WASHINGTON, D.C. 20310

21 March 1995

MEMORANDUM FOR INSTITUTIONAL ARMY AXIS GENERAL OFFICER STEERING  
COMMITTEE (GOSC) MEMBERS

SUBJECT: Institutional Army Re-engineering and Redesign Campaign Plan

1. PURPOSE. Provide a concept for re-engineering and redesigning the Army for the twenty-first century.

2. ORGANIZATION. Structure for management and conduct of effort is shown in Annex A - Institutional Army Operating Organization

3. REFERENCES. See Annex B.

4. BACKGROUND.

a. General. Force XXI is the U.S. Army of the twenty-first century. It is America's Army redesigned to meet the challenges of that era.

(1) Force XXI Campaign Plan. The Campaign Plan for Force XXI provides a concept of operations describing three synchronous efforts:

(a) The main effort will be the redesign of Army warfighting forces. (Joint Venture (JV))

(b) Another effort provides for acquisition and assimilation of information age C4I capabilities. (Army Digitization Office (ADO))

(c) A third effort will re-engineer departmental processes and redesign the Institutional Army to support core competencies required by the Army of the twenty-first century. (Institutional Army (IA))

b. Secretary of the Army (SA) and Chief of Staff (CSA) Guidance. Our nation's transition from the industrial age to the information age, from a cold war defense paradigm to a force projection strategy, and from facing a clearly defined threat to being confronted by myriad ill-defined threats requires a campaign that results in a

top-to-bottom reform of America's fighting force. Inherent to that force is the institutional underpinning which recruits, organizes, trains, maintains, sustains, performs research and development, and manages its integral communities. The Institutional Army represents the Army's culture, tradition, and overall quality that is largely responsible for enduring, timeless military values and military ethics. Beginning now and concluding not later than year 2000, in concert with the Force XXI Campaign Plan, the Army will re-engineer departmental processes and redesign organizations to support core competencies required for America's Army in the twenty-first century. The Vice Chief of Staff, Army (VCSA) will supervise redesign of the Institutional Army. The Deputy Chief of Staff for Operations and Plans (DCSOPS) and the Assistant Secretary of the Army for Manpower and Reserve Affairs (ASA(M&RA)) will coordinate the overall effort. Charter for Redesigning the Institutional Army is at Annex C.

c. Assumption. Resources (manpower and dollars) will be available to execute this campaign plan.

5. MISSION. Re-engineer and redesign the Institutional Army by the Year 2000 to effectively and efficiently perform service Title 10 functions to support redesigned Army warfighting organizations in order to ensure a trained and ready Army, fully capable of doing its part in executing the National Military Strategy, in joint and combined operations, while maintaining timeless Army values and ethics.

6. EXECUTION.

a. Concept of the Operation. Using four simultaneous and integrated efforts, the Institutional Army Re-engineering and Redesign Campaign will be conducted in three phases coinciding with the next three major POM cycles.

(1) Integrated Efforts

(a) MACOMs will continue to re-engineer their core processes, the results of which will be integrated into the overall Institutional Army re-engineering and redesign efforts. MACOM commanders will brief the VCSA annually on the results of their efforts.

(b) The Institutional Army Functional Area Assessment (FAA) process will provide the forum to develop and process re-engineering and redesign issues for service Title 10 functions.

(c) The redesign of HQDA, its field operating agencies (FOA) and staff support activities (SSA) will be a continuous part of the re-engineering and redesign efforts.

(d) An umbrella group will integrate results of the Institutional Army FAAs, MACOM re-engineering, and HQDA redesign, resulting in a comprehensive redesign of the Institutional Army which is synchronized with both the overall redesign and the digitization of the warfighting Army.

(2) Phases. Phase I of the Institutional Army re-engineering and redesign campaign effort will commence with the approval of the axis Charter. Its objective will be to develop a baseline redesign for the Institutional Army organization. Phase II will begin when Phase I is integrated into POM 98-03 in the Spring of 1996. It will provide a revised organization from the Phase I baseline. Phase III begins with the submission of POM 00-05 and will conclude the redesign process by producing a final design supporting FORCE XXI. Phase III will be entered into POM 02-07 in the Spring of 2000. The Phases will be implemented in accordance with the format, principles and parameters discussed in detail in Annexes D, E, and F respectively.

b. Management Organization.

(1) Board of Directors (BoD). The BoD provides corporate guidance to the Force XXI Institutional Army axis effort and approves recommendations for submission to the SA and CSA for implementation approval.

(2) VCSA. The VCSA provides oversight of the entire Institutional Army Redesign effort. The ASA(M&RA) and the DCSOPS will coordinate the overall effort. Accordingly, the Director, Force Programs, ODCSOPS will review progress of the campaign effort with the VCSA on a monthly basis as well as schedule FAA presentations by sponsors/proponents as they are completed.

(3) GOSC. The GOSC is co-chaired by the Director, Force Programs and Deputy Assistant Secretary of the Army for Force Management, Manpower and Resources and supervises:

(a) The development and implementation of the Institutional Army Redesign Campaign Plan.

(b) The identification and tracking of axis issues, other Force XXI efforts, activities, experiments, studies and assessments for inclusion in FAAs.

(c) The prioritization of recommendations to the BoD.

(4) Council of Colonels (CoC). The CoC is co-chaired by the Chief, Force Integration and Management Division and Assistant Deputy for Force Management, Manpower and Resources and reviews, develops and prepares alternatives for presentation to the GOSC.

d. Timelines and Milestones. The timelines and milestones for major events influencing the development of the Phase I Baseline Institutional Army Organizational Design are at Annex G. Corresponding data for Phases II and III will be determined as Phase I actions develop.

## 7. COORDINATING INSTRUCTIONS.

a. Re-engineering and redesign efforts will be in accordance with the principles and parameters set forth in Annexes E and F.

b. Base Realignment and Closure (BRAC) and the Committee on Roles and Missions (CORM) decisions as well as applicable laws must be reviewed and appropriately reconciled throughout the campaign effort.

c. Director, Programs, Analysis and Evaluation (DPAE).

(1) Monitor the progress of the Institutional Army Redesign effort to identify programmatic actions appropriate for inclusion initially in POM 1998-2003, and ultimately POM 2002-2007.

(2) Review and reconcile current programming processes and procedures, e.g., Program Evaluation Groups, Management Decision Packages, Army Management Structure Codes, etc. (Assisted by Director, Force Programs)

d. Office of the Assistant Secretary of the Army for Financial Management and Comptroller. Support DPAE efforts to make routine the programming of the Institutional Army.

e. Cost and Economic Analysis Agency provides analytical costing support to the Institutional Army axis community.

f. Issues raised in FAAs and referred to the VCSA will be adjudicated by the VCSA and/or presented by the VCSA to the BoD to be addressed for experimentation in accordance with proponent experimentation plans.

g. Prioritization recommendations across functions will be referred to the BoD by the GOSC through the VCSA.

h. Sponsors and proponents will participate in development of GHQ scenarios, or other mediums as appropriate; testing of initial re-engineered processes and redesigned organizations; establishment of priorities and evaluation of changed/new policies and resource options. This will be done IAW the Institutional Axis Analysis Support and Execution Plan.

i. The Director, Force Programs will provide the VCSA a monthly in-process review.

Thomas N. Burnette, Jr.  
Brigadier General, GS  
Director, Force Programs

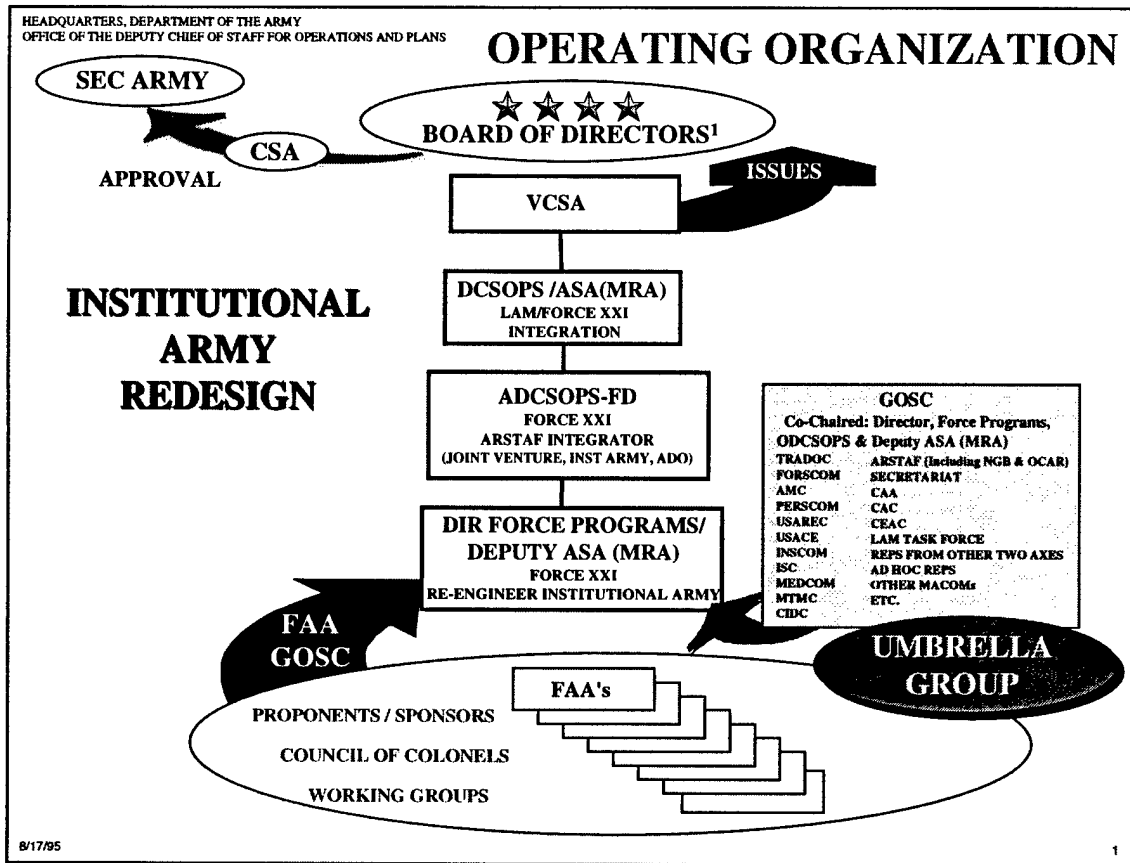

Jayson L. Spiegel  
Deputy Assistant Secretary  
of the Army  
(Force Management, Manpower  
and Resources)

DEPARTMENT OF THE ARMY  
WASHINGTON, D.C. 20310

January 13, 1995

**Charter for Redesigning  
the Institutional/TDA Army**

**Purpose.** To establish procedures and responsibilities for redesigning the Institutional/TDA Army as part of the Force XXI campaign.

**Mission.** Redesign the institutional Army by the year 2000 so that it will effectively and efficiently perform service Title 10 functions that support redesigned Army warfighting organizations in order to ensure a trained and ready Army, fully capable of doing its part in executing the National Military Strategy, in joint and combined operations, while maintaining timeless Army values and ethics.

**Execution.** The Vice Chief of Staff, Army (VCSA) will supervise the re-engineering of departmental processes and the redesign of organizational structures to support the Title 10 core competencies required for America's Army in the twenty-first century. The Assistant Secretary of the Army for Manpower and Reserve Affairs (ASA(M&RA)) and the Deputy Chief of Staff for Operations and Plans (DCSOPS) will coordinate the overall effort. Re-engineering and redesign will be accomplished in three phases with an initial, preliminary redesign in time to support submission of the Program Objective Memorandum for the Fiscal Year 1996 submission, and subsequent redesigns accomplished in time to support Program Objective Memorandum submissions in Fiscal Years 1998 and 2000. The process will consist of four simultaneous and interrelated efforts:

- Internal Major Army Command (MACOM) re-engineering. Under the leadership of their respective commanders, MACOMs will be re-engineered. This effort is in progress and will serve as the analytic baseline for the redesign effort. MACOM commanders will review with the VCSA the results of their re-engineering efforts beginning in January 1995, and, annually thereafter, their progress in implementing those results, including adjustments attributable to Force XXI.

- Comprehensive review of service Title 10 functions. The VCSA will direct a series of Functional Area Assessments (FM) for selected Title 10 functions in order to provide insights and momentum to the TDA redesign effort. The ASA(M&RA) and DCSOPS will recommend the functional areas to be examined and the procedures and schedule to be followed, as well as coordinate the process. Each department principal is charged with functional oversight of the re-engineering and redesign of their

respective functions. In general, MACOM commanders will conduct, for and in coordination with department principals, a comprehensive assessment of selected Title 10 functions. Assessments will be conducted in accordance with the campaign plan and the principles outlined below and synchronous with the design of the operational force and the Planning, Programming, Budgeting and Execution System milestones. Initial redesign attributable to the Title 10 FM will be completed by April 1996. Subsequent Title 10 FM will be conducted during the period FY97-FY99, as required Discrete, specific issues of major significance, such as Integrated Sustainment Maintenance, may be referred to the VCSA at the discretion of the major commanders and department principals as those issues surface; these issues are not restricted by the above milestones.

- Redesign of the Department of the Army Headquarters (HQDA), its field operating agencies (FOA), and staff support activities (SSA). Under the general oversight of the ASA(M&RA), the Administrative Assistant to the Secretary of the Army and the Director of the Army Staff will lead this effort, and, as part of the initial redesign phase, present alternatives and recommendations for redesign to the Under Secretary and the VCSA no later than March 1, 1996. Recommendations for the HQDA redesign will be submitted through the Chief of Staff, Army (CSA) to the Secretary of the Army (SA) for approval.

- Umbrella redesign of the Institutional/TDA Army. The ASA(M&RA) and the DCSOPS will provide oversight of an in-depth study conducted by the Assistant DCSOPS, Force Development, to determine overall organizational changes which may be required to enhance the ability of the Institutional/TDA Army to perform service Title 10 functions and to support Army warfighting organizations in the twenty-first century. Included will be the development of a fully coordinated statement of institutional core competencies necessary to establish the Institution's contribution to Force XXI as well as a documented doctrinal basis for the Institution. This effort will integrate the results of Title 10 FM, MACOM re-engineering efforts, and the results of the redesign and digitization of the warfighting Army. As part of the initial redesign phase, fully coordinated Secretariat/Army Staff study alternatives and recommendations will be provided to the Under Secretary and the VCSA no later than March 30, 1996. Subsequent recommendations will be submitted through the CSA to the SA for approval.

**Principles.** The Institutional/TDA Army will be re-engineered and redesigned in accordance with the following principles:

- Enduring Army values and ethics as detailed in FM 100-1, The Army, guide the redesign effort.

- The six Army imperatives continue to be the bedrock of the Institutional/TDA Army.

-- The Institutional/TDA Army redesign will be linked to the National Military Strategy and be consistent with the Army's role as a power projection Total Army that operates increasingly within a joint environment.

-- Redesign efforts will conform to National Performance Review principles. Unnecessary layering of functions and headquarters will be eliminated. Strive to reduce the size of HQDA and reduce the number of FOA and SSA. Reduce the number of MACOM headquarters.

-- The Army's core competencies will serve as the foundation of the Institutional/TDA Army.

-- Information age technology, management practices and processes and emerging results from the redesign and digitization of the operational force will be leveraged to improve effectiveness and provide efficiencies.

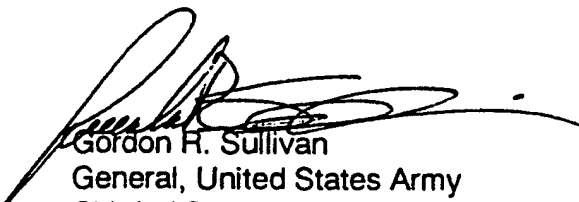

-- The Institutional/TDA Army redesign and MACOM re-engineering will be accomplished within a shared vision of the Total Army leadership.

-- Functions will be resourced in the most cost-effective manner.

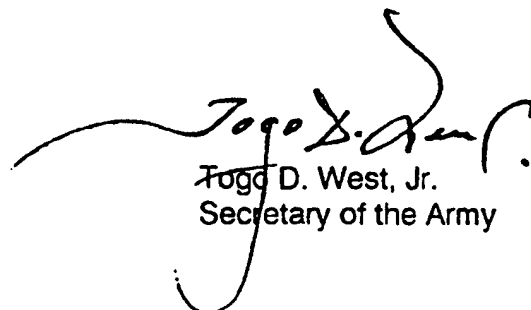

-- Organizations and associated manpower requirements will be established in accordance with these principles and information age management practices. We will capitalize on the strengths of each component - active, reserve and civilian.

-- Experimentation will be conducted as required in General Headquarters Exercises and other advanced warfighting experiments to test and refine proposed redesign efforts.

**Synchronization.** Institutional/TDA Army redesign will be synchronized with the redesign and digitization of the Warfighting Army and the Planning, Programming, Budgeting and Execution System cycle.

Gordon H. Sullivan  
General, United States Army  
Chief of Staff

Todd D. West, Jr.  
Secretary of the Army

## FUNCTIONAL AREA ASSESSMENTS

### 1. General.

- a. Functional Area Assessments have been used as a means for in-depth investigation of functional areas and complex Army-wide issues. The current series of FAAs examines, branch by branch, under the proponency of the TRADOC school commandant, the impact of restructuring the Army into a smaller force while maintaining emphasis on readiness, combat power and force modernization. Branch issues for training, modernization, doctrine and personnel that may inhibit a smooth transition and future COMPO 1, 2 and 3 structure are the products of the FAA briefing to the VCSA and ARSTAF principals.
- b. Institutional Army FAAs provide a forum for developing re-engineering issues for service Title 10 functions and a proposed redesigned organization of the function to support Force XXI under the proponency of designated Army major commands. Re-engineering properly defined is the "fundamental rethinking and radical redesign of business processes to achieve dramatic improvements in critical, contemporary measures of performance." The Army business processes are defined as the Title 10 functions, an overall collection of activities that take various inputs and create an output of value to the warfighting force.

### 2. Proponents and Sponsors.

- a. *Functional Proponents.* For certain service functions identified in US Code Title 10 one Army major command (MACOM) is designated proponent (HQDA and Umbrella Institutional Army Redesign have Army Staff (ARSTAF) proponents). Proponency entails the entire function for which the Army is responsible, both internally and with relationship to the Office of the Secretary of Defense (OSD) and other services. This campaign plan serves as authority for proponents to request and obtain information, data, or other materiel related to their function from other MACOM and/or agencies as necessary. Based on laws, culture, tradition, results of other related studies and emerging results from other Force XXI efforts, the functional proponents plan the transition of their designated functions from the current state (post on-going re-engineering efforts) to that required of Force XXI early in the twenty-first century. In general, proponents take the lead in the conduct of the FAA.
- b. *Functional Sponsors.* HQDA principals serve as sponsors, and full partners with proponents, of relevant FAAs. As such, they facilitate the functional

proponents' efforts by providing guidance on issues involving policy, statute, DoD Directive or Army-unique requirements which influence the institutional organization necessary to perform the function. In addition, functional sponsors provide broad resourcing and prioritization guidance consistent with that established by the Board of Directors in accordance with the Force XXI Campaign Plan.

**3. FAA Objectives.** Each FAA will have the following objectives:

- a. Identify the basis for performing the function (define "requirements") and its functional contribution to Army Force XXI.
- b. Describe the core processes currently employed in performing the function and generating the functional output, or product described in paragraph d, below, consistent with basis established in the first objective. Develop alternative, re-engineered processes to support structural organizational redesign to improve functional outputs, or products, apropos Title 10 core competencies required for America's Army in the twenty-first century.
- c. Describe the enabling processes, such as information management, which support the core processes described in paragraph b above.
- d. Identify the required skills to perform the function, the means of obtaining and maintaining those skills and the publications either produced by or required to perform the function.
- e. Identify the costs/resources required to perform the function, by appropriation.
- f. Develop standards to assess whether the function is being performed satisfactorily.
- g. Develop a methodology for prioritizing requirements to be resourced and identify the types of resources that can best be utilized to perform the function.
- h. Define the key drivers influencing the performance of this function.
- i. Identify the fundamental programming assumptions and required data and sources for the functions.
- j. Determine the most effective organization to perform the function, including the HQ/MACOM organizational structure necessary to manage the function and consistent with the principles enumerated in Annex E.

- k. Develop and resolve issues or propose issue resolution to appropriate authority, e.g., VCSA, BoD, CSA, SA.

**4. Functional Area Definitions.** The following provides definitions for the Title 10 functional areas, or processes, to be assessed in the FAAs, the proponents and sponsors of each and expected product of both the FAA and the processes:

- a. *Mobilize.* Sponsor - ASA(M&RA)/DCSOPS; proponent - FORSCOM. Function/process entails the transition of reserve forces from an inactive to active status. Function/process includes interrelationship with other functions/processes, e.g., train, equip, construct, inform, etc. to assure efficient transition. Functional/process product is a unit or set of units prepared to be validated for deployment or to initiate requisite post-mobilization, pre-deployment training prelude to validation and deployment as applicable. FAA product is the methodology for achieving this functional/process product.
- b. *Demobilize.* Sponsor - ASA(M&RA)/DCSOPS; proponent - FORSCOM. Function/process entails the transition of mobilized reserve units to their steady state, reserve status. Functional/process product is a unit or set of units restored to their pre-mobilization status. FAA product is the methodology for achieving this functional/process product.
- c. *Deploy/Redeploy.* Sponsor - ASA(ILE)/DCSOPS; proponent FORSCOM/MTMC. Function/process entails the deployment/redeployment of active and reserve component forces. Function/process includes interrelationship with other functions/processes and enabling processes, e.g., train, equip, construct, inform, etc. to assure efficient and effective deployment of units to support the National Military Strategy. Functional/process product is the capability to move units or sets of units from mobilization station to theater of operations for commitments across the spectrum of conflict levels and return. FAA product is the methodology for achieving this functional/process product.
- d. *Equip/Science and Technology (R&D).* Sponsor - DUSA(OR)/ASA(RDA)/DCSOPS; proponent - AMC. Function/process entails providing affordable, timely science and technology support that meets warfighting needs to enable swift, decisive low-casualty victories across the spectrum of conflict by coalition forces anywhere. Function/process includes developing and maintaining a world class network of government and private science and technology capabilities and shortened acquisition cycles that: are responsive to rapid changes in policy and to advances in technology; and produce affordable technology and weapons systems. Function/process also includes the automated management information systems and enabling processes necessary to perform this function/process and a science and technology system that

employs best business practices from every source to ensure continuous improvements, mutual trust, reduced cost and managed risk. That part of force management involving the materiel development process is an integral part of this function/process. Functional/process product is the total Army provisioned with state of the art technology to perform its many functions/processes in peacetime, operational conditions and in crisis response. FAA product is the methodology for achieving this functional/process product.

- e. *Supply*. Sponsor - ASA(ILE)/DCSLOG; proponent - AMC. Function/process entails provisioning and sustaining the Army with all classes of supply, less Class 1, and identification of the enabling transportation functions and associated processes which support supply functions. Also included for all components (Active, Guard and Reserve), are the functions of issuing, cataloging, controlling, managing, storing, and disposing of all classes of supply, less Class I. Also included are the automated management information systems and enabling processes necessary to perform this function/process, including accountability where applicable. Functional/process product is the Army provisioned with sufficient supplies to perform required tasks to established standards both in peacetime and under operational conditions, in crises response including mobilization. FAA product is the methodology for achieving this functional/process product.

**(1) Phase I addressed Class IX supply only, For follow-on work/studies resulting from the AMC Phase I FAA see paragraph 8 below.**

**(2) Phase II addresses all classes of supply, less Class I (the Services FAA), Class IX (Phase I), and Class VIII (Health FAA). Sponsor-ASA(ILE)/DCSLOG; proponent-AMC**

- f. *Service*. Sponsor - ASA(ILE)/ASA(RDA)/DCSLOG; proponent - AMC/MTMC. Function/process entails providing both troop (food, laundry and mortuary) and transportation, not part of the Deploy/Redeploy function/process, (personnel, units, cargo, motor, rail, and personal property) services for all components (Active, Guard and Reserve) and all institution contractual support including legal review and administration. Function/process includes requisite automated management information systems and other enabling processes. It also includes the enabling transportation functions and associated processes which support the six service functions defined in DA PAM 700-126. Include under services those transportation functions supporting movement of personnel, material, and personal property while excluding those functions addressed in the deploy/redeploy FAA (e.g. unit movements)." Functional/process product is the provisioning of sufficient services for the Army to perform its statutory

and doctrinal requirements efficiently and effectively both in peacetime and under operational conditions, in crises response including mobilization. FAA product is the methodology for achieving this functional/process product.

- g. *Maintain.* Sponsor - ASA(ILE)/DCSLOG; proponent - AMC. Function/process entails repair of military equipment in all components (Active, Guard and Reserve), including measures routinely performed to prevent equipment failure and extend equipment utility. Also included are the requisite enabling management processes and procedures, including automated management information systems to facilitate this function/process, and the enabling transportation functions and associated processes which support the maintain functions. Functional/process product is fully operational equipment. FAA product is the methodology for achieving this functional/process product.
- h. *Doctrine/Organize.* Sponsor - ASA(M&RA)/DCSOPS; proponent - TRADOC. Function/process entails all tasks and processes associated with the Army's concepts based requirements system and force management functions for all components (Active, Guard, and Reserve) and civilian. Included, for operating forces, are those processes currently performed largely, but not exclusively, by TRADOC involving that part of force management involving doctrine development and, combat development. Also included are complementary processes for organizing the Institutional Army and associated enabling process including automated management information systems. HQDA ODCSOPS-FD will assess the Institutional Army organizational process and provide the Proponent with mini FAA support. Functional/process product is a set of documented organizations, both operational and institutional, including required and authorized manpower and equipment, which, if fielded with those personnel and equipment, are capable of performing assigned tasks to established standards consistent with Army doctrine and, for the institutional force, policy. FAA product is the methodology for achieving this functional/process product.
- i. *Train/Leader Development.* Sponsor - ASA(M&RA)/DCSOPS; proponent - TRADOC. Function/process entails institutional (individual/organizational/self development) training and includes the institutional organization necessary to develop training programs, standards and, as appropriate, facility requirements for all components (Active, Guard, and Reserve) and civilians. It also includes that part of force management involving training development. Function/process is focused on supporting primarily operating forces. Function/process includes leader development through individual training as well as integrated, progressive, sequential experience of leaders integral to the organization and training programs requisite to introducing new systems and/or organizations into the Army.

Function/process includes enabling process such as automated management information systems as appropriate. Functional/process product is a comprehensive Total Army training program which, if followed, will produce a set of superbly led operating forces and institutional units capable of performing assigned tasks to established standards. FAA product is the methodology for achieving this functional/process product.

- j. *Recruit.* Sponsor - ASA(M&RA)/DCSPER; proponent - DCSPER. Function/process entails providing qualified personnel for the Army. It includes all identities (officer, warrant, enlisted and civilian) for all components (Active, Guard and Reserve). Providing qualified personnel includes advertising, acquiring high quality people, given requisite training and education, capable of performing assigned tasks to established standards. Function/process includes enabling process such as required automated management information systems. Functional/process product is sustained qualified personnel, both leader and led, in required numbers and skills both in peacetime and in crises response, under operational conditions including mobilization. FAA product is the methodology for achieving this functional/process product.
- k. *Personnel Management.* Sponsor - ASA(M&RA)/DCSPER; proponent - DCSPER. Function/process entails all facets of personnel management for all identities (officer, warrant officer, enlisted and civilian), all components (Active, Guard and Reserve) including, but not limited to, assignments (temporary and permanent), pay, promotion, retirement, legal and religious support, safety, public affairs and inspector general activities. Also included are supporting, enabling administrative systems and processes and associated automated management information systems. Finally, function/process includes personnel accountability, heraldic services, morale, welfare and recreational services and internal Army postal services not provided by the US Postal Service. Functional/process product is a community of soldiers, their families, retirees and Department of the Army civilians confident that their personal interests and personnel management concerns are being served satisfactorily. Satisfactory service is manifest in job performance, retention rates, complaints, accident rates, disciplinary indices and other, similar classic measures of morale and welfare. FAA product is the methodology for achieving this functional/process product.
- l. *Construct.* Sponsor - ASA(ILE)/ACSIM; proponent - USACE. Function/process entails providing the Army, all components (Active, Guard and Reserve) with requisite real property. Function/process includes acquisition, as well as construction, lease, purchase, permitting and ultimate disposal of all Army real property. Also included in this function/process are the Army's environmental responsibilities. Function/process includes associated, enabling engineer management processes, including disaster response management, automated information management and real

property accountability. Finally, function/process includes engineer support to installations and construction agent responsibilities for other DoD agencies. Functional/process product is real property sufficient to support and sustain the Army's functions (man, equip, train, forward station, sustain, mobilize, deploy, redeploy and demobilize). FAA product is the methodology for achieving this functional/process product. (Note: above definition is pending final approval after review by the ASA(CW) and USACE).

- m. *HQDA/FOA/SSA*. Sponsor - ASA(M&RA); proponent - DAS/AA. Function/process entails management of the Department of the Army. Function/process includes the Office of the Secretary of the Army, Office of the Chief of Staff, Army, the staff of each and all staff support and field operating agencies of the headquarters. The function is comprised essentially, but not exclusively, of the resources permitted in the Army Management Headquarters Account, and the function/process is currently delimited in Title 10 regarding certain assistant secretary positions, numbers of deputy and assistant chiefs permitted, etc. Emphasis is on the management rather than the operational dimension of the function/process; i.e., how the headquarters develops and implements policy rather than how it sustains itself. Functional/process product is an efficiently organized headquarters designed to comply with relevant statutes and sensitive to the principles outlined in Annex E and bounded by the parameters in Annex F. FAA product is the methodology for achieving this functional/process product.
- n. *Umbrella Institutional Army Redesign*. Sponsor - ASA(M&RA)/DCSOPS; proponent - ADCSOPS-FD. Function/process entails an independent assessment of the Institutional Army. Function/process includes all Title 10 functions, the current organization to perform those functions and the supporting rationale for that organization, that is, mix of commands and agencies. Function/process also includes an assessment of compelling requirements to continue to perform those functions/processes (what capabilities "must" the Army retain in the twenty-first century?) and an assessment of what business process improvements might be employed to perform those functions/processes in a more efficient, effective manner. Functional/process product is a set of alternative organizations for each Title 10 function. Included are those functions/processes not addressed in the other six FAA or postured for the twenty-first century through MACOM re-engineering, e.g., health care.

5. **FAA Schedule:** There will be a total of 7 FAAs conducted in accordance with the following schedule:

<u>Function(s)</u>	<u>Proponent/Staff</u>	<u>Completion Date</u>
Mobilize/Demobilize and Deploy/Redeploy	FORSCOM/MTMC	September, 1995
Doctrine & Organize Train & Leader Development	TRADOC	October, 1995
Recruit/Personnel Management	ODCSPER	December, 1995
Construct	USACE	January, 1996
Equip, Supply, Service & Maintain	USAMC	January, 1996
HQDA/SSA/FOA	ODAS/OAA	February, 1996
Umbrella Institutional Army Redesign	ODCSOPS	March, 1996
<b>Contracting</b>	<b>ASA(RDA)</b>	<b>February, 1997</b>
<b>Test &amp; Evaluation</b>	<b>TEMA</b>	<b>February, 1997</b>
<b>PLL Elimination</b>	<b>FORSCOM</b>	<b>December, 1996</b>
<b>PM Matrix Support</b>	<b>ASA(RDA)</b>	<b>February, 1997</b>
<b>ARL Alignment</b>	<b>ASA(RDA)</b>	<b>February, 1997</b>

6. **FAA Products.** All FAAs will be presented in the format prescribed herein. In essence, the required product is the proposed organization of the function, redesigned to support Force XXI. Included will be intermediate milestones, as applicable, to be met in order to achieve each objective and an experimentation plan to investigate the efficacy of the proposed organization in supporting the Joint Venture effort at its intermediate objectives (Brigade/Task Force XXI, Division XXI, Corps XXI) along that endeavor. The functional experimentation plan will include, but will not be limited to, specific issues to be addressed in the FAAs and other efforts dealing with this venture, some of which can also be addressed adequately in the GHQ exercise series. Functional proponents will be responsible for the preparation and participation in exercises to pursue issue resolution. Experimentation plans are not limited to these series of exercises and may include other approaches such as relevant Joint Venture and Army Digitization Office experiments or other options deemed appropriate by the sponsor/proponent in coordination with the Director, Force Programs, ODCSOPS.

7. **FAA Format.** Each FAA presentation to the VCSA will be in accordance with the following format:
- a. *Process.* Description of the current and proposed re-engineered core process for performing the function to include how, if appropriate, the basis for performing the functions/processes must be changed.
  - b. *Organization.* HQDA, intermediate and installation level. Define three alternative organizations for each level with the advantages and disadvantages of each alternative. One alternative must reflect an organization significantly smaller than the current (authorized manpower) total Army organization of the function; one alternative must represent a total revision of the current major command/major subordinate command organizational structure for the function Army wide.
  - c. *Basis.* Policy, law (in addition to or other than US Code, Title 10), directive, custom, etc. to define requirements/work required of the function.
  - d. *Key Drivers.* Conditions which influence how a process is performed, such as, numbers of divisions, active installations, prepositioned equipment, forward deployed forces.
  - e. *Enablers.* Common systems, processes and/or procedures which facilitate the performance of core function/process.
  - f. *Operational Force.* Linkages to the operating force including the division of responsibilities between the Institutional Army and operational counterpart in peacetime and wartime.
  - g. *Skills.* Education, schools, programs, other structure necessary to provide and sustain the skills necessary to perform the function.
  - h. *Management.* Requisite structure to manage the function (related to one alternative in "Organization" (paragraph b above).
  - i. *Resources.* Manpower (AC/RC/Civilian/Contract), dollars, other that may be used to perform this function and where, as applicable, one type resource is preferred or required over another, e.g., requirement to exercise Uniform Code of Military Justice (UCMJ) jurisdiction = military/officer.
  - j. *Publications.* Documentation produced by or required to perform this function.

- k. *Standards.* Performance measures to assess functional effectiveness.
  - l. *Priorities.* Method for prioritizing requirements to be resourced.
  - m. *Issues.* For each unresolved FAA issue, alternatives, advantages, disadvantages and recommendation for resolution.
  - n. *Assumptions.* Assumptions made in the conduct of the FAA which are necessary to program the function, e.g., size of force stationed overseas or installations retained.
  - o. *Data.* Data requirements and sources required to manage the function.
  - p. *Principles.* Demonstrate how each study principle is accommodated in the redesigned function.
  - q. *Experimentation Plan.* Approach to test the proposed redesigned function using GHQ series of exercises or comparable method for testing/validating issue resolution.
8. **Collateral functions.** Certain functions performed by the Army, not explicitly enumerated in Title 10, such as safety, inspections, audits and religious and legal services, are relevant to several of the FAAs. Accordingly, FAA management operating organizations, co-chaired by the sponsors and proponents, should include broad representation to ensure appropriate consideration of these universal functions. The HQDA FAA is scheduled late so that FAA sponsors and proponents will have an opportunity to define, as part of their organization-related objective (paragraph 6b above), the nature of the headquarters structure necessary to manage the proposed functional design. The Institutional Army Umbrella Redesign FAA will commence immediately and be conducted concurrent with all other FAAs, interjecting issues to be addressed by relevant FAAs as they surface and presenting alternative solutions to individual FAA proposals at the concluding presentation to the VCSA as each FAA is completed.
9. **Issue Management.** The Umbrella Institutional Army Redesign FAA will serve as a coordination cell for the steering committee. The coordination cell will ensure integration among the individual FAA and that innovative ideas are examined across the functional boundaries of the individual FAA. Issues may be presented to the steering committee for approval and assignment to the appropriate FAA for resolution. Moreover, FAA sponsors/proponents may mutually agree to refer specific issues to each other without necessarily deferring to the steering committee. Major, discrete issues, such as Integrated Sustainment Maintenance may be briefed to the VCSA outside the FAA format. The coordination cell will ensure that findings from these single issue briefings are integrated across Institutional Army assessments. Additionally, at the direction of the steering

committee, the coordination cell will develop and refer issues on challenging topics to be vetted in one or more FAAs.

10. **Major Command Re-engineering.** The analytic base for initiating the Institutional Army redesign axis is the current status of the Institutional Army as defined by the results of recent and on-going major command re-engineering initiatives. To ensure a clear description of that analytic base each major command conducting a re-engineer initiative related to the Bottom's Up Review will present to the VCSA the results of their individual re-engineering work starting in January, 1995. The schedule and format outline for those presentations will be published separately.

## PRINCIPLES

The Institutional Army will be re-engineered and redesigned in accordance with the following principles:

1. **Values.** Enduring Army values and ethics as detailed in FM 100-1, The Army, guide the redesign effort.
2. **Army Imperatives.** The six Army imperatives continue to be the bedrock of the Institutional Army.
3. **Linkage.** The Institutional Army redesign will be linked to the National Military Strategy and be consistent with the Army's role as a power projection Total Army that operates increasingly within a joint environment.
4. **National Performance Review.** Redesign efforts will conform to National Performance Review principles. Unnecessary layering of functions and headquarters will be eliminated. Strive to reduce the size of HQDA and reduce the number of FOA and SSA. Reduce the number of MACOM headquarters.
5. **Core Competencies.** The Army's core competencies will serve as the foundation of the Institutional Army.
6. **Leverage.** Information age technology, management practices and processes and emerging results from the redesign and digitization of the operational force will be leveraged to improve effectiveness and provide efficiencies.
7. **Shared Vision.** The Institutional Army redesign and MACOM re-engineering will be accomplished within a shared vision of the Total Army leadership.
8. **Resourcing.** Functions will be resourced in the most cost-effective manner.
9. **Manpower Requirements.** Organizations and associated manpower requirements will be established in accordance with these principles and information age management practices. We will capitalize on the strengths of each component -- active, reserve and civilian.
10. **Experimentation.** Experimentation will be conducted as required in General Headquarters Exercises and other advanced warfighting experiments to test and refine proposed redesign efforts.

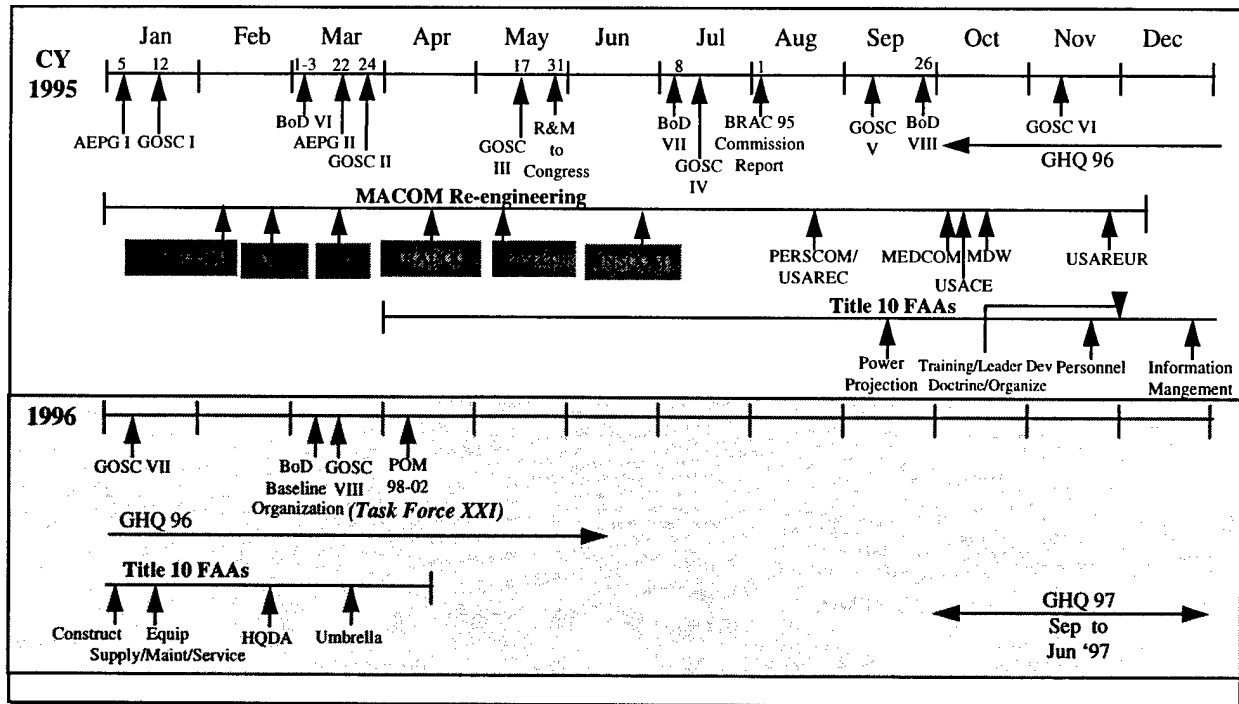

## ORGANIZATION IMPROVEMENT PARAMETERS

The Institutional Army redesign campaign axis will be executed in accordance with the management principles enumerated in Annex E and include the following parameters:

1. **Empowerment.** Centralize guidance; decentralize execution. Empower personnel and organizations responsible and accountable for performing a function to make more decisions, solve more problems.
2. **Simplicity.** Streamline the organization to bare bones; retain only those personnel and equipment that contribute primarily to the organization's product. Avoid complex, multifunctional organizations the nature of which tends to dilute the quality of the organization's output. Cut the red tape.
3. **Output.** Establish why the organization exists - what is its product; who are its customers; and organize to achieve performance standards defined in terms of product quality or customer satisfaction.
4. **Focus.** Combine organizations with a common focus. Avoid redundancies, overlapping responsibilities and dysfunctional competition. Each organization has a singleness of purpose, focused vision oriented at output - product quality or customer satisfaction.
5. **Technology.** Nurture technology within the organization for efficiency and effectiveness. Design technology into performance standards. Get on the information highway and collect information once - at the source. Use technology to make seemingly dispersed, dissimilar organizations perform as central, focused organizations. Collect only that information required to provide satisfactory output as defined in performance measures, and, as the functional proponent and therefore acknowledged authority, share it!
6. **Stewardship.** Inculcate a stewardship ethic. All members of the organization have the same shared vision, same focus, same goal of quality and customer satisfaction, in a cost-effective manner.

## Institutional Army Timeline and Milestones

In consideration of CSA intent to address issues via, "Commander's Conference" all references in Campaign Plan to, "Board of Directors" or "BoD" should be considered as references to, "Commander's Conference." The original terms are retained in this annex to reduce confusion during the transition of terminology.

## DEFINITIONS

**NOTE:** To facilitate relating the Institutional Army to the Army and Operational Force, discussion of the Army and Operating Force is limited to definitions of their Competencies and an abbreviated overview of their Capabilities. Core processes discussion is limited to the Institutional Army.

**1. Core Competency - *A collection of skills and technologies rather than a discrete skill or technology.***

**a. Army Core Competency:**

*Prompt and Sustained Operations on Land*

**b. Operating Force Core Competency:**

*Decisive Victory, as the Land Component of the Combatant Commander's Joint/Multinational Force*

**c. Institutional Army core competency:**

*Organize, Train, Equip, Provide and Sustain the Land Component of the Combatant Commander's Joint/Multinational Force.*

**2. Core Capabilities**

**a. Army Core Capabilities**

- Compel
- Deter
- Reassure
- Support

**b. Operating Force Core Capabilities**

- Dominate Maneuver
- Precision Strike
- Win the Information War
- Protect the Force
- Project and Sustain

c. Institutional Army Core Capabilities and their definitions

*Definition: The capability gained when Institutional Army core processes are combined in relation to an element(s) of the Institutional Army's core competency.*

- **Develop the Force.** The "organizing," "training" and "equipping" elements of the institutional core competency encompass the various processes that must be accomplished to bring into being the operational units that comprise the Army's general purpose forces. Together they are driven by all five of the Force XXI battle dynamics (TRADOC Pam 525-5) and collectively form the core capability of force development. The processes comprising this capability begin with the development of doctrine—the basis for personnel and materiel requirements. Included are the design of units and their aggregation into the Army's force structure. Integration of trained personnel and modern equipment into the units is also a part of this capability.
- **Generate and Project the Force.** In a strategic environment where the threat is uncertain, missions difficult to foresee and American military power increasingly concentrated at home, the ability to rapidly deploy ready forces into a distant area of operations and to keep them coming as dictated by the tempo of battle, is recognized as the overriding capability by which the Army will be measured. This is the "provide" element of the institutional core competency that is driven by the "early entry" battle dynamic and is the operative capability that the other core capabilities and processes will support. It is defined as "force generation and projection" core capability. Implicit in force generation is to maintain appropriate readiness levels in active and reserve component units, plan for and conduct mobilization, tailoring, and deployment of units in the correct numbers, type and sequences into a theater of operations and redeploy and demobilize them upon termination of operations. Force generation and projection involves both the sending and receiving Army commands.

- **Sustain the Force.** The fifth element of the institutional core competency, "sustain," is also a core capability that directly supports the generation and employment of forces. It provides the consumables that enable military operations and the materiel, replacement units, soldiers and equipment to replace losses. Force sustainment begins in the continental United States (CONUS) sustaining base or in forward bases, extends through the Army component command and ultimately to the using units. It is primarily driven by the "combat service support" battle dynamic.
- **Direct, Acquire and Resource the Force.** Broadly defined, the three preceding core capabilities are the interdependent engines of land power by which the Institutional Army will support the combatant commanders in conducting military operations on land. For these capabilities to take effect, however, there must be central direction and coordination. Resources must be obtained, prioritized and allocated. A fourth core capability, "direct, acquire and integrate the force," encompasses those statutory responsibilities of the Secretary of the Army to effectively implement the policy, program and budget decisions of the President and Secretary of Defense. Direct, acquire and resource the force is a core capability for which Headquarters, Department of the Army has primary responsibility.

### 3. Core Processes

*Definition: From a Business Process Reengineering perspective, there are two types of processes in a business. Operations Processes are the core processes that generate the product or output that is "sold" to the external customer, i.e., the Commander in Chiefs (CINCs). Administrative Processes are the internal processes that keep the business going, do not consume (pay/use) the products, and are for the internal customer, i.e., the Staff, Office of the Secretary of Defense (OSD), Congress, etc. These might be considered as "enabling" processes.*

A preliminary list of Institutional Army Core Processes are:

- **Develop Doctrine:** the process of developing the fundamental principles by which the operating force and the Institutional Army guide their actions in support of national objectives in war and operations other than war.
- **Develop Requirements:** the process of identifying, investigating and developing doctrine, training, leader development, organizations and materiel required improvements and capabilities, focused on the soldier, responding to the Army's vision of future requirements.
- **Acquire and Sustain People:** the process of attracting, accessing, training, educating, managing, promoting, distributing, assigning and retaining personnel to meet military and civilian manpower requirements and sustaining entitled personnel service and health service support.
- **Identify and Develop Leaders:** the process of identifying and transforming potential leaders into future commanders, staff leaders, noncommissioned officers and civilian leaders for current and future Army requirements through education, self development, varied assignments and experience.
- **Acquire, Maintain and Sustain Equipment:** the process beginning with research and development, to production, and through materiel fielding which provides to the total force the necessary technology and enhanced systems capable of executing warfighting operations today and tomorrow.
- **Tailor, Mobilize and Project Land Power:** the process of building force packages from the total force based on requirements of the combatant commanders, preparing them for deployment, and insuring a seamless flow to ports of embarkation, while maintaining a continuity of support for deploying force package units. *Tailoring* is the function/process that, in the execution of either deliberate or contingency operations, entails the actions of the Army in selecting the specific CS and CSS units to be included in the CINCs force package and other force requirements for a specified operation. It also includes the function/process of the identification by supporting CINCs (e.g., ACOM, EUCOM, SOCOM, SOUTHCOM, PACOM, TRANSCOM,

SPACECOM, STRATCOM, CENTCOM), in coordination with the Army, of the units (specific) which will be mobilized (active/reserve) for that action. The output of the tailoring process is a force package to accomplish the supported CINCs operational mission and a package of other necessary forces (forces for backfill, mobilization and deployment support, etc.) to support that operation.

- **Support Organizational Training:** the process of establishing organizational training standards and identifying and providing resources of all types and categories necessary for the conduct of organizational training.
- **Acquire and Sustain Facilities:** the process of identifying, acquiring, managing, maintaining and ultimately disposing of real property in support of Army requirements for the sustaining base and forward stationed forces.
- **Maintain and Sustain Land Operations:** the process of providing maintenance, supply, transportation and field services to operating units world-wide to maintain force effectiveness including the initial provisioning of force packages and the strategic concentration of support assets in the theater based on combatant commander guidance and priorities.
- **Manage Installations:** the process of planning, organizing, coordinating, staffing, directing and controlling resources to accomplish the installations' mission in support of maintaining the readiness of the force, deploying and sustaining the force, protecting the environment and enhancing the quality of life for soldiers, families and the army civilian workforce.

- **Plan, Provide Direction and Obtain and Allocate Resources:** the process of providing direction and allocating resources in accordance with established priorities to support OSD, OJCS, CINCs, MACOMs and multinational operational planning including articulating, justifying, obtaining and executing resources in a manner consistent with OSD and the legislative branch of government.
- **Manage Information:** the process of collecting, processing, disseminating and displaying information in an integrated, inter-operable, compatible global system.
- **Financial Management .....**

(Note: Need to incorporate MG (Ret) Greenway's split of processes)

DEPARTMENT OF THE ARMY  
WASHINGTON, D.C. 20310

January 13, 1995

**Charter for Redesigning  
the Institutional/TDA Army**

**Purpose.** To establish procedures and responsibilities for redesigning the Institutional/TDA Army as part of the Force XXI campaign.

**Mission.** Redesign the institutional Army by the year 2000 so that it will effectively and efficiently perform service Title 10 functions that support redesigned Army warfighting organizations in order to ensure a trained and ready Army, fully capable of doing its part in executing the National Military Strategy, in joint and combined operations, while maintaining timeless Army values and ethics.

**Execution.** The Vice Chief of Staff, Army (VCSA) will supervise the re-engineering of departmental processes and the redesign of organizational structures to support the Title 10 core competencies required for America's Army in the twenty-first century. The Assistant Secretary of the Army for Manpower and Reserve Affairs (ASA(M&RA)) and the Deputy Chief of Staff for Operations and Plans (DCSOPS) will coordinate the overall effort. Re-engineering and redesign will be accomplished in three phases with an initial, preliminary redesign in time to support submission of the Program Objective Memorandum for the Fiscal Year 1996 submission, and subsequent redesigns accomplished in time to support Program Objective Memorandum submissions in Fiscal Years 1998 and 2000. The process will consist of four simultaneous and interrelated efforts:

- Internal Major Army Command (MACOM) re-engineering. Under the leadership of their respective commanders, MACOMs will be re-engineered. This effort is in progress and will serve as the analytic baseline for the redesign effort. MACOM commanders will review with the VCSA the results of their re-engineering efforts beginning in January 1995, and, annually thereafter, their progress in implementing those results, including adjustments attributable to Force XXI.

- Comprehensive review of service Title 10 functions. The VCSA will direct a series of Functional Area Assessments (FM) for selected Title 10 functions in order to provide insights and momentum to the TDA redesign effort. The ASA(M&RA) and DCSOPS will recommend the functional areas to be examined and the procedures and schedule to be followed, as well as coordinate the process. Each department principal is charged with functional oversight of the re-engineering and redesign of their respective functions. In general, MACOM commanders will conduct, for and in coordination with department principals, a comprehensive assessment of selected Title

10 functions. Assessments will be conducted in accordance with the campaign plan and the principles outlined below and synchronous with the design of the operational force and the Planning, Programming, Budgeting and Execution System milestones. Initial redesign attributable to the Title 10 FM will be completed by April 1996. Subsequent Title 10 FM will be conducted during the period FY97-FY99, as required Discrete, specific issues of major significance, such as Integrated Sustainment Maintenance, may be referred to the VCSA at the discretion of the major commanders and department principals as those issues surface; these issues are not restricted by the above milestones.

- Redesign of the Department of the Army Headquarters (HQDA), its field operating agencies (FOA), and staff support activities (SSA). Under the general oversight of the ASA(M&RA), the Administrative Assistant to the Secretary of the Army and the Director of the Army Staff will lead this effort, and, as part of the initial redesign phase, present alternatives and recommendations for redesign to the Under Secretary and the VCSA no later than March 1, 1996. Recommendations for the HQDA redesign will be submitted through the Chief of Staff, Army (CSA) to the Secretary of the Army (SA) for approval.

- Umbrella redesign of the Institutional/TDA Army. The ASA(M&RA) and the DCSOPS will provide oversight of an in-depth study conducted by the Assistant DCSOPS, Force Development, to determine overall organizational changes which may be required to enhance the ability of the Institutional/TDA Army to perform service Title 10 functions and to support Army warfighting organizations in the twenty-first century. Included will be the development of a fully coordinated statement of institutional core competencies necessary to establish the Institution's contribution to Force XXI as well as a documented doctrinal basis for the Institution. This effort will integrate the results of Title 10 FM, MACOM re-engineering efforts, and the results of the redesign and digitization of the warfighting Army. As part of the initial redesign phase, fully coordinated Secretariat/Army Staff study alternatives and recommendations will be provided to the Under Secretary and the VCSA no later than March 30, 1996. Subsequent recommendations will be submitted through the CSA to the SA for approval.

**Principles.** The Institutional/TDA Army will be re-engineered and redesigned in accordance with the following principles:

- Enduring Army values and ethics as detailed in FM 100-1, The Army, guide the redesign effort.

- The six Army imperatives continue to be the bedrock of the Institutional/TDA Army.

-- The Institutional/TDA Army redesign will be linked to the National Military Strategy and be consistent with the Army's role as a power projection Total Army that operates increasingly within a joint environment.

-- Redesign efforts will conform to National Performance Review principles. Unnecessary layering of functions and headquarters will be eliminated. Strive to reduce the size of HQDA and reduce the number of FOA and SSA. Reduce the number of MACOM headquarters.

-- The Army's core competencies will serve as the foundation of the Institutional/TDA Army.

-- Information age technology, management practices and processes and emerging results from the redesign and digitization of the operational force will be leveraged to improve effectiveness and provide efficiencies.

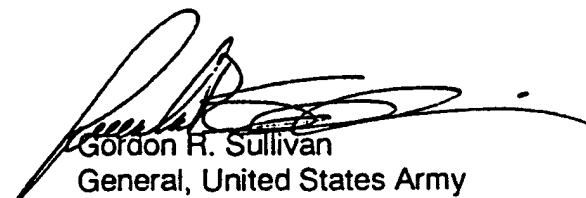

-- The Institutional/TDA Army redesign and MACOM re-engineering will be accomplished within a shared vision of the Total Army leadership.

-- Functions will be resourced in the most cost-effective manner.

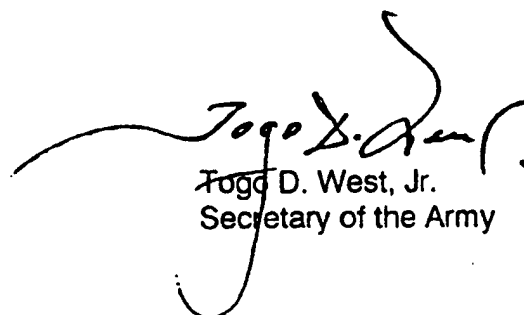

-- Organizations and associated manpower requirements will be established in accordance with these principles and information age management practices. We will capitalize on the strengths of each component - active, reserve and civilian.

-- Experimentation will be conducted as required in General Headquarters Exercises and other advanced warfighting experiments to test and refine proposed redesign efforts.

**Synchronization.** Institutional/TDA Army redesign will be synchronized with the redesign and digitization of the Warfighting Army and the Planning, Programming, Budgeting and Execution System cycle.

# POWER PROJECTION FAA BACKGROUND

- **FORSCOM's strategy:**
  - Two separate sub FAA's: Mob/Demob and Deploy/Redeploy
  - Literature search, PAT's, current process definition of Deployment - Mobilization
  - Level of Detail - Continue refining after VCSA briefing
  - Focus on Re-engineering Process Vs Organization
  - Experimentation and validation of alternatives continues after VCSA briefing
- **Joint Implications** - Understand and consider for both Mobilization and Deployment
- **Not a resource rich FAA**

**FORSCOM**

012/512096

**FORSCOM**

R 5

# POWER PROJECTION FAA PARAMETERS (DA Campaign Plan)

- Mob/Demob: Unit or set of units prepared to be validated for deployment or to initiate requisite post mobilization training and to be restored to their pre mobilization status.
- Deploy/Redeploy: Capability to move units from mob (AC installations) station to theater of operations (for commitments across the spectrum of conflict levels and return).

## Additional FAA Guidance

### → *Focus on the Re-engineering the Process*

- Two MRCs - isolated from any given scenario
- RC must be mobilized
- Do not address sustainment
- Do not consider industrial mobilization or implementation of the Selective Service System
- Civilian leadership has granted authority to mobilize RC
- Ability to move forces between theaters
- U.S. retains capability to project force by air and sea

# Current Mobilization Process

## Planning Phase

- Establish & implement policy
- Conduct mob planning
- Maintain mob files
- Conduct exercises & training

## Alert Phase

- Identify mob rqmts
- Publish alert order
- Crosslevel per & equip
- Publish mob orders

## Home Station Phase

- Assemble unit
- Review USR
- ID shortages / needs
- Move to MS

## Mob Station Phase

- Conduct individual training
- Redistribute per & equip
- Conduct SRP
- Validate units

Validated Units Ready for Deployment

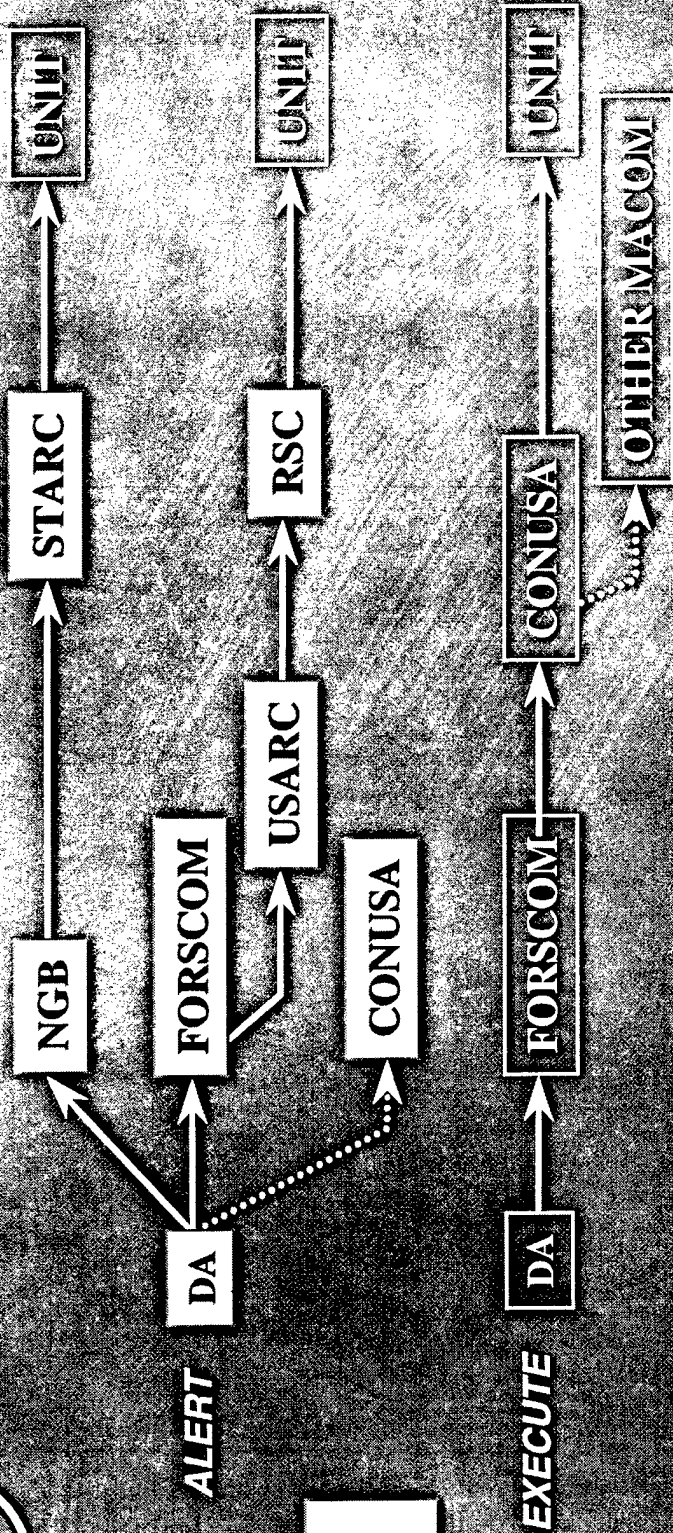

## CURRENT PROCESS ANALYSIS

- Present process works, enhancements will increase efficiencies
  - Eliminate redundancies
  - Eliminate duplicate functions
- JCS MOBILIZATION Exercise Program
  - Non-existent
  - No Army wide exercise
- Execution process must be disciplined
  - Headquarters / units do not follow FORWIDE
  - Cross leveling
  - Follow established procedures
    - Eliminate unnecessary duplication of pre-mob tasks between HQ
    - Cross level only to necessary deployment criteria

**FORSCOM**

# Readiness Command

Command of FORSCOM installations;  
OPCON of non-FORSCOM installations

**FORSCOM**

# Readiness Command

- Concept: Form a tri-component Readiness Command from USARC with CONUSA resources to plan, manage, and execute training and mobilization. Readiness Command commands USAR forces and, post mob, mobilized ARNG units. Readiness Command commands FORSCOM installations. Specifics:
  - Readiness Command assumes mission of CONUSAs and USARC; commands USAR forces pre- and post mob.
  - Readiness Command focuses on Reserve forces, readiness, mobilization, and installation management. Provides ready RC forces to FORSCOM for deployment.
  - FORSCOM focuses on Total Force readiness and deployment.
- DISCARDED
  - Large Span of Control

FORSCOM

**FORSCOM**

# Readiness Divisions

## Pre-Mob

## Post Mob

FORSCOM

## Readiness Division

- Concept: Establish the Readiness Divisions; give them responsibility for both training and mobilization. Eliminate the CONUSAs. Specifics:
  - Expand Readiness Divisions' responsibilities to include pre- and post mob training, planning, and execution responsibilities.
  - Readiness Divisions assume CONUSAs' pre- and post mobilization planning, execution, and C2 responsibilities.
- **DISCARDED**
  - Requires more resources than current two CONUSA organization.
  - Dependent upon implementation of Readiness Division concept.
  - Requires plus-up of Readiness Div staffs to support installation & mobilization.
  - Post mob, Readiness Divisions assume responsibility of mob station C2.
  - No 3-Star "Honest Broker" arbitrator.
  - RSC has split post mob focus.

## POWER PROJECTION FAA

CURRENT STRUCTURE

FORSCOM

# EXPANDED CONUSA

# EXPANDED CONUSA

FORSYTH

## EXPANDED CONUSA

- Concept: Expand CONUSA responsibility by giving them full responsibility for mobilization planning and execution. CONUSA assume FORSCOM mobilization planning and execution responsibilities and installation management pre & post mobilization.
- **DISCARDED**  
Cost additional spaces

**FORSCOM**

# EXPANDED CONUSA

**FORSYTH**

## EXPANDED CONUSA

### OBSERVATIONS:

- INSTALLATION MANAGEMENT BY CONUSA  
A MUST FOR OPTION TO BE FEASIBLE
- EMPOWER SUBORDINATES
- EXPANDED ROLE OF CONUSA MINOR
- COST MORE SPACES THAN SAVINGS

CONCLUSION: NOT FEASIBLE / COST SPACES

## POWER PROJECTION FAA

- Eliminate DA from sourcing

**FORSCOM**

DA/AF/OPS

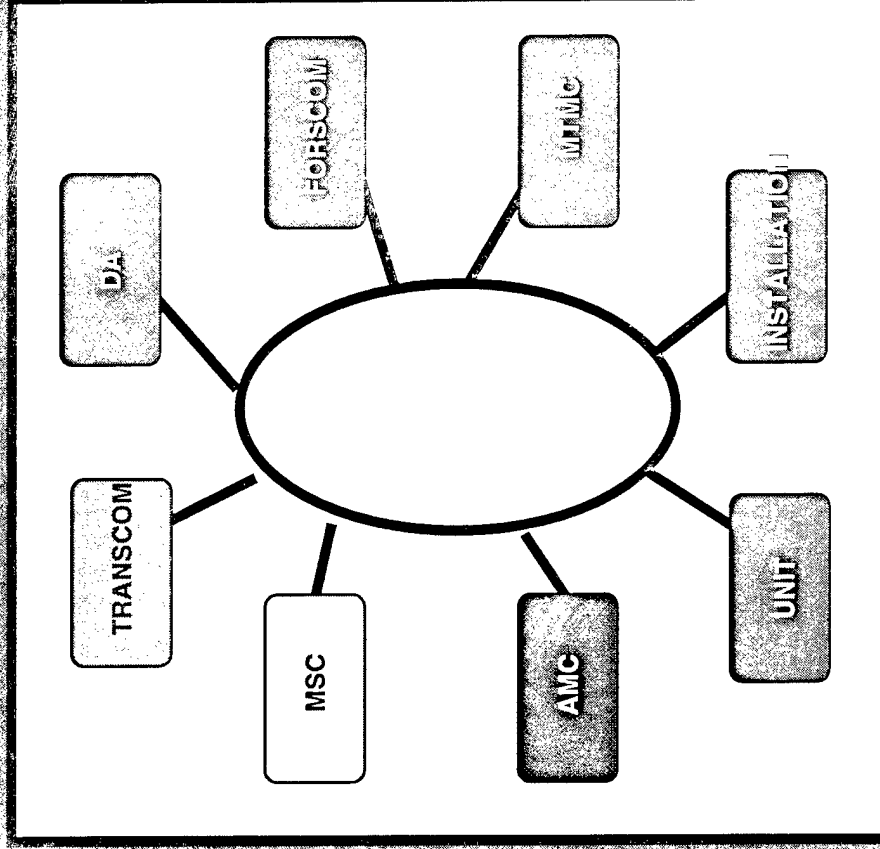

# AUTOMATED DEPLOYMENT SYSTEM

## Automated Information System

- User friendly operating system.
- Designed for lowest skilled user.
- Real-time data available at all nodes.
- Minimum training at operator level.
- Automated simulation tools designed for the decision maker.
- Portable and deployable.

**FORSCOM**

9/15/2008

5/20/98

# EQUIPMENT MEASURING DEVICE

## Automatic Unit Movement Data Collection

- Accurately and efficiently records height, length, width, and weight.
- Electronically updates tag and transmits data.
- Saves time and manpower in updating AUEL.
- Reduces/eliminates opportunities for human error.
- Stationary or Portable

# MARC CARDS

## Multi-Technology Automated Reader Card

- Saves time in manifest planning.
- Electronic transfer of manifest and personnel data.
- Less time to determine individual or unit deployability during Soldier Readiness Processing (SRP).
- Fewer personnel required at SRP site.
- Faster unit deployments.

**FORSCOM**

5/20/98

# RADIO FREQUENCY TAG

## In-Transit Visibility

- Provides timely & accurate info on the location, movement, status, and identity of:
  - units
  - personnel
  - equipment
  - supplies
- Improves accountability

FORSCOM

# DEPLOYMENT TRAINING

## PROBLEMS:

- Inaccurate Unit Movement Data
- Improper documentation for hazardous material and cargo.
- Nonstandard deployment procedures.
- Lack of JOPES qualified personnel at installation.

## SOLUTIONS:

- Emphasize deployment training for Units and Individuals.
- Disseminate AARs and lessons learned.
- Standardize deployment procedures for CONOPS and major exercise deployments. (NTC/JRTC/SEDRES)
- Expand role of FORSCOM headquarters in SEDRE eval.

**FORSCOM**

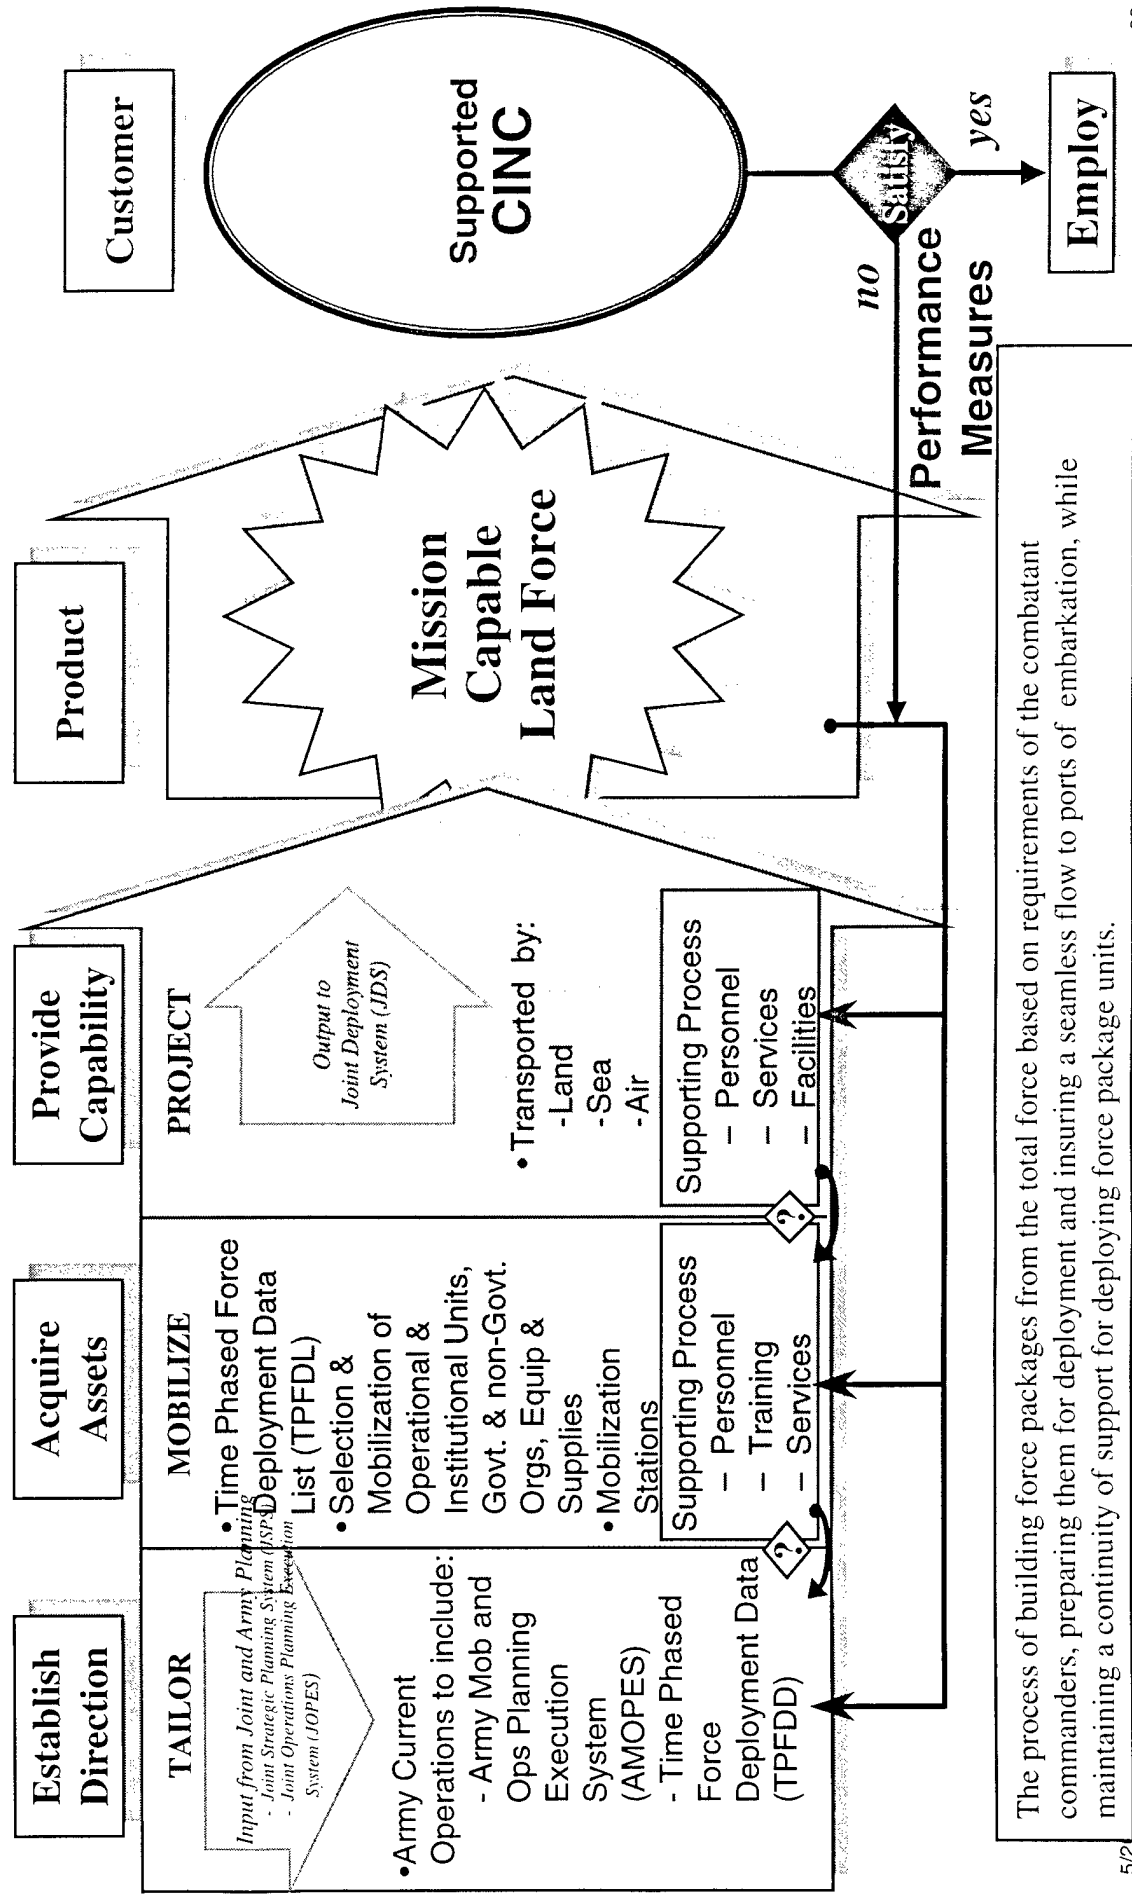

# DEPLOY FAA

## Experimentation Plan

- Develop plan to test recommendations during Exercise Positive Force 96 (1-14 March 96) and during Exercise Atlantic Resolve 96 (2-14 June 96).
- Test installation recommendations during the following SEDRE's:
  - XVIII ABN CORPS, 2-15 March 1996
  - III CORPS, 25 March - 5 April 1996

**TDA / Institutional Army Redesign**

**DOCTRINE  
FUNCTIONAL AREA ASSESSMENT**

**DOCTRINE FAA UPDATE FOR  
LTG MILLER  
15 November 1995**

# **TDA / INSTITUTIONAL ARMY REDESIGN**

## **AGENDA**

- **INTRODUCTION**
- **BASE CASE ASSESSMENT**
  - **Outcomes, Methods, Resources**
- **ALTERNATIVES**
  - **TRADOC XXI**
  - **Total Revision**
  - **Significantly Different**
- **UMBRELLA GROUP ISSUE**

# **TDA / INSTITUTIONAL ARMY REDESIGN**

## **PURPOSE**

**DCSDOC conducts Army-wide Doctrine FAA by:**

- **Developing a Base Case laydown and three alternate courses of action that define the processes and organizations that produce doctrine throughout the Army.**
- **Assisting in the integration and harmonization of the doctrine function with other function proposals.**

DOCTRINE

# TDA / INSTITUTIONAL ARMY REDESIGN

## MATRIX TEAMS

### TRADOC MATRIX TEAM

- Performs Study Work
- Develops Base Case/Alternatives
- Presents Work to Army Matrix Team
- Harmonizes Doctrine Alternatives for FAA

### TRADOC MATRIX TEAM (CORE)

DCSDOC (all directors)

CIG  
DCST  
DCSCD  
CAC  
CASCOM  
INF SCH  
EN SCH

### ARMY MATRIX TEAM

- Reviews TRADOC Matrix Tm's Work
- Approves Base Case and Alternatives
- Review Final FAA

### ARMY MATRIX TEAM (CORE)

# TDA / INSTITUTIONAL ARMY REDESIGN

## DOCTRINE AREA ASSESSMENT

"...a body of thought on how to fight achieved through consensus...."

*General William W. Hartzog*

<b>Function</b>	.....	Doctrine - - Lead Intellectual Growth
<b>Objective</b>	.....	Produce quality doctrine that's understood, accepted, and embedded throughout the Army
<b>Products</b>	.....	<b>FMs, JPs</b> , articles, symposia, field support, contact with other Armies
<b>Processes</b>	.....	Current / future regs / actual process Research, write, coordinate, implement, evaluate (disseminate, integrate)
<b>Resources</b>	.....	Qualified people Dollars Automation

Who is assigned this function?  
Who does this function?  
How does this compare to RM data?

# TDA / INSTITUTIONAL ARMY REDESIGN

## WHAT IS DOCTRINE

Doctrine = Fundamental Principles + Tactics, Techniques, and Procedures

### Fundamental Principles

"...body of thought on how we fight...."

*General William W. Hartzog*

Fundamental principles by which military forces guide their actions in support of national objectives. Doctrine is authoritative but requires judgement in application.

JOINT PUB 1-02

**PLUS**

### Tactics, Techniques, and Procedures (TTP)

Not a substitute  
for an OPOD

Tactics - Employment of units in combat

Techniques - General and detailed methods used by troops  
and/or commanders to perform assigned missions  
and functions

Procedures - Standard and detailed courses of action that  
describe how to perform a task

TRADOC PAM 25-34

# **TDA / INSTITUTIONAL ARMY REDESIGN**

## **BASIS**

**Policy, law, directive, custom etc. to define requirements/work of Army Doctrine:**

<b>United States Code - 1</b>	<b>Army Pamphlet - 1</b>
<b>DoD Directive/Instruction - 1</b>	<b>TRADOC Regulation - 4</b>
<b>Joint Publication - 2</b>	<b>TRADOC Pamphlet - 2</b>
<b>Army Regulation - 2</b>	<b>Memorandums of Understanding - 3</b>

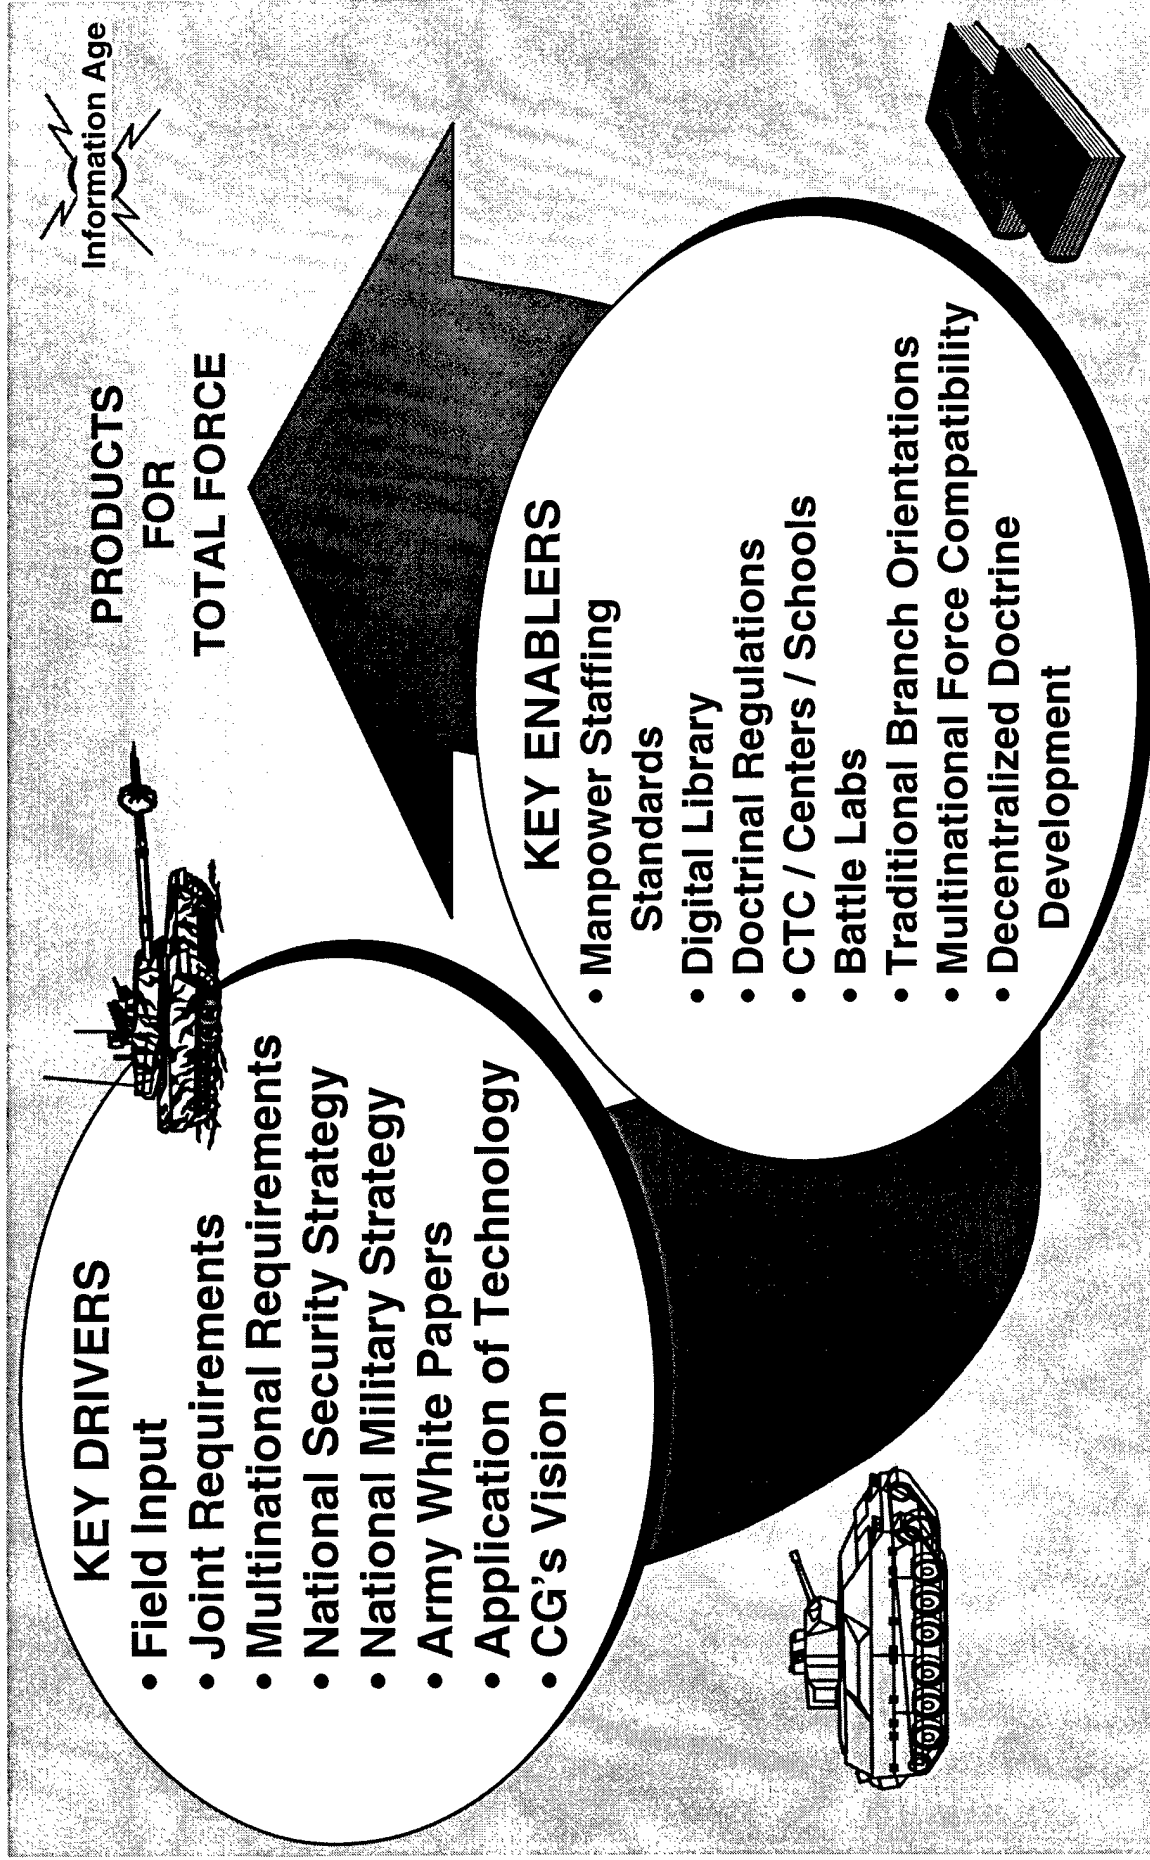

# TDA / INSTITUTIONAL ARMY REDESIGN

## LOSS OF DOCTRINE DEVELOPERS OVER TIME

TRADOC... WHERE TOMORROW'S VICTORIES BEGIN

25 5/20/98

# TDA / INSTITUTIONAL ARMY REDESIGN

Doctrine Developer Duties....more than just writing

# **TDA / INSTITUTIONAL ARMY REDESIGN**

DOCTRINE

## **BASE CASE ASSESSMENT**

- Personnel ---- Need quality not quantity.
- Doctrine production steady since 1987 ---- approx. 70 FMs annually.
- Doctrine development is more than writing.
- Doctrine developers need to be collocated or have direct link with Commandants/Schools.
- Transition to digital doctrine is hard but inevitable (its more than CD-ROM).

# TDA / INSTITUTIONAL ARMY REDESIGN

---

# **TDA / INSTITUTIONAL ARMY REDESIGN**

## **ALTERNATIVES**

**ALTERNATIVE 1-- TRADOC XXI**

**ALTERNATIVE 2-- TOTAL REVISION**

**ALTERNATIVE 3-- SIGNIFICANTLY DIFFERENT**

# **TDA / INSTITUTIONAL ARMY REDESIGN**

## **KEY ASSUMPTIONS**

- **Follow CG's Strategic Plan 95**
- **DCSDOC:**
  - Initiates actions to digitize doctrine
  - Initiates effort to digitize doctrine development
  - Manages/integrates ADTLP
  - Continues movement toward WWW linkage
  - Maintains doctrine approval linkages
  - Continues Joint doctrine development
- **Contractor support available**
- **A complete digitized doctrinal library is a reality**

# TDA / INSTITUTIONAL ARMY REDESIGN

## ALTERNATIVE 1 TRADOC XXI

### DESCRIPTION

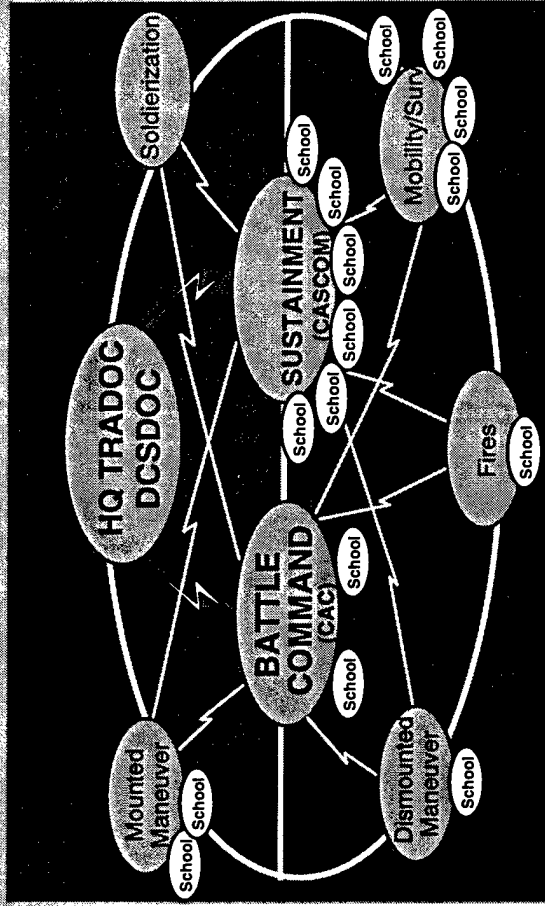

- Selected Operational doctrine migrates
- DCSDOC manages/integrates
- Joint Doctrine Directorate remains
- Schools retain doctrine developers

### ADVANTAGES

- Central management / decentralized execution
- Keeps doctrine developers at source
- Minimal turbulence

### DISADVANTAGES

- Resource savings minimal

### KEY ENABLERS:

- Authoritative ADTLP management tool established
- Upgrade hardware and software
- Qualified personnel

# TDA / INSTITUTIONAL ARMY REDESIGN

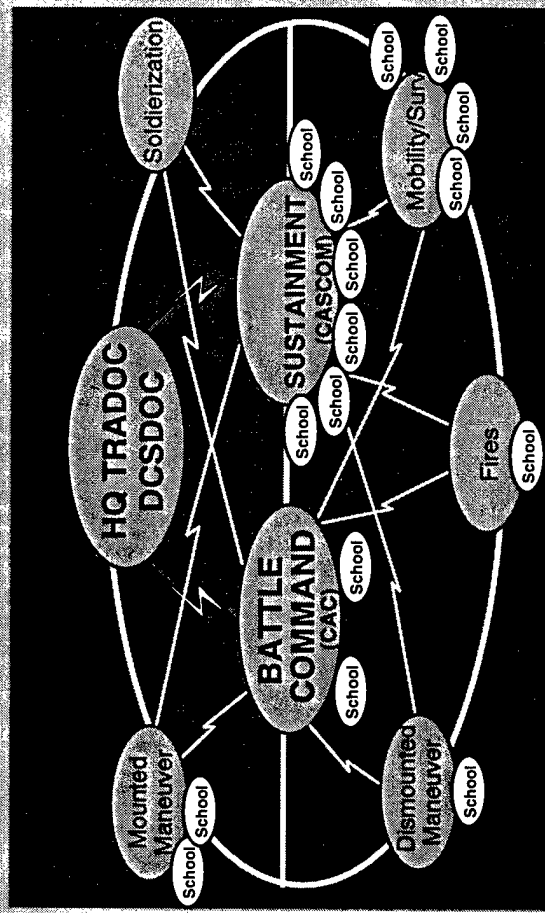

## ALTERNATIVE 1--TRADOC XXI RESOURCES

### COST TO IMPLEMENT

- Hardware/Software Upgrade
- \$250k Est PC upgrades for doctrine developers
- Communication Capability

### SAVINGS

- Seeking savings and cost avoidance that will be used to offset POM programmed reductions and generating resources for recapitalization.

**ALTERNATIVE 2**  
**TOTAL REVISION**

- Same as for Alternative 1
- DCSDOC:
  - assumes DAMO-FD doctrine role
  - assumes functional oversight of MACOM doctrine development
- War College and USMA develop selected doctrine
- Strong links developed with CTCs

- One doctrine chief
- Provides oversight for production of all Army Doctrine
- Strengthens integration
- Non-TRADOC SMEs develop Doctrine

**DISADVANTAGES**

- Difficult to implement: Directive authority without ownership may not be viable

## DISADVANTAGES

- Difficult to implement: Directive authority without ownership may not be viable

- Same as for Alternative 1
- Tasking authority mandatory
- Approved MOUs in place with MACOMs
- Qualified personnel

# ALTERNATIVE 2 -- TOTAL REVISION RESOURCES

- **Hardware/Software Upgrade**
  - \$250k Est PC upgrades for doctrine developers
  - Communication Capability
- **Travel**
- **Internal Realignment**

- **Seeking savings and cost avoidance that will be used to offset POM programmed reductions and generating resources for recapitalization.**

# TDA / INSTITUTIONAL ARMY REDESIGN

## ALTERNATIVE 3 SIGNIFICANTLY DIFFERENT

### DESCRIPTION

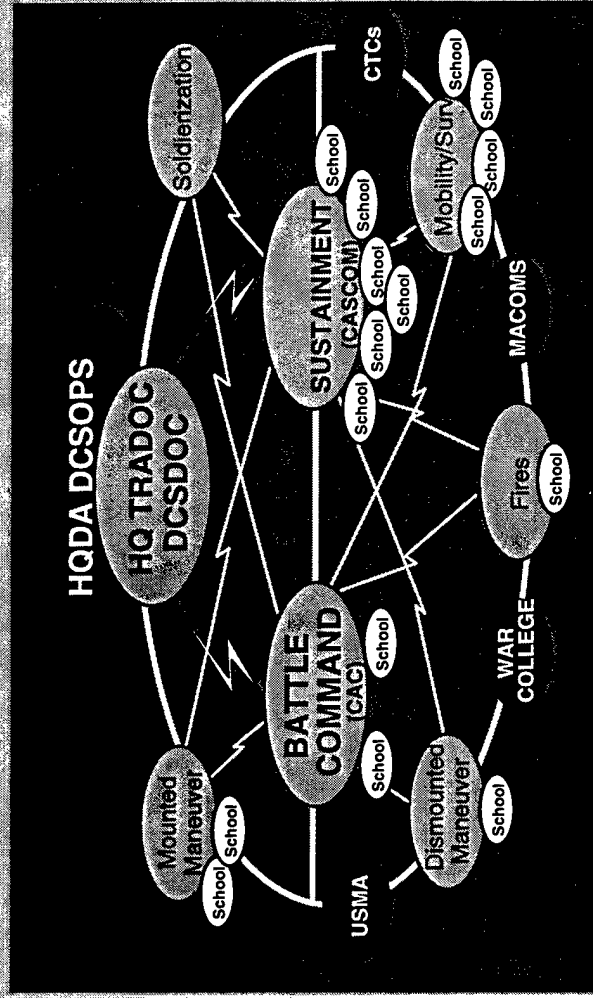

- Same as ALT 2
- Consolidate doctrine developers at the centers

### ADVANTAGES

- Management simplified
- Shared resources
- Facilitates integration

### DISADVANTAGES

- Commandants may lose some influence over doctrine development
- Separates doctrine from CD/Tng development
- Commandants may be inclined to form doctrine "cells" at schools

### KEY ENABLERS:

- Same as ALT 2

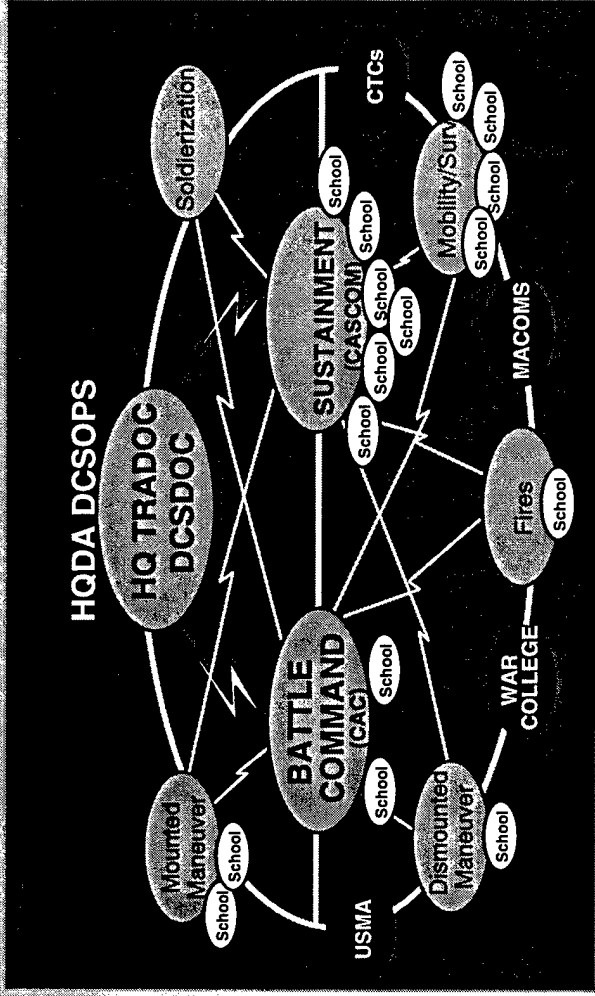

## ALTERNATIVE 3 -- SIGNIFICANTLY DIFFERENT RESOURCES

# COST TO IMPLEMENT

- Technology linkages as for ALTs 1 & 2

# SAVINGS

- **Seeking savings and cost avoidance that will be used to offset POM programmed reductions and generating resources for recapitalization.**

# **TDA / INSTITUTIONAL ARMY REDESIGN**

## **RECOMMENDED COURSE OF ACTION**

### **ALTERNATIVE 2 -- TOTAL REVISION**

#### **ADVANTAGES**

- ONE DOCTRINE CHIEF
- SYNERGISM OF SCHOOLS, TNG CTRS, KEY LEADERS, CTCs, USMA, AWC, MACOMs' INVOLVEMENT

# TDA / INSTITUTIONAL ARMY REDESIGN

# TDA / INSTITUTIONAL ARMY REDESIGN

## ISSUE

### ISSUE: DOCTRINE FOR THE TDA/INSTITUTIONAL ARMY

- **Background**
  - Assigned to TRADOC by Umbrella Group
  - Linkage between TDA and Operating Force
- **Alternatives**
  - Separate TDA doctrine
  - Army doctrine
    - » Embedded doctrine
    - » Separate doctrine (FM 100-22, FM 63-11)
    - » Incorporate into Chap 4, TRADOC PAM 525-5
- **Recommendation**
  - Army doctrine

**Already Embedded**

FM 100-7, FM 100-16, FM 100-23

**TDA / Institutional Army Redesign**

**DOCTRINE  
FUNCTIONAL AREA ASSESSMENT**

**DOCTRINE FAA UPDATE FOR  
LTG MILLER  
15 November 1995**

# TDA / INSTITUTIONAL ARMY REDESIGN

## CORE COMPETENCIES

- Develop Doctrine and Future Warfighting Vision
- Disseminate and Integrate Doctrine
- Support Warfighting CINCs and International Army Programs

# **TDA / INSTITUTIONAL ARMY REDESIGN**

## **WORK IN PROGRESS**

- Complete implication / impact of digitizing doctrine development process
- Addressing use of recent retirees in a writing pool
- Who's doing concepts in Schools
- Cost--Benefit of expanded contractor support
- Number of personnel required to develop doctrine
- Identify AOSF/SAMS -- Potential doctrine developers
- DCSRM Manpower Survey

# TDA / INSTITUTIONAL ARMY REDESIGN

## *Information Briefing*

VCSA

*November 29, 1995*

# **This is an Information Briefing for the VCSA to set the stage for the Organize, Doctrine, Training and Leader Development FAA to be conducted by TRADOC on 1 December 1995**

# Doctrine FAA

## “Develop Doctrine” Process

# What's wrong with the current Process ?

---

## Customer

- Products not clearly defined
- Process not “holistic” TOE - TDA
- Process too slow
  - Publication time
  - Acceptance/Adoption time

## Process Owner

- Too many “process owners”
- Too many “hand-offs”
- Resources not tied to product nor process

# Develop Doctrine

## Doctrine Products

- Future Vision
- Army Field Manuals
- Joint Publications
- Ad Hoc TTP
- Articles for periodicals, magazines
- Training Support Packages
- Support to ARFOR
- Concepts
- Liaison w/ Foreign Mil Schools
- Train Observer/Controllers
- Symposia
- Mission Training Plans
- Special Report
- Conferences
- Briefings
- Curricular Review

## ??? Products

- ARTEPs
- Training Circulars
- Field Circulars
- Soldiers Manuals
- Other than "Ad Hoc" TTP
- DA PAMs
- Regulations
- O&O Plans
- FM 100-3 (draft)
- FM 100-7 (draft)
- FM 100-11
- TC 525-5
- DA PAM 100-XX

# Develop Doctrine

---

Customer

Process Owner

*Efficiency*

Minimize Use of Resources

- Minimize Process Hand-offs
- Eliminate Redundancies

# Develop Doctrine

## Establish Direction

### PROCESS

- Congress
- Intnat'l Agreements
- OSD Directives
- STANAGs
- NSS
- NMS

*Joint Doctrine*

- Army Doctrine
  - DTLOMS
  - TTP

### ORGANIZATIONS

INTERAGENCY  
MULTINATIONAL  
JOINT STAFF

• HQDA

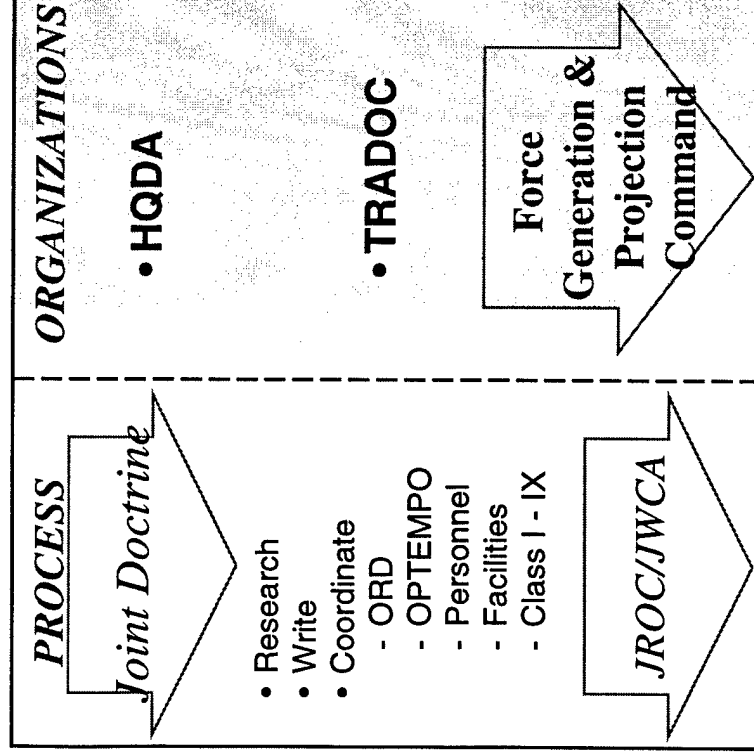

• TRADOC

*“to be”*

- HQDA retains responsibility for Interagency, Multinational & Joint Doctrine
- HQDA coordinates with ASCCs, and Joint Staff to gain CINC approval of Land Forces Doctrine
- HQDA, as the Process Owner, is the proponent of Army Doctrine (“Operational level” of war)
- HQDA approves Army Policy, including Doctrine
- TRADOC develops, trains, teaches and evaluates Army TTP (“Tactical level of war”; (implementation doctrine))
  - TRADOC DCSDOC(-) and DAMO-FDQ merged into a single directorate at HQDA
  - TTP developed by TRADOC schools/labs
- One organization for internal process (TRADOC) and one for external process (HQDA)

# Develop Doctrine

## Acquire Assets

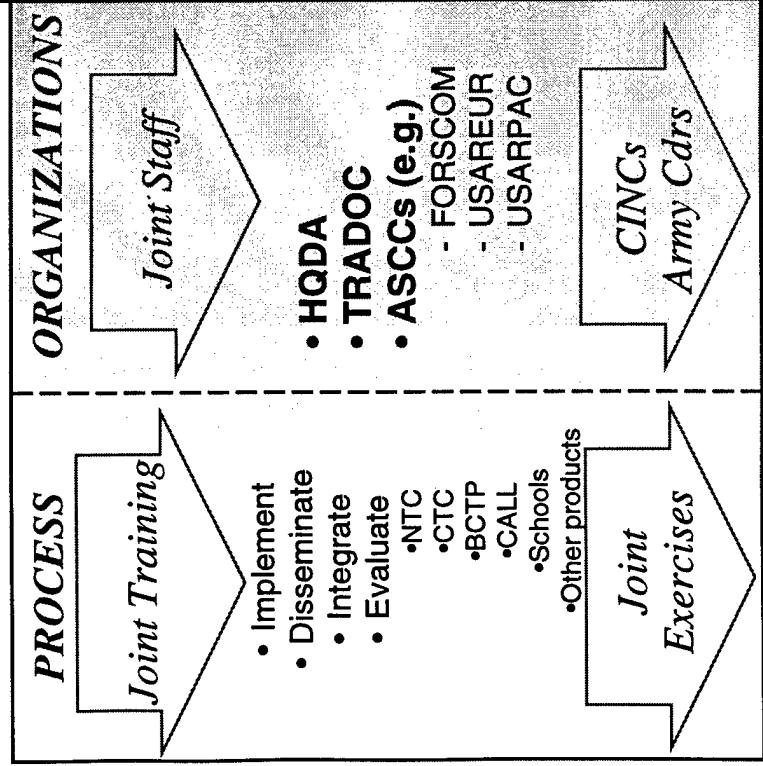

## “to be”

- HQDA, as the Army proponent for Joint Doctrine, establishes a tie between Joint Doctrine and JROC (Acquisition)
- HQDA links Army Force Structure to JWCA (Capabilities/Doctrinally based Army)
- TRADOC, as the TTP Owner, establishes a common doctrinal base for land forces (requirements determination)
- Force Development Command (TRADOC) develops doctrinally required land force organizations (TOE/TDA)
- Reduces the number of process hand-offs in doctrine from 8 to 2 (HQDA - TRADOC)
- Eliminates redundancies in ARSTAF
- All “Doctrinal” publications are staffed and developed “on-line”; hard copies are a user responsibility
  - Capstone/Keystone doctrine - HQDA
  - Enabling Doctrine & TTP - TRADOC

# Develop Doctrine

## Provide Capability

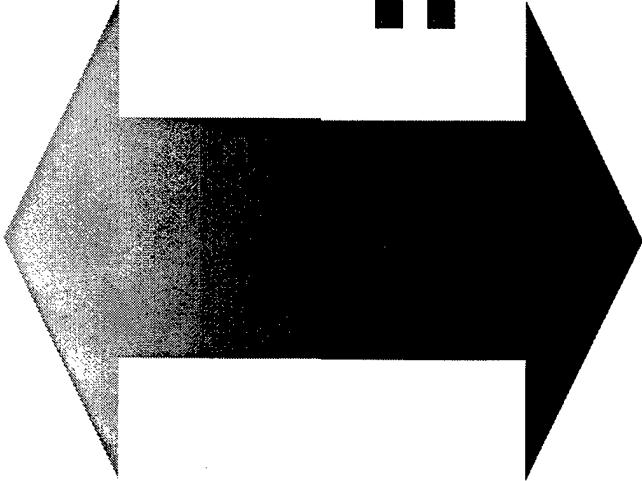

## “to be”

- HQDA responsible for all Army Doctrine - “Strategy, Plans, Policy and Doctrine”
- TRADOC responsible for all tactical (TTP) processes less Exercises (Joint and Unit Training)
- Reduces redundancies and streamlines doctrinal processes (reduces hand-offs)
- Enhances Army land force capabilities to CINCs requirements (Joint Doctrine and JROC/JWCA)
- “Doctrinal” publications staffed & produced faster by “on-line” doctrinal WWW development and publication system
- The Capability provided by the “Doctrine” process is “A doctrinally organized, trained, equipped and resourced” land force organization.

# Develop Doctrine

## Prioritization of Process Changes

Policy, law, directive, custom, etc. to define requirements/work of the function:

- United States Code - 3
- DOD Directive/Instruction - 19
- Federal Acquisition Regulation
- Joint Publication - 1
- General Order - 1
- Chief of Staff Regulations - 5
- Army Regulations - 40
- Common Table of Allowances - 2
- DA Pamphlets - 6
- DA Handbook - 1
- Field Manual - 3
- TRADOC Supplement to AR 1-1
- TRADOC Regulations - 6
- TRADOC Pamphlets - 4
- Memorandums - 6
- Memorandums of Understanding - 3
- Newsletter - 1

Total 103

and counting

Many are out of date; many should be consolidated.

# Enablers

Common systems, processes and/or procedures which facilitate the performance of core function/process:	
<ul style="list-style-type: none"> <li>Contemporary Operational Issues Process</li> <li>Concept Development Process</li> <li>Research &amp; Development Process</li> <li>Experimentation Process</li> <li>Planning, Programming, Budgeting and Execution System (PPBES)</li> <li>MACOM Linked Nets</li> </ul>	<p><b>Materiel Requirements Determination</b></p> <ul style="list-style-type: none"> <li>Force Integration Master Planner</li> <li>Materiel Requirements Determination Process/System</li> <li>Army Systems Acquisition Review Council</li> </ul> <p><b>Organize</b></p> <ul style="list-style-type: none"> <li>The Army Authorization Documents System - Unit Authorizations</li> <li>Requirements Documentation System (RDS)</li> <li>Structure and Composition System (SACS)</li> <li>Total Army Analysis</li> <li>Army Force Planning Data and Assumptions (AFPDA)</li> <li>Structure and Manpower Accounting System (SAMAS)</li> <li>Force Analysis Simulation of Theater Administrative Logistics Support (FASTALS)</li> </ul>

# Base Case Assessment

## Materiel Requirements Determination

**“Materiel Requirements Determination” process is different from the way currently documented.**

- “Materiel Requirements Determination” process, as developed over last two years, is going in right direction.
- Relationships between DCDs, Battle Labs, TSMs and PM/PEOs are ambiguous.
- Current PPBES hinders execution of the combat development process.

# “Operational” TDA Organizations

Need to differentiate TDA organizations.

- Deployable TDA
- Direct Support TDA
- Sustaining Base TDA
- All others

Force Projection

# Base Case Assessment Organize (TOE)

- Biennial TAA process too slow to affect change.
- Semiannual MTOE process creates turbulence at the unit level making it difficult to manage change.
- Rules/regulations require update/consolidation.
- Process disconnected with Army Training Requirements and Resources System (ATRRS).
- Potential exists for combining TOE and MTOE into one document.

# Table of Distribution and Allowances Process

## BMG Development

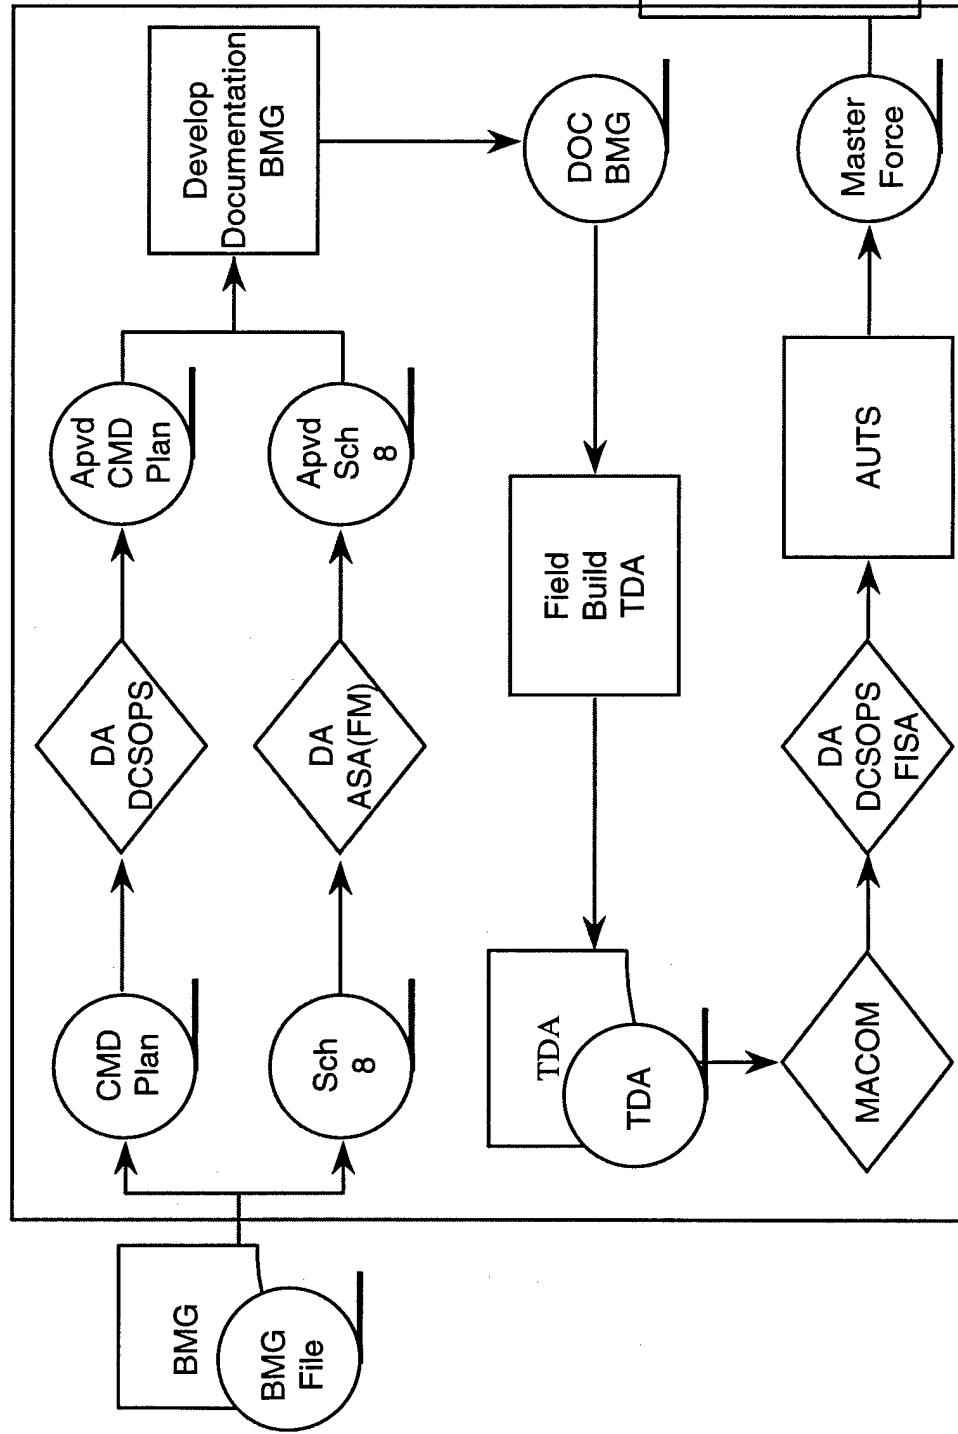

Org & Mat Rqmt Det

# Table of Distribution and Allowances Process

## TDA Development/Documentation

# Base Case Assessment Organize (TDA)

- TDA Organize process needs improvements to enhance the requirements determination and justification process while maintaining flexible local mission and workload execution.
- TDA Organize system needs streamlining to eliminate bookkeeping procedures which do not add value to the process.
- TDA Organize process needs to utilize information technologies (existing and future) to improve effectiveness.

# **Organize (TDA)**

## **Part 1 - Selected Enhancements**

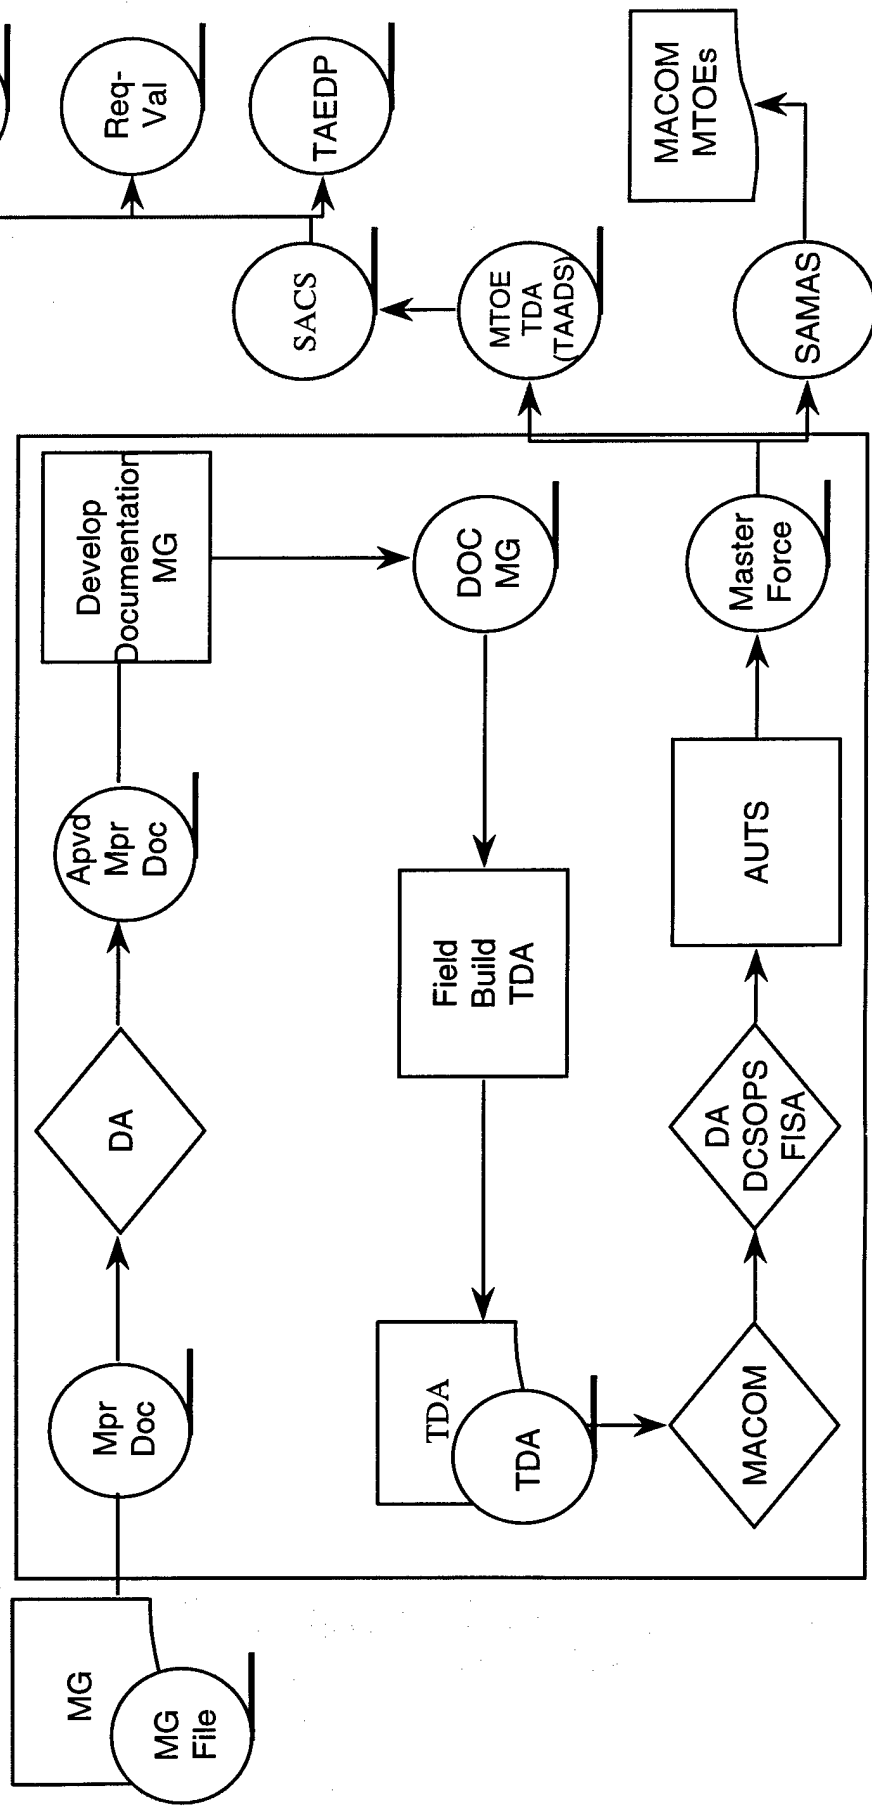

1. Designate one department level organization to be responsible for the manpower management system.
2. Establish a single manpower management system which provides:
  - required updates to DA data bases
  - mil and civ distribution for required reporting periods
  - a baseline for TDA's.
- a. Reduce reporting for Command Plans, Schedule 8's, and TDA documents.
- b. Publish manpower guidance to match Management of Change windows. (MTOE MOC windows are now annual.)
3. Consolidate Manpower and Budget reporting codes. (Use AMSCO.)
4. HQDA adopt on-line TDA system in lieu of installation TAADS-R System. (System currently used by two MACOMs and other organizations. Primary cost would be limited to hardware.)

# Organize (TDA)

## Part 1 - Selected Enhancements Continued

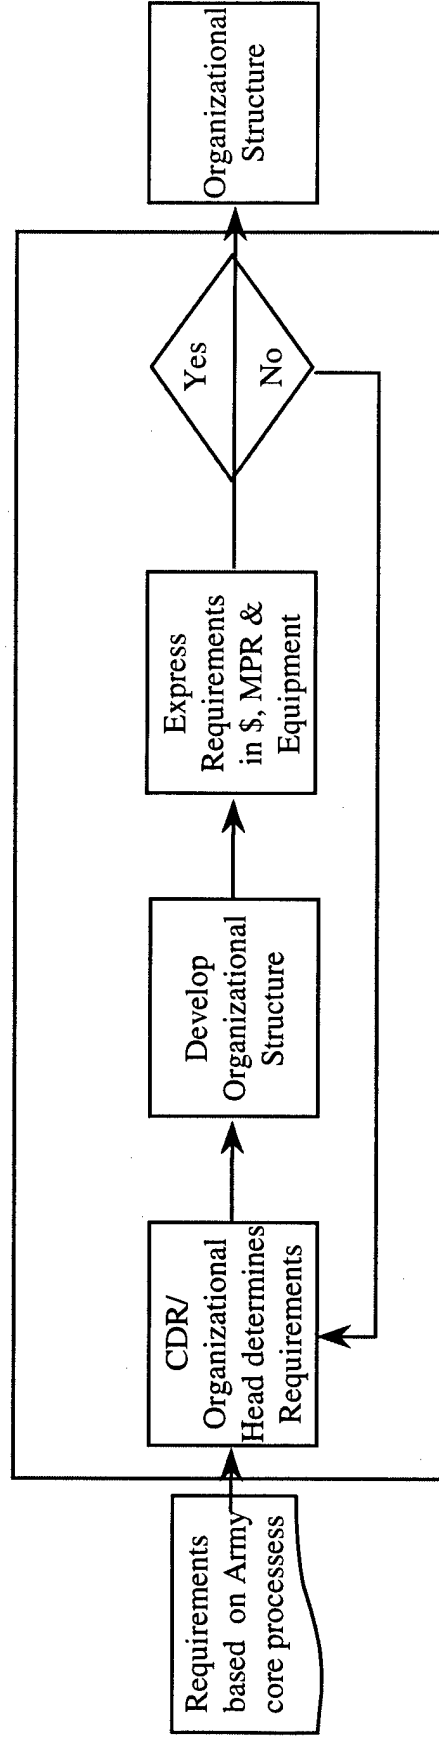

### Table of Distribution and Allowances (TDA) Development/Documentation

# Organize (TDA)

## Part 2 - Customer & Product Based

### Organization Design

# Organize (TDA)

## Part 2 - Customer & Product Based

# **Organize (TDA)**

## **Part 2 - Customer & Product Based**

### **GOALS:**

- Define proponents, processes, products & customers
- Improve resource allocation through linkage to Twelve Core processes
- Improve linkage between operational and institutional organizations
- Establish measures of effectiveness and performance for products
- Decentralize execution and reduce bookkeeping

## Organize (TDA)

### Part 2 - Customer & Product Based

1. Design the Organize process for the "TDA Army" based on the twelve core processes of:
  - Develop Doctrine
  - Acquire, (Train) and Sustain People
  - Identify and Develop Leaders
  - Develop Requirements
  - Tailor, Mobilize & Project Land Force
  - Support Organizational Training
  - Acquire & Maintain Facilities
  - Maintain & Sustain Land Operations
  - Manage Installations
  - Acquire, Maintain & Sustain Equipment
  - Plan Provide Direction; Obtain & Allocate Resource
  - Manage Information
2. Establish a comprehensive list of subprocesses which will serve to further define the twelve core processes.

**Example:**

Process

Tailor, Mobilize &  
Project Land Forces

Subprocess

Deployment Training

## Organize (TDA)

### Part 2 - Customer & Product Based

3. Identify products for the various sub-processes. **Example:**  

<u>Subprocess</u>	<u>Product</u>
Deployment Training	trained units and soldiers
4. Identify customers for the products. **Example:** Customer = CINCs
5. Identify Measures of Efficiencies/Effectiveness (MOE) and Measures of Performance (MOP) for the products.  
**Example:** Percentage of units and soldiers qualified through deployment training
6. Allocate resources (\$, manpower, and equipment) and issue “summary” PBG to proponents associated with the Twelve Core processes. Seek enablers to reduce all bookkeeping which does not add value to execution of proponent requirements.
7. Develop and execute a customer grading system of products based on approved MOE and MOP (feedback loop).
8. Develop and maintain macro policy that governs above.

# Organize (TDA)

## Part 2 - Customer & Product Based

- Defines proponents, processes, products and customers and allows for execution of process at lowest level with a minimum of bookkeeping

### Pros

- Improves linkage between operational and institutional organizations
- Decentralized execution and minimizes bookkeeping
- Establishes MOEs and MOPs
- Closer compliance with NPR
- Command prerogative
- Migrate towards common organization/force design system

### Cons

- New concept and methodology must be developed
- Requires OSD and higher enablers
- Unknown cost and workload to execute
- Cultural impact
- Not assured method of operation for the Army

# Organizational (Structure) Alternatives

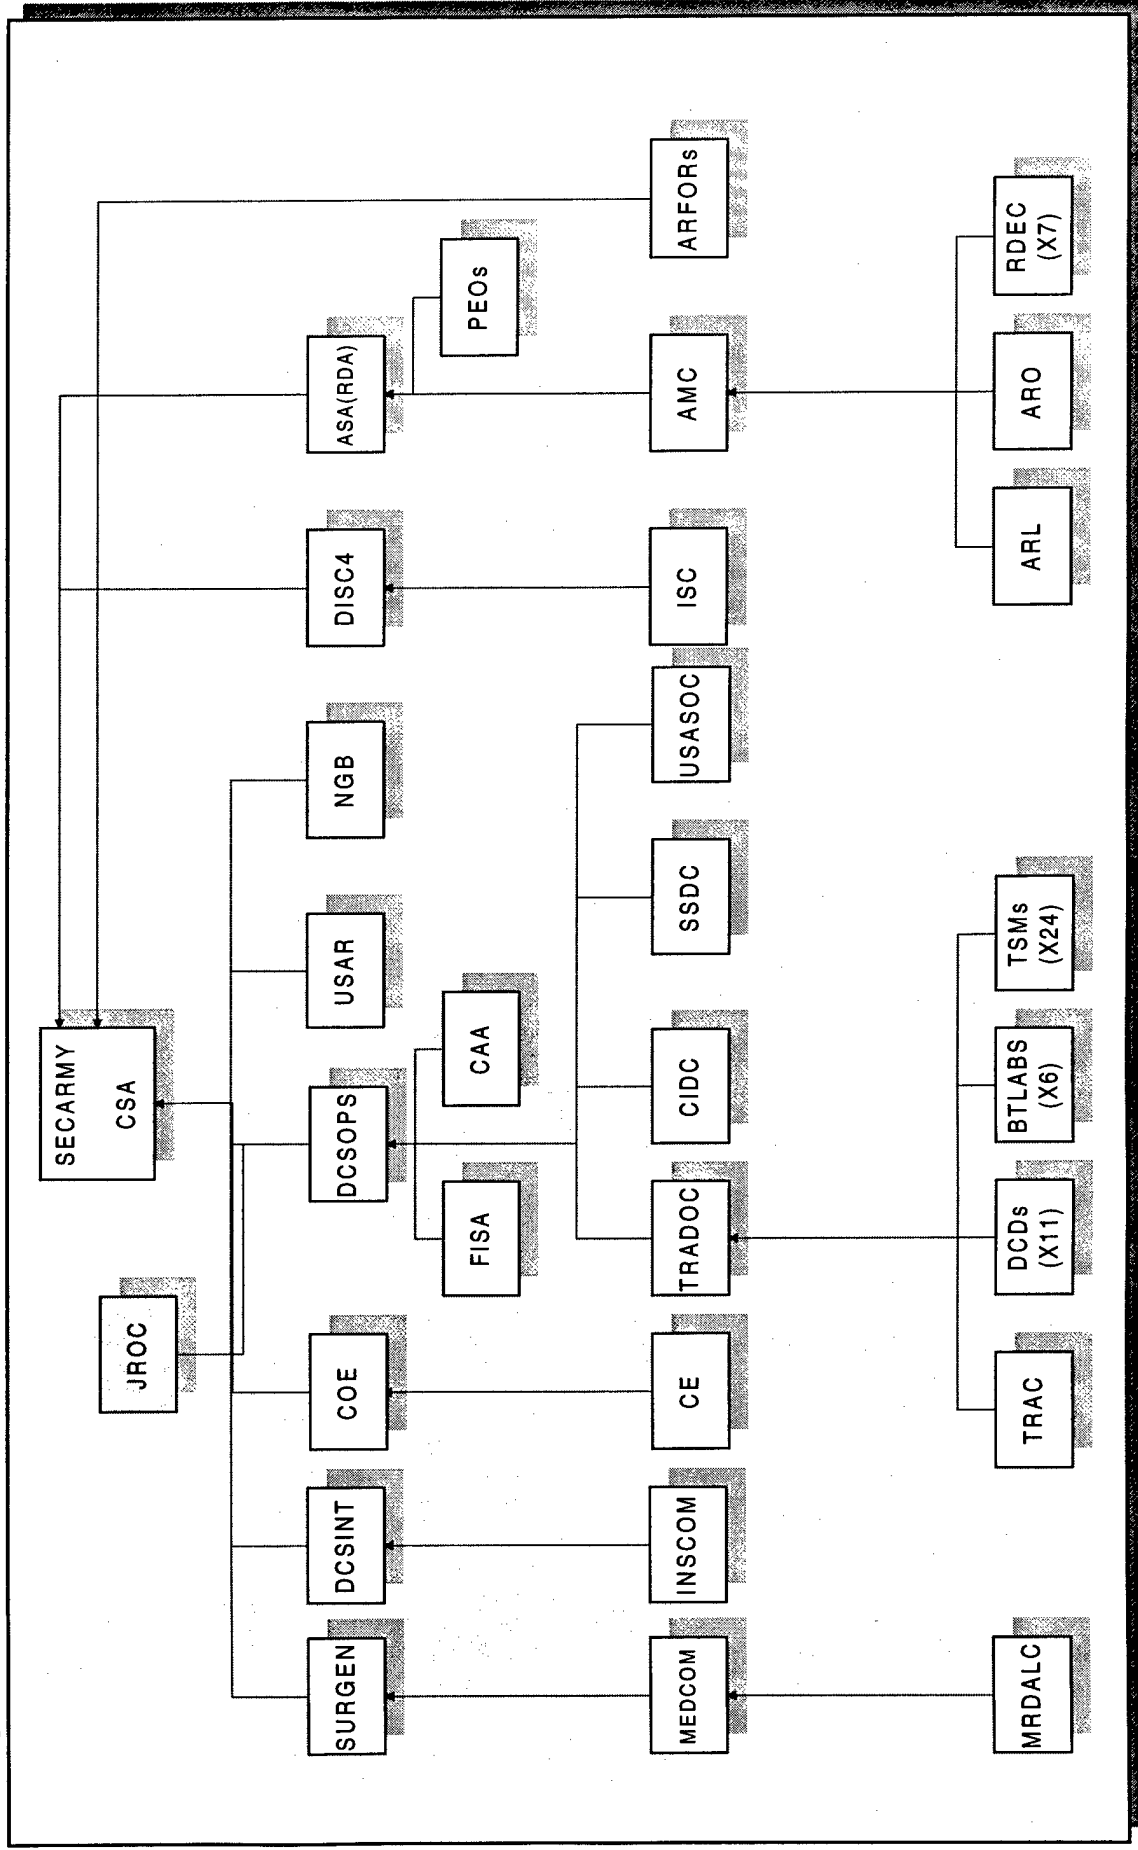

- TRADOC XXI - Centers of Excellence
- Total Revision - Consolidate Army CD Activity
- Significantly Smaller/Different - Enhanced TRADOC

Org & Mat Rqmt Det

# O&M Organizations Base Case

Org & Mat Rqmt Det

# **TRADOC XXI**

## **Centers of Excellence**

### **Current:**

- **Structure:** 11 DCDs, 6 Battle Labs and 24 TSMs
- **Functions:** Relationship between DCD, Battle Lab, & TSM ambiguous

### **Proposed:**

- **Consolidate at a number of locations (6 centers), based on "Enduring Battlefield Functions"**
  - Battle Command
  - Mounted Maneuver
  - Dismounted Maneuver
  - Fires
  - Mobility & Survivability
  - Sustainment
- **Clearly defined responsibilities for DCDs, Battle Labs, and TSMs**

### **Pros:**

- Fully institute battle lab approach
- Improved horizontal integration
- Reduces layering and overhead
- Moderate personnel turbulence/relocation costs/facility costs

### **Cons:**

- Potential loss of subject matter expertise
- Loss of proponent influence

#### **Basic tenet:**

*"Battle Lab" is a way of  
doing business,  
not a geographical  
location.*

**Broader  
combined arms  
view**

TRADOC XXI  
alternative  
pertains to  
TRADOC only

# ***Total Revision - Consolidate Army CD Activity***

## **Current:**

- TRADOC, as the primary Army combat developer, performs “organize” and “materiel requirements determination” functions and reports to DCSOPS.
- ISC, INSCOM, MEDCOM, CIDC, SSDC, JFKSWC, USAR, and ARNG also perform these functions for their organizations and report to various DCS at HQDA.

## **Proposed:**

- Align all Army CD activities into TRADOC. Builds on Centers of Excellence structure.
- Some remain at current locations, but under TRADOC; others move to Centers of Excellence.

## **Pros:**

- Unity of effort
- Accommodates JWCA and JROC
- Potential manpower savings
- Seamless view of operations
- Expands view to include corps and above

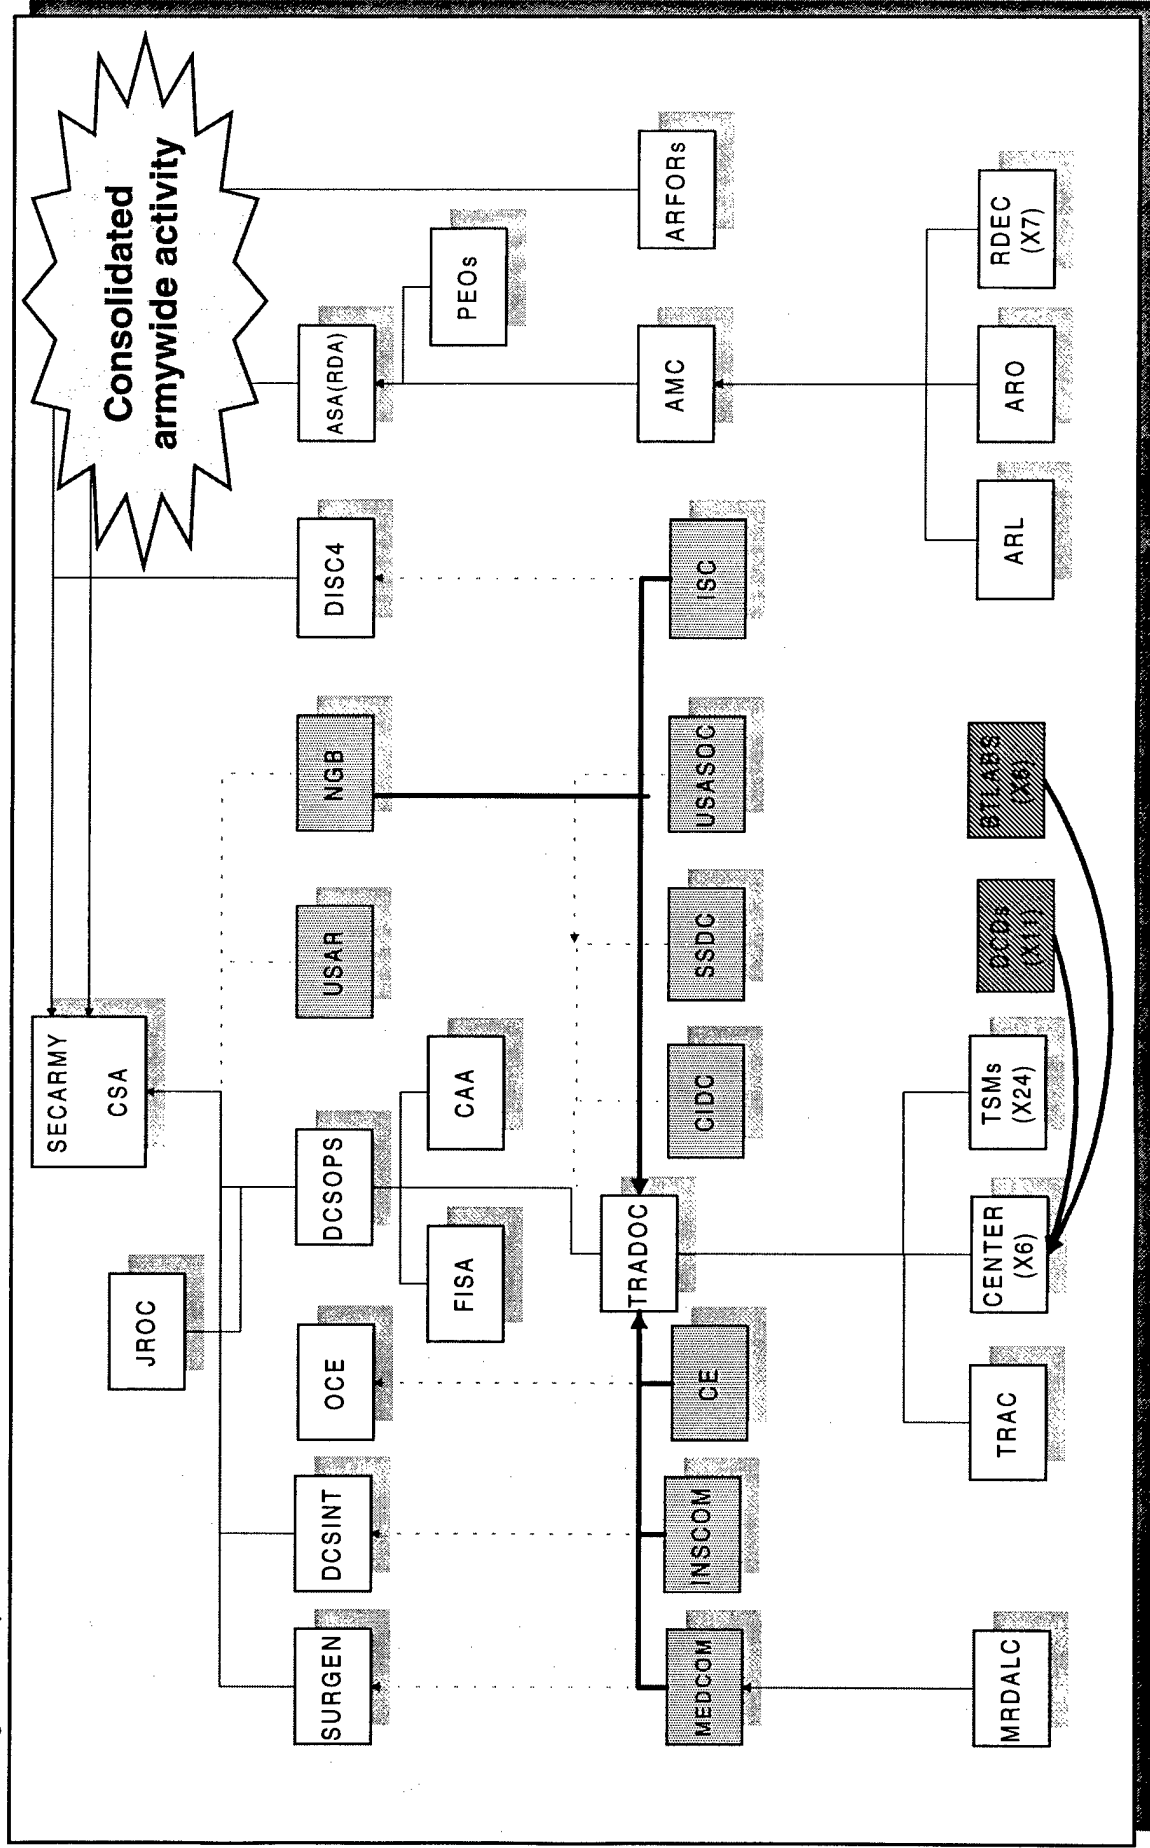

## **Cons:**

- Potential loss of touch with subject matter experts
- Loss of control by MACOMs/DA staff

Org & Mat Rqmt Det

# O&M Organizations Total Revision

# ***Total Revision - Consolidate Army CD Activity Alternative Costing***

## **Manpower**

**Base Case**   **Alternative**

**FY - Authorizations:**  
**96 - 3,673**

**Dollars (\$M)**

**Base Case**   **Alternative**

**FY- MPA/OMA/RDTE**  
**96 - \$288M**

**Potential savings unknown  
at this time.**

## **Enabling Investment:**

- DSI T1 connectivity available to all CD sites.
- Enhancements may be required.

# ***Significantly Smaller/Different - Enhanced TRADOC***

## **Current:**

- Combat developer and materiel developer exist in separate organizations.
- HQDA serves as approval authority for major/selected systems.
- ARFOR Commanders communicate requirements to HQDA.

## **Proposed:**

- Consolidate materiel developer in TRADOC to create a concept up to production command.
- Acquisition would remain a responsibility of the AMC/A&E structure.
- O&M solution decision authority vested in TRADOC.
- ARFOR communicate requirements to TRADOC.

## **Pros:**

- All DTLOMS solution approval authority in one command.
- Enhances JWCA and JROC
- Potential manpower savings
- Expands view to include corps & above
- Easier user interface

## **Cons:**

- Potential loss of touch with subject matter experts
- Loss of control by MACOMs/DA staff
- Major changes in proponentcy
- Major changes in roles and missions

**Rejected - Not Plausible**

Org & Mat Rqmt Det

# O&M Organizations Significantly Smaller/Different

- "S&T" integrated with consolidated CD
- Single solution decision authority

# **Significantly Smaller/Different - Enhanced TRADOC Alternative Costing**

## **Base case manpower expanded to include:**

<b>AMSAA</b>	<b>393</b>	<b>Mil and civ</b>
<b>ARL</b>	<b>2,766</b>	<b>Mil and civ</b>
<b>ARO</b>	<b>119</b>	<b>Mil and civ</b>
<b>RDECs</b>	<b>11,163</b>	<b>Civ only; mil auth unavailable</b>
<b>Remainder of SSDC</b>	<b>1,100</b>	<b>Mil and civ</b>
<b>COE (Rsch Lab)</b>	<b>1,211</b>	<b>Mil and civ</b>
<b>MEDCOM (USAMDA)</b>	<b>56</b>	<b>Mil and civ</b>
<b>Remainder of CAA</b>	<b>163</b>	<b>Mil and civ</b>

**Potential savings  
unknown  
at this time.**

## **Enabling Investment:**

- DSI T1 connectivity appears to be available to all CD sites.
- Enhancements may be required.

Org & Mat Rqmt Det

# Conclusions

- Document "Materiel Requirements Determination" process as developed over last two years.
- Support CORM recommendation to restructure PPBES; incorporate measures to accommodate documented process.
- Accelerate TAA process to annual basis.
- Reduce MTOE process to annual basis.
- Eliminate DA review from TOE process; have OI attend FISA Review Board.
- Explore feasibility of combining TOE and MTOE.
- Implement Part 1 of Organize (TDA) process changes.
- Phase II
  - Plan/implement consolidation of Army CD activity in TRADOC.
  - Continue detailed study of organize function
    - mission implications of TOE/TDA mix
    - efficiencies in TDA process.

# Issue: Regulations

**TITLE 10 Function/Process:** Organize and Materiel Requirements Determination

**TDA Core Competency:** Organize, train, equip, provide and sustain the land component of the combatant commander's joint/multi-national force

**Product:** Organizational Documents and Materiel Requirements Documents

**Customer:** Combat Development, Materiel Development, and Acquisition communities; DA activities

**Issue:** Many regulations need to be updated and consolidated. Why maintain separate regulations for related aspects of a functional area? Timing is critical to this effort.

# Issue: Approval/Prioritization of Requirement Documents

**TITLE 10 Function/Process:** Organize and Materiel Requirements Determination

**TDA Core Competency:** Organize, train, equip, provide and sustain the land component of the combatant commander's joint/multi-national force.

**Product:** Organizational Documents and Materiel Requirements Documents

**Customer:** Combat Development, Materiel Development and Acquisition communities and DA activities

**Issue:** Who should approve or disapprove, and prioritize requirements documents (e.g. MNS/ORD)?

# Issue: Significance of CD-MD Friction

**TITLE 10 Function/Process:** Organize and Materiel Requirements Determination

**TDA Core Competency:** Organize, train, equip, provide and sustain the land component of the combatant commander's joint/multi-national force.

**Product:** Organizational Documents and Materiel Requirements Documents

**Customer:** Combat Development, Materiel Development and Acquisition communities and DA activities

**Issue:** Is back and forth friction (concept - S&T - requirement - etc.) between Combat Development and Materiel Development significant enough to warrant major reengineering (beyond the institutionalization of the integrated product team approach)?

# Issue: CINC, ARFOR Requirements

**TITLE 10 Function/Process:** Organize and Materiel Requirements Determination

**TDA Core Competency:** Organize, train, equip, provide and sustain the land component of the combatant commander's joint/multi-national force.

**Product:** Organizational Documents and Materiel Requirements Documents

**Customer:** Combat Development, Materiel Development and Acquisition communities and DA activities

**Issue:** Should CINC, ARFOR requirements continue to enter the system through HQDA?

# REDESIGN OF THE INSTITUTIONAL ARMY

## *Information Briefing*

VCSA

*November 29, 1995*

# **This is an Information Briefing for the VCSA to set the stage for the Organize, Doctrine, Training and Leader Development FAA to be conducted by TRADOC on 1 December 1995**

# Organize FAA

## “Develop Requirements” Process

# What's wrong with the current Process ?

---

## Customer

- Customers not clearly defined
- Products not clearly defined
- Process not “holistic” TOE - TDA
- Process too slow (force generation)

## Process Owner

- Multiple “process owners”
- Multiple “hand-offs”
- Process is manpower and time intensive
- Resources not tied to product nor process

# Develop Requirements

## Measures Standard

<p><i>Establish Direction</i></p> <ul style="list-style-type: none"> <li>• CINCs Strategy (JSPS)</li> <li>• JT/DF NMS</li> <li>• MACOM s(ASCC) - The Army Plan (TAP)</li> </ul>	<p><i>Effectiveness</i></p>	<p><i>Performance</i></p> <ul style="list-style-type: none"> <li>• Joint Strategy Review (JSR)</li> <li>• Defense Planning Guidance (DPG)</li> <li>• Issues addressed in TAP</li> </ul>
<p><i>Acquire Assets</i></p> <ul style="list-style-type: none"> <li>• CINCs Integrated Priority Lists (IPLs)</li> <li>• JT/DF CPA/PDM</li> <li>• MACOM POM</li> </ul>	<p><i>Effectiveness</i></p>	<p><i>Performance</i></p> <ul style="list-style-type: none"> <li>• CINCs Preparedness Assessment Report (CSPAR)</li> <li>• Chairman's Program Assessment (CPA); PDM</li> <li>• MACOM PARs</li> </ul>

*Efficiency*

Minimize Use of Resources

- Minimize Process Hand-offs
- Eliminate Redundancies

# Develop Requirements

## Establish Direction

## *“to be”*

- HQDA establish a Director for Force Structure, Resources & Assessments (A-8)[DAMO-FD(-); PAED; CAA]
  - DCSREQ (single Army agency for program requirements and interface with J-8)
- Consolidate all MACOM Force Development functions in TRADOC
  - ISC; INSCOM; CIDC; SSDC; MEDCOM; SOCOM; USAR; ARNG; DAMO-FD(-)/FISA
  - S&T from AMC to TRADOC
- Transfer all Force Development functions/divisions/FOAs/SSAs to the “Force Development Command” [TRADOC]
  - a single Army MACOM responsible for design thru documentation

# Develop Requirements

## Acquire Assets

### PROCESS

Acquire the -  
personnel, materiel  
and facilities  
necessary to create  
TOE/TDA units:

- TOE Staffing
  - FDU
  - BOIP
  - QQPRI
- TDA Staffing
  - MS3
  - BMG
- TAA
- SACS
  - TAEDP
  - REQVAL
  - PMAD
  - ASIP

### ORGANIZATIONS

- OSD
- JCS
- CINCs

- HQDA
  - A-8

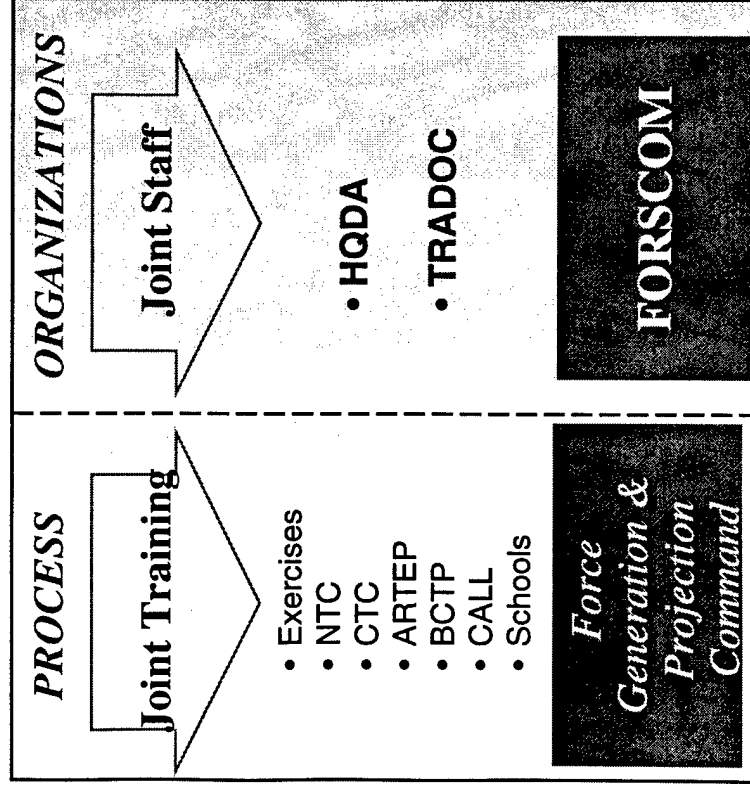

- TRADOC
  - Battle Labs
  - S & T

## “to be”

- Army “A-8” justifies Army requirements (programs) in terms of JROC/JWCA and CINCs operational requirements
  - Provides input (direction) to Army CBRs
- The Force Development command (TRADOC) establishes a doctrinal link, across DTLOMS, to define requirements (TOE & TDA), concept base, doctrinally sound Land Force capability for the CINCs
  - Visionary Future “concepts, doctrine and structure”
- TAA, SACS, TAADS done on-line (nearly real time)

# Develop Requirements

**Provide  
Capability**

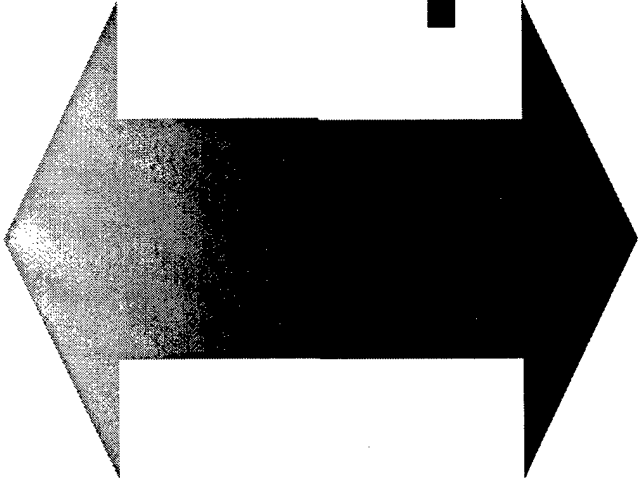

**“to be”**

- HQDA, Director for Force Structure, Resources & Assessments, (A-8) establishes the link between Joint requirements and Army requirements
- The Force Development command (TRADOC) establishes:
  - FDU continuously on-line (TOE/TDA)
  - TAA “on demand”
  - CENDOC “on-line”
  - Doctrinal TPFDD “on demand”
- The Force Generation Command (FORSCOM)
  - “Assembles” the product
  - Process owner for Unit Training
  - Process owner for adjusting doctrinal TPFDD to CINC TPFDL(sourcing)
  - Projects the required operational capability (TPFDL) to given supported CINC.
- Joint Training is the “feed-back loop” for tying JROC/JWCA and Army Force Structure to CINCs required operational capability

# Develop Requirements

## Prioritization of Process Changes

Easy/Cheap/Early	<u>Action</u>	<u>TRADOC</u>	<u>Experiment</u>
	•	HQDA Requirements Process Owner	+
	•	TRADOC Force Development Owner	+
	•	TRADOC DOC/CD Merged	-
	•	TAA; SACS; TAADS "On-line" WWW	+
	•	Move DAMO-FD(-) to TRADOC	+
	•	Battle Labs process to CBRS	+
		Tie JWCA to Force Development	-
Hard/Expensive/Later	 Requires JCS/OSD approval

# Base Case Assessment Training Processes

## ➤ Initial Entry Training

Assessment: Produces well trained soldiers

Work in Progress:

- Leveraging RC support with conversion to Echo Company concept from Pro-Train
  - Potential savings by reducing BCT sites and aligning with Center concept
- ## ➤ Functional courses

Assessment: New requirements resourced by taking from existing courses

## ➤ Total Army School System (TASS)

Assessment: Region C pilot implemented

Work in Progress:

- Refining Region C
- Standing up other regions
- Developing requisite TATS courseware

• Tng & Ldr Development

# Base Case Assessment

**Provides summary of:**

- **Process assessment**
- **Work in progress**
- **Disconnects in the processes**

Tng & Ldr Development

# Base Case Assessment

## Leader Development Processes

### ➤ Precommissioning

#### Assessment:

- Produces top quality officers qualified in OFS I.

#### Work in Progress:

- CSA approved reductions for ROTC.
- RC support to ROTC Camps
- Military Leader Development (OES, NCOES, WOES)

#### Assessment:. Small Group Instruction produces quality leaders.

#### Work in Progress:

- Revising timing and location of OES training through CPT's PME study. Aligns with roles of centers and satellites.
- Combat Arms BNCOC consolidation effort.

# Base Case Assessment Training Processes (cont)

## Combat Training Centers (CTC) “School of Practice”

### Assessment:

- Quality training and feedback conducted including some joint and combined training
- Shared responsibilities between TRADOC, FORSCOM and USAREUR for CTC mission execution

### Work in Progress:

#### • Development of CTC Master Plan/CTC Futures

- ❖ Links CTCs to Institutional training base
- ❖ Leverages/incorporates lessons learned into Institutional training base
- ❖ Targetry/instrumentation modernization/upgrade.
- ❖ OC participation in Institutional training base LD process.

# Base Case Assessment

## Training Development and Support Processes

### ➤ Training Development

#### Assessment:

- Training Development not standardized across MACOMs
- Processes under funded with substantial backlog

### ➤ Training Support to Operational Forces

#### Assessment:

- Mobile Training Teams successful but not fully resourced
- Increased impact of simulators and simulations on tactical operations

#### Work in Progress:

- DA sponsored Training Development Fix Task Force
- Technology Integration
  - ✦ Distance Learning
  - ✦ Conversion from paper to electronic media in process
  - ✦ Automated testing and diagnostics
  - ✦ Automated Libraries

# Base Case Assessment Leader Development Processes

## ➤ Civilian Education System

**Assessment:** Lacking core competencies and inconsistent training opportunities across MACOMs

### **Work in Progress:**

- Leadership Core Assessment
- AMSC/SSC requirements study
- Developing ACTED plans to cover additional career fields
  - ❖ Requirement for 54 plans identified, 25 developed and approved; approximately 10 plans projected for development FY 96

Tng & Ldr Development

# Base Case Assessment

## Process Disconnects:

- **Institutional training and civilian leader development not prioritized consistently across MACOMs**
  - Require criteria/strategy for downsizing courses (readiness, warfighting, leader development): OBC FTXs vs case studies in Operations Research Systems Analysis Course at ALMC
  - Require strategy for determining priority between courses: Manpower and Force Management (ALMC) vs Bradley Leader's course vs USMA armor training vs Ammunition Maintenance (Defense Ammunition School)
- **Diffused institutional training command and management**
  - Duplication of courses: AMEC vs Signal and ALMC (ex: Automation/Contracting/Logistics)
  - Institutional training efforts not standardized or synchronized
- **Civilian training and leader development disjointed and not requirements based**
  - Civilian training managed/ administered locally by CPOs and inconsistently across MACOMs
  - OLE, PME and AMSC train by capacity/quota not requirement

## Tng & Ldr Development

17 Right

# Road to Envisioned End-state

---

- Centers developed around enduring battlefield functions tempered with organizing around current locations.
- Single institutional training resourcer consolidated at HQDA who provides prioritization guidance and resources for all military and civilian institutional training and leader development.
- Single institutional training command responsible for institutional training.  
(linked to USMA, IG, AMEDD, AWC, TJAG, SWC, USA CHPPM)
- Single automated system to document, schedule, record and resource all institutional training requirements and courses.

Tng & Ldr Development

# Base Case Assessment

## **Process Disconnects:**

- **Institutional training resourcing not fully connected to training requirements**
  - Resources declined disproportionately to load/requirements
  - SMDR process, budget process and personnel cycle not synchronized
  - Unresourced load increases
  - Supporting training development and training support not fully resourced
  - Instructor Certification not included in resourcing models
- **Automated institutional training management system inadequate**
  - All courses not included (Reserve Component, Civilian training)
  - Linkage incomplete (unit scheduling systems, ASAT, DOD TRAIN module)
- **Institutional training assessment requirement not resourced**
  - Army-wide school assessment and standardization assets nonexistent

Tng & Ldr Development

# Alternatives

- **TRADOC XXI (Alternative 1)**
  - Focus on internal TRADOC redesign

- **Total Revision (Alternative 2)**
  - Army-wide institutional training realignment
  - Alternative builds on TRADOC XXI

- **Significantly Smaller (Alternative 3)**
  - Incorporates Total Revision alternative while reducing footprint

Each alternative  
incorporates  
TRADOC Commander's  
1995 Strategic Plan

# Road to Envisioned End-state

---

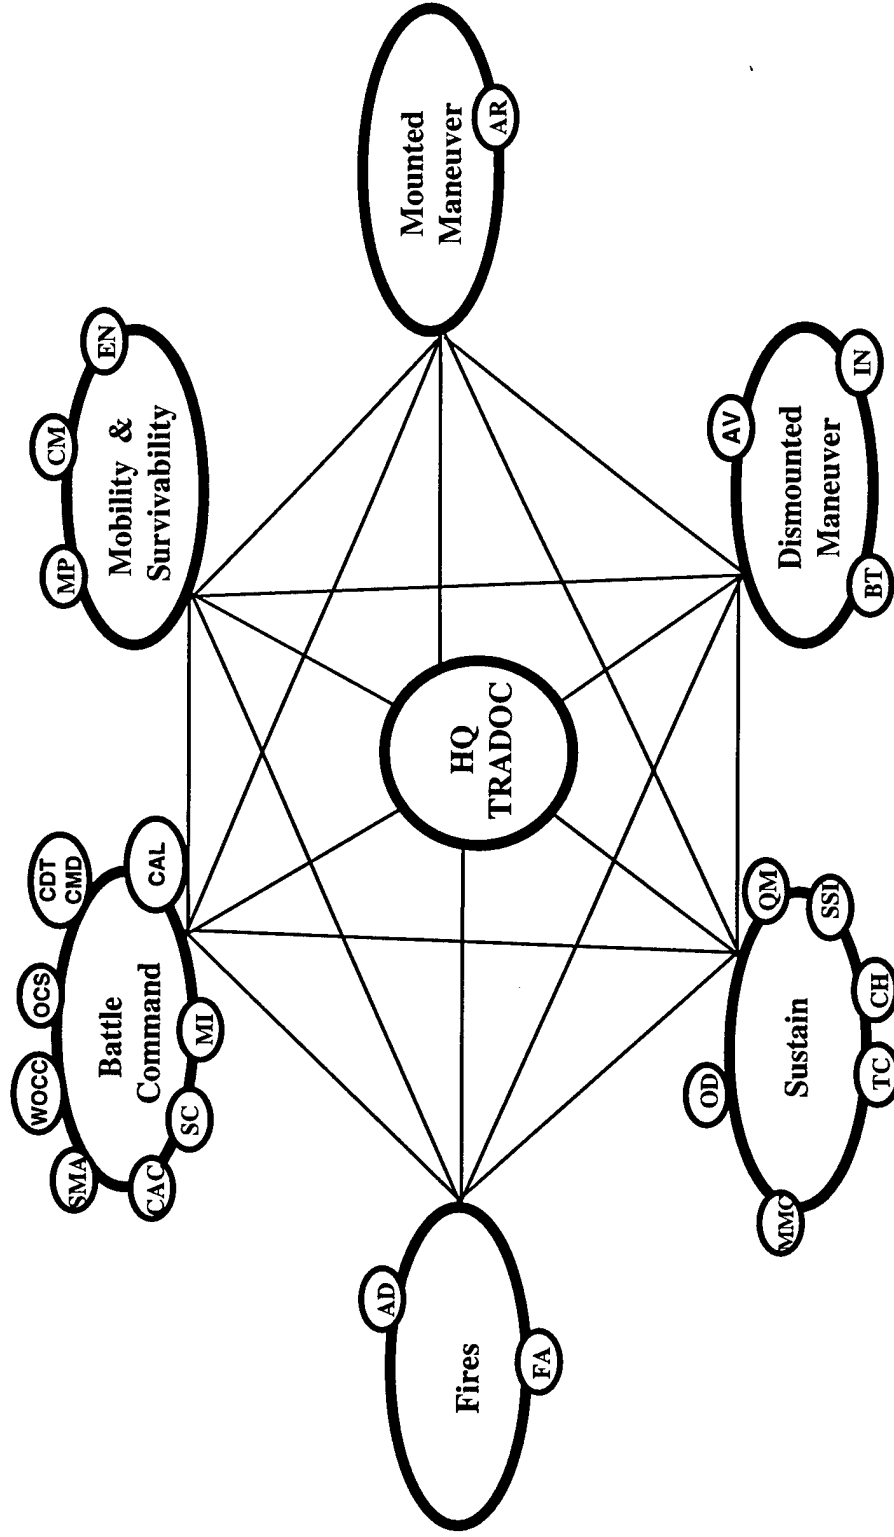

- **Training assessment function resourced to meet standardization and feedback requirements.**
- **Training development process standardized for all institutional training.**
- **TASS fully implemented.**
- **Economies of consolidation where feasible.**

Tng & Ldr Development

# Alternative 1 TRADOC XXI

## Enduring Battlefield Functions

Tng & Ldr Development

1. The purpose of this document is to provide a framework for the development of the Tng & Ldr Development program. This document will serve as a guide for the development of the program and will be used to ensure that the program is developed in a consistent and effective manner.

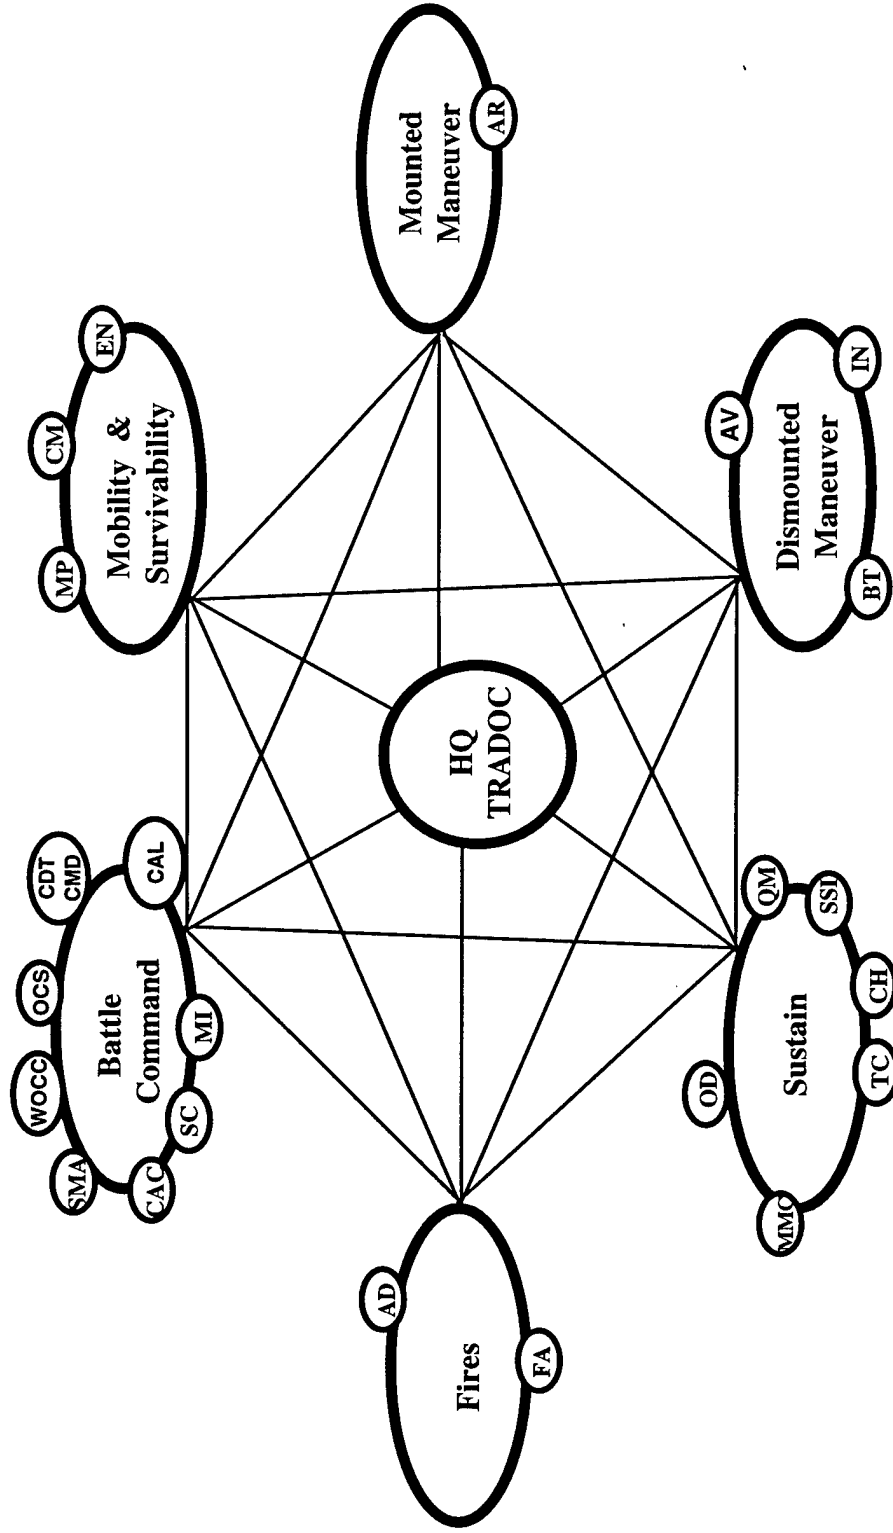

Alternative 1

# TRADOC XXI

## Enduring Battlefield Functions

Tng & Ldr Development

# Alternative 1 TRADOC XXI Process Changes

## **Key Enabling Investments:**

- **Increased emphasis on distance learning.**
- **Complete implementation of TASS.**
- **Classroom XXI implementation.**
- **Digitized courseware.**
- **CTC/OC linkage to schools.**

# TRADOC XXI

## Investment Strategy FY 2010

### Capitalization/Modernization Annual Investment 97-10

- MA:** > Total Army Tng Sighs Courseware  
> Digitization of Tng/Do products/pubs  
\$20-30M/yr > Connectivity/CommaVT.  
> Mod equip manta & lifecycle replacement  
> Tng Dev Backlog
- OPA:** > Modern high-tech equip for multi-media  
networking distance learning capability;  
\$10-15M/yr more efficient tng dev production and  
school admin.
- MCA:** > Increased cost of modernized classrooms  
requiring multi-media capability, additional  
\$15M/yr space, modern electrical service, enhanced  
environmental controls

FY 1996

Center

One-time costs:  
TDB

Requires Steady Stream of  
Investment

\$45 to \$60 Million per year  
across PALM years to 2010 with  
view for sustained investment

# Alternative 1 TRADOC XXI

## Process Changes (cont)

---

### **Manpower and other Economies**

- Echo company transition from Pro-Train.
- Reduced BCT structure/sites/ Drill SGT to student ratio.
- Proposed changes for Professional Military Education of Captains study.
- Leader development study
- Branch specific skills and education at satellites.  
(OBC, BNCOC, OSUT, AIT)

Tng & Ldr Development

# Alternative 1 **TRADOC XXI**

## **Advantages**

---

- + Incorporates TRADOC Cdr's Strategic plan
- + Focuses future investments and leverages key enabling investments
- + Provides for economies of consolidation within centers
- + Provides partial source of resources for recapitalization
- + Reduces BCT overhead costs and enhances standardization
- + Integrates RC capabilities more fully into daily rhythm of institutional training
- + Simplifies structure while maintaining flexibility
- + Outsource training where cost effective within TRADOC

# Alternative 1 TRADOC XXI Benefits/Savings

## Enhanced/Increased Capability

- Global access to training when and where needed.
- Student-centered training through active learning.
- Global access to training information and feedback (digital and live).
- Timely training distribution and updates.
- Reduced resident training requirement at TRADOC Schools (smaller TTHS). Improved personnel readiness.
- Reduced cost for personnel, materials, student management.
- Continuous training assessment.
- Efficient and effective training material development.

## FY 2010 Steady State Cumulative

### Savings

OMA (Msn & Basops)    \$90-120M  
TTHS account            10-20%

Dollar and space savings used  
for meeting estimated program  
reductions and generating  
resources for recapitalization

### Spaces

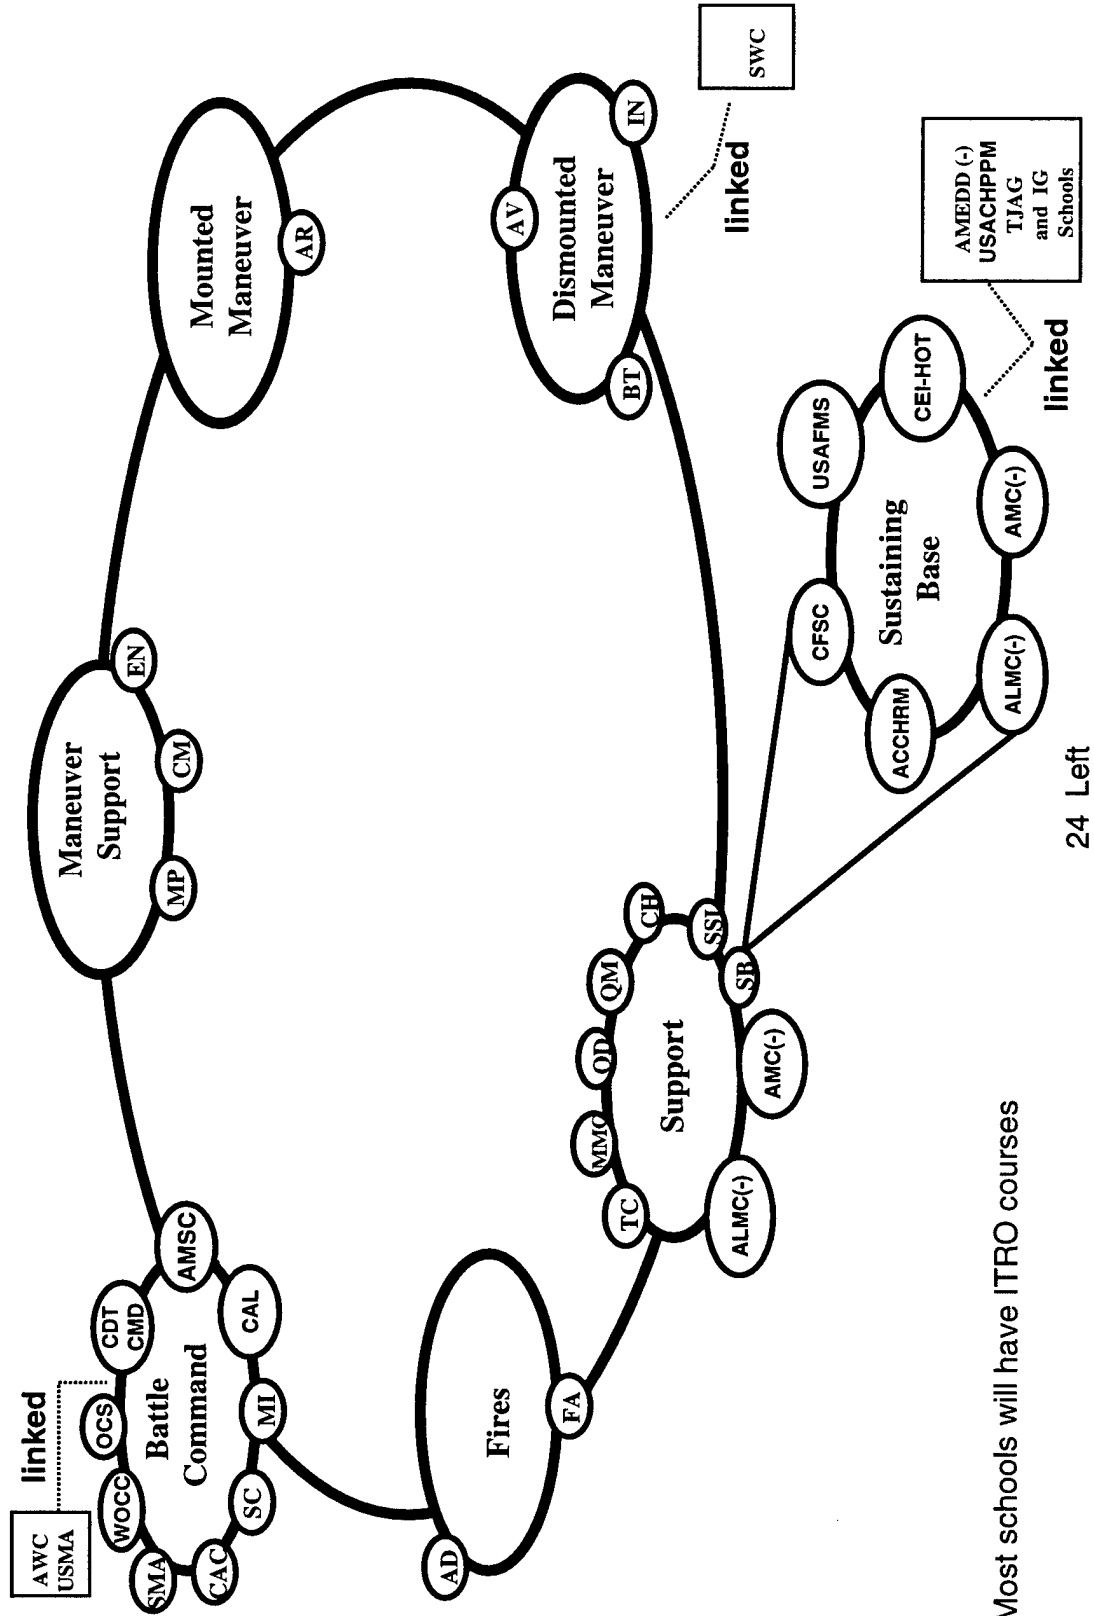

Military spaces            3% to 6%  
Civilian spaces            5% to 7%  
TTHS account            10-20%

# Alternative 2

## Total Revision

### Institutional Training

➤ Most schools will have ITRO courses

Tng & Ldr Development

Alternative 1

# TRADOC XXI

## Disadvantages

- Remainder of sustaining base training and civilian training and leader development issues unresolved
- Fails to provide clear institutional training and leader development prioritization
- Institutional training command/management remains diffused
- Institutional training resourcing remains disconnected
- Automated institutional training management system does not include all institutional training

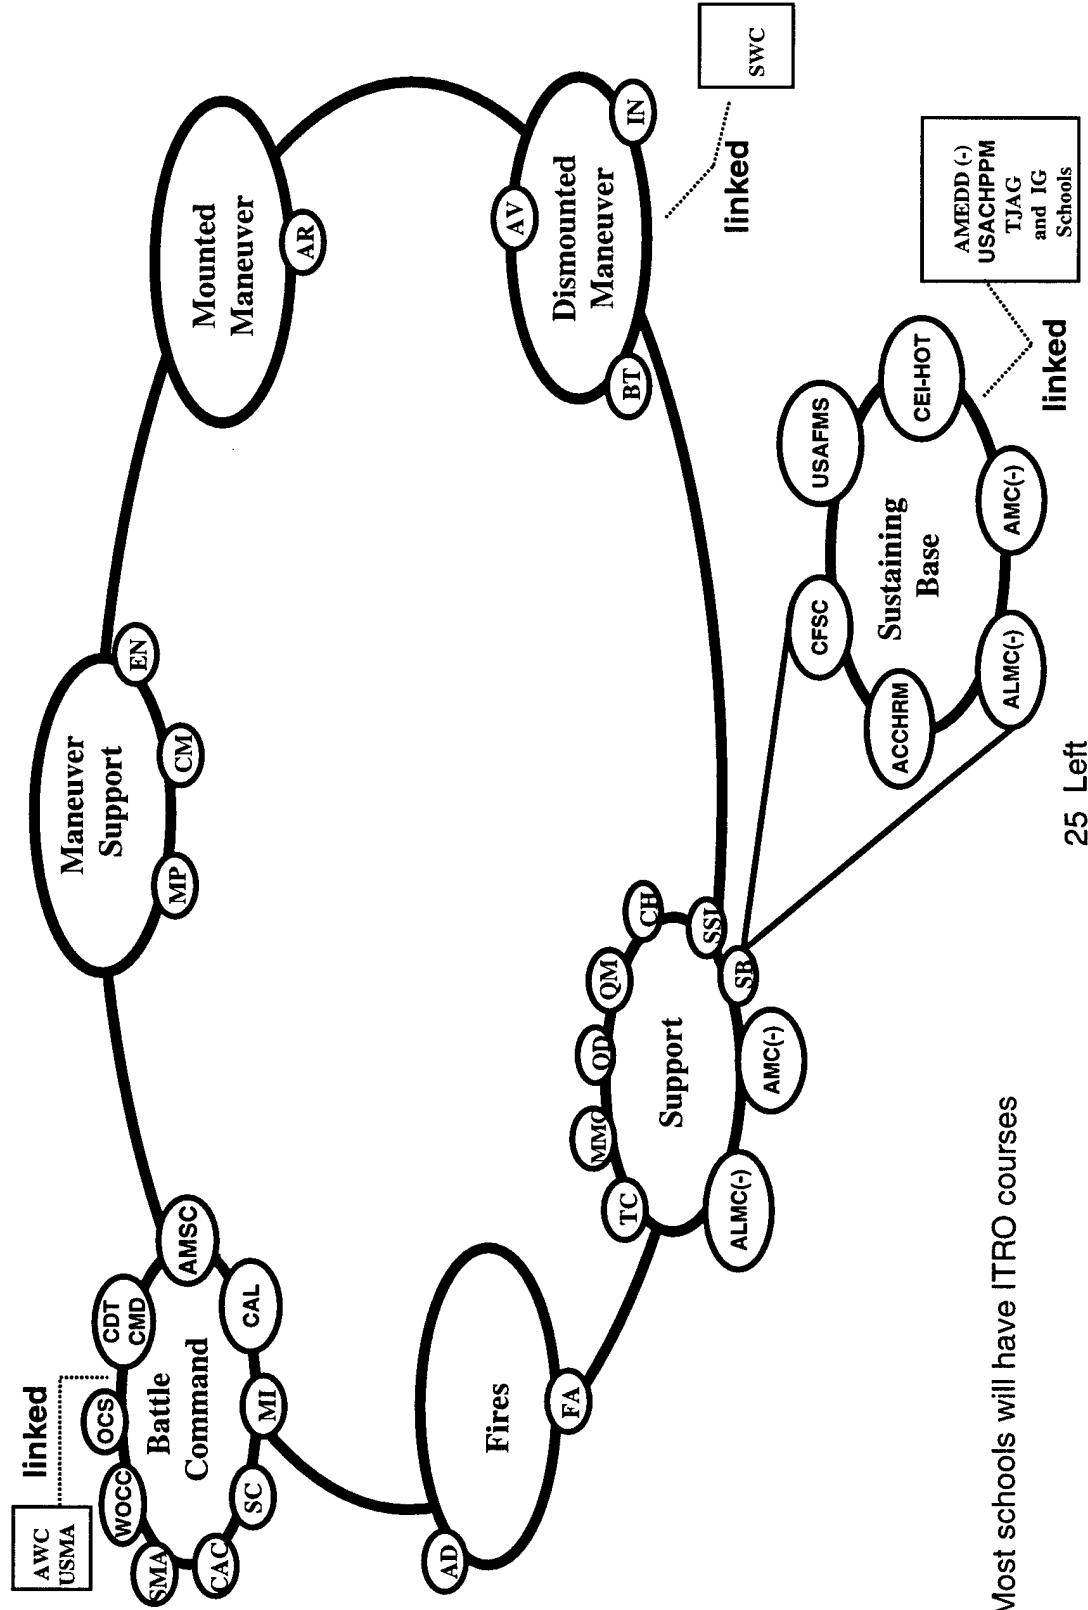

Tng & Ldr Development

# Alternative 2

## Total Revision

### Institutional Training

➤ Most schools will have ITRO courses

25 Left

Alternative 2

# Total Revision

## Process Changes

- **Incorporates all process changes from TRADOC XXI Alternative.**
- **Establishes Single Institutional Training Resourcer at HQDA to provide prioritization guidance and resourcing.**
- **Establishes Single Institutional Training Command which conducts majority of institutional training. Includes TRADOC, AMC schools and other sustaining base schools and is linked to USMA, AWC, SWC, AMEDD, TJAG, and IG schools.**
- **Integrates military and civilian training and leader development reducing redundant functions between ASA (M&RA) civilian training, DCSOPS training, CAL and TRADOC.**

Tng & Ldr Development

Alternative 2

# Total Revision

## Investment Strategy

FY 2010

### Capitalization/Modernization\*

Expands investments listed in TRADOC XXI  
(Alternative 1)

OMA = \$24M - 36M/yr

OPA = \$12M - 18M/yr

MCA = \$18M/yr

\* Minor savings  
but enables  
modernization  
to be properly  
focused

FY 1996

Center  
One-time costs:  
TBD

Sustaining Base Satellite  
Costs:  
TBD

Requires Steady Stream of  
Investment

\$54 to \$72 Million per year  
across POM years to 2010 with  
view for sustained investment

Alternative 2

# Total Revision

## Process Changes (cont)

---

- Aligns civilian leader development with Battle Command Center.
- Aligns ALMC, AMEDD and AMC schools with Support Center and Sustaining Base Satellite.
- Comprehensive Automated Training Management System that documents, schedules, records and resources all institutional training requirements and courses.
- Training development process standardized for all institutional training.
- Training evaluation resourced to meet standardization, feedback and assessment requirements.

Tng & Ldr Development

Alternative 2

# Total Revision

## Advantages

---

- **Incorporates all advantages of TRADOC XXI alternative:**
  - + **Incorporates TRADOC Cdr's Strategic plan**
  - + **Focuses future investments and leverages key enabling investments**
  - + **Provides for economies of consolidation within centers**
  - + **Provides partial source of resources for recapitalization**
  - + **Reduces BCT overhead costs and enhances standardization**
  - + **Integrates RC capabilities more fully into daily rhythm of institutional training**
  - + **Simplifies structure while maintaining flexibility**
  - + **Outsource training where cost effective within TRADOC**

Tng & Ldr Development

Alternative 2

# Total Revision

## Benefits/Savings

### FY 2010 Steady State Cumulative

#### Savings

OMA (Msn & Basops) \$90-120M  
TTHS account 10-20%

Dollar and space savings used  
for meeting estimated program  
reductions and generating  
resources for recapitalization

### Enhanced/Increased Capability

- Includes Enhancements from Alternative

#1

- Civilian training model transitioned to match Military model
- Increased unity of command

#### Spaces

Military spaces 3% to 6%  
Civilian spaces 5% to 7%  
TTHS account 10-20%

Alternative 2

# Total Revision

## Disadvantages

---

- Increases near-term turbulence
- Increases span of control for “Support” Center commander

Tng & Ldr Development

Alternative 2

# Total Revision

## Advantages (cont)

---

- **Aligns training management at DA level with MACOMs**
- **Center/Satellite System established for sustaining base training**
- **Enhances civilian training and leader development with integration with military counterparts**
- **Incorporates most institutional training in single command**
- **Expands leveraging contracting/outourcing**
- **Provides long term personnel and dollar savings**
- **Provides better automated training management**

Tng & Ldr Development

# Recommendation

## Alternative 2: Total Revision of Institutional Training

**But...**

**If nothing else happens, the following can and must be done:**

- Establish single institutional training resourcer at HQDA for all mil & civ institutional tng and LD
- Establish single automated training management system incorporating all mil & civ institutional tng and LD
- Standardize TD Process
- Incorporate all civilian leader development schools in single institutional training command
- Resource KEI for Distance Learning/Classroom XXI

# REDESIGN OF THE INSTITUTIONAL ARMY

## *Information Briefing*

VCSA

*November 29, 1995*

**This is an Information Briefing  
for the VCSA to set the stage for  
the Organize, Doctrine, Training  
and Leader Development FAA to be  
conducted by TRADOC on  
1 December 1995**

# Leader Development FAA

## “Identify and Develop Leaders” Process

## Assertion

---

The separation between the two core Army processes -- Identify and Develop Leaders and Acquire and Sustain People -- is artificial. The Campaign Plan addresses these and a third function, individual training, independently. Because training and educating people and developing leaders appears to be major sub-processes of the more generic process "Acquire and Sustain People," the Umbrella FAA will treat them all as one process.

# What's wrong with the current Process ?

---

## Customer

- Process not standardized (Mil/Civ)
- Products not equal (AC/RC)
- Artificial Separation of Leader Dev/  
Acquire & Sustain People Processes

## Process Owner

- Too many “process owners”
- Too many “hand-offs”

# Identify and Develop Leaders

	Measures	Standards
Customer	<p><i>Effectiveness</i></p> <p><i>Establish Direction</i></p> <ul style="list-style-type: none"> <li>• Comprehensive Leader Development Plans</li> </ul>	<p><i>Performance</i></p> <ul style="list-style-type: none"> <li>• Plan from Selection to Retirement (Mil &amp; Civ)</li> <li>• Standardize by Identity/Component</li> </ul>
	<p><i>Acquire Assets</i></p> <ul style="list-style-type: none"> <li>• Potential Leaders Selected by Determined Criteria</li> </ul>	<ul style="list-style-type: none"> <li>• Selection Based on Values-Ethics-Mental/Phys Fitness-Tech and Tact Competence</li> </ul>
	<p><i>Provide Capability</i></p> <ul style="list-style-type: none"> <li>• Competent Leaders Developed through Progressive and Sequential Assignments</li> </ul>	<ul style="list-style-type: none"> <li>• Qualified Leaders Selected for Appropriate Positions</li> <li>• Indiscipline Indices</li> <li>• Budgetary Stewardship</li> <li>• Organizational Training Standards</li> </ul>
Process Owner	<p><i>Efficiency</i></p> <ul style="list-style-type: none"> <li>• Minimize the Use of Resources <ul style="list-style-type: none"> <li>– Minimize Process Hand-offs</li> <li>– Eliminate Redundancies</li> </ul> </li> </ul>	<p><i>Performance</i></p> <ul style="list-style-type: none"> <li>• Time</li> <li>• Dollars</li> <li>• Manpower</li> <li>• Facilities</li> </ul>

# Identify and Develop Leaders

## Establish Direction

### PROCESS

- Leader Development Support System(LDSS)
  - Develop Leader Development Initiatives
    - Focus
    - Direction
  - Assess and Develop Leader Development Issues
    - Sr Leaders & Cmdrs
  - Develop Leader Development Action Plans for:
    - Officers
    - Warrant Officers
    - Non-Comm'd Officers
    - Reserve Components
    - Civilians

### ORGANIZATIONS

- TRADOC
  - DEP CMTD C&GSC
  - Center for Army Leadership
  - Leader Development Office

## “to be”

- Establish a single process owner (MACOM) of leader development -- reduce hand-offs
- Single process owner standardizes process tailored to the uniqueness of components
- Single process owner standardizes the format and direction of all LDAPs
- Process owner updates LDAPs using information technologies for issue development procedure
- Process owner establishes measures and is accountable for measures of effectiveness and efficiency
- Process becomes integral to the more comprehensive, generic process -- Acquire and Sustain People

# Identify and Develop Leaders

## Acquire Assets

### PROCESS

- LDSS
- Acquire - Identify Leaders Based Upon Assessing:
  - Values - Ethics
  - Fitness (ment/phys)
  - Tech & Tact Prof
  - Education
  - Experience
- Educate - Provide Leader Development Opportunities Through:
  - Institutional Education
  - Operational Experiences
  - Self-Development

### ORGANIZATIONS

- DoD
  - Sr Serv Col
  - JCS
- The Army University
  - USMA
  - AWC
  - Cadet Cmd
  - Schools/Acads
  - TJAG
  - Other Schools
  - Army Cmds/Units
  - Schools/Acads
  - MEDCOM
  - USAREC
  - ARNG Recruiters
  - USARF Schools
  - CPO
- PERSCOM
  - ARPERCEN
  - GUARDPERCEN
  - CIVPERCEN

## “to be”

- Single process owner (MACOM) establishes standards for acquiring/identifying officer candidates/cadets
- Process owner standardizes procedures for evaluating past performance and future potential as basis for selecting individuals (AC/RC) for further leader development opportunities -- officers, WOs, NCOs, & enlisted
- Process owner ensures standardization across army for selection of civilians for leadership development opportunities consistent with military leader development standards

# Identify and Develop Leaders

## Provide Capability

### PROCESS

- LDSS
- Educate and/or Provide Leader Development Opportunities Through:
  - Self Development
  - Institutional Education
  - Operational Experiences

### ORGANIZATIONS

- DoD
  - Senior Service Colleges
  - JCS
  - CINCs
- The Army University
  - Schools/Academies
  - Cadet Command
  - Units
  - USMA
  - AWC
  - Other Schools
- FORSCOM et.al.
  - Other Lifetime Educational and Experience Providers
  - Other Army Commands and Organizations

*“to be”*

- Process owner establishes procedures to ensure consistent, comparable AC and RC assignment opportunities can reduce the difference in the operational experience factor for the RC leader
- Process owner establish means to monitor and rapidly respond to performance standards when they are not being met

# Leader Development Spectrum

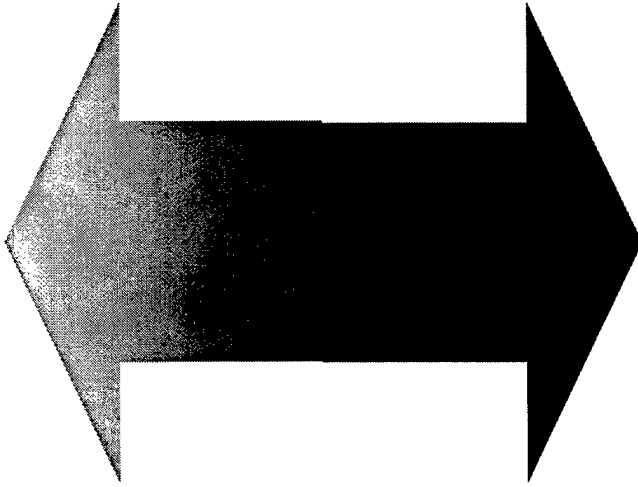

## AC/RC Leadership Solution

- ~ Provide Opportunities of AC Experience for RC Leaders at All Levels
- ~ RC Leaders are Fulltime Above Company Level
- ~ RC Units have Experienced AC Personnel in Units
- ~ Both AC and RC are Required to have Other Component Experience

# Identify and Develop Leaders

## Prioritization of Process Changes

<b>Easy/Cheap/Early</b>	<b>Action</b>	<b>TRADOC</b>	<b>Experiment</b>
	<ul style="list-style-type: none"><li>• TRADOC Ident &amp; Dev Leaders Process Owner</li></ul>	+	Analysis/Exercise
	<ul style="list-style-type: none"><li>• Move DAMO-TR(-) &amp; DAPE-HR-L(-) to TRADOC</li></ul>	+	Exercise
	<ul style="list-style-type: none"><li>• TRADOC Acq &amp; Sus People Process Owner</li></ul>	?	Analysis/Exercise
	<ul style="list-style-type: none"><li>• Develop improved RC Officer Development Program</li></ul>	?	Analysis/Exercise
<b>Hard/Expensive/Later</b>			

# Training FAA

## “Train Individuals” Process

# What's wrong with the current Process ?

---

## Customer

- Process very -- perhaps excessively -- manpower and time intensive
- Standards not evenly applied to

## Customers

- Process Owner doesn't manage all Products

## Process Owner

- Too many "process owners"
- Too many "hand-offs"
- Resources not optimized
- Resources not prioritized

# Train Individuals

## Measures Standards

<b>Customer</b>	<b><i>Effectiveness</i></b>	<b><i>Performance</i></b>
	<i>Establish Direction</i> <ul style="list-style-type: none"> <li>• Training Plans Consistent with Reqmts (Mil &amp; Civ)</li> </ul>	<ul style="list-style-type: none"> <li>• Executable within Resources</li> </ul>
	<i>Acquire Assets</i> <ul style="list-style-type: none"> <li>• Qualified Instructor/Capable Student</li> <li>• Trng Aids/Equip/Facilities Prepared</li> </ul>	<ul style="list-style-type: none"> <li>• Instructor/Student Meet Standards</li> <li>• Assets Available for Trng</li> </ul>
<b>Process Owner</b>	<i>Provide Capability</i>	<ul style="list-style-type: none"> <li>• Individual Trained to Perform at Expected Level</li> <li>• Individual Meets Standards Required for Assignment</li> </ul>

TATS/TASS  
AIMS-R  
POIMM  
ACPERS

### ORGANIZATIONS

- TRADOC (+)

## “to be”

- Improve ATRRS with input from REQUEST to require identity of education/training student load for all Army courses (AC/RC)
- Complete automation of formal training development process to automated systems approach to training (ASAT). Prioritize training development to meet all training loads, resident/non-resident, AC and RC
- Selection of civilians to be trained is accomplished by the supervisor/employer IAW standards set by TRADOC

# Train Individuals

**Provide  
Capability**

*“to be”*

- Create Army University under TRADOC
- Consolidate TRADOC training centers/ installations to eliminate redundancies in training/training support and installation requirements consistent with Battle Labs
- Contract or privatize appropriate training/schools - JAG, Chaplain, language, etc.
- Standardize and regionalize RC schools to maximize efficiencies (TASS)
- TRADOC conduct ROTC using RC officers and NCOs - conduct training on week-ends - reapply AC officers
- Use non-resident, correspondence courses, and distance learning for more training requirements (reduce resident training by one-third)
- Apply DIV (IT)s across total Army training requirements

PROCESS	ORGANIZATIONS

# Resident Training ‘Investment’

**TTHS**

“as is”

60K

**T R A I N I N G  
R E S I D E N T**

*Largely  
‘trainees &  
students’*

Up to  
One-third  
LESS  
Resident  
Training

“to be”

40K

**T R A I N I N G  
R E S I D E N T**

10K to  
20K  
For the  
“Operating  
Forces”

- Increase Course Content (more classes in same or fewer days)
- Reduce Resident Training Rqmnts
- Eliminate OAC or CAS3
- AWC (Use Navy Model - Attend Once MAJ - COL) Eliminate C&GSC
- Eliminate one of 4 Levels of NCOES
- Use more ACCP
- Use Distance Learning

# School Management Inefficiencies

## PROBLEM

Common core curriculum taught at 16 different Army Schools creates requirement for excessive, redundant instructor and management overhead.

## SOLUTION

Core curriculum taught at fewer, central locations. Increase the use of correspondence courses and distance learning. Options include aligning core locations with Battle Labs, Battlefield Functions, or the Power Projection Platforms.

*One analysis with the Army's Functional Approach to Warfighting alignment when combining OBC, OAC & AIT suggests a SAVINGS of 1525 Mil/Civ Spaces and up to \$50 Million*

# Efficiency in ROTC

**Resource the ROTC Mission with RC Officers and NCOs.**

**OPTION ONE - ROTC PMS/instructor/staff manned by AGR Officers and NCOs, instruction conducted as it is today.**

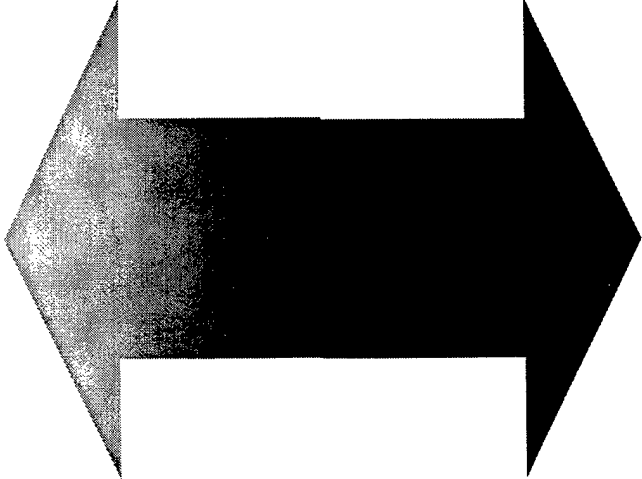

**OPTION TWO - Manned by M-Day Officers and NCOs, instruction conducted as it is today**

**OPTION THREE - Manned by M-day Officers and NCOs, instruction conducted in RC drill status.**

***SAVINGS OF UP TO ONE-HALF OF CURRENT ROTC COST  
> \$ 100 MILLION and RETURN OF MOST AC OFFICERS AND  
NCOs (2500) TO THE OPERATING FORCES***

# View From the Top

---

**“Information systems  
constitute the single  
most important  
technology that can give  
U.S. warfighters the  
upper hand in regional  
contingencies.”**

**Information  
is a  
Strategic  
Resource**

Secretary of Defense William J. Perry,  
“Regional Contingency Dangers Command  
Dependable Agile Information Systems,”  
NATIONAL DEFENSE, July/August 1995

# Managing Information for the 21st Century Warfighter

---

**The Business is  
Changing**

Today's High Tech =  
Tomorrow's  
Housekeeping

**Information is the  
Strategic Resource**

The Power is in  
the Information

***Need to Refocus  
from Managing Equipment  
to Managing Information  
for the Battlefield***

**Information Integration and  
"Jointness" Dominate the Future**

# IM on the Battlefield

## Flexibility

- Ability to Adapt to Spectrum of Missions
- Engineer Solutions "On-The-Fly"

## Connectivity

- Voice, Data, Video, Imagery
- Information Systems

## Availability

- Right Information
- When Needed
- Supporting Infrastructure

Mobile

Subscriber  
Equipment  
Network

FM Radio  
Nets

# New Environment

**FORCE**

- Power Projection
- Battlefield Operations
- Split Base Operations
- Sustaining Base Links

**Need Common  
Architecture and  
Standards to Make  
Sure it Works**

# The Information Highway

# Policy and Architecture are Critical

---

- Someone Must Develop and Control the Technical “Master Plan” to Ensure:
  - Communications and Automation are Integrated
  - Data is Shared Across Functions and Networks
  - Configuration Control is Maintained
- If Not, You Spend Lots of Money, and the Pieces Don’t Fit Together...

# Others Share the Same Concerns

**Congress**

**Cohen  
Amendment**

**Chief Information Officer (CIO)**

- Information Expertise
- Functional to Technical Translation
- Prioritize IM Requirements
- IM Oversight
- Authority Over IM Technology Acquisitions

**CIO are at the  
TOP of Industry**

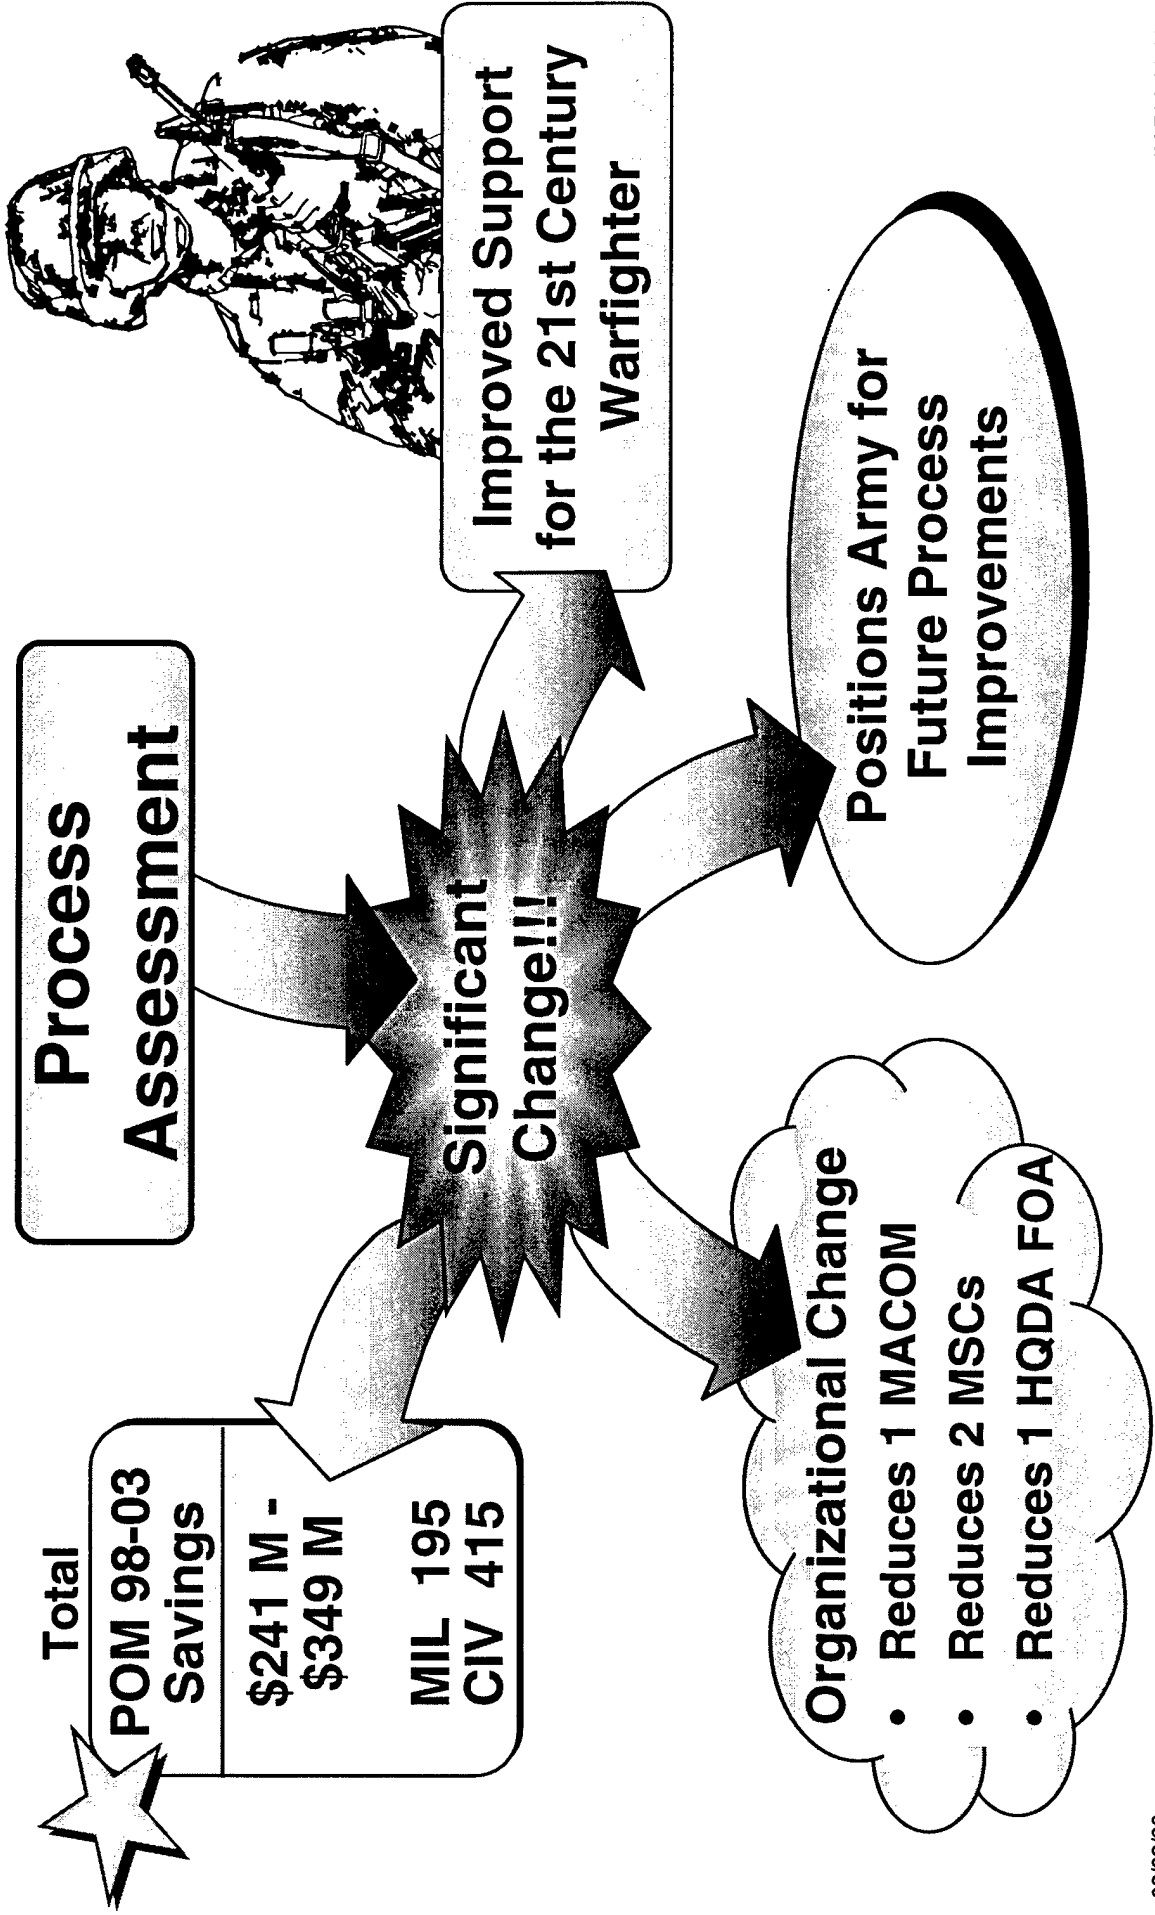

**Air Force  
and Navy  
Want to  
Know Our  
Approach**

# Signal Organization Mission Alignment (SOMA) Direction

## VCSA Memo to DISC4

- Examine ISC Realignment
- Examine Roles and Missions - Force XXI
- Identify Duplication and Redundancy
- Make Recommendations

## New CSA and VCSA Guidance

- Validated Original Guidance
- Expect Strong DISC4 Role in Policy, Control, and Enforcement
- Investigate Elimination of Units/Commands
- Expect Efficiencies/Savings

## SOMA Principles

- Focus on the Warfighter
- Structure for Force XXI
- Maintain Operational Support Throughout Transition/Reorganization
- Focus on Core Competencies
- Consolidate Functions for Seamless Support - Sustaining Base to Foxhole
- Be Sensitive to People Impacts

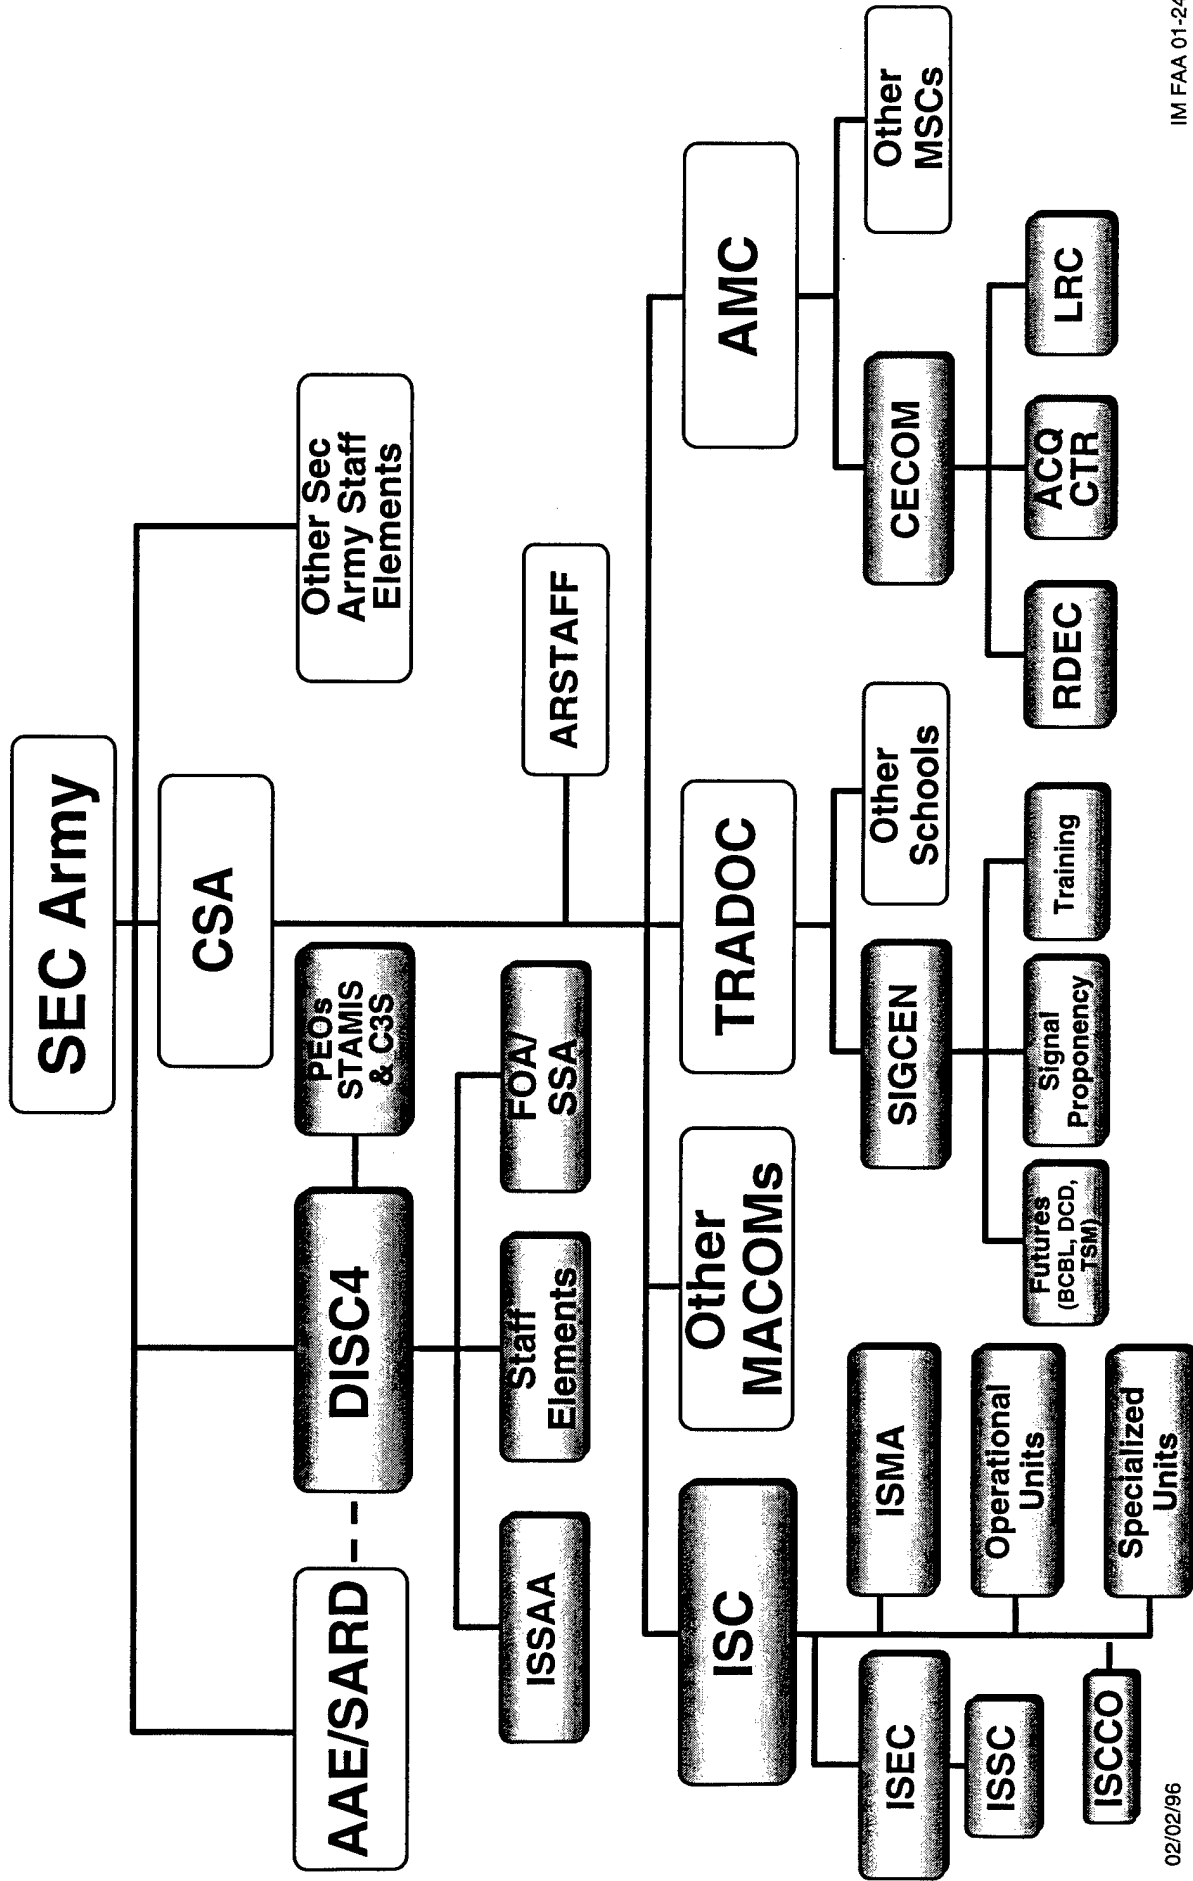

## Effort Refocused at ISC Re-Engineering Briefing

- Not a Bogey Drill
- Concentrate on Core Priorities/Capabilities - Force XXI
- Evaluate Areas for Divestiture and Privatization
- Expand Effort to IM FAA

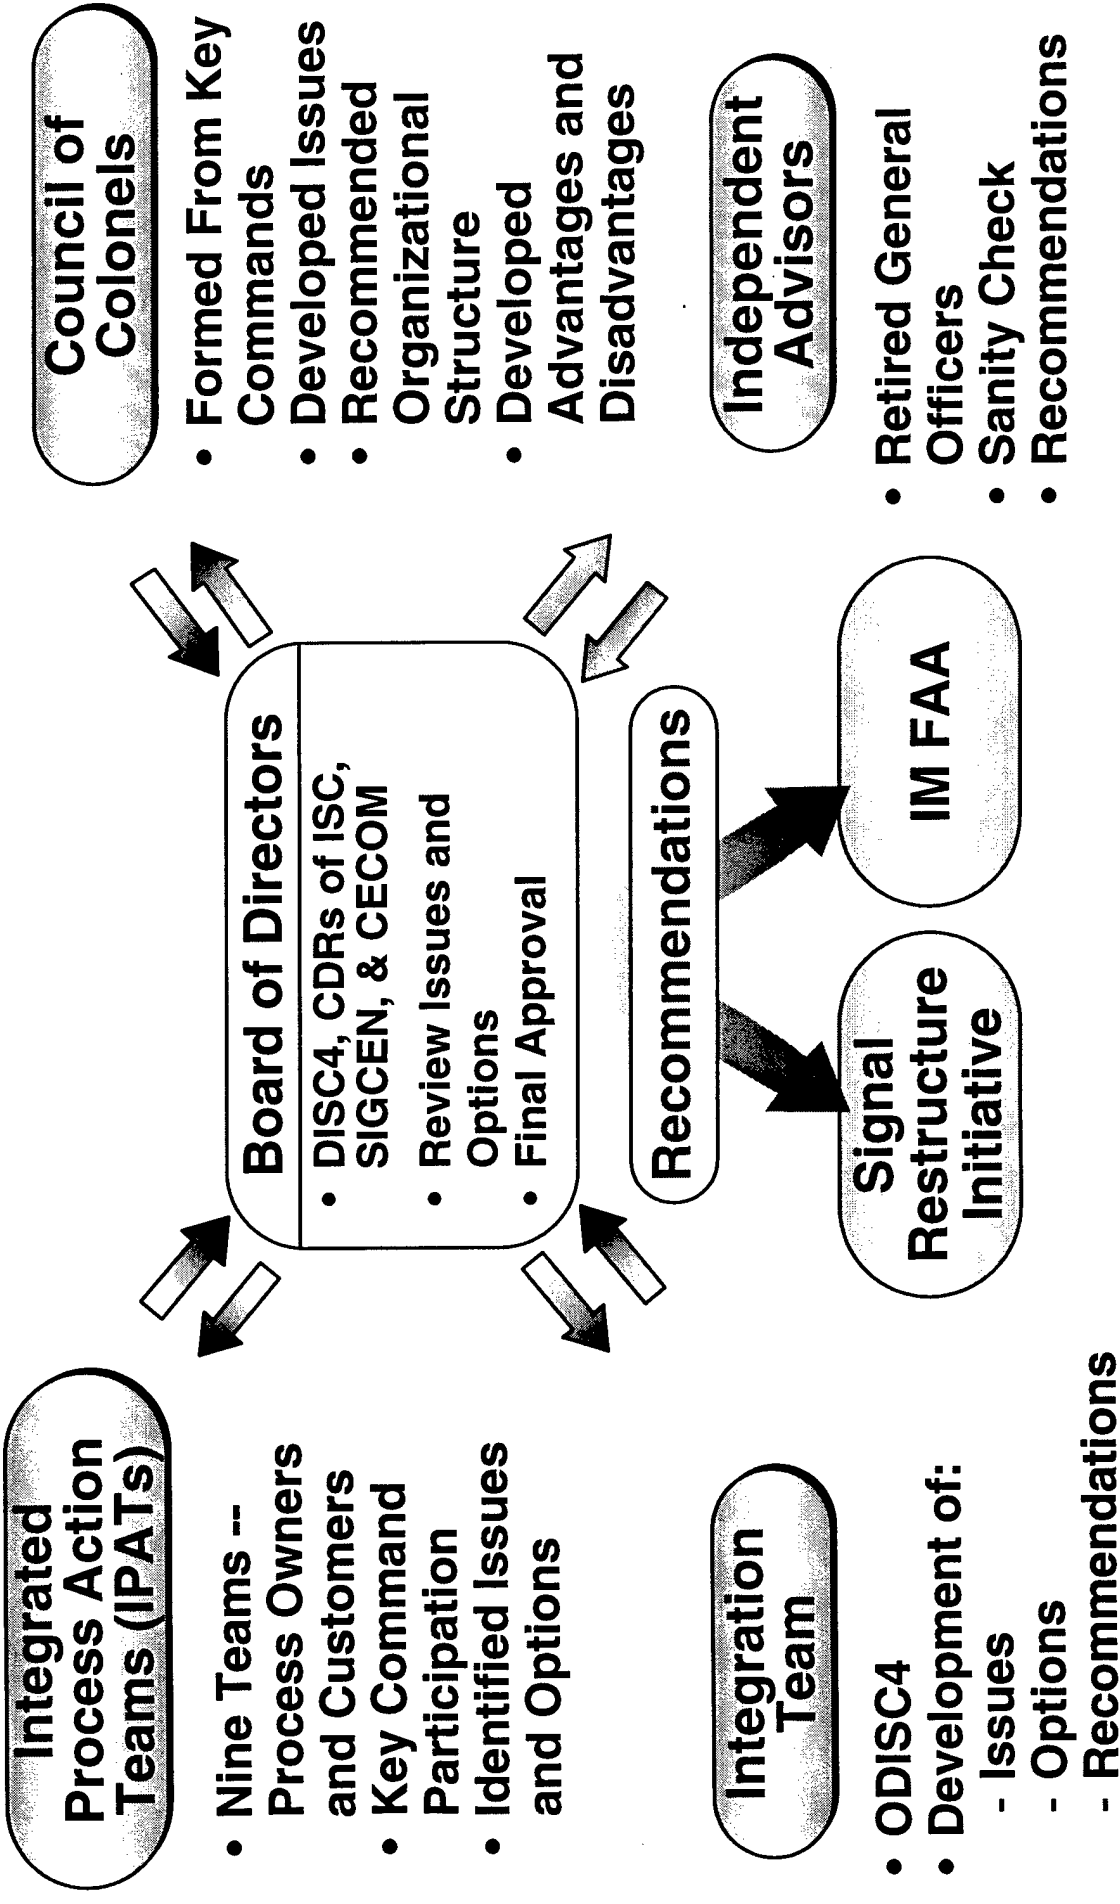

# Key SIGNAL/IM Organizations

Resource Requirements	Y	G
Legislative Sensitivities	Y	G

# SOMA Enhanced = Dealer's Choice

---

- Joint Warfighter Cell Expansion
- Aggressive Configuration Control
- Information Integration
- Disposition of Records Management, Publications and Printing, and Libraries
- Realign Technology Applications Office
- Improved Support to IM Service Providers

- DISC4 Refocus
- DOIM Ownership Issue
- Privatization Opportunities

# Joint Warfighter Coordination Capability

## Permanent Division Within DISC4 to:

- **Coordinate C4 for the Warfighter with Joint Staff and DISA**
- **Coordinate with ASD(C3I)**
- **Coordinate with Joint Staff J6:**
  - Joint Requirements Oversight Council (JROC)
  - Joint Warfighter Capability Assessment (JWCA)
  - Joint Warrior Interoperability Demonstration (JWID)
- **Coordinate Joint Standards and Architecture with Army Standards and Architecture**

Zero Sum  
Reallocation  
Within DISC4

# Configuration Control Capability

- **Institute Compliance Program**

- Provide Guidelines for MACOM Review of Subordinates to Assure Configuration Control at All Levels
- Perform Reviews of MACOMs

Refocus  
Existing  
Assets

- **Enforce Policies, Standards, and Architectures Across the Army**

- Ensure Connectivity from Warfighter to Power Projection Platform and Sustaining Base
- Link Policies, Standards, and Architectures to Execution

- **Ensure Configuration Oversight is a Core Function**

- **Resource Only Compliant Programs**

# Information Integration

## Requires Army-Wide Action:

- **Overwatch OSD Primary Staff Assistant (PSA) Corporate Information Management (CIM) Actions**
- **Integrate Army Efforts with DoD/Joint Systems (GCCS/GCSS)**
- **Integrate Information Across Army Functional Business Processes**
- **Translate Between Functional Requirements and Technical Delivery**
- **Ensure Warfighter Access to Essential Business System Information**

# Disposition of Non-Core Responsibilities

## Non-Core Areas

- Records Management
- Publications & Printing
- Libraries

<b>POM 98-03 Savings</b>
\$11 M - Investment
\$13 M
MIL 2
CIV 112

Need \$7M Investment

Realign Policy and Oversight to the Adjutant General

Retain Architecture and Standards (Technology) in Digitization) in DISC4

Transfer

Operating Mission & Non-Core Functions to

New Functional Process = More Savings

Cease Central Policy Functions; Follow Civilian Standards

# Improved Support to IM Providers

## DISC4 Refocus Will:

- **Provide Assistance for IM Operations**
  - Technical Consulting on IM Service Issues
  - Appropriate Army Policy, Standards, and Architectures for Use at Installation Level
- **Facilitate Exchange of Information Concerning Business Practices Across the Army**
- **Support Initiatives to Privatize IM Services**
  - Additional IDIQ Contracts
  - Sample SOWs for Services

# DOIM Ownership Issue

---

- **OCONUS**

- Fully Integrated in Overseas Signal Support Elements
- No Change Desired or Required -- Unanimous Opinion

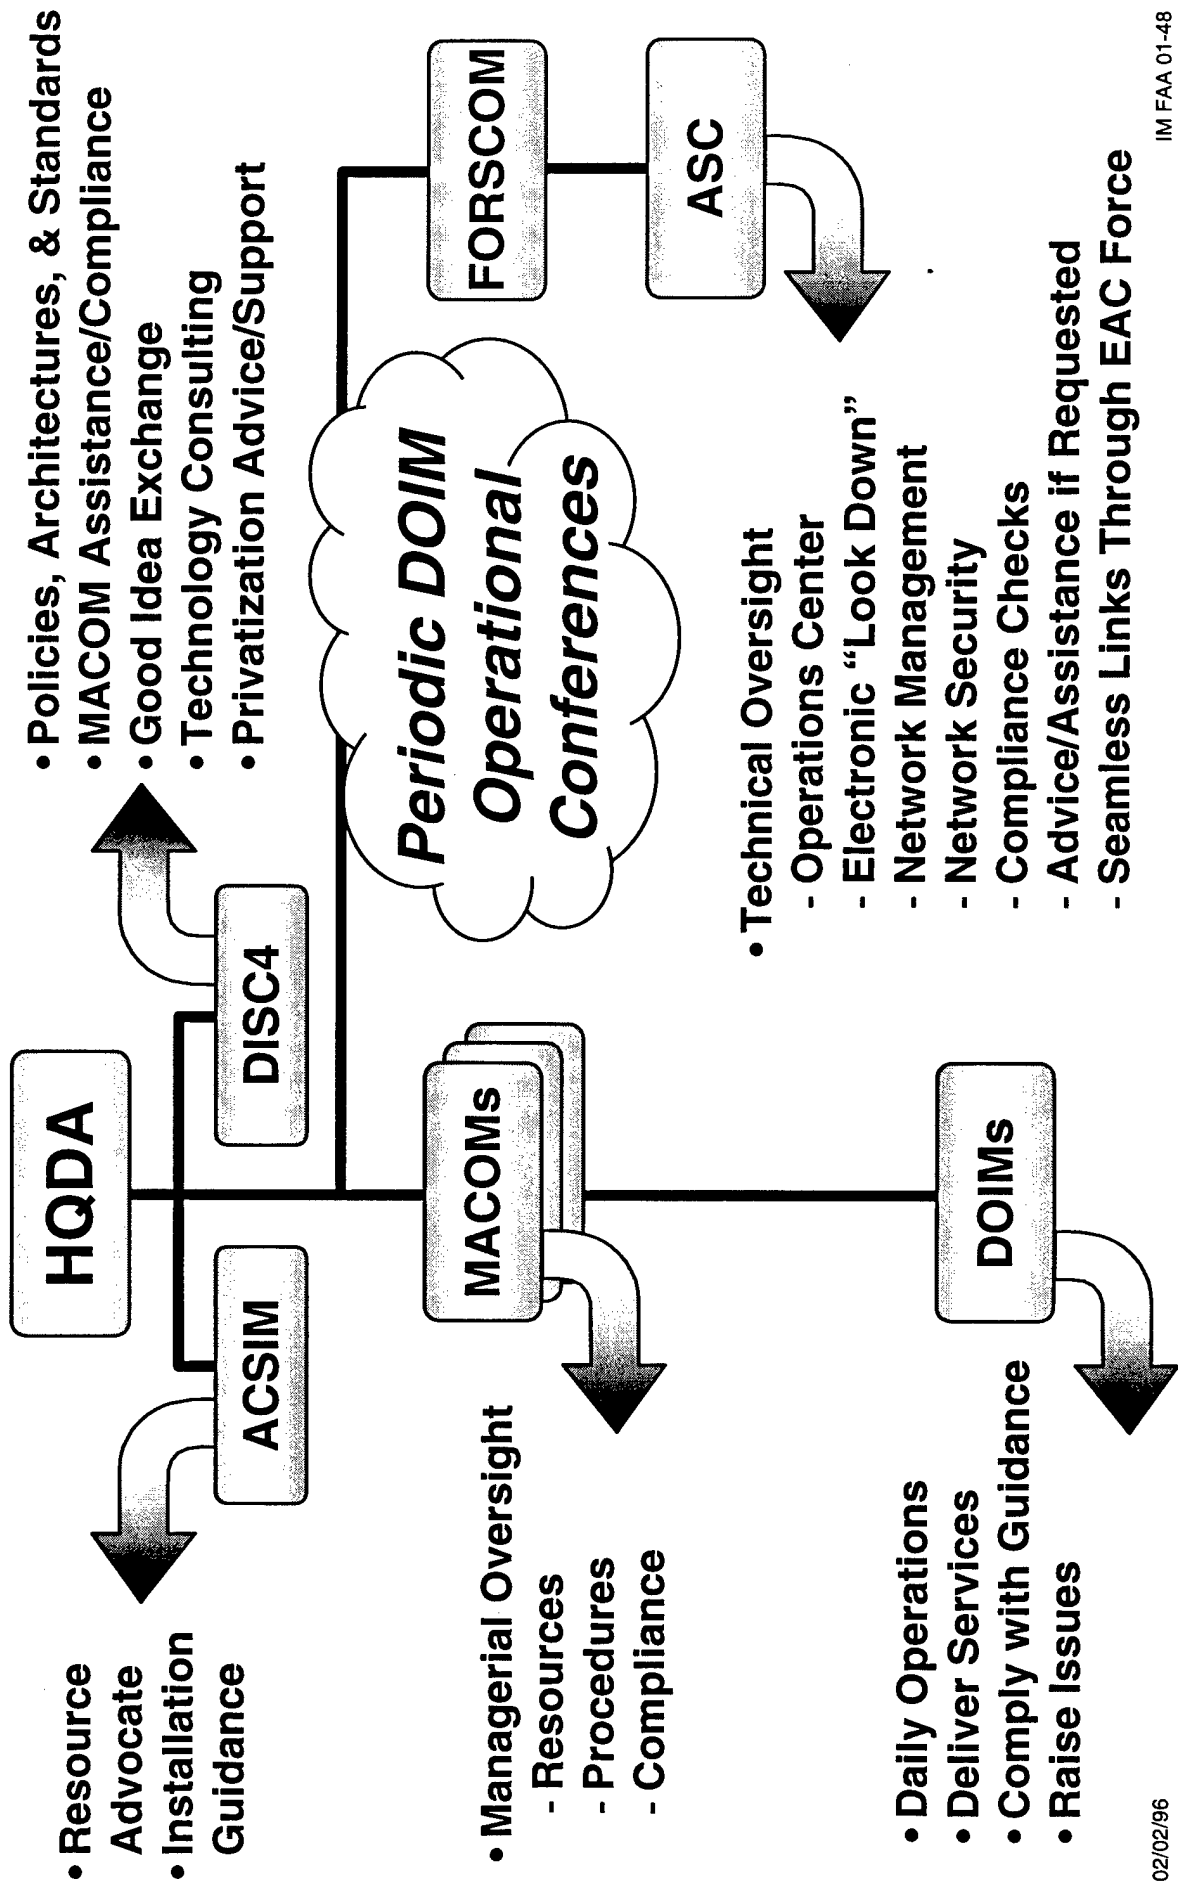

- **CONUS Options Examined**

- Under Respective MACOMs
- Under DISC4 as FOA
- Under ACSIM
- Under ASC

**Conclusion: Organizational Change Not  
Required -- Look at Process Change**

# DOIM Support Process

# IM FAA Topics

## Overview

## The IM FAA Process

## Alternatives

## Privatization Opportunities

## Recommendations

## Impact of Recommendations

# IM FAA Recommendations -- Actions Initiated

---

## Refocus Army IM

- Increase Emphasis on Policy and Architecture
- Create a Joint Warfighter Division in DISC4
- Increase Emphasis on Configuration Control of Information Systems
- Strengthen the Army's Compliance Program to Ensure Adherence to Architectures and Standards
- Emphasize Integration of Information Across Technical and Functional Lines
- Establish a Process to Identify Issues and Offer Assistance to Directors of Information Management (DOIMs)
- Institute a Method of Publicizing Good Business Practices for DOIMs

## Improved Integration

- Align the Sustaining Base and Tactical C4/IM Requirements Processes
- Create Horizontal Integration Technology Cells in PEO STAMIS and PEO C3S

# IM FAA Recommendations -- Decisions Required

---

## Refocus Army IM

- Cease Performing a Library Policy Function
- Realign Publications and Printing Operations from ISC to Defense Logistics Agency
- Realign Publications and Printing Policy from the DISC4 to the Adjutant General
- Realign Records Management Policy from the DISC4 to the Adjutant General
- Retain Publications and Printing, and Records Management Architecture and Standards Mission in the DISC4 to Assure Army Digital Interoperability
- Realign the Information Systems Selection and Acquisition Agency (a HQDA FOA) from the DISC4 to the Communications-Electronics Command (CECOM)

## Warfighter Alignment for ISC

- Redesignate ISC as the Army Signal Command, Eliminate as a MACOM, and Realign Under FORSCOM after Completing Below Actions
- Designate the ASC Commander as FORSCOM G6
- Realign Program Managers from the Information Systems Management Activity (ISMA) to the Program Executive Officer Structure
- Inactivate ISMA
- Realign the Information Systems Software Command from ISC to CECOM

# IM FAA Recommendations -- Decisions Required

---

## Warfighter Alignment for ISC Continued

- Realign the Information Systems Engineering Command from ISC to CECOM Less a Small, Organic Element to Remain with ISC
- Realign the Research, Development and Acquisition Information Systems Agency (RDAISA) from ISC to the ASA(RDA)
- Realign the Personnel Information Systems Command (PERSINSCOM) from ISC to PERSCOM
- Realign the Technology Applications Office Under PEO, STAMIS
- Realign ISC Contracting Office to CECOM

## Improved Integration

- Establish Technical Oversight of DOIM Digital Links and Connections Using ISC (ASC) Capability
- Realign EAC Combat Development to SIGCEN

# Potential FAA Results for Recapitalization

## Information Management FAA

POM 98-03 or Earlier Initiatives			Later Initiatives	
Issue	\$ (in millions)	Spaces (mil/civ)	Issue	Spaces
Acquisition Structure Changes	\$11-13	8/40	Outsource	?
Streamline Procurement & Engineering	\$9-11	169/218	Mail/Messenger Services	
ISC HQ Changes	\$10-12	16/45	Admin Support Services	
Divest Pubs/Paint to DLA (invest \$7 million)	\$11-13	2/112	Auto/Comm Services	
Automation Efficiencies	\$200-300		Software Engineering	
			Visual Information Support	
<b>Total</b>		<b>\$241-349</b>	<b>195/415</b>	

# Umbrella Initiatives

Issue	Spaces
Combine ADO & DISC4 immediately (all spaces transfer immediately, wedge savings in out years)	10 ±
Transfer DISC4 PEO oversight responsibilities to AAE/SARDA	Minimal
Option 1: Phase I: Downsize	-96
Option 2: Phase II: Relocate to FORSCOM	-30
Option 3: Phase III: Eliminate	-307
Return all DOIMs to Supported MACOM	in ISC totals
Consolidate all software design centers (ISC & AMC) to CECOM and contract	34 +

# **Signal Organization and Mission Alignment Study**

# Signal Organization and Mission Alignment (SOMA)

## *Initiatives*

### Consolidate C4/IM Rqmts Process

TRADOC validates all C4/IM rqmts  
TRADOC integrates  
DCSOPS approves rqmts  
DCSOPS manages all \$\$\$\$

### Divest Non-Core Responsibilities

Records Management  
Publications & Printing  
Libraries

### PEO structure changes

ISMA missions absorbed by PEO, C3S,  
and PEO, STAMIS

### Streamline Procurement & Engineering

Consolidate at CECOM

### Signal Warfighter Alignment

Align a divested ISC as FORSCOM  
MSC (Army Signal Command)

### Realign ISC

Combat Development & Doctrine to  
SIGCEN

ISMA to PEOs

ISEC to CECOM

Dedicated support to PERSINSCOM

RDAISA to SARDA

### DOIM Alignment

ASC Oversight

## Other Stuff in the FAA

- Joint Warfighter Coordination Capability -- J6 and DISA coordination -- Joint Standards and Architecture
- Configuration-Control Capability -- oversight and resource only compliant programs
- IM Operations Support Capability -- compliance programs, assistance, facilities best practices across Army
- Information Integration and Implementation - coordinate business system -- tactical -- DoD/Joint systems information and access
- Chief Information Officer (IO) Consideration -- posture potential changes (Cohen Amendment calls for a CIO)

Necessary Changes but No Savings

# Signal Organization - The Remaining Pieces

---

- DISC4 and ADO duplication
- Forward stationed Signal units under “ASC” or CINC/Army element
- Requirements for business systems and their integration with warfighting systems (GCSS)
- PEO alignment under AAE
- DOIM split -- commanders need advisors on hi-tech insertion but phone lines and LAN/WAN support should be locally owned and operated
- A DISC4 or a CIO (Director of Information Technology and Management) or both?
- Out sourcing -- should Bill Gates and Microsoft (or another firm) write Army code or should it be done in-house?

# Assumptions

- The distinction between tactical, strategic and sustaining base information and information systems is no longer valid:
  - information is not tagged to TDA or TOE, it's just information
  - the distinction between TDA and TOE units grows smaller
  - commanders require information from all environments, all the time
  - seamless interface between front line and support infrastructure
- Information technology enables change -- the experts with technology implement change in operations, they do not lead the change
- Information is a critical resource; requirements for information, like all requirements, must be driven and established by the operational mission, and prioritized for resourcing and action.

## Assumptions (continued)

---

- Information is often confused with the technical network information delivery means -- technologies and equipment
- The customers for information are both inside the Army and outside -- CINC information requirements must be satisfied with information produced primarily for inside the Army customers
- Information is created both inside the Army and outside -- the Army must negotiate to get what they need from outside sources

# What's the Problem?

- Information Requirements not well understood -- how are critical information requirements identified for the warfighter, for Army business operations?
- Technology is driving requirements -- just because it is possible to have a foxhole to factory information system, is it required and at what cost?
- Business information requirements and warfighting requirements use separate processes -- yet information must be shared and validation/prioritization of business systems unclear (many business process owners in OSD: contract, log, trans, PPBES/finance)
- Digitizing the battlefield means platform requirements -- ADO oversees and coordinates the integration of Army battlefield digitization actions -- DISC4 provides Army-wide technical architecture, technical standards and policy -- duplication?
- In-house software design and engineering -- when world leadership in software exists in American industry

## What's the Real Problem?

---

✓ Information Management is new -- learning while doing

- Existing organizations concentrate on moving the information (signal communications) and system acquisition
- Architecture, standards, new capabilities, information integration second place

The information highway exists -- must now establish and enforce the laws, ensure cars on the highways (and trips) are necessary, meet crash protection, emission and safety standards

# DISC4/ADO Comparison

## DISC4 Responsibilities

IM PEO/systems ACQ oversight

MAISRC process oversight

Info sys contracting oversight

IM policy & standards

IM resource mgnt

Info tech mgnt/plng

Info sys integration/infrastructure

Info sys OPS oversight

## ADO Responsibilities

Oversee/coordinate integration of Army Battlefield digitization activities

Provide guidance, assistance and coordination in acquisition matters related to digitization

Monitoring and assisting in the coordination of Army, joint, governmental and allied activities impacting on, or by, digitization

Develops the Digitization Master Plan:

- overall investment strategy
- schedule
- short & long term development
- synchronize fielding

Assists in defining, developing, coordinating, determining operational, interoperability and standardization rqmts technology assessments and approaches development of a common architecture and standards, formats and protocols

Recommends, maintains and updates planned digitization program funding

Combine ADO & DISC4 immediately

POM98-03 Savings: 10 ± spaces

# Align Forward Deployed TOE Signal Units

5th SIG CMD

USAREUR

1st SIG Bde

EUSA

516th SIG Bde

USARPAC

106th SIG Bde

USARSO

Residual ISC (ISC DCSOPS) becomes FORSCOM G6; 11th SIG Bde and 1108th SIG Bde support Power Projection

Rationale: The Army's AT&T is the Defense Global Communications System -- the Army is a regional provider

# ISC Elimination/Downsizing

## Option 1: Phase I: Downsize

- ISC retains forward deployed elements

ASC remains a FORSCOM  
MSC, downsized to reflect  
no longer Army MACOM

**Savings 96**

## Option 2: Phase II: Relocate to FORSCOM

- ISC relocated to FORSCOM

ISC remains a MSC; FORSCOM  
provides protocol, SJA, Safety,  
RM, Public Affairs

**Savings 30**

## Option 3: Phase III: Eliminate ISC

# Requirements

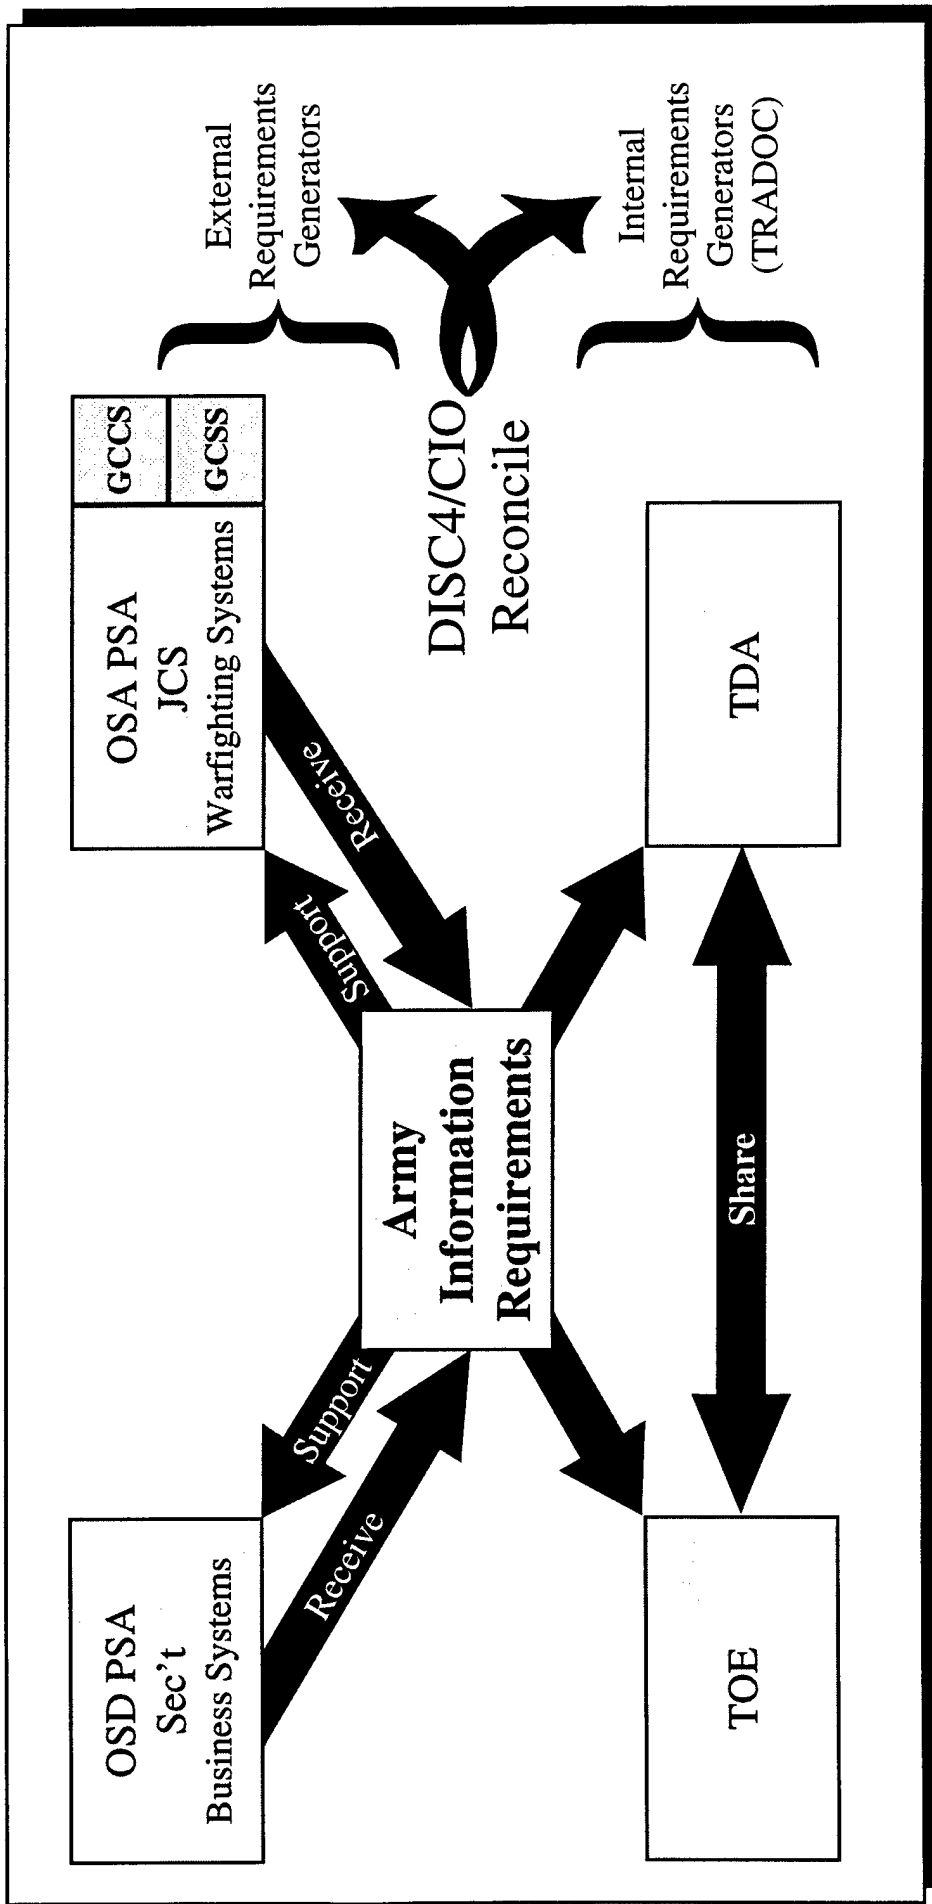

---

✓ SOMA consolidated warfighting requirements  
at TRADOC (100-XX)

- Who approves AMC depot information systems or HQDA financial management systems?
- Who integrates business systems with tactical systems?

Business requirements and some warfighting  
support requirements must be adjudicated at  
HQDA -- DISC4

# Requirements Adjudication

## PEO Alignment

---

✓ FAA retains DISC4 PEOs

- Acquisition focus, in the weeds
- Less attention to information integration, requirements, priorities, resources

The DISC4 must continue to be involved with acquisition (architecture, tech standards, tech insertion, data) -- issue is how much involvement

Can't let PMs be driven solely by dollars and milestone considerations -- must support the architecture

Recommendations: PEO to SARDA

# DOIM

---

- ✓ FAA doesn't address DOIMs currently assigned to ISC (MDW, INSCOM, West Point)
  - No organizational change for other DOIMs assigned to MACOMs, but recommends technical oversight

Give DOIMs to the people they work for and be done with it.

- (1) DISC4 can facilitate across all DOIMs
- (2) Feed them architecture and standards

Savings reflected in ISC downsizing

## DISC4 or CIO or Both

---

✓ No need for two

- Drop non-CIO functions
- Refocus DISC4 to Information Management

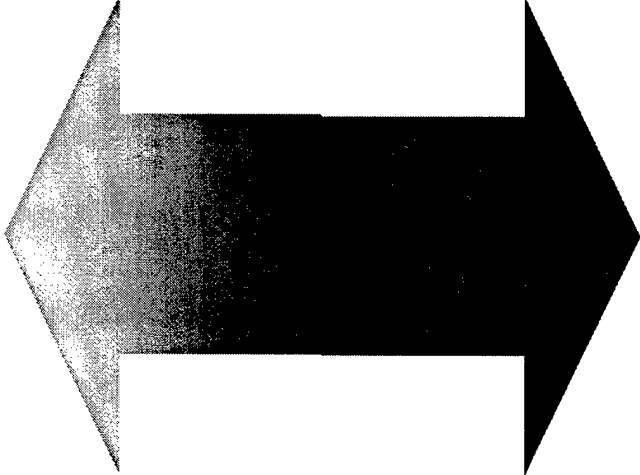

No Savings -- but business process  
reengineering to focus on the core  
processes

# Summary

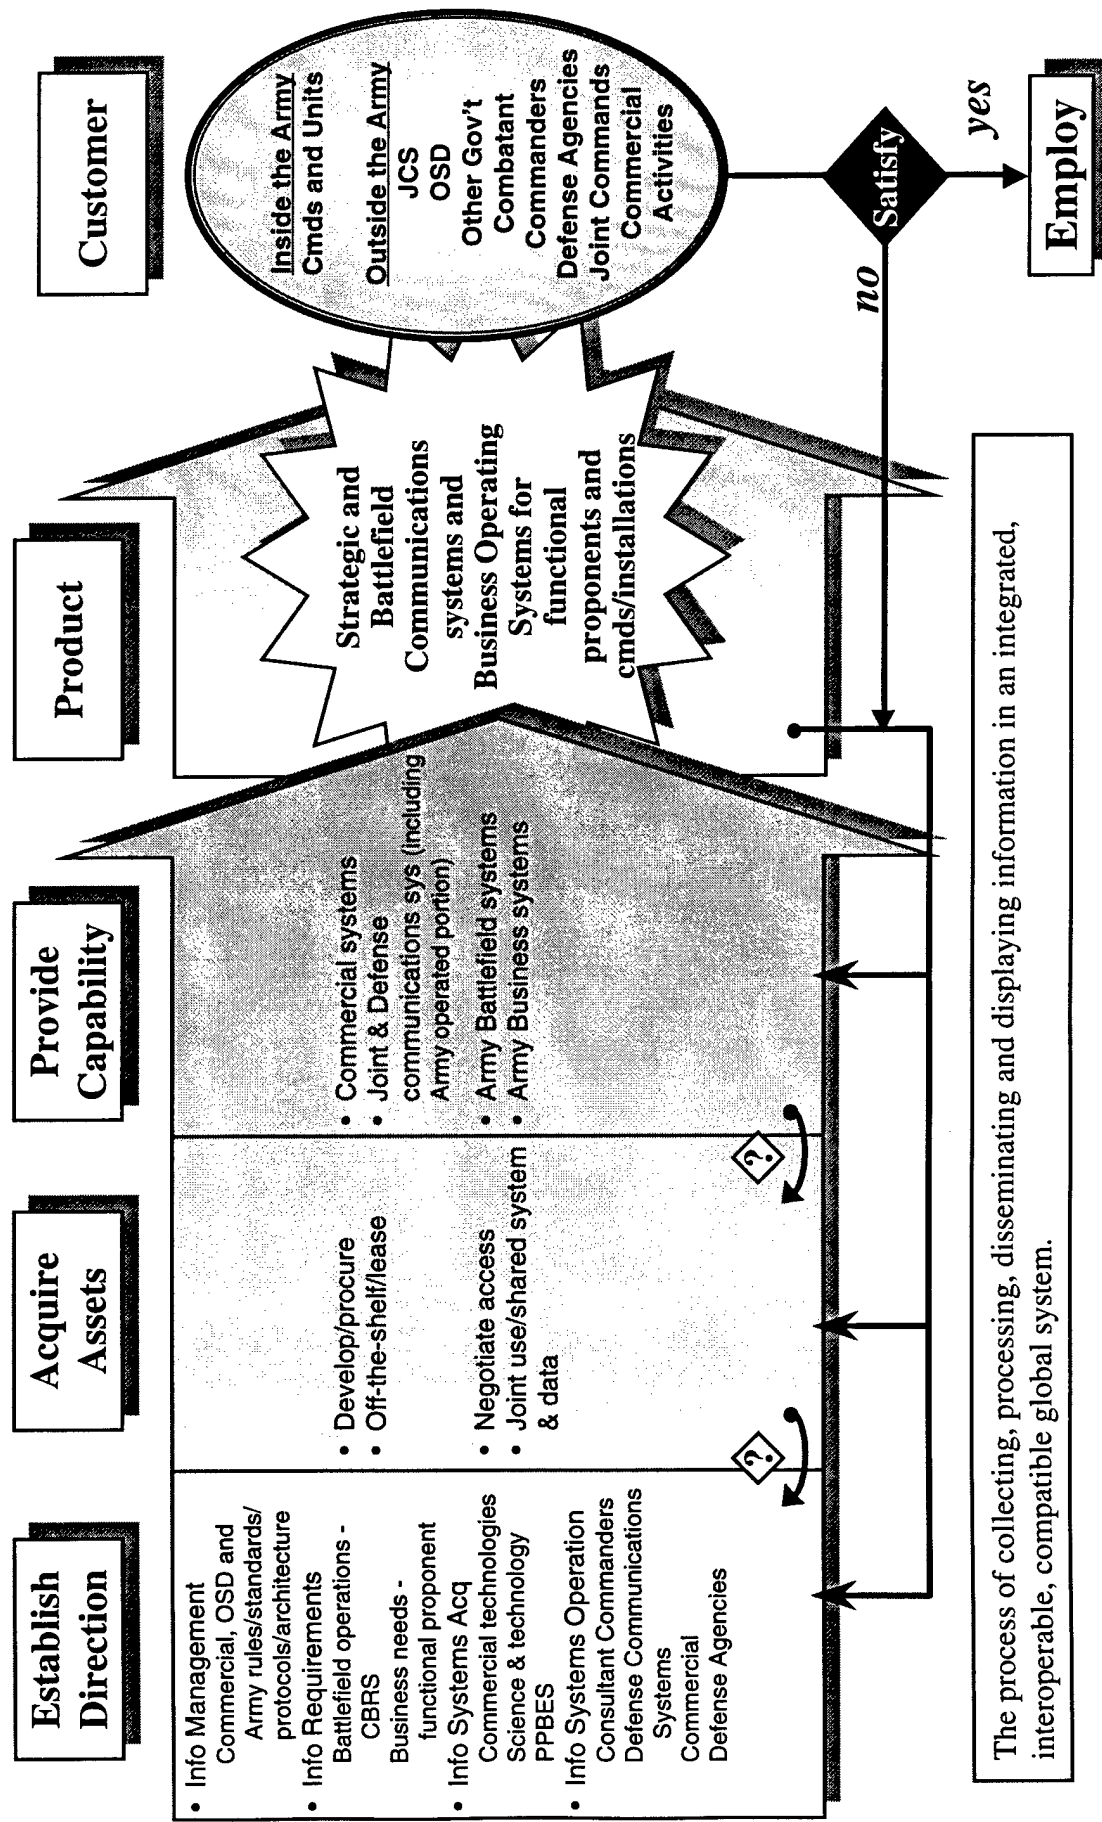

FAA Initiatives:		\$ (in millions)	Spaces
Acquisition Structure Changes		\$11-13	48

- Info Systems Acq  
AAE  
DISC4  
ADO  
Joint, Defense,  
Commercial
- Info Systems Operation

- DISC4 sets policy and standards and establishes/integrates EAC architecture
- ADO coordinates and “assists” with battlefield “digitization” standards, formats, protocols
- Functional proponents and defense agendas design internal business systems -- DFAS, Transportation, DLA, AMC installation LANS
- Battlefield requirements developed separately with split between EAC and below (DISC4/TRADOC); business system requirements developed by proponent
- Acquisition direction by AAE PEO structure except for local purchase by installations -- contracting rules

# Manage Information

## Acquire Assets

### PROCESS

- Develop/procure
- Off-the-shelf/lease
- Negotiate access
- Joint use/shared system & data

### ORGANIZATIONS

- Commercial
- DISA
- AAE
- DOIMs
- MACOMs

## “as is”

- Battlefield systems acquired by PEOs (CCS/COM) coordinated by ADO, DISC4
- EAC system and some business systems (ISMA/SAMIS) acquired by PEOs (C3S and STAMIS) under DISC4, ADO for digitization impacts
- Business systems acquired by functional proponent
- Joint/Defense systems acquired by DISA
- Commercial systems leased by services/functional proponents

# Manage Information

**Provide  
Capability**

**“as is”**

## **PROCESS**

- Commercial systems
- Joint & Defense communications sys (including Army operated portion)
- Army Battlefield systems
- Army Business systems

## **ORGANIZATIONS**

- WWW
- AT&T et al
- GCCS, Defense Comm Sys and other Joint & Defense Telecommunications Systems
- ISC - Army Battlefield Systems
- DOIM - LANs
- MACOMs - internal business systems

- Battlefield systems are owned and operated and enters the worldwide Defense Communications System for SATCOM, etc.
- Business systems: stovepipe operations within commands, including local area networks and defense agency systems
- Commercial systems made available through lease or purchase

**REDESIGNING THE INSTITUTIONAL ARMY AS PART OF  
THE FORCE XXI CAMPAIGN PLAN**

**F O R C E**

PERSONNEL MANAGEMENT AND RECRUIT FUNCTIONAL AREA ASSESSMENT BRIEFING

TO

THE VICE CHIEF OF STAFF OF THE ARMY

23 JAN 96

# PURPOSE

TO PRESENT REENGINEERING CONCEPTS AND  
RECOMMENDATIONS FOR REDESIGN OF  
PERSONNEL FUNCTIONS TO SUPPORT THE  
INSTITUTIONAL ARMY REDESIGN INITIATIVE

## **PERSONNEL MGT PARTICIPANTS**

- INSPECTOR GENERAL ACTIVITIES FAA - TIG
- PUBLIC AFFAIRS FAA - CHIEF OF PUBLIC AFFAIRS
- MORALE, WELFARE AND RECREATION FAA -  
ACSIM
- LEGAL SERVICES FAA - TJAG
- CHPLAINCY FAA - CHIEF OF CHAPLAINS
- ENLISTED/OFFICER/CIVILIAN AND RECRUIT FAA -  
ASA(M&RA)/DCSPER

# INSPECTOR GENERAL FAA

# **THE INSPECTOR GENERAL**

## **Philosophical Underpinnings**

- IGs are directly responsible to Commanders
  - Personal Staff Officer
  - Extension of Cdr's eyes, ears, voice and conscience
- Not a career field--"From the Line to the Line"
- Focused on systemic issues
- Confidential fact finder for the Command (sensitive issues)
- Promotes discipline, efficiency and standards
- Readiness focus (Teaching and Training mission)
- Promotes the Army professional ethic

# RECOMMENDED COURSE OF ACTION

The IG System could. . .

ALIGN IG AND TAQ FUNCTIONS  
AT THE INSTALLATION LEVEL  
REVISE ASSISTANCE FUNCTION

- TOTAL ARMY QUALITY

- ✓ IMPLEMENT A TOTAL QUALITY MANAGEMENT PROGRAM
- ✓ TRAIN THE ORGANIZATION
- ✓ ESTABLISH PERFORMANCE CRITERIA
- ✓ ASSESS PERFORMANCE
- ✓ REWARD EXCELLENCE

- REVISE ASSISTANCE FUNCTION:

- ✓ MODIFY RESPONSE TO IGARS BASED ON SUBJECT AREA
- ✓ SCREEN IGARS BASED ON AGE AND CURRENT IMPACT OF ISSUE

# **RECOMMENDED** **COURSE OF ACTION**

## **Implications:**

- **KEY DRIVERS:** SUPPORT OF TAQ IS CONSISTENT WITH ARMY LEADERSHIP PRIORITIES
- **LINKAGES:** THE IG SYSTEMIC INSPECTION PROCESS IS WELL SUITED TO THE TASK OF TAQ ORGANIZATIONAL ASSESSEMENT
- **SKILLS:** INSPECTORS GENERAL WOULD REQUIRE TOTAL ARMY QUALITY (TAQ) TRAINING
- **RESOURCES:**
  - ✓ THE ARMY IG SYSTEM WILL SUPPORT TAQ IMPLEMENTATION WITHIN PROJECTED RESOURCES
  - ✓ REVISION OF THE ASSISTANCE FUNCTION WILL REDUCE CASE BACKLOGS BUT IS NOT EXPECTED TO REDUCE IG PERSONNEL REQUIREMENTS

PUBLIC AFFAIRS FAA

# Office of the Chief of Public Affairs

Office of the Chief  
of Public Affairs

# RECOMMENDED COA

## CORE PROCESSES

RETAIN ALL FIVE  
CORE PROCESSES

INTEGRATED WORLDWIDE

|--|---------------------------|
| • SUPPORTS SPLIT BASED OPERATIONS          | • COSTS EXCEED SAVINGS    |
| • LOCAL COMMANDERS CAN TAILOR THE PA FORCE | • TECHNOLOGY COSTS        |
| • WORLD-CLASS TECHNOLOGY                   | • CIVILIAN CONTRACT COSTS |
| • SEAMLESS AC/RC OPS                       |                           |

## **CORE PROCESS IMPLICATIONS**

- ✓ ENHANCES PA CAPABILITIES--SUPPORT TO ARMY, COMMANDERS, SOLDIERS, DACS AND RETIREES
- ✓ RC REMAINS ESSENTIAL TO MISSION ACCOMPLISHMENT
- ✓ DIGITAL TECHNOLOGY INVESTMENT--"LINCHPIN" TO OUR SUCCESS
- ✓ INTEGRATED WORLDWIDE DIGITAL IMAGING OF STILL AND VIDEO NEWS RELEASES
- ✓ DEVELOP AND INTEGRATE PA STRATEGIES ACROSS MACOMS
- ✓ RC AUGMENTS FORSCOM AND TRADOC INSTALLATIONS AT MOBILIZATION
- ✓ REDESIGNATE ADMIN PA BILLETS AS EDITORIAL ASSISTANTS--"HELP OURSELVES"

# SAVINGS AND COSTS

## SAVINGS

MILITARY	4
CIVILIAN	10
\$M	0.5
NET SAVINGS	NA

## COSTS (\$M)

TRAINING	1.3
EQUIPMENT*	5.0
SERVICES	0.7

- ✓ COST EXCEEDS SAVINGS BY \$6.5M
- ✓ TECHNOLOGY--"LINCHPIN" OF SUCCESS--\$5M FOR 5 YEARS
- ✓ DIGITAL OFFICE SIGNIFICANTLY ENHANCES CAPABILITIES
- ✓ TRAINING COST OF 40 ADMIN SPECIALISTS RETRAINED AS EDITORIAL ASSISTANTS--WE "HELP OURSELVES"

\*PER YEAR FOR 5 YEARS

MWR FAA

# ENVIRONMENT

## SERVING

Over 55 programs  
6361 "front doors"  
150 installations worldwide

## CHALLENGES

Added missions  
Declining resources

## APPROACHES

MWR Vision  
MWR Strategic Action Plan  
ACS Strategic Action Plan  
MWR Board of Directors  
ASA(M&RA) policy oversight  
Integrate with IMAP

## RESULTS

Club turnaround  
Decreased child care subsidy  
Procurement strategic partnering  
Overhead reduced

## **RECOMMENDATIONS**

- ✓ Innovative program delivery
- ✓ Re-engineer common support
- ✓ Mitigate dual funding
- ✓ Centralize common support

# IMPLICATIONS

## **MWR is Decentralized**

Tailor implementation to each installation;  
Integrate with BASOPS strategy

### **Outcomes**

- Follow modern business practice
- Improve efficiency and effectiveness
- Mitigate dual funding issues
- Eliminate management layers
- Focus resources on program delivery

# LEGAL SERVICES FAA

# LEGAL SERVICES XXI

## Recommended Course of Action

+

+

- ✓ Digitization of legal references
- ✓ Paperless legal office
- ✓ Law Office Management Software
- ✓ Voice recognition software
- ✓ Video teleconferencing
- ✓ Deployable legal automation sets
- ✓ Distance learning

- ✓ Better utilization of RC JAGC
- ✓ Inter-service cooperation
- ✓ Delegation of responsibility
- ✓ Early intervention in the business decision cycle
- ✓ Expanded use of paralegals - both civilian and military

- ✓ Claims reengineering
- ✓ Establishment of Center for Law and Military Operations
- ✓ Use of alternative dispute resolution
- ✓ Regionalization initiatives
- ✓ Consolidated (MTOE/TDA) offices
- ✓ Legal Technology Resources Office

# LEGAL CORE PROCESS IMPLICATIONS

## Legal Assistance

- ☆ Enhanced Joint and RC cooperation will improve client services
- ☆ Leveraging of legal automation will enhance efficiency

## Claims

- ☆ Application of business practices will make claims processing more efficient
- ☆ Privatization of household goods claims process will permit improved support to other claims missions

## Litigate

- ☆ Avoidance of costly and lengthy litigation through the use of alternative dispute resolution (ADR) procedures

## Military Justice

- ☆ Use of emerging legal information technology will ensure more rapid processing of UCMJ actions

## Command Advice

- ☆ Adoption of corporate general counsel model
  - ☆ more efficient installation business operations
- ☆ Pro-active legal support to commanders

## Training

- ☆ Legal Services XXI will require highly trained & versatile attorneys and support staff
- ☆ Improved doctrine/lessons learned/updated training for JAs from the Center for Law and Military Operations

# LEGAL SERVICES XXI ASSESSMENT

## Advantages

- ☆ Flexible, affordable approach that allows JAGC to meet fast-growing demand for legal services
- ☆ Enables JAGC to keep pace with increasing use of automation that is transforming the practice of law
- ☆ Maximizes Joint and RC legal capabilities

## Disadvantages

- ☆ Incremental approach to change

## Savings

- ☆ Claims reengineering offers potential for substantial resource savings
- ☆ Digitization of legal references will reduce legal offices' publications budget
- ☆ Innovative legal support will make installation operations more efficient and maximize cost avoidance capability

## Costs

- ☆ Minimal costs associated with personnel innovation and organizational changes
- ☆ Automation initiatives are affordable
  - ☆ reliance on off-the-shelf legal software
  - ☆ leveraging of existing capabilities
  - ☆ hardware upgrades will be pursued by competing more effectively for existing automation resources

# RELIGIOUS SERVICES FAA

# Institutional/TDA Army

## CHAPLAINCY

### COMPETENCIES, CAPABILITIES & PROCESSES

#### Core Capabilities

1. Direct, Acquire & Resource the Force
2. Develop the Force
3. Generate & Project the Force
4. Sustain the Force

#### Core Processes

1. Plan, Provide Direction; Obtain & Allocate Resources
2. Manage Information
3. Develop Doctrine
4. Develop Requirements
5. Acquire and Sustain People
6. Identify and Develop Leaders
7. Tailor, Mobilize and Project Land Power
8. Support Organizational Training
9. Acquire, Maintain and Sustain Equipment
10. Maintain and Sustain Land Operations
11. Acquire and Sustain Facilities
12. Manage Installations

#### Army Imperatives

1. Quality People
2. Solid Doctrine
3. Realistic Training
4. Competent Leaders
5. Appropriate Force Mix
6. Continuous Modernization

#### OBJECTIVE

Trained, Ready, Deployable and Sustainable Army

**Army Vision**  
America's Army is a Total Force, trained and ready to fight, serving the Nation at home and abroad...a strategic force capable of decisive victory

**Chaplaincy**  
A Chaplaincy trained and ready to provide religious, spiritual, moral and ethical support to America's Army in any contingency

**Army's Core Competency**  
Conduct Prompt & Sustained Operations on Land

**Chaplaincy**  
Provide total religious support to America's Army across the spectrum of operation

**Chaplaincy**

1. Religious Services
2. Rites, Sacraments, Ord.
3. Pastoral Care/Counseling
4. Religious Education
5. Family Life Ministry
6. Clinical Pastoral Ed
7. Advisor to the Cdr
8. Management & Admin
9. Rel/Humanitarian Support
10. Training
11. Rel Spt Planning/Opns

**Institutional Army Core Competency**  
Organize, Train, Equip, Provide and Sustain the Land Components of the Combatant Commander's Joint/Multinational Force

**Chaplaincy**  
Provide for the free exercise of religion of soldiers, their family members, and authorized civilians in a single seamless system

# **RECOMMENDED COA**

- ✓ Provide Religious Services
  - ★ Increase Reserve Component funeral support
  - ★ Provide pastoral care for USAREC using Individual Ready Reserve (IRR) chaplains
  - ★ Worship Services
    - ⊕ Consolidate services and coordinate Joint Service support where feasible
    - ⊕ Explore use of tele-ministry for remote sites
  - ★ Shift to support emerging faith groups/changing demographics (analyze through CARSS, the Chaplain Automated Religious Support System)
- ✓ Provide Training
  - ★ Change Officer Advanced Course (OAC) to 8-week TDY (est. annual savings = \$.5M)
  - ★ Re-evaluate advanced education needs (e.g., family life, Clinical Pastoral Education (CPE), world religions, ethics, etc.)
  - ★ Use of Chapnet/Internet

# PERSONNEL FAA

# PERSONNEL MANAGEMENT FAA

## USAREC Expanded

This proposal will expand the mission of USAREC to include all accessioning for the Department of the Army. The intent is to consolidate all recruiting of personnel and as many operational activities as possible under current law. This mission will include all active and reserve component military personnel and civilian interns and hard to fill occupations. It will not include National Guard and the Staff Judge Advocate.

- Single operational entity for Officer and Enlisted
- Develop synergism for officer recruiting between USMA/Cadet Command/OCS
- Skills, human resource analysis and research
- Leverage recruiting resources to meet total force needs

# PERSONNEL MANAGEMENT FAA

## *USAREC Expanded (cont.)*

### RECOMMENDATION:

Target to expand USAREC's recruiting mission to include USMA, ROTC, all of OCS, and selected civilian occupations and attempt to gain 15 percent savings in personnel

# PERSONNEL MANAGEMENT FAA

## Current

\*Partial

## Proposed

# PERSONNEL MANAGEMENT FAA

## *USMA and Cadet Command Combined*

The intent is to combine the individual training of all officer cadets under a single authority. This will include all academy, ROTC, and OCS programs. It will also include strategic direction for the conduct of state-level programs in the Army National Guard.

- Sole linkage to USAREC recruiting efforts
- Single proponent for accessioning criteria for officers
- Consolidation of all USMA/ROTC/OCS resources
- Sole proponent for commissioning criteria (Cadet performance criteria)

# PERSONNEL MANAGEMENT FAA

## *USMA and Cadet Command Combined (cont.)*

- Proponent for standardized pre-commissioning training
- Establish commonality in pre-commissioning experience and training
- Incorporate Warrant Officer Candidates

RECOMMENDATION: Develop Officer Cadet Command as organized in Proposal #4.

# PERSONNEL MANAGEMENT FAA

## USMA and Cadet Command Combined

### Current

### Proposal #1

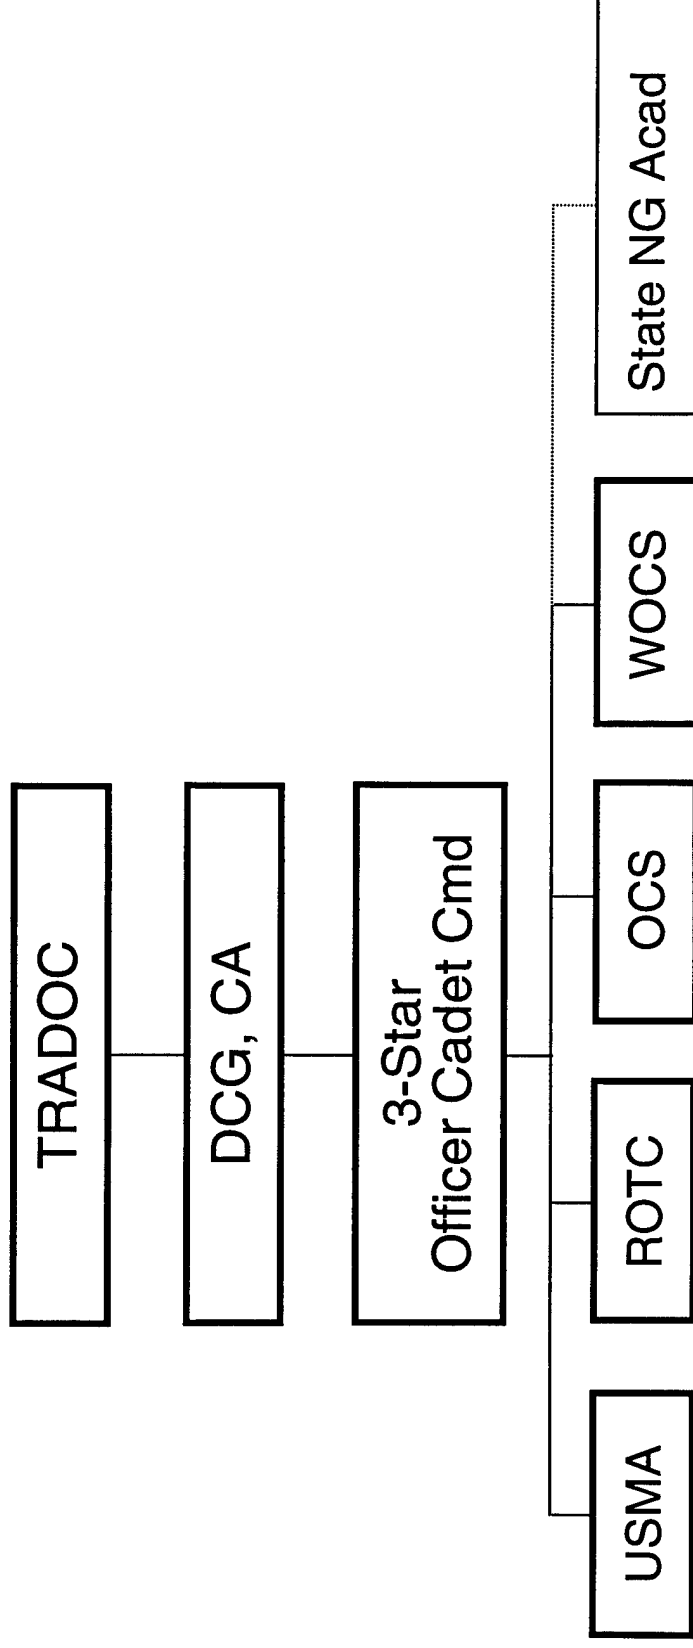

----- Policy Guidance

# PERSONNEL MANAGEMENT FAA

## USMA and Cadet Command Combined

### Proposal #2

..... Policy Guidance

# PERSONNEL MANAGEMENT FAA

## USMA and Cadet Command Combined

### Proposal #3

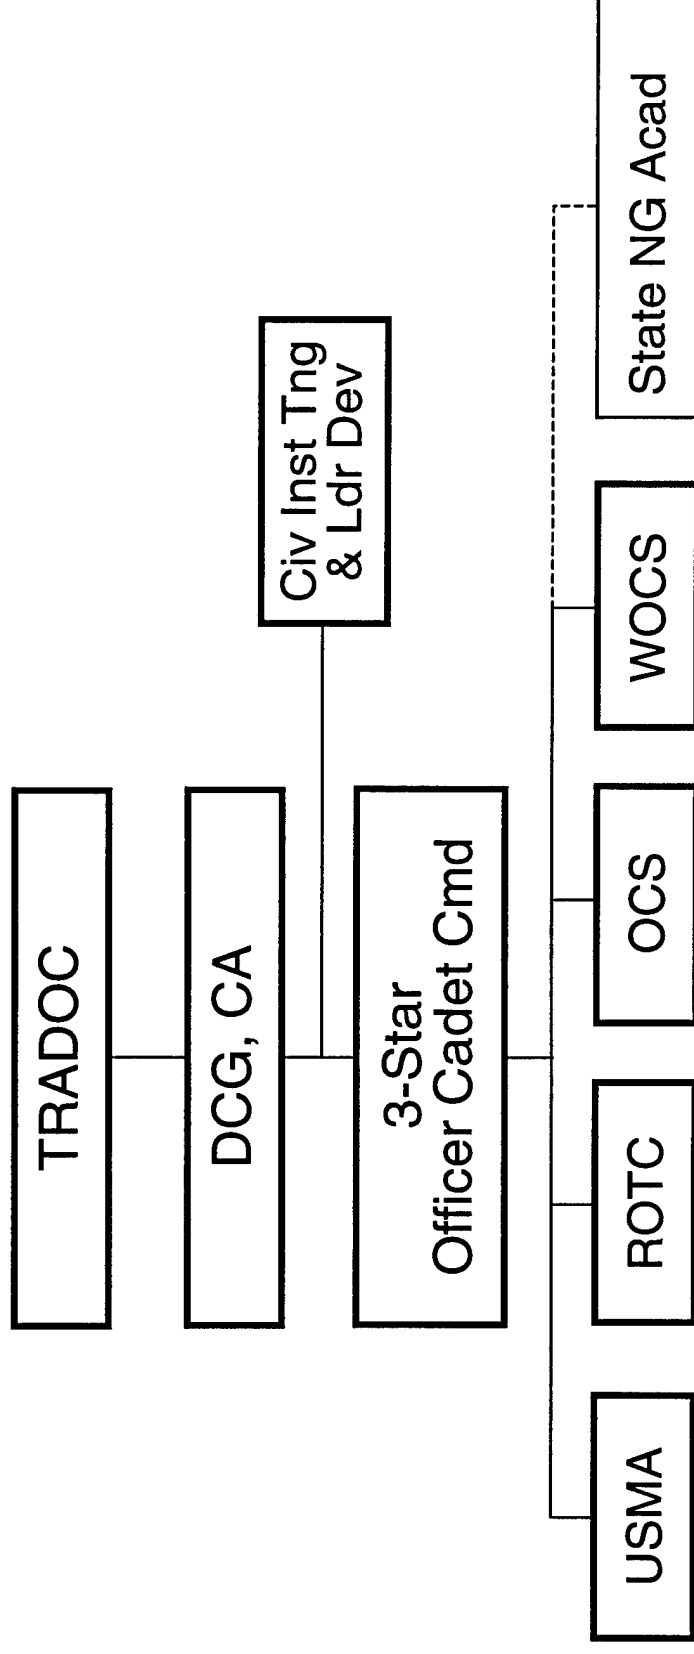

----- Policy Guidance

# PERSONNEL MANAGEMENT FAA

## *USMA and Cadet Command Combined*

### Proposal #4

----- Policy Guidance

# PERSONNEL MANAGEMENT FAA

## 20 Percent Turnover

The purpose of this topic is to address means to reduce annual turnover of Army personnel. It will include the determination of an acceptable turnover rate as a goal, establish methods for accomplishing this goal, and articulate the desired end state in terms of characterizing the Army's resulting human resources.

How should this be achieved?

- More pay, benefits?
- Contractual obligation extended?
- Cultural change?
- Change in law?
- Reduce training base attrition

# PERSONNEL MANAGEMENT FAA

## 20 Percent Turnover (cont.)

- End State
  - Older Army?
  - More married Army--AC married rate now 65%
  - More family members
  - Change in costs
    - Medical for older soldiers
    - Family members
    - Smaller training base
- Requires Adjustment of Leader Development Model

# PERSONNEL MANAGEMENT FAA

## 20 Percent Turnover (cont.)

### RECOMMENDATION:

1. Take action to reduce IET training base attrition to 10%
2. Strive to reduce first-term attrition prior to ETS by 10%
3. Conduct study to determine desired end state of the Army and how to achieve it

# PERSONNEL MANAGEMENT FAA

## *Pay/Personnel Integration*

This initiative will investigate the advantages/disadvantages of an integration of the functions and organizations of pay and personnel management. It will focus on the consolidations, efficiencies, savings, and enhancements to customer services that are possible.

- Eliminate redundancies
- Eliminate unnecessary work--dual reporting to personnel and pay (promotions, UCMJ, demotions, etc.)

# PERSONNEL MANAGEMENT FAA

## *Pay/Personnel Integration (cont.)*

- Single automation system--paperless, timely transactions
- Combine pay/personnel organizations

RECOMMENDATION: Target for implementation pending war-stopper issues; target savings of 100 spaces.

# PERSONNEL MANAGEMENT FAA

## *Pay/Personnel Integration*

### Functional Reorganization

#### Current

#### Proposed

# PERSONNEL MANAGEMENT FAA

## *Doctrine--SSI/CASCOM*

Should pay and personnel doctrine remain a sub-function of logistics as opposed to full representation among TRADOC functions. Organizationally, should the Soldier Support Institute remain a subordinate command to the Combined Arms Support Command?

- Improved visibility of PSS doctrinal concepts at TRADOC and Army levels
- Current structure subordinates PSS to logistics in doctrine and organization

# PERSONNEL MANAGEMENT FAA

## *Doctrine--SSI/CASCOM (cont.)*

- One voice for PSS ultimately improving integration of PSS activities across the full range of combat developments, doctrine, organizations, systems and leader development
- Tighter link between HQDA and its field operating and doctrine agency at SSI
- SSI has no integrating staff at Institute level
- Resistance to establishing a PSS integrating activity within greater PSS community (JAG, Chap, PA)

# PERSONNEL MANAGEMENT FAA

## *Doctrine--SSI/CASCOM (cont.)*

### RECOMMENDATION:

Further develop proposal and formally recommend to Cdr, TRADOC.

# PERSONNEL MANAGEMENT FAA

## Doctrine--SSI/CASCOM

### Delaying Doctrine

#### Current

#### Proposed

# PERSONNEL MANAGEMENT FAA

## *Restructure HQ Pers Mgmt Operating Functions*

Within the context of the other initiatives listed here, what functions, structure, and responsibilities can be eliminated or divested? What will be the resulting purpose of the organization and what will be the differences between current operations and capabilities?

- Assimilate PERSINSCOM function; contract out hardware operations
- Build integrated personnel relational database
- Transfer policy mission of TAGD to HQDA

# PERSONNEL MANAGEMENT FAA

## *Restructure HQ Pers Mgmt Operating Functions (cont.)*

- Multi-component Personnel Command combining like functions where appropriate (AC/USAR/NG - promotions, selection boards, separations, etc.)
- Divest civilian personnel management operations centers after full implementation of regionalization
- Eliminate or divest non-HQ operations to commands/installations

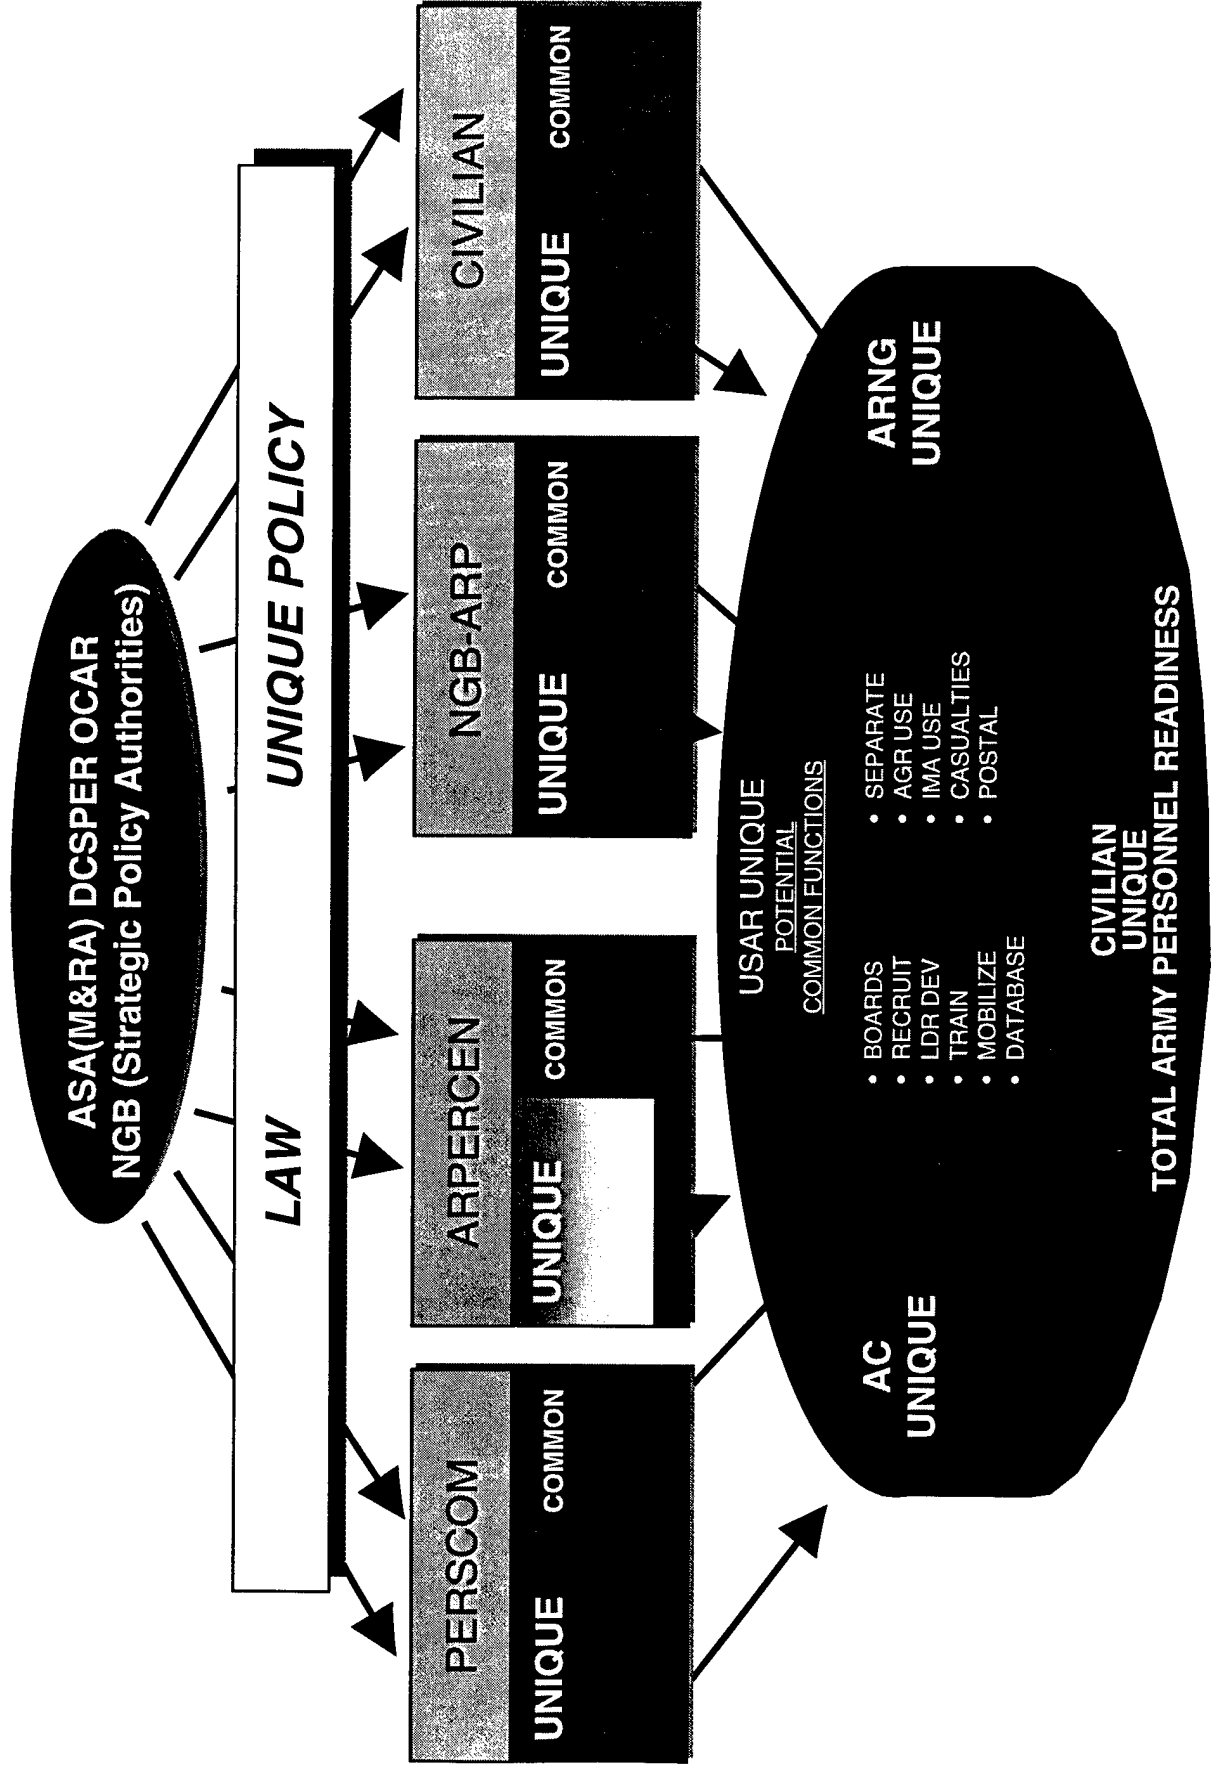

# PERSONNEL MANAGEMENT FAA

## *Restructure HQ Pers Mgmt Operating Functions (cont.)*

### RECOMMENDATION:

1. Realign PERSINSCOM with PERSCOM IAW SOMA Study; explore contracting out hardware
2. Transfer policy mission of TAGD to DCSPER
3. Study divestiture of operations centers after full implementation of regionalization
4. Develop integrated, relational personnel database for all components
5. Establish Multi-component Personnel Command to integrate common functions (i.e. boards, separations, mobilization)
6. Identify non-HQ operating functions to be eliminated or divested to commands/installations in POM 98-03

# PERSONNEL MANAGEMENT FAA

# PERSONNEL MANAGEMENT FAA

## *Protocol Officers*

The purpose of this initiative is to determine if there are excessive numbers of protocol officers in the Army. What advantages might be gained by the reduction of resources committed to protocol?

- Eliminates resources without eliminating requirements
- 104 known offices
  - Civilian/Military mix?
  - Should this be a military function or all civilian?
- Two Models:
  1. Robust--fully mission capable
  2. Minimal staffing--task work to subordinate commands

# PERSONNEL MANAGEMENT FAA

## *Protocol Officers (cont.)*

- Who sets the standard? How are people trained?
- Can the function be regionalized?
  - Remain responsive to commanders?
  - Remain responsive to the customer?
  - Communication?
  - Training?

RECOMMENDATION: Target for 15 percent reduction Army-wide (approximately 50 spaces)

# PERSONNEL MANAGEMENT FAA

## *Consolidation of USAREC & PERSCOM*

This topic is concerned with the advantages/disadvantages of combining USAREC and other non-HQ operating personnel management functions into a single organization. The resulting organization will be responsible for accessioning personnel as well as their subsequent distribution, individual training program management, sustainment, and separation.

- Combines all personnel operations in one place
- Provides direct linkage between accessioning and life cycle management under a single commander

# PERSONNEL MANAGEMENT FAA

## Consolidation of USAREC & PERSCOM (cont.)

- Single link between HQDA (policy) and personnel operations
- Extremely large mission scope and span of control
- Minimal resource savings

RECOMMENDATION: Do not consolidate.

# PERSONNEL MANAGEMENT FAA

## Consolidation of USAREC & PERSCOM

### Current

### Proposed

# PERSONNEL MANAGEMENT FAA

## Consolidation of USAREC & PERSCOM

### Current

### Proposed

# PERSONNEL MANAGEMENT FAA

## *PERSCOM to TRADOC*

This proposal is to integrate PERSCOM into TRADOC. As such TRADOC would constitute an intermediate headquarters between HQDA and PERSCOM for the implementation of personnel policy. Policy making would remain at the HQDA level, while operations will be executed by PERSCOM as interpreted by TRADOC.

- Adds redundant layer between HQDA and personnel operations
- Ill-defined role for TRADOC as an intermediate command
  - Fiscal policy? - Resource allocation?
  - Personnel policy interpretation
- No personnel savings (possible staff plus-up for TRADOC)

# PERSONNEL MANAGEMENT FAA

## PERSCOM to TRADOC (cont.)

### RECOMMENDATION:

PERSCOM not go to TRADOC

# PERSONNEL MANAGEMENT FAA

## PERSCOM to TRADOC

I BASELINE ORGANIZATION  
POM 98-03

II REVISED ORGANIZATION  
BRIGADE XXI  
POM 00-05

III FINAL ORGANIZATION  
DIVISION XXI  
POM 02-07

# Umbrella Group Tasks

---

1. Coordinate and Synchronize Efforts with other Axes and Studies
2. Define, Coordinate FAA Process and Re-Engineering Briefings
  - Format and Schedules
  - *Inject Innovation and Challenging Issues*
3. Facilitate Sharing of Ideas
4. FAA: Outline the Institutional Army Design -- 21st Century

# Institutional Axis FAAs

## FAA Laydowns

Power Projection (FORSCOM)	<input checked="" type="checkbox"/> 25 October 95
Training/Leader Development/ Doctrine/Organize (TRADOC)	<input checked="" type="checkbox"/> 1 December 95
Information Management (DISC4)	TBD
Personnel Mgmt/Recruit (DCSPER)	20 December 95
Construct (USACE)	8 January 96
Equip/ Supply/Maintain/Service (AMC)	29 January 96
HQDA/FOA/SSA (AA/DAS)	12 February 96
Umbrella (DCSOPS)	15 February 96

## Expected Outcome

- Broad Army Focus
- Current, Army-Wide Process Description
- Alternative(s), 21st Century Processes, Et Al
- Linkage To:
  - Institutional Core Competencies
  - 21st Century Operating Force
- Underlying Assumptions/Risks
- Range of Options for Preliminary TDA Redesign
  - Do Now (Early in POM 98-03)
  - Do Later (Out Years of POM 98-03)
  - Assess in Greater Detail in Phase 2
- Issues (Program) w/Recommendations to be Resolved By
  - VCSA
  - ACC
  - CSA/SA

# Key Points of Power Projection FAA

## FORSCOM

- Designate FORSCOM as Exec Agent for Mob
- Designate 15 PPPs & 12 PSPs
- Review ARNG/USAR STARC/RSC size, structure, manning, regionalizing & DIV(IT) use
- Align Deployment Units
- Use JOPES & train deploy pers
- Automate Deploy w/elect tags and other tech means
- MTMC as "common user" seaport mgr & joint container mgr
- Joint commonality of Automated Deployment Systems
- Seek support of modular force pkgs

## UMBRELLA GROUP

- FORSCOM Process Owner
- Align GSUs to Power Proj Platforms
- FORSCOM/MTMC use JMATS
- MTMC subordinate to FORSCOM
- Provide common Deployment System
- FORSCOM is Army Force Provider
- FORSCOM assumes Current Ops
- FORSCOM generates Alert/Mob Order
- FORSCOM selects RC units
- RC Cdrs validate units for deployment
- RC units bypass Mob Station
- Reduce Mob Stations
- CORPS assume CONUSA mission
- Provide common TPFDD/L System

# Key Points of Trng/Ldr Dev/Org/Doc FAA

## TRADOC

### *TRAINING & LEADER DEVELOPMENT*

- TRADOC Institutional Training Command
- More 'different-place-same-time' training and distance learning
- Use 'Echo Company' for USAR Trng Bns
- Reduce TTHS (resident training rgmts)
- Privatize/Contract out ROTC mission
- Much smaller (Option 3)

### *DEVELOP REQUIREMENTS*

- TRADOC Requirements Process Owner
- TRADOC designs and HQDA documents force
- Annual TAA
- Align all Army CD activities into TRADOC
- Battle Labs process to CBRS
- Out-of-the-box option by March
- *TRADOC Battle Labs ensure interface with JROC*

### *DEVELOP DOCTRINE*

- TRADOC Joint Doctrine Process POC
- TRADOC Army Doctrine Process Own
- Publish Doctrine "On-line" BBS
- AWC & USMA develop selected doctrine
- DA Pam 100-XX rolled into TC 525-5
- TRADOC will Develop TDA Doctrine

## UMBRELLA GROUP

### *TRAINING & LEADER DEVELOPMENT*

- TRADOC Ident & Dev Leaders Process Owner
- TRADOC Acq & Sus People Process Owner
- Move DAMO-TR & DAPE-HR-L to TRADOC
- Improved RC Officer Leader Development
- Reduce Resident Training Rqmts
- Use RC for ROTC mission
- Reduce number of schools

### *DEVELOP REQUIREMENTS*

- HQDA Requirements Process Owner
- TRADOC Force Development Owner
- TRADOC DOC/CD Merged
- TAA; SACS; TAADS "On-line" WWW
- Move DAMO-FD(-) to TRADOC
- Battle Labs process to CBRS
- *Tie JWCA to Force Development*

### *DEVELOP DOCTRINE*

- HQDA Joint Doctrine Process POC
- HQDA Army Doctrine Process Own
- Publish Doctrine "On-line" BBS
- Move all Army TTP to TRADOC
- *Embed Army Doctrine in JROC/JWCA*
- *Reengineer Joint Doctrine Development*

# Agenda

---

- Introduction
- Approach
- Results
- Summary

# Reengineering (Starting Over)

---

**What it is:** “The fundamental rethinking and radical redesign of processes to achieve dramatic improvements in critical, contemporary measures of performance such as cost, quality, service and speed.”

# Institutional Army Axis Hypothesis

---

## Fundamental ‘Reengineering’ Hypothesis

- If we understand the Institutional Army’s core competencies and related processes and the insights derived from Joint Venture we can use information age technology and management practices for reengineering the processes to deduce an organization which produces a better product

Process + Technology

Organization = Product

# Core to the Army

## THE ARMY

Being worked  
by LAM &  
Joint Venture

- Prompt and Sustained Operations on Land

## OPERATING FORCES

- Decisive Victory, as the Land Component of the Combatant Commander's Joint/Multinational Force

## COMPETENCY

## CAPABILITY

- Compel
- Deter
- Reassure
- Support
- Dominate Maneuver
- Conduct Precision Strikes
- Win the Information War
- Protect the Force
- Project and Sustain
- Direct, Acquire and Resource the Force
- Develop the Force
- Generate and Project the Force
- Sustain the Force

## INSTITUTIONAL ARMY

- Organize, Train, Equip, Provide and Sustain the Land Component of the Combatant Commander's Joint/Multinational Force

Approved by July  
1995 ACC

# Institutional Army Core Processes

---

Plan, Provide Direction; Obtain & Allocate Resources

*Develop Requirements*

*Develop Doctrine*

Acquire, Maintain &  
Sustain Equipment

*Tailor, Mobilize & Project  
Land Power*

*Identify & Develop Leaders*

✓ *Acquire & Sustain  
People*

Support  
Organizational Training

Manage Information

Manage Installations

Maintain & Sustain Land Operations

# Institutional Axis ‘Measures’

## Measures of Effectiveness

These are *external* measures of the process *product* from the *customer’s perspective*.

What satisfies the customer? Note: if you’re part of the process, you are *not* a customer

- time?
- reliability?
- user friendly?
- cost?

## Measures of Efficiency

These are *internal* measures of the *process* from the *process owner’s perspective*.

What is the most efficient way to generate a satisfactory product?

- time?
- cost?
- service?
- quality?

## Measures of Performance

These are standards or criteria which establish acceptability of effectiveness or efficiency:

- time - not later than *date*
- reliability - probability of failure is *X*?
- user friendly - self instructional manual

# Process: The Approach

## DoD Enterprise Model

# Capstone Perspective

- **In the 21st Century:**
  - Headquarters, DA performs exclusively the strategic planning, programming, budgeting and integrating functions.
  - The Execution of all operational functions will be performed exclusively by Army MACOMs
- **In Business Process Reengineering:**
  - Core processes have a single process owner
  - Processes are designed to minimize the number of hand-offs;
  - Processes are designed to reduce redundancies;
  - Processes become increasingly cross functional.
  - The focus of the process is “Customer Satisfaction.”

# Agenda

---

- Introduction
- Approach
- Results
- Summary

# **Personnel FAA**

## **“Acquire and Sustain People” Process**

# Acquire and Sustain People

---

## Assumptions:

- “Quality People” remains an imperative
- Army Staff and Commanders represent the Secretary of the Army
- The Army will continue to be comprised of:
  - Active and Reserve Military and Civilians
- “Quality” is a universally, uniformly applied standard

# Title 10 U.S. Code

Paragraph 3013(b) - Secretary of Army is responsible for . . . the following functions:

**Recruiting**

Organizing

Supplying

Equipping (including research and development)

**Training**

**Servicing**

Mobilizing

Demobilizing

**Administering** (including the morale and welfare of personnel)

Maintaining

The construction, outfitting, and repair of military equipment

The construction, maintenance, and repair of buildings, structures, and utilities and the acquisition of real property and interests in real property necessary to carry out the responsibilities specified in this section.

"The Secretary of the Army is also responsible. . . for"

Functioning and efficiency of the Department of the Army

Formulating policies and programs by the Department of the Army

Effective and timely implementation of policy, program, and budget decisions and instructions by the President or the SECDEF

Carrying out the functions. . . to fulfill. . .

current and future operational requirements of the unified Combatant Commands

Effective cooperation and coordination

between DA, other military departments and agencies of DoD to provide more effective, efficient, and economical administration

Presentation and justification of the positions of DA on plans, programs, and policies of DoD

Effective supervision and control of the intelligence activities of DA

# Title 10 U.S. Code (*continued*)

Paragraph 3014 - "The Office of the Secretary of the Army shall have sole responsibility within the Office of the Secretary and the Army Staff for the following functions:

- Acquisition
- Auditing
- Comptroller (including financial management)
- Information Management
- Inspector General
- Legislative Affairs
- Public Affairs

"The Secretary of the Army shall establish or designate a single office or other entity within the Office of the Secretary to conduct each function specified [above]. No office or other entity may be established or designated within the Army Staff to conduct any of the functions specified [above].

# Investment

## “as is”

- Army force structure establishes the number of positions necessary to do the work required of the Army IAW:
  - Statute DPG
  - NSS CINCs Req
  - NMS Army Doctrine, Culture, Tradition
- The Army budget and programming processes determine how many people will be employed to fill required billets. Those billets then are the authorized subset of requirements.
- The length of time a person is employed by the Army is a combination of
  - Statute
  - Policy
  - Budget exigency/Policy exceptions
  - Individual preference
  - Death
- Closed system. Little opportunity to move: across components; across identities (particularly military/civilian)

# Acquire and Sustain People

## Acquire Asset

## “as is”

### Acquire

- The Army acquires people in numbers by: identity (Officer, WO, enlisted, civilian); component (AC/NG/AR) as stipulated in its budget; and quality as established in relevant policies, e.g., grade standards, and priorities.

- Commands acquire active military by requisitioning them in the numbers authorized (PBG, TAADs, PMAD)

- civilians are acquired based upon available funds
- reservists are acquired locally based on NG/AR troop programs guidance consistent with the budgeted end strength

- Higher grade people are acquired by promotion and requisition.

### Trained

- People are trained by a variety of internal Army (TRADOC, SSC, JAG, CH, special -- IG, FM, RM) and external (civilian, universities) programs.

### Sustained

- People are sustained in the Army by:

- an upward mobility program of promotions
- competitive pay and benefits (vacation, holidays, health care, employee advocate/IG)
- comprehensive services package (good work environment, physically safe, secure, child care, commissary, exchange, postal, religious support, legal support)
- for military, provisions for adequate housing

# Acquire and Sustain People

## Provide Capability

### PROCESS

#### DISTRIBUTE

- Assign/reassign
- Progression
- Opportunity
- Prerequisites

### ORGANIZATIONS

#### DISTRIBUTE

- PERSCOM
- ARPERCEN
- GUARDPERCEN
- CPO
- OTJAG
- OCCH

“*as is*”

#### • Capability is provided

##### – to people by:

- assigning them to positions to perform tasks in which they are qualified
- maintaining a sequence of opportunities for success
- ensuring assignments are progressive, challenging, rewarding
- integrating opportunities to gain requisite qualifications for progression -- education, type assignments (JT, teaching, etc.)

##### – to organizations by:

- authorizing, hiring and/or assigning people with the requisite qualifications
- acquiring a work force sufficient to the organization's tasks

# What's Wrong with the Current Process?

---

## Customers

- Manpower requirements exceed personnel assets/resources
- Inconsistent quality
- High active military turn over rate (20%)
- Unstable/high turn over
- Inexperience

## Process Owners

- Too many process owners -- DCSPER, CAR, DARNG, TJAG, CCH...
- Too many handoffs -- USAREC, MEDCOM, TRADOC, PERSCOM, FORSCOM, TRADOC...
- Too many gates -- command, school, joint, branch, reserve...
- Closed system
- Too much overhead (TTHS)

# Acquire and Sustain People: The “Processes”

---

## The Army has:

- At least six separate personnel management systems
  - Active military
  - ARNG (+)
  - USAR
  - Chaplain
  - Judge Advocate General
  - Civilian
- Many special interest offices
  - HQDA
  - OPS (FAO)

# Acquire and Sustain People

## Establish Direction

### PROCESS

#### STRUCTURE

IAW, NSS, NMS, DPG

provide:

land force strategy, doctrine  
(operating force), policies  
(institution)

Provide personnel resource  
guidance:

- numbers by identity and component
- priorities

Constrain Structure to  
resources, law priorities and  
standards

#### SEPARATE

Process unchanged

#### STANDARDS

Retention standard  
changed, lengthened

### ORGANIZATIONS

#### STRUCTURE

• Director Requirements (A-8)

• ASA(MRA)

• DCSPER

• Force Development

Command

#### SEPARATE &

#### STANDARDS

• Organization unchanged

## “to be”

- Structure

- all manpower requirements developed by one command
- Force Development Command (process proponent)
- HQDA (process owner) allocates resources/defines the limits (personnel) within which the Army must be structured, and priorities
- HQDA establishes quality standards for all accessions
- FD command develops/recommends “affordable requirements” within priorities; HQDA approves.

- Separate

- current process unduly burdens Acquire Assets sub-process
- personnel retained longer -- age 62 max
- personnel migrate across identities; separate as “prior Army service” not prior AC, RC or Civilian.

- Impact

- reduced TTHS
- reduced turbulence; enhanced cohesion
- enhanced reserve forces
- reduced retirement investment
- expanded experience opportunities, e.g., command, JT, school

# Acquire and Sustain People

## Acquire Assets

PROCESS	ORGANIZATIONS
ACQUIRE	The Army University
TRAIN	ADVERTISE, ACQUIRE, RECRUIT, HIRE
SUSTAIN	• Director of Admissions
unchanged	TRAIN (Educate)
	• Dean of Core and Advanced Studies
	• Core Colleges/Battle Labs
	SUSTAIN
	• Vice Presidents for Placement and Services

## “to be”

- Acquire
  - acquire fewer, retain longer
  - all acquired by one command; same command that defined requirements -- Force Development Command
  - other commands/agencies “acquire” people by requisitioning from Force Development Command “Placement Center” (PERSCOM, all components, all identities)
- Train
  - all individual training responsibility of one command -- Force Development Command
  - three individual training hubs: tactical; operational; strategic
    - tactical = 6 battle labs focus; branches are electives
    - operational = joint/defense focus
    - strategic = multinational focus
- Sustain
  - upward mobility program managed by “Placement Center”
  - pay, benefits, safety, awards and decorations, mail, casualties and other services assumed by University “Services Center”
  - Total Army Quality, including inspection assistance, investigation (waste/fraud/abuse), security and audits under Office of the University Provost.

# Acquire and Sustain People

**Provide  
Capability**

## **PROCESS**

**DISTRIBUTE**  
process  
consolidated

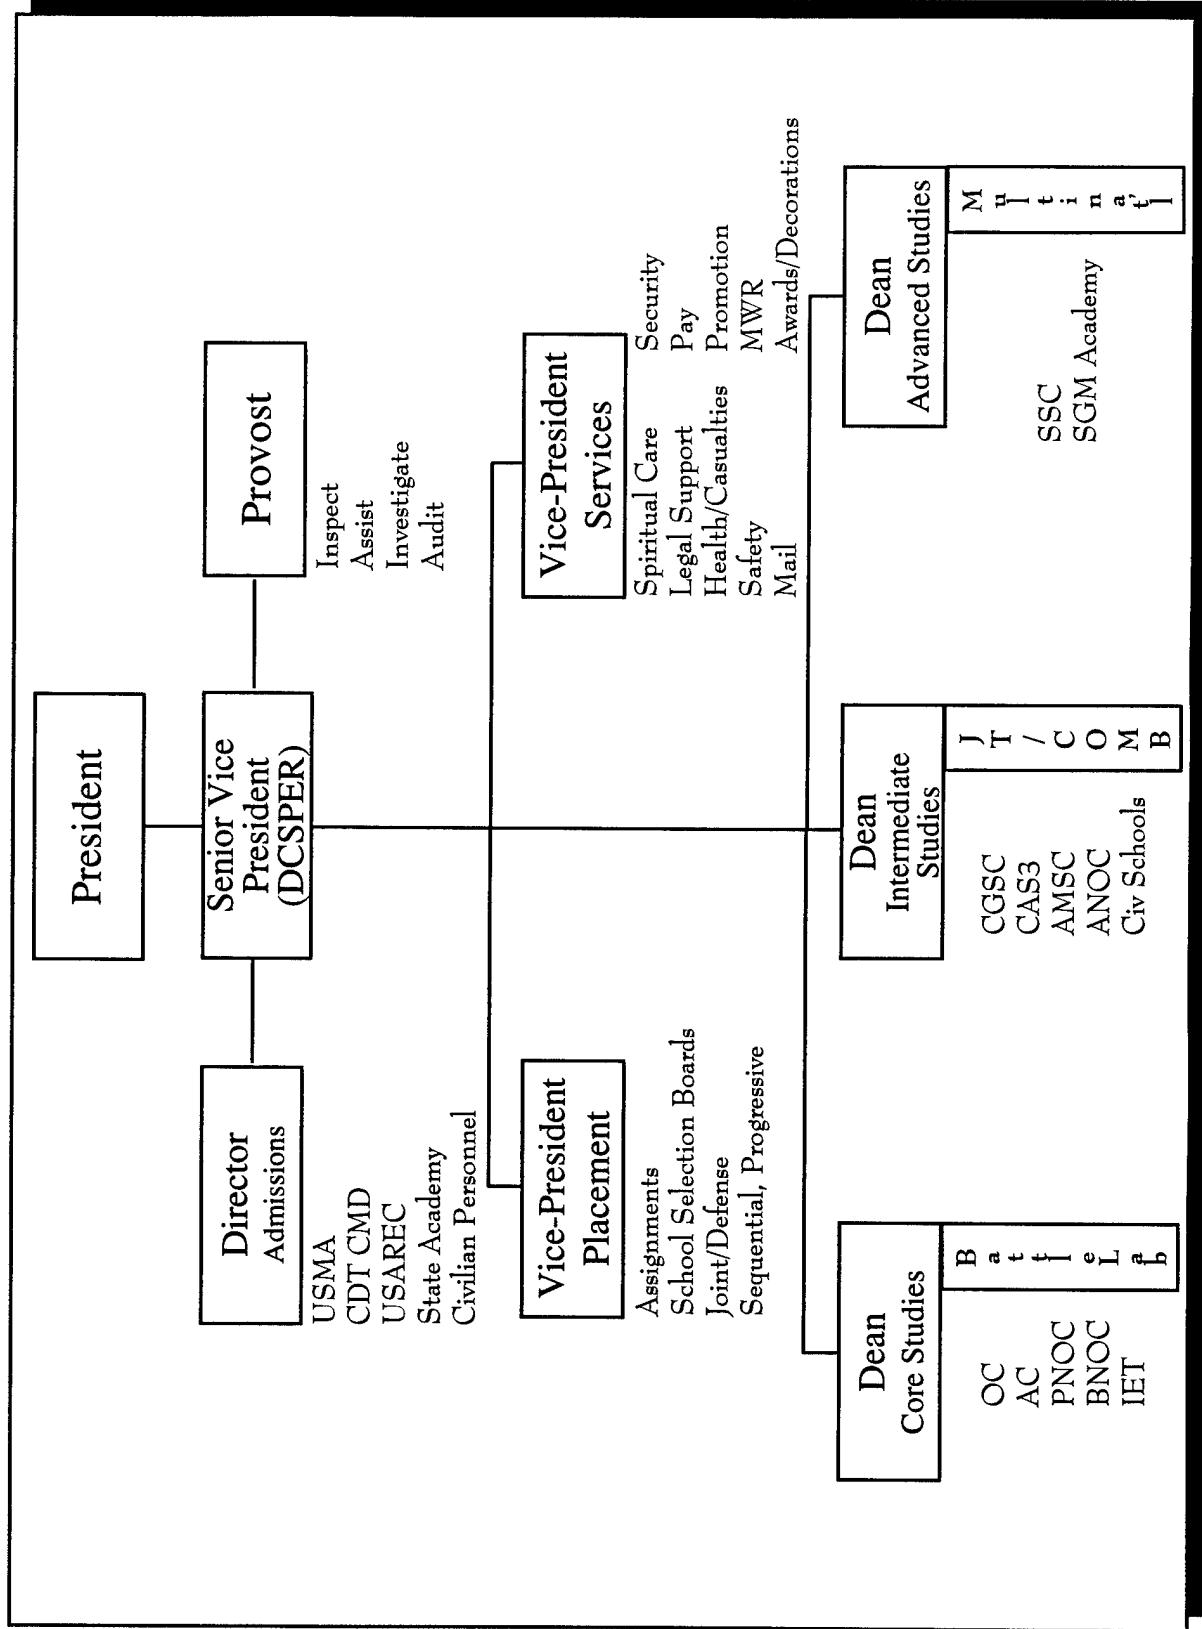

## **ORGANIZATIONS**

**DISTRIBUTE**  
The Army University  
Vice President for  
Placement

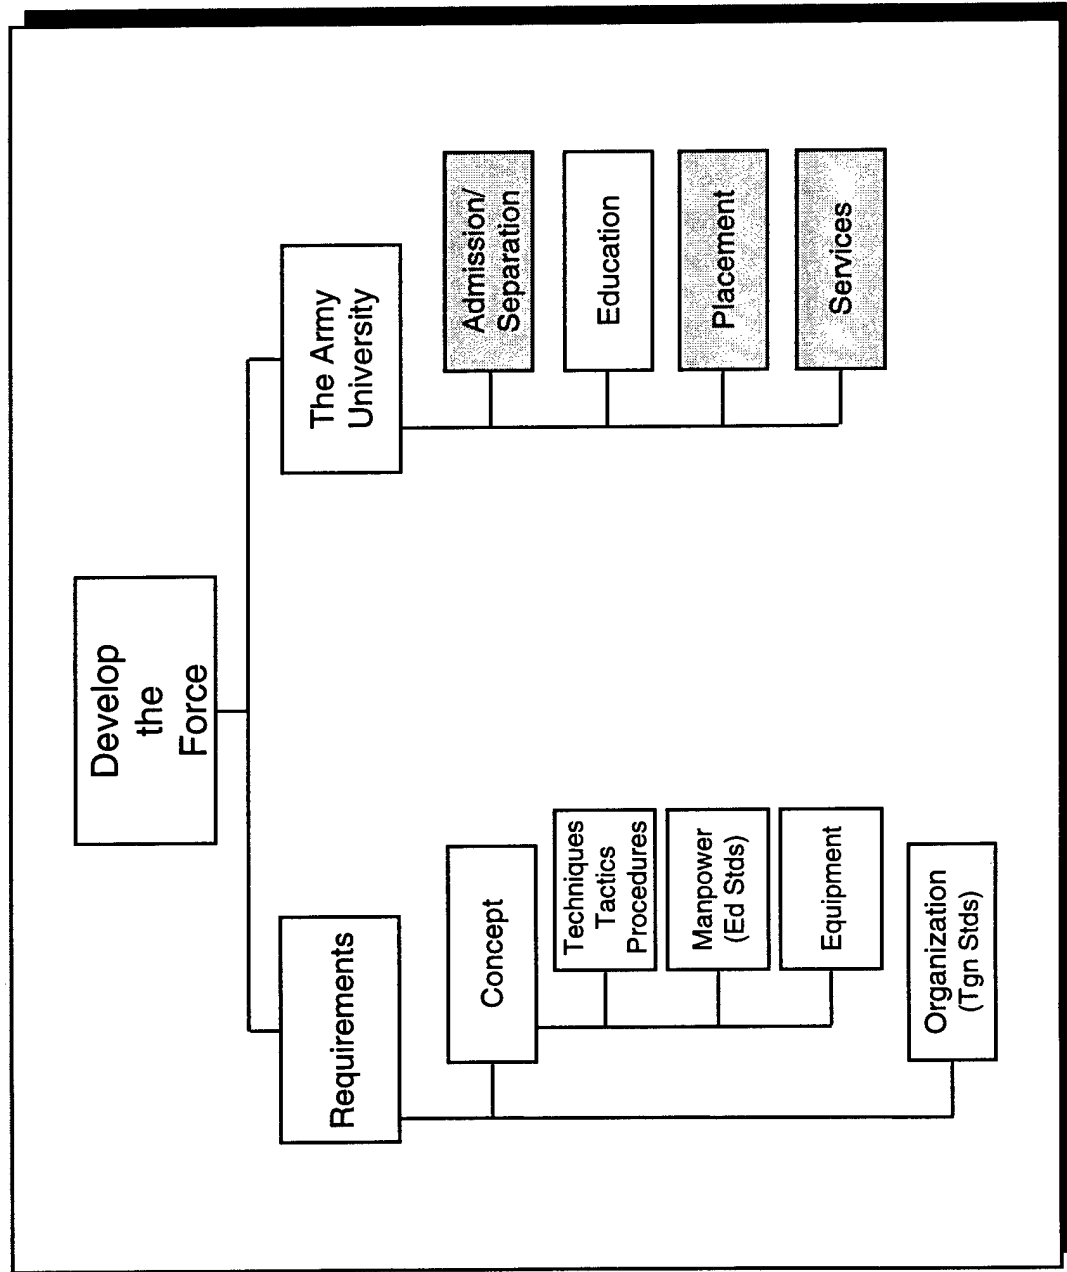

***“to be”***

- Maximize tour lengths
- Minimize turbulence
  - frequency and duration of short tours
  - frequency and duration of unaccompanied tours
- Optimize stability
  - encourage local upward mobility
  - discourage local lateral mobility
- Quality people
  - select people: “quality” criteria for selection
  - qualified people: trained to tasks
  - satisfied people: quality of life, benefits
  - experienced people: retain the best longer
  - circumspect people:  
active/reserve/civilian/interactive system

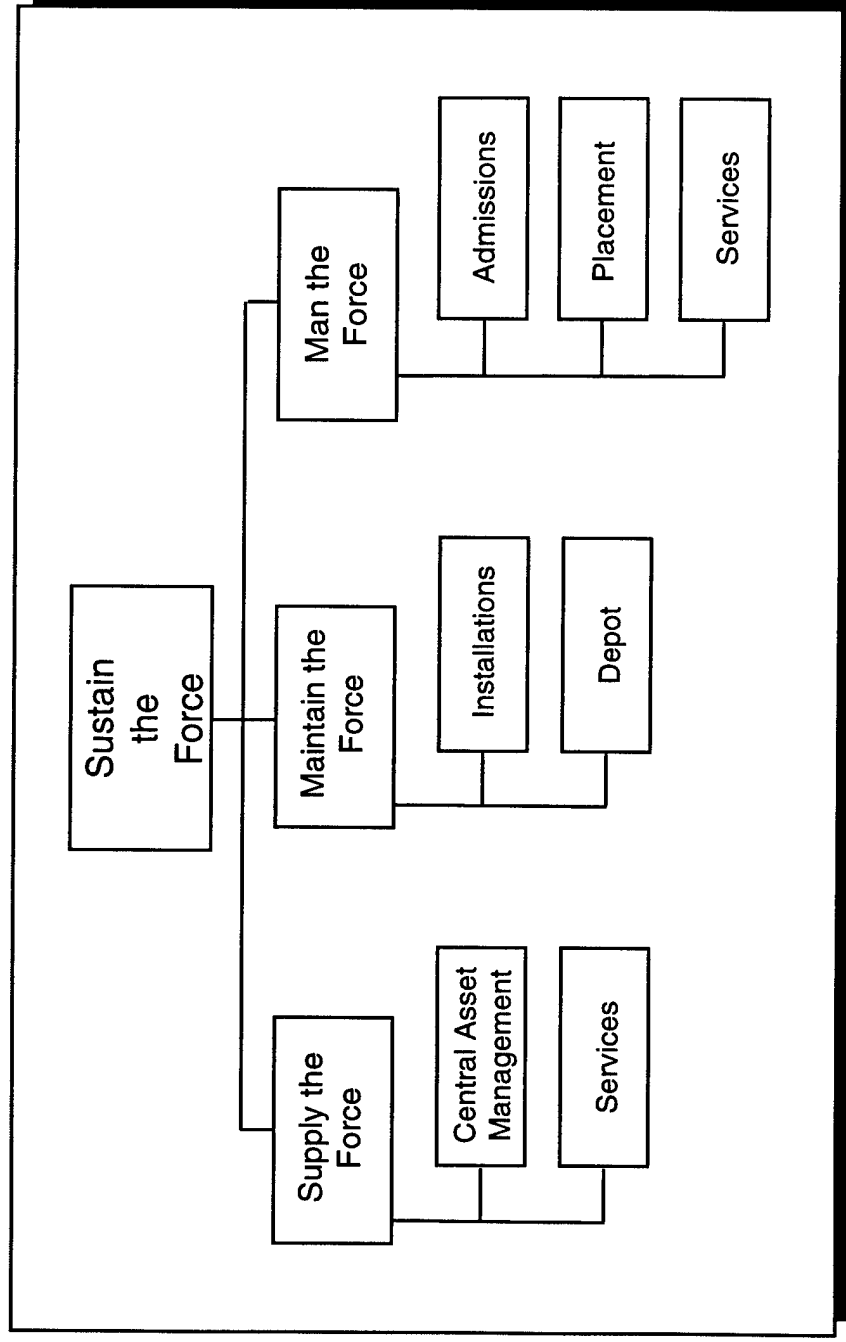

# The Army University

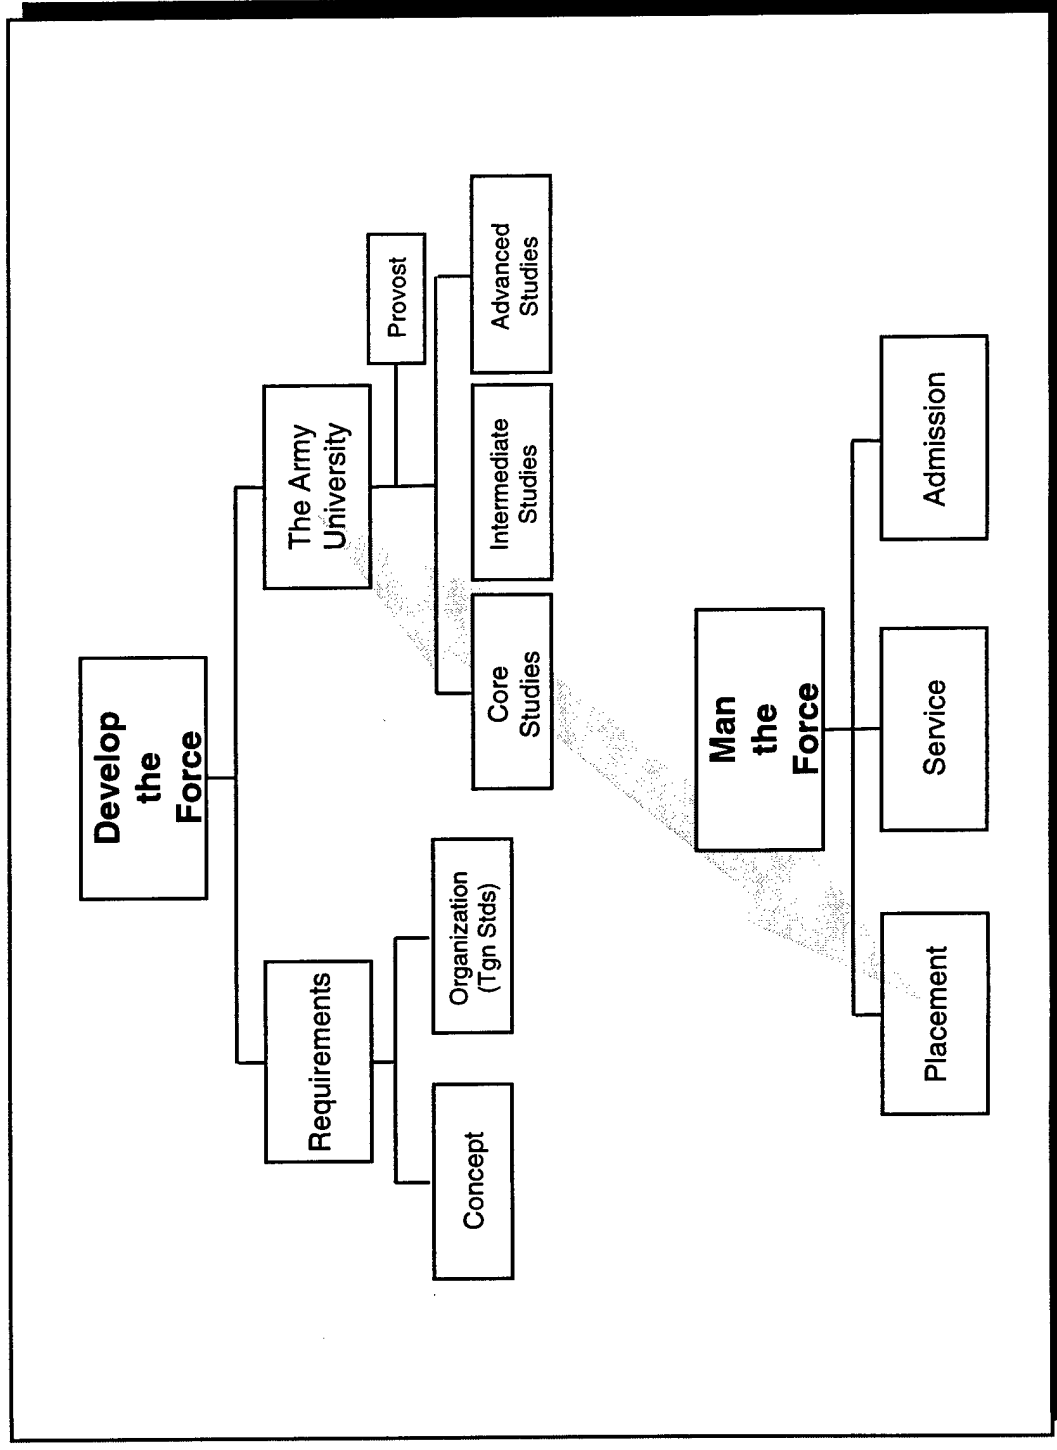

# Option 1. Develop the Force Command

## Option 2. Sustain the Force Command

## Option 3. Separate Major Commands

# Acquire and Sustain People

**Easy/Cheap/Early**

**Hard/Expensive/Later**

**Easy/Cheap/Early**

**Action**

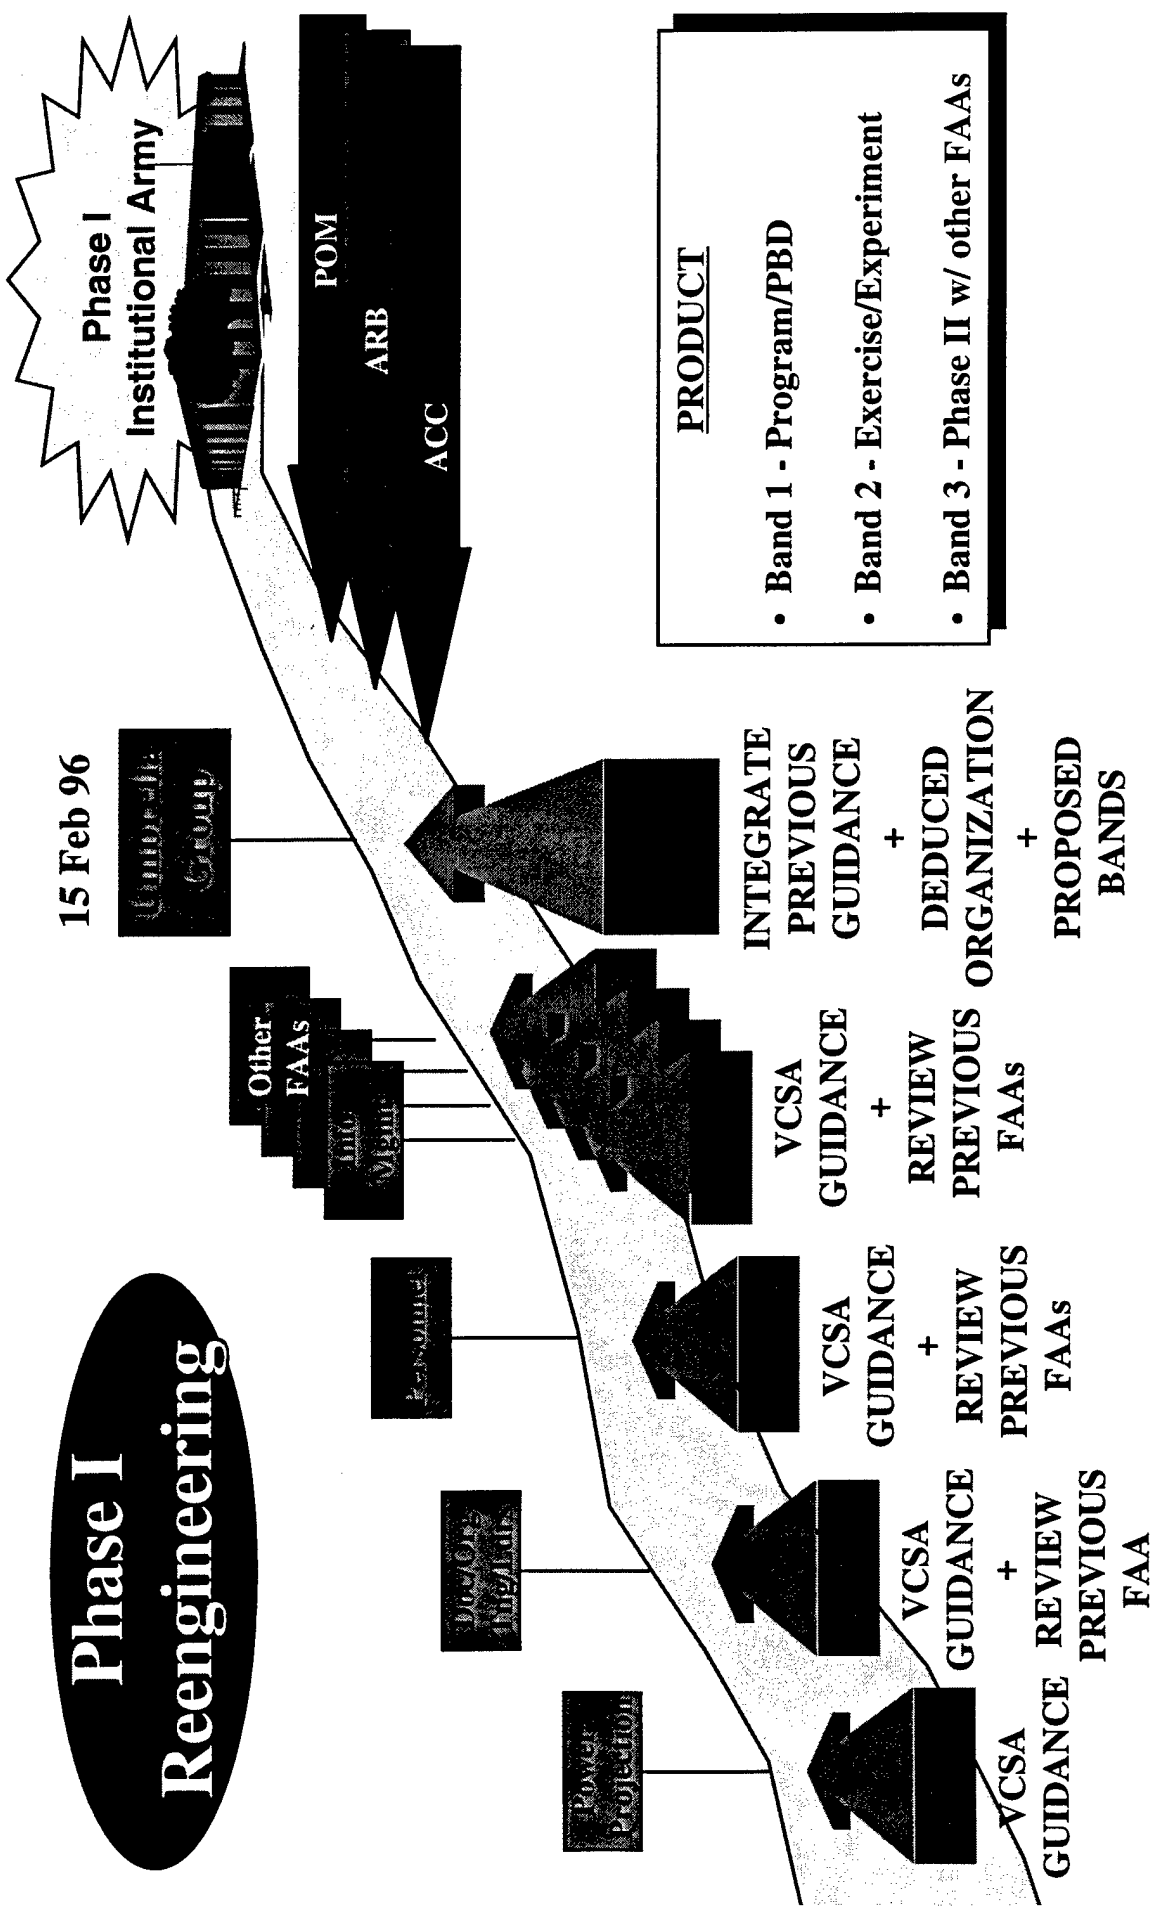

**DCSPER**

**Experiment**

- Divest "structure" to FD Command -
- All accessions to one Command -
- All education to one Command -
- All assignments to one Command +
- Condense education to "Core Colleges" -
- Establish The Army University +
- Eliminate Special Branches -
- Eliminate Criminal Investigations -
- Interactive active/reserve/civilians +
- *Revise retirement* -

**Excess Property**  
*Balancing Property to Readiness/QOL*

**Readiness/QOL**

**Excesses are...**

- at most installations
- growing
- maintenance burden

**But...**

- can be an asset if leveraged

**Examples**

- Ft Carson land/housing swap
- Ft Ord trailer park

Date: 2/2004 Page 68L

Date: 2/2004 Page 70 R

Your Notes

Slides Left and Right

# U.S. Army Construct FAA

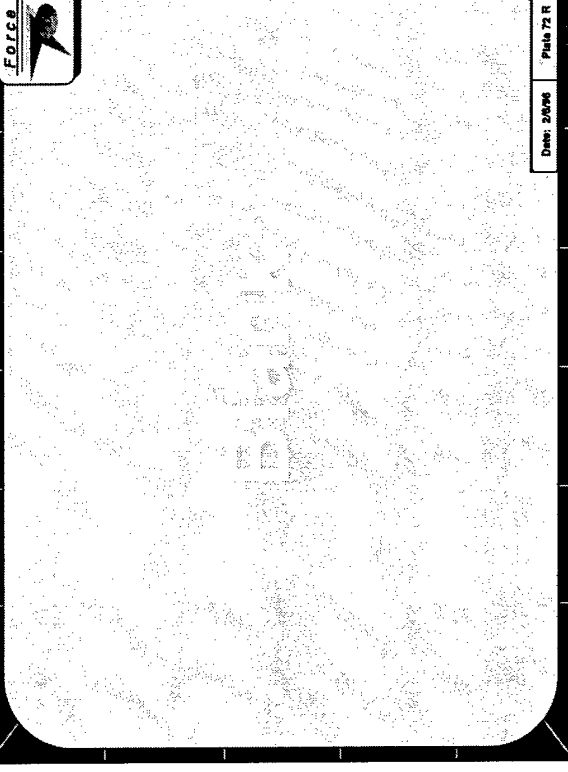

**Excess Property Conclusions**

- HQDA
  - Establish surge requirement
  - Continue to emphasize management/disposal
- MACOMs
  - Dispose of excess consistent with MACOM Reengineering & HQDA Umbrella FAA
- USACE
  - Continue to support MACOMs
  - As directed assume control of property for management/disposal

Date: 2/20/04

Slide 71L

Date: 2/20/04

Slide 72 R

Your Notes

# U.S. Army Construct FAA

## Excess Property Conclusions

- HQDA**
  - Establish surge requirement
  - Continue to emphasize management/disposal
- MACOMs**
  - Dispose of excess consistent with MACOM Reengineering & HQDA Umbrella FAA
- USACE**
  - Continue to support MACOMs
  - As directed assume control of property for management/disposal

Date: 2/9/94 Plate 73L

## Excess Property Pros & Cons

### Pros

- Reduces BASOPS FTEs & \$\$
- Uses excess productively
- Leverages USACE civil works O&M capability

### Cons

- Up front \$\$ required?
- USACE requires \$\$ to assume control

O&M savings < \$200M/year

Examples

- Kapalama – Phases I & II
- Sacramento Depot – BRAC

Date: 2/9/94 Plate 74 R

Your Notes

Slides Left and Right

# U.S. Army Construct FAA

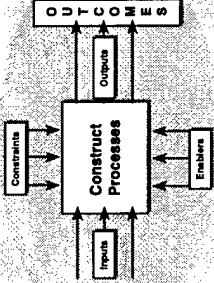

**Reengineer Processes  
Conclusions**

- Facilities programming
- Streamline MILCON
- Acquisition practices
- Eliminate multiple layers
- Use information technology
- Improve environmental management

**Additional Conclusion**

- Seek legislative changes

**Construct Processes**

Inputs → Construct Processes → Outputs → Outcomes

Constraints → Construct Processes

Enablers → Construct Processes

**OUTCOMES**

## Improve Organizations Alternatives Assessment

★ Assumes  
all BASOPS

Criteria	Min FTE A	Inst Cmd B	Partnership C	USACE PW C1
Readiness	□	+	+	+
Quality of Life	□	+	+	+
Funds	□	+	+	+
FTE	□	+	+	+
Responsiveness	□	+	+	+
Political Constraints	□	+	+	+
Environment	□	+	+	+
Organization	□	+	+	+
Functional Expertise	□	+	+	+
Excess Inventory	□	+	+	+

Impact

☐ negative  
☐ none  
☒ positive

$<25,000 \text{ FTE} \leq 1200 \text{ FTE} \leq 500 \text{ FTE} \leq 1000 \text{ FTE}$   
 $\text{more } \$\$ ? \leq \$50\text{M} \leq \$21\text{M} \leq \$42\text{M}$

## Slides Left and Right

# U.S. Army Construct FAA

**Improve Organizations  
Conclusions**

Reject Alternative A - Minimum FTE  
– Breaks Army's skill base & processes needed to perform mission

Evaluate Alternative B - Installation Command in BASOPS FAA  
– Has merit if applied to all BASOPS functions

Proceed with Alternative C - DPW/USACE Partnerships  
– Provides immediate support at critical time

Pilot test Alternative C1 - USACE Public Works Mission USACE and one or more MACOMs  
– Increases savings potential of Alternative C

# REDESIGN OF THE INSTITUTIONAL ARMY

## CONSTRUCT FAA

*“Acquire and Sustain Facilities”*

*January 3, 1996*

# **This is an Information Briefing for the VCSA to set the stage for the Construct FAA to be conducted by the USAACE on 8 January 1996**

# Agenda

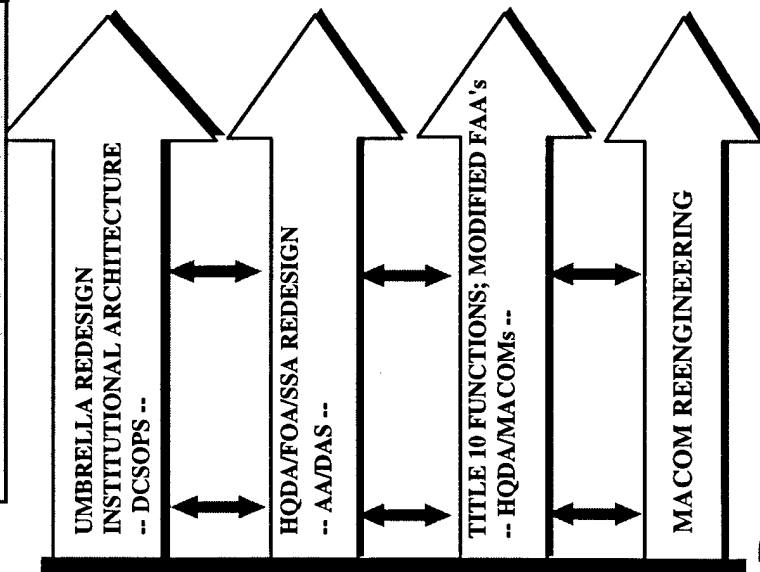

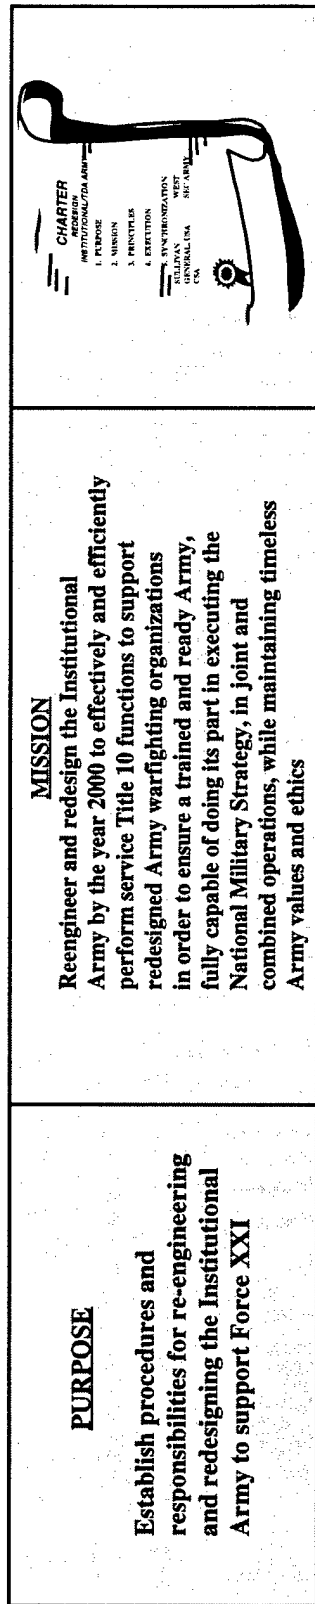

---

- Introduction
- Approach
- Results
- Summary

# Institutional Army Redesign Charter

I N T E G R A T I O N   B Y   D C S O P S / A S A (M&RA)

## TITLE 10 FUNCTIONS

MACOM PROPONENTS  
&  
HQDA SPONSORS  
-- PARTNERSHIP --

F O R C E

## PHASED CAMPAIGN

- I BASELINE ORGANIZATION  
POM 98-03
- II REVISED ORGANIZATION  
BRIGADE XXI  
POM 00-05
- III FINAL ORGANIZATION  
DIVISION XXI  
POM 02-07

LD

5/20/98

# Umbrella Group Tasks

---

1. Coordinate and Synchronize Efforts with other Axes and Studies
2. Define, Coordinate FAA Process and Re-Engineering Briefings
  - Format and Schedules
  - *Inject Innovation and Challenging Issues*
3. Facilitate Sharing of Ideas
4. FAA: Outline the Institutional Army Design -- 21st Century

# Institutional Axis FAAs

## FAA Laydowns

Power Projection (FORSCOM)	✓	25 October 95
Training/Leader Development/ Doctrine/Organize (TRADOC)	✓	1 December 95
Construct (USACE)		8 January 96
Personnel Mgmt/Recruit (DCSPER)		23 January 96
Equip/ Supply/Maintain/Service (AMC)		29 January 96
Information Management (DISC4)		2 February 96
HQDA/FOA/SSA (AA/DAS)		12 February 96
Umbrella (DCSOPS)		23 February 96

## Expected Outcome

- Broad Army Focus
- Current, Army-Wide Process Description
- Alternative(s), 21st Century Processes, Et Al
- Linkage To:
  - Institutional Core Competencies
  - 21st Century Operating Force
- Underlying Assumptions/Risks
- Range of Options for Preliminary TDA Redesign
  - Do Now (Early in POM 98-03)
  - Do Later (Out Years of POM 98-03)
  - Assess in Greater Detail in Phase 2
- Issues (Program) w/Recommendations to be Resolved By
  - VCSA
  - ACC
  - CSA/SA

# Key Points of Power Projection FAA

## FORSCOM

- Designate FORSCOM as Exec Agent for Mob
- Designate 15 PPPs & 12 PSPs
- Review ARNG/USAR STARC/RSC size, structure, manning, regionalizing & DIV(IT) use
- Align Deployment Units
- Use JOPES & train deploy pers
- Automate Deploy w/elect tags and other tech means
- MTMC as “common user” seaport mgr & joint container mgr
- Joint commonality of Automated Deployment Systems
- Seek support of modular force pkgs

## UMBRELLA GROUP

- FORSCOM Process Owner
- Align GSUs to Power Proj Platforms
- FORSCOM/MTMC use JMATs
- MTMC subordinate to FORSCOM
- Provide common Deployment System
- FORSCOM is Army Force Provider
- FORSCOM assumes Current Ops
- FORSCOM generates Alert/Mob Order
- FORSCOM selects RC units
- RC Cdrs validate units for deployment
- RC units by pass Mob Station
- Reduce Mob Stations
- CORPS assume CONUSA mission
- Provide common TPFDD/L System

# Key Points of Trng/Ldr Dev/Org/Doc FAA

<u>TRADOC</u>	
<i>TRAINING &amp; LEADER DEVELOPMENT</i>	
•	TRADOC Institutional Training Command
•	More 'different-place-same-time' training and distance learning
•	Use 'Echo Company' for USAR Trng Bns
•	Reduce TTHS (resident training rqmts)
•	Privatize/Contract out ROTC mission
•	Much smaller (Option 3)
<i>DEVELOP REQUIREMENTS</i>	
•	TRADOC Requirements Process Owner
•	TRADOC designs and HQDA documents force
•	Annual TAA
•	Align all Army CD activities into TRADOC
•	Battle Labs process to CBRS
•	Out-of-the-box option by March
•	TRADOC Battle Labs ensure interface with JROC
<i>DEVELOP DOCTRINE</i>	
•	TRADOC Joint Doctrine Process POC
•	TRADOC Army Doctrine Process Own
•	Publish Doctrine "On-line" BBS
•	AWC & USMA develop selected doctrine
•	DA Pam 100-XX rolled into TC 525-5
•	TRADOC will Develop TDA Doctrine

<u>UMBRELLA GROUP</u>	
<i>TRAINING &amp; LEADER DEVELOPMENT</i>	
•	TRADOC Ident & Dev Leaders Process Owner
•	TRADOC Acq & Sus People Process Owner
•	Move DAMO-TR & DAPE-HR-L to TRADOC
•	Improved RC Officer Leader Development
•	Reduce Resident Training Rqmts
•	Use RC for ROTC mission
•	Reduce number of schools
<i>DEVELOP REQUIREMENTS</i>	
•	HQDA Requirements Process Owner
•	TRADOC Force Development Owner
•	TRADOC DOC/CD Merged
•	TAA; SACS; TAADS "On-line" WWW
•	Move DAMO-FD(-) to TRADOC
•	Battle Labs process to CBRS
•	Tie JWCA to Force Development
<i>DEVELOP DOCTRINE</i>	
•	HQDA Joint Doctrine Process POC
•	HQDA Army Doctrine Process Own
•	Publish Doctrine "On-line" BBS
•	Move all Army TTP to TRADOC
•	Embed Army Doctrine in JROC/JWCA
•	Reengineer Joint Doctrine Development

# Agenda

---

- Introduction
- Approach
- Results
- Summary

# Institutional Army Axis Hypothesis

---

## Fundamental “Reengineering” Hypothesis

- If we understand the Institutional Army’s core competencies and related processes and the insights derived from Joint Venture we can use information age technology and management practices for reengineering the processes to deduce an organization which produces a better product

Process + Technology

Organization = Product

# Institutional Army Core Processes

---

Plan, Provide Direction; Obtain & Allocate Resources

*Develop Requirements*

*Develop Doctrine*

Acquire, Maintain &  
Sustain Equipment

*Tailor, Mobilize & Project  
Land Power*

*Identify & Develop Leaders*

Acquire & Sustain  
People

Support  
Organizational Training

Manage Information

✓ *Acquire and Sustain Facilities*

Manage Installations

Maintain & Sustain Land Operations

# Institutional Axis ‘Measures’

## Measures of Effectiveness

These are *external* measures of the process *product* from the *customer’s perspective*.

What satisfies the customer? Note: if you’re part of the process, you are *not* a customer

- time?
- reliability?
- user friendly?
- cost?

## Measures of Efficiency

These are *internal* measures of the *process* from the *process owner’s perspective*.

What is the most efficient way to generate a satisfactory product?

- time?
- cost?
- service?
- quality?

## Measures of Performance

These are standards or criteria which establish acceptability of effectiveness or efficiency:

- time - not later than *date*
- reliability - probability of failure is X?
- user friendly - self instructional manual

# Process: The Approach

## DoD Enterprise Model

# Capstone Perspective

- **In the 21st Century:**
  - Headquarters, DA performs exclusively the strategic planning, programming, budgeting and integrating functions.
  - The Execution of all operational functions will be performed exclusively by Army MACOMs
- **In Business Process Reengineering:**
  - Core processes have a single process owner
  - Processes are designed to minimize the number of hand-offs;
  - Processes are designed to reduce redundancies;
  - Processes become increasingly cross functional.
  - The focus of the process is “Customer Satisfaction.”

# Agenda

---

- Introduction
- Approach
- Results
- Summary

# **Construct FAA**

## **“Acquire and Sustain Facilities” Process**

# Title 10 U.S. Code

Paragraph 3013(b) - Secretary of Army is responsible for . . . the following functions:

- Recruiting
- Organizing
- Supplying
- Equipping (including research and development)
- Training
- Servicing
- Mobilizing
- Demobilizing
- Administering (including the morale and welfare of personnel)
- Maintaining
- The construction, outfitting, and repair of military equipment
- ☒ The construction, maintenance, and repair of buildings, structures, and utilities and the acquisition of real property and interests in real property necessary to carry out the responsibilities specified in this section.

"The Secretary of the Army is also responsible. . . for"

- Functioning and efficiency of the Department of the Army
- Formulating policies and programs by the Department of the Army
- Effective and timely implementation of policy, program, and budget decisions and instructions by the President or the SECDEF
- Carrying out the functions. . . to fulfill. . . current and future operational requirements of the unified Combatant Commands
- Effective cooperation and coordination between DA, other military departments and agencies of DoD to provide more effective, efficient, and economical administration
- Presentation and justification of the positions of DA on plans, programs, and policies of DoD
- Effective supervision and control of the intelligence activities of DA

# Acquire and Sustain Facilities

## *Definition*

---

The process of identifying, acquiring, managing, maintaining, and ultimately disposing of real property in support of Army requirements for the sustaining base and forward stationed forces.

(Executing the Army's real property environmental responsibilities is assumed in the managing aspect of the above definition).

# Acquire and Sustain Facilities

## *Assumptions*

---

- Defense resources will not keep pace with Service requirements
- Army will operate in an environment as described in TRADOC PAM 525-5
- Mission related programming will continue to be done by MACOMs
- DoD will continue to move toward privatization

# Acquire and Sustain Facilities

**Important Factor:** *Construct* processes represent a significant resource investment. Redesigned processes should provide mechanism to support future requirements appropriately.

<b>Facilities</b>	950M square feet in inventory with 170M square feet considered excess (18%)
<b>Manpower</b>	43,000 Civilians and 1,000 Military
<b>Dollars \$12B</b>	(Lrg Accnts: AFH \$1.4B; MCA \$691M; OMA \$2.8B)

The focus must be on: eliminating redundancies; reducing the number of hand-offs; and, dramatic improvement in other measures of performance such as time, cost and services.

# Core to the Army

## THE ARMY

- Prompt and Sustained Operations on Land

Being worked  
by LAM &  
Joint Venture

## OPERATING FORCES

- Decisive Victory, as the Land Component of the Combatant Commander's Joint/Multinational Force

## INSTITUTIONAL ARMY

- Organize, Train, Equip, Provide and Sustain the Land Component of the Combatant Commander's Joint/Multinational Force

Approved by July  
1995 ACC

## COMPETENCY

## CAPABILITY

- Compel
- Deter
- Reassure
- Support
- Dominate Maneuver
- Conduct Precision Strikes
- Win the Information War
- Protect the Force
- Project and Sustain
- Direct, Acquire and Resource the Force
- Develop the Force
- Generate and Project the Force
- Sustain the Force

# Acquire and Sustain Facilities: *The Process*

# Acquire and Sustain Facilities: *The Organizations*

# Acquire and Sustain Facilities

---

## A Look at the Process Parts

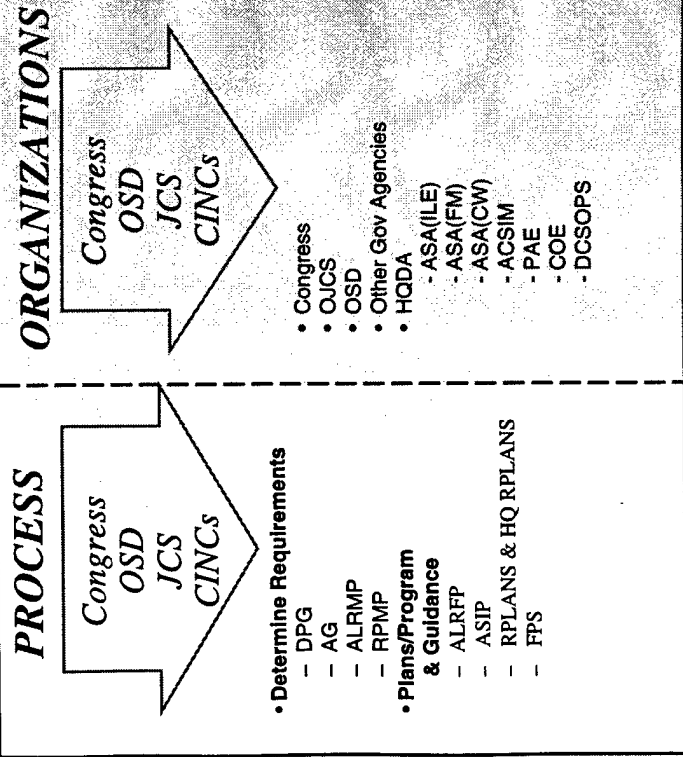

*Establish Direction*

*Acquire Assets*

*Provide Capability*

# Acquire and Sustain Facilities

## Establish Direction

*“as is”*

- Defense Guidance establishes direction for Army requirements
- Historic precedence and traditions in post and fort design
- Congressional appropriations actions influence scope
- CINC’s through CSPAR and IPL process
- JCS through Program Evaluation Process
- Force Structure changes are slow to generate facility changes/requirements - e.g. M-1 wash racks; Apache hangers
- Installations determine unique local requirements
- Stationing decisions influence/direct the process
- Training initiatives , weapon systems, maintenance, etc., changes are slow to mandate requirement for new facilities - e.g. MLRS made new ranges necessary.
- New technology influences direction, but slow to infuse

# Acquire and Sustain Facilities

## Acquire Assets

## “as is”

- Real properties are acquired through a combination of purchase, leases, construction or other forms of contract - both foreign and domestic.
- Some requirements are not “Acquired” due to resource constraints - Projects are line item issues in Congress.
- Some existing requirements are not “Sustained” due to resource constraints - BMAR increase (300% FY92-FY99).
- Environmental issues in acquiring, operating and disposing of real property. e.g., Environmental Impact Statement must be accommodated.
- Real Property responsibilities for other government agencies e.g., USAF, USN, DLA, NDU, Dependent Schools.

# Acquire and Sustain Facilities

Provide  
Capability

PROCESS	ORGANIZATIONS
<ul style="list-style-type: none"><li>• Budget Process<ul style="list-style-type: none"><li>- OMA</li><li>- OMNG</li><li>- OMAR</li><li>- AFH</li><li>- RPMA</li></ul></li><li>• AWP</li><li>• Operate, Maintain &amp; Sustain Real Property<ul style="list-style-type: none"><li>- Utilities</li><li>- Maintain &amp; Repair</li><li>- Modernize</li><li>- P</li></ul></li></ul>	<ul style="list-style-type: none"><li>• HQDA and MACOMs<ul style="list-style-type: none"><li>- TRADOC</li><li>- AMC</li><li>- USACE</li><li>- States (AFNG)</li><li>- Reserves (Army, Navy, AF, USMC)</li><li>- Installations (DEH)</li></ul></li><li>• DEF Agencies<ul style="list-style-type: none"><li>- DeCA</li><li>- AEC</li><li>- AAFES</li></ul></li><li>• Gov Agencies<ul style="list-style-type: none"><li>- Interior</li><li>- Agriculture</li><li>- Lands</li></ul></li></ul>

“as is”

- Not always consistent with customer requirements:
  - Maintain facilities and property - Backlog
  - Sustain facilities and property
  - Dispose of facilities and property - 170M sq ft excess
- Provide customer with useable real property e.g. Army Units
  - - Barracks - Lag in enlisted barrack construction
  - - Training Areas
  - - Administrative facilities
  - - Other e.g., maintenance buildings, recreation, etc.Army Families
  - - Government quarters
  - - MWR facilities

# What's Wrong with the Current Process?

---

## Customer

- Command Expectations Exceed Resources
- Ineffective, Fragmented Information Systems
- Inflexible, Non-integrated Procurement

## Process Owner

- Multiple “process owners”
  - Multiple “hand-offs”
- Process is manpower and time intensive
- Resource delivery not tied to requirements

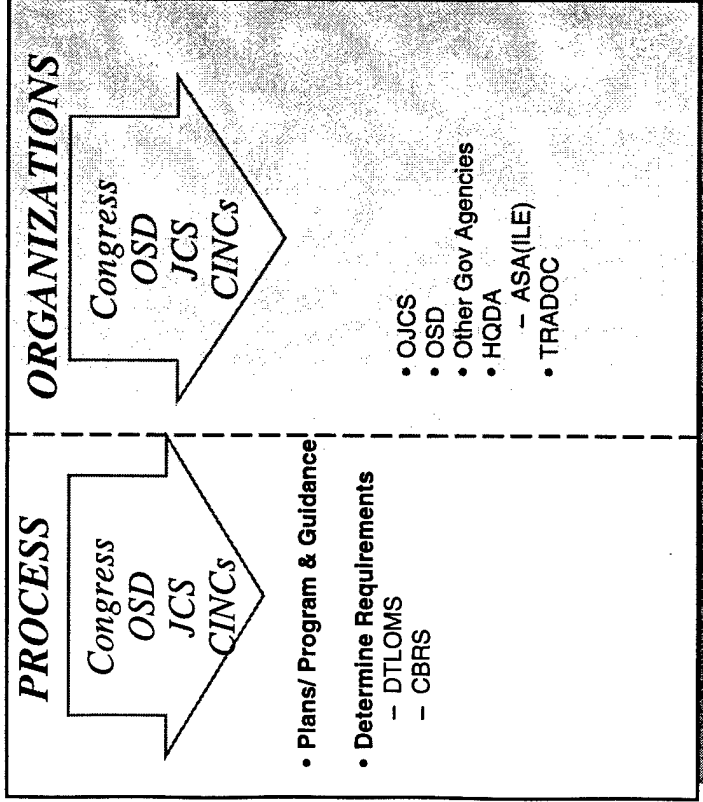

# Acquire and Sustain Facilities

## Measures Standard

Customer	Effectiveness	Performance
	<i>Establishes Direction</i> <ul style="list-style-type: none"><li>• Support National Military Strategy</li><li>• Meet OSD/Army Requirements (AG)</li><li>• Integrated Plans (ALRFP; ASIP; RPLANS)</li></ul> <i>Acquire Assets</i> <ul style="list-style-type: none"><li>• POM</li></ul> <i>Provide Capability</i> <ul style="list-style-type: none"><li>• Budget</li></ul>	<ul style="list-style-type: none"><li>• Supports Power Projection</li><li>• Sufficient Number of Appropriate Facilities</li><li>• Supports The Army Plan</li></ul> <ul style="list-style-type: none"><li>• Supports Sustainment and Environment</li></ul> <ul style="list-style-type: none"><li>• Installation ISR</li></ul>
Process Owner	Efficiency	Performance
	Minimize Use of Resources <ul style="list-style-type: none"><li>– Minimize Process Hand-offs</li><li>– Eliminate Redundancies</li></ul>	<ul style="list-style-type: none"><li>• Time</li><li>• Dollars</li><li>• Manpower</li><li>• Facilities</li></ul>

# Acquire and Sustain Facilities

## Establish Direction

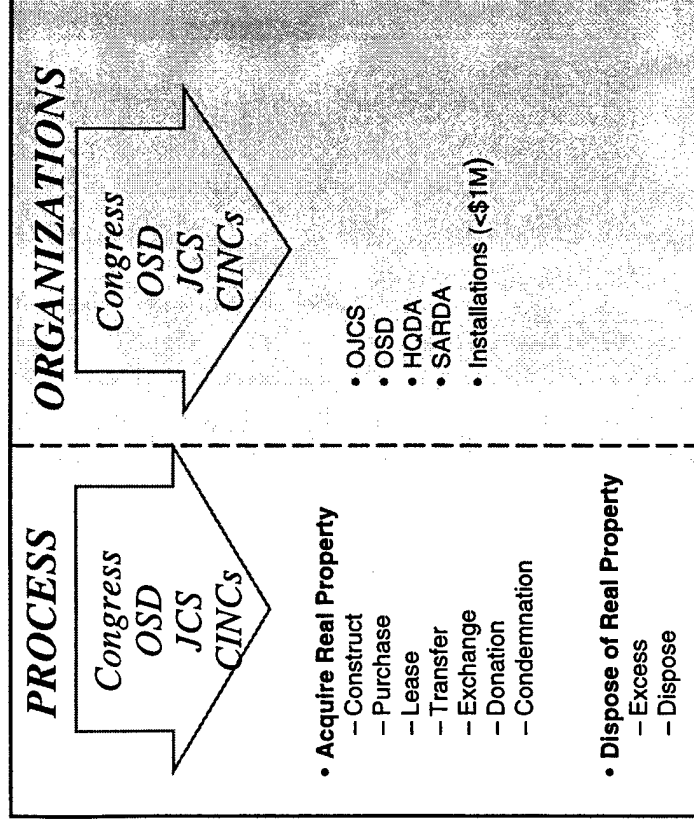

## *“to be”*

- Divest Civil Works
  - Not in Title 10 as specific function
  - Not a core competency
  - Not a core capability
  - Not a core process
- HQDA determines direction
- Merge COE (MACOM (-)) into ILE
  - Reduces redundancies of staff
  - Chief of Engineers becomes ASA(AILE)
  - Responsibilities vested in single process owner formulating an integrated process
- Single multi-functional MACOM determines requirements (Force Development Command)

# Acquire and Sustain Facilities

## Acquire Assets

*“to be”*

- Real Property contracting is an Army acquisition process
- Single process owner for contracting (>\$1M) - SARDA
  - Design Build Through Contracting
  - Leverage Private Capital
  - Build - To - Lease Arrangement
  - Privatize to Maximum Extent
- Empowerment to local installation (<\$1M local const)
- Disposal of excess property
  - Real Property Disposal Agent in ILE
  - Provide leverage for best disposition of excess property - make unit CDR tenant only

# Acquire and Sustain Facilities

## Provide Capability

### PROCESS

- Army POM
- Army Budget
- Command Plans
- Provide:
  - Training
  - Equip
  - Supplies
  - Services
  - Tech Support
  - Info Mangt
  - Policy
  - Adherence

### ORGANIZATIONS

- HQDA and MACOMs
- DoD Agencies
- Gov Agencies

## “to be”

- Single Installation MGT process owner - ILE
  - Consolidation of ACSIM into ILE
  - Responsible for Real Property Disposal
- Privatize/outsource maintenance/sustainment functions for facilities and properties
  - Improve Environmental Management
  - Use Information Management Smarter

# Acquire and Sustain Facilities

## *“To-Be”*

---

### An “Integrated” Process

Divestiture of Civil Works

Merge USACE (-) into ILE

Merge ACSIM (-) into ILE

Establishes responsibility for excess real property disposal activity in ILE

Single Installation Management process owner - ILE

Single contracting process owner - SARDA

Maximize outsourcing of maintenance and sustainment functions

# Acquire and Sustain Facilities

**Easy**

**Hard**

<u>Action</u>	<u>FAA</u>	<u>Experiment</u>
Disposal of property	+	Analysis
Outsourcing of maintenance & sustainment functions	+	Analysis
Make COE the AILE	?	Analysis
Merge USACE(-) into ILE	?	Analysis
Merge ACSIM(-) into ILE	?	Analysis
Contracting single process owner	?	Analysis
Single Installation manager process owner	?	Analysis
Divest Civil Works	?	Analysis

Summary

# Synchronization of Institutional FAAs

# Where do We go from Here ?

---

## Recommend:

- Determine Resource Impacts or Further Analysis of Selected Actions
- Coordinate with Follow-On FAAs and Related Processes

# **Army Functional Area Assessment (FAA)** **of Title 10 Functions of** **"Equip", "Supply", and "Maintain"**

**GEN Leon E. Salomon**

*Commanding General*  
**U.S. Army Materiel Command**

**29 January 1996**

**U.S. Army Materiel Command**  
**MACOM Proponent for Equip/Supply/Maintain FAA**

## Background

XXI

- ✓ Force XXI: America's Army redesigned to meet the challenges of the 21st Century
- ✓ TDA Axis: Re-Engineer departmental processes and redesign the Institutional Army to support core competencies required by Force XXI
  - MACOM Re-Engineering
  - Series of FAAs
- ✓ AMC: Designated MACOM Functional Proponent for FAA of Title 10 functions of "Equip", "Supply" and "Maintain" (E/S/M)
  - "Service" Deferred to Phase II

## Charter for Redesigning the Institutional/TDA Army

### SECRETARY OF THE ARMY

WASHINGTON, D.C. 20310

January 13, 1995

Charter for Redesigning  
the Institutional/TDA Army

**PURPOSE.** To establish procedures and responsibilities for redesigning the Institutional/TDA Army as part of the Force XXI Campaign.

**MISSION.** Redesign the institutional Army by the year 2000 so that it will effectively and efficiently perform service Title 10 function.....

**EXECUTION...** Re-engineering and redesign will be accomplished in three phases in time to support submission of the POM for the Fiscal Year 1996 submission..... The process will consist of four simultaneous and interrelated efforts:

- Internal Major Army Command (MACOM) re-engineering
- Comprehensive review of service Title 10 functions
- Redesign of the Department of the Army Headquarters (HQDA)
- Umbrella redesign of the Institutional/TDA Army

**PRINCIPLES.** - Unnecessary layering of functions and headquarters will be eliminated. Strive to reduce the size of HQDA and reduce the number of FOA and SSA. Reduce the number of MACOM headquarters.

- The Army's core competencies will serve as the foundation .....
- Functions will be resourced in the most cost-effective manner.

Gordon R. Sullivan  
General, United States Army  
Chief of Staff

Togo D. West, Jr.  
Secretary of the Army

## Guidance from Secretary of the Army

SECRETARY OF THE ARMY  
WASHINGTON

October 16, 1995

### MEMORANDUM FOR DEPUTY SECRETARY OF DEFENSE

SUBJECT: Commission on Roles and Missions Recommendations on Restructuring Military Department Staffs

#### I. Guiding Principles

The Army will divest.....functions that are not essential, remove layers, and give commanders in the field the power..... We will eliminate unnecessary duplication while we preserve and enhance operational effectiveness.

#### II. Overarching Design

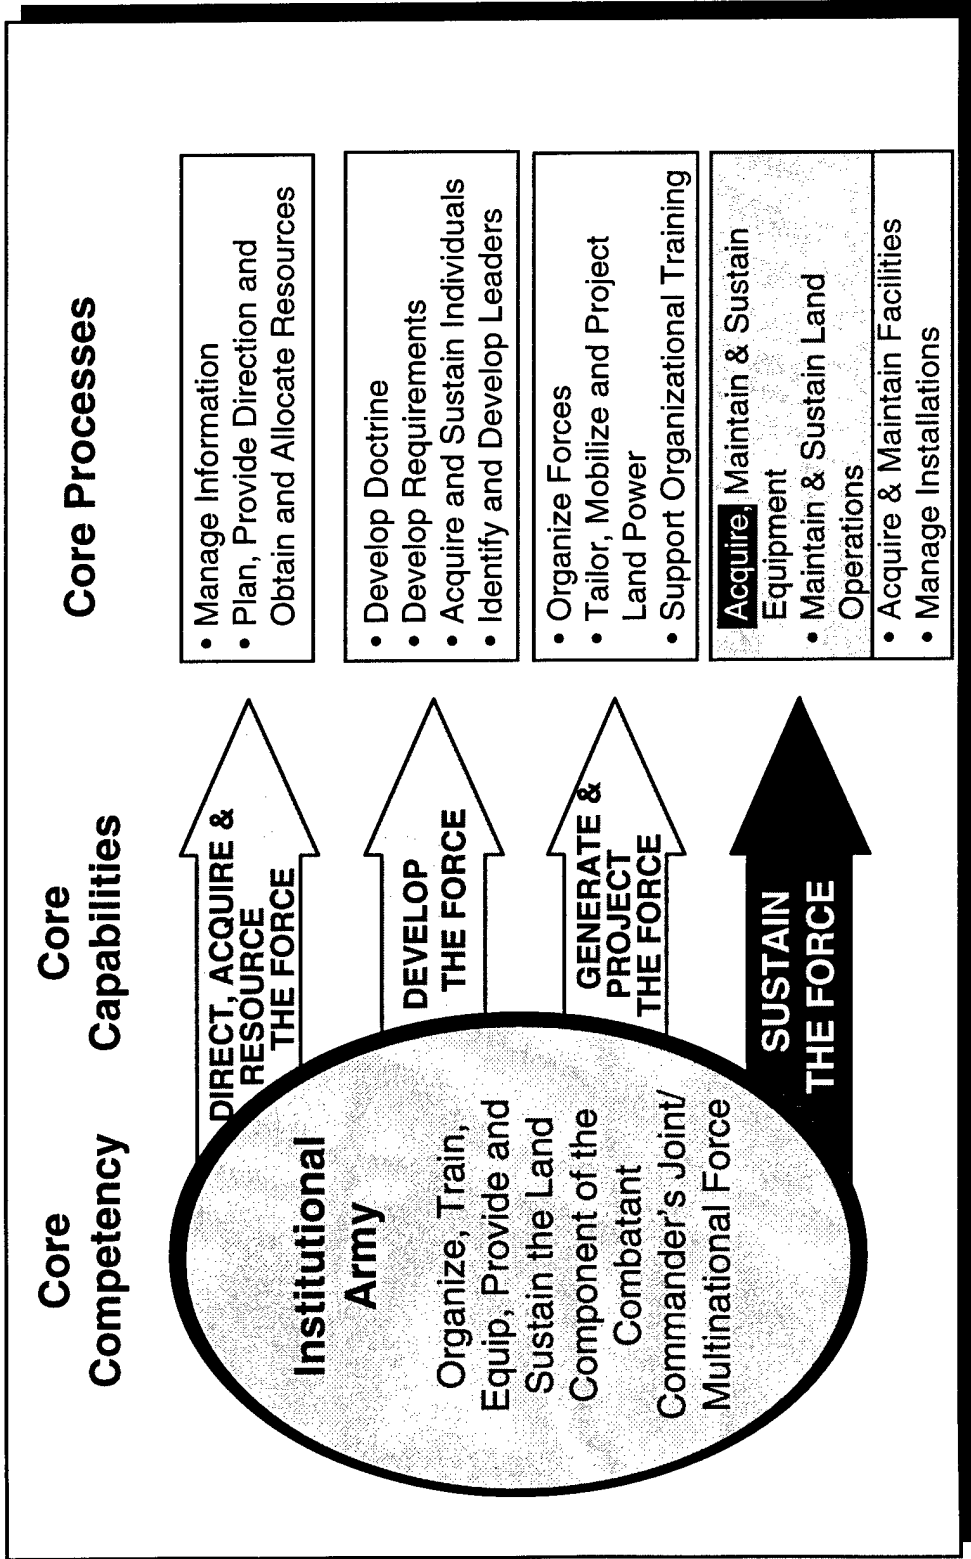

We will reduce the number of MACOMs, divest....., and reallocate resources to support our core capabilities. We expect to reduce significantly the number of headquarters agencies, .....explore every opportunity to privatize or outsource a number of administrative support functions.

The initial results of our redesign activities will be incorporated into our POM 98-03 submission.....

Togo D. West, Jr.  
Secretary of the Army

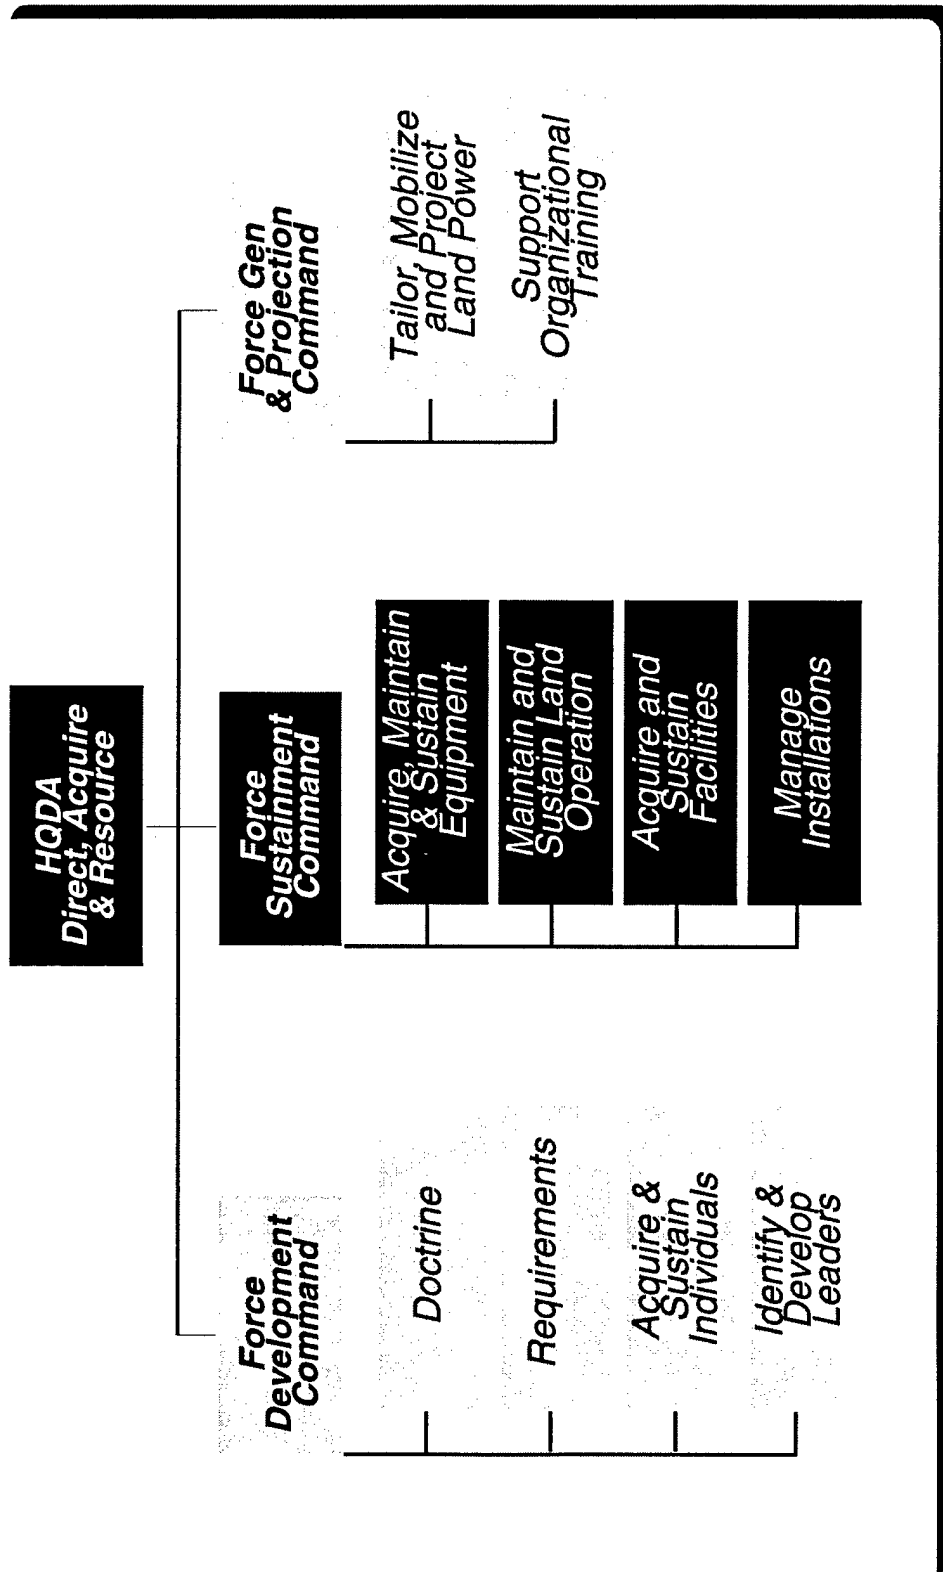

# Strategic Framework for FAA

# DA PAM 100-XX Vision

XXI

# "E/S/M" FAA Re-Engineering Focus

## Subject: CSA "Yellow" 95-03

The Nation's resources available for defense are limited. Continuing resource constraints will demand unprecedented productivity. We need to find new and innovative ways to help ourselves. ....

- Find smarter ways to do business
- Streamline our mgmt processes
- Reduce overhead
- Leverage outside resources
- Use what we have more efficiently

Soldiers Are our Credentials!

Dennis J. Reimer  
General, United States Army  
Chief of Staff

FORCE

## Efficiency Measures

- TDA Reduction (Cost @ \$50K)
- TDA Conversion (Privatized)
- Non TDA \$ Savings (in Addition to TDA Reduction)

## Re Engineered Processes

- Increase Efficiency
- Improve Process
- Functionally Realign
- Change Organization

## FAA Considerations

XXI

**FAA GOAL:** Become More  
Efficient Without Sacrificing  
Readiness or Effectiveness

Efficiency

Time

**Resources Drive the FAA's**

✓ FAA Must Be the Decision  
Forum

✓ If We Wait To Decide, We Will  
Become a Smaller Version  
of Today's  
Organizations,  
Not Re-engineered  
for the 21st Century

### Challenge

✓ Everyone Wants to Re-Engineer in  
their Area

✓ Resistance to Cutting Across  
Organizational/Functional/Cultural  
Boundaries

✓ With FAA Decisions, Can  
Eliminate  
Boundaries and Integrate Across  
Equip/Supply/Maintain

**Re-Engineering  
With FAA**

**Downsizing  
Without FAA**

Time

→ 21st Century

ARMY FUNCTIONAL AREA ASSESSMENTS

Will the Army Become a Smaller Version of Itself

AMC AS  
An  
Example

Without reengineering and enablers, the Army will be a smaller version of itself.

# "E/S/M" FAA: Estimated FY96 TDA

## TDA Savings Via Benchmarked Best Practices

## **Contracting POM 98-03 Summary**

### **Conclusions**

- MACOMs Need to Take Full Advantage of Credit Card Opportunities
- Disparities in Contracting Office Resources Per Action within MACOMs
- Multiple Policy Layers and Potential Local Contracting Office Consolidation

### **Issues & Concerns**

- Need to Avoid Double Counting of TDA Savings
- Privatization Will Increase Contracting Workload
- Trend Towards More Best Value Contracting...Increases Contracting Workload

### **Decisions Required**

- Mandate Minimum Credit Card Usage Rate of At Least 80% for Micro Purchases
- Within Each MACOM, Identify and Implement Best Practices in Contracting to Achieve TDA Savings Identified in Workload Based Manpower Determination
- Eliminate Multiple Local Policy & Contracting Offices

**POM 98-03  
Potential  
TDA Reduction  
1,037  
(\$52M Per Year)**

## ARO

### Army Research Office

Provide Fundamental Knowledge to  
**Army Science Base**  
Thru Extramural Research for Solutions of Military Problems

#### Extramural Research In:

- Physical
- Engineering
- Mathematics
- Atmospheric
- Terrestrial
- Biological

## ARL

### Army Research Laboratory

Provide  
**Key Technologies**  
and  
**Analytical Support**  
Thru Exploratory and Applied Research

#### Five Thrust Areas:

- Digitization/Communications
- Armor & Armaments
- Soldiers Systems Technology
- Air & Ground Vehicle Tech
- Survivability/Lethality Analysis

## RDECs

### Research, Engineering & Devel. Centers

Develop and  
**Transition Technologies**  
and Provide  
**Engineering Support**  
to Developmental Systems (PEOs/PMs) and Fielded Systems (Div/Corps)

#### Major RDE Activities:

- Integrate & Demo Tech
- Transition Tech to PEO/PM
- Tech Support to PEO/PM
- Quick Reaction to Field Problems

## FY89-99 RDT&E Infrastructure Drawdown

**BRAC I (88)**

➤ Close MTL (Material Technology Lab)

**BRAC 91**

➤ Consolidate LABCOM (7 Labs) to create ARL

➤ Reduce Medical Labs (from 9 to 6)

➤ Close Army Institute for Res. Mgmt Info, Commo and Computer Sciences

**BRAC 93**

➤ Close BRDEC

**BRAC 95**

➤ Co-locate AVRDEC with MRDEC --- Consolidate Common Functions

**Significant Re-Engineering of S&T Accomplished to Date**

\*Majority of TDA spaces are funded by civil works dollars vs. RDT&E

Note 1: FY99 Numbers Include PBD 755  
Note 2: Source SARD-ZT RDT&E Infrastructure Data Call, Apr 94

**xxx**

17% - Implementation of  
Federated Lab

**Approx 64% of ARL/RDEC  
S&T \$'s Spent External to  
Govt Organizations**

## **Major Ongoing Initiatives in Army S&T**

✓ **Federated Lab Concept** 

Broadly Supported  
"Out-of-the-Box"  
Initiative

**TRADOC/AMC Battle Labs Partnerships & ACT II**

**Extensive Use of CRADAs\* (792) to Partner With Industry**

**Full Implementation of STO/ATD/ACTD Process**

**Army Lead Responsibility For Medical (Tri-Service Reliance)**

**Army Lead Responsibility for Tri-Service Chem-Bio Defense**

**Increased Emphasis on the Soldier (Soldier System Command)**

\* Commercial Research and Development Agreement

**Need Time to Mature and Gain Benefits**

# Federated Lab Concept--A Business Opportunity

XXI

## WHAT

A Partnership Among  
Government, Industry  
& Academia using  
Cooperative  
Agreement Authority

## A New Process

Federated Lab Represents  
Major Change in the Way  
We Do Business...

We Just Signed the  
Contract

## WHY

- So We Can Balance In-House & External Tech Base Contributions
- Because The Tech Base Is:
  - Constantly Changing
  - Stronger Externally in Some Areas
  - Stronger In-House in other Areas
- So We Can Mutually Exchange Our Scientist & Engineers:
  - We Become Smarter Buyers
  - They Become Aware of new Business Opportunities

## In-House Focus

- Weapons Technology
- Survivability/ Lethality Analysis
- Human Research & Engineering
- Physical Sciences

## External Focus

- Information Sci & Tech
- Advanced Simulation/ High Performing Computing
- Sensors
- Vehicle Structures
- Vehicle Propulsion

ARMY FUNCTIONAL AREA ASSESSMENTS

## Issue: Ownership of S&T in Army

### Integration of "Acquire Equipment" Process in Force XXI Objective State

### Umbrella FAA Proposal Regarding Army S&T

1. Eliminate ARL; Realign most Directorates to AMC RDECs; Elim. other Directorates
2. Realign new RDECs & ARO with TRADOC to integrate concepts and technology

**What is the IMPACT of Proposal on the Army?**

# Why S&T is Integrated with Acq. & Sustainment

Powerful Synergy with Acquisition & Sustainment

**"S&T/Logistics Influence Each Other"**  
Future Readiness is the Measure

Strong, Essential Partnership Between AAE, PEO/PMs and AMC

**"Development to Production"**  
Matrix Spt, Legal, Log, Proc, Engr, etc.

Strong, Yet Balanced, Partnership with TRADOC

**"Balance"**  
Tech Push & Reqmts Pull

Builds on a Winning Tradition

**"Results"**  
Desert Storm

# Don't Create a Handoff "Late" In Cycle

## Umbrella FAA Proposal

Jeopardizes Success Of Producing Supportable And Sustainable Equipment

## E/S/M FAA Recommendation

Keep "Acquire Equipment" in Sustainment Command ---  
Ensure Sustainment/Support Issues Addressed Early

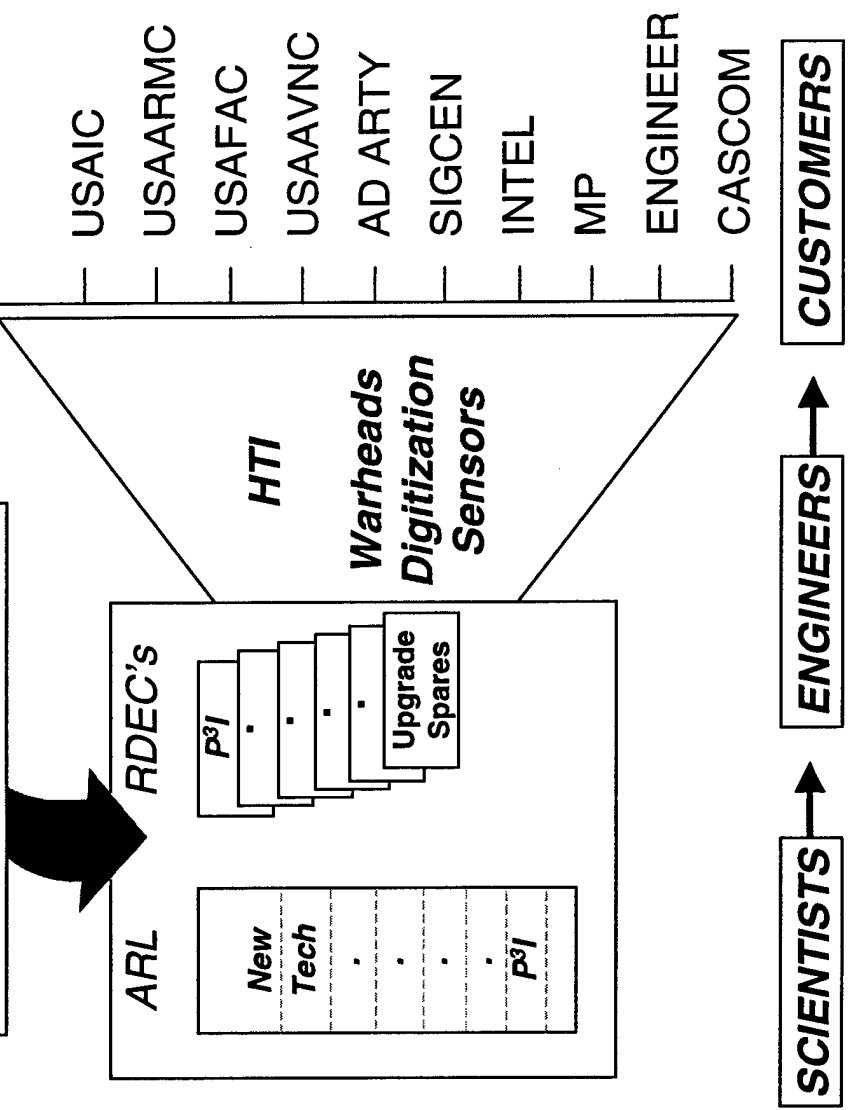

# HTI is a Key to Force XII

Old S&T Process  
Was Geared Toward

For the  
Last 40 Years

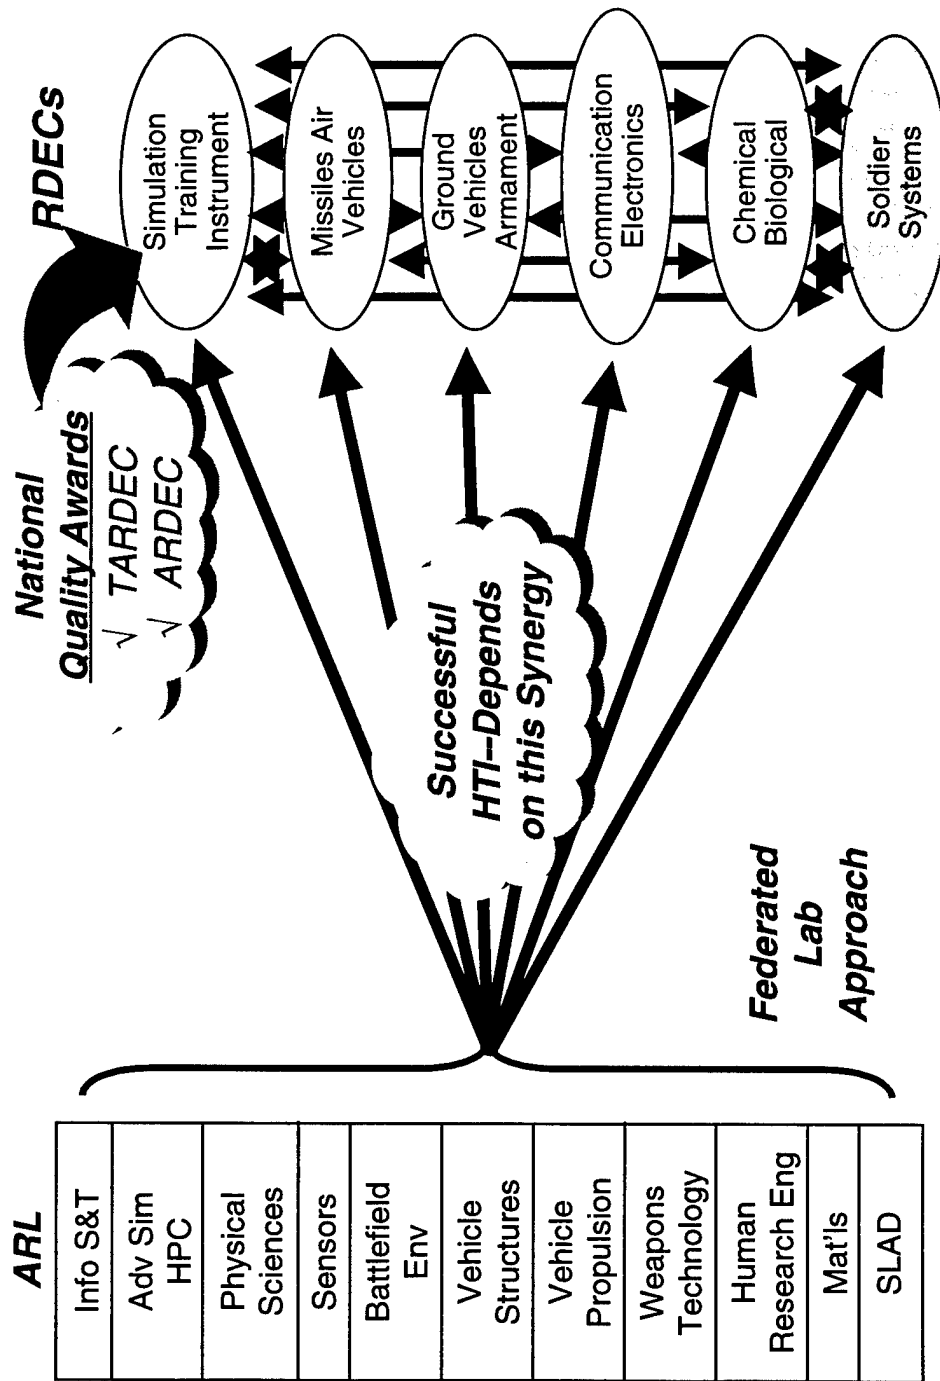

The Re-Engineered Process  
Focuses on HTI

Structure Supports Force XXI HTI Goal

(\$7.5M-35M Per Year)**

# Current T&E Process

XXI

# Re-Engineered T&E Process

"Single Process"

"Single Product"

"Single Evaluation Plan & Test Strategy"

- Process Steps
- Critical Issues
  - Eval Planning
  - Test Design
  - Test Planning
  - Testing
  - Data Collection
  - Analysis & Eval

Single Source Documents for Cradle to Grave T&E

- Efficiency Improvements
- Requires Fewer Resources
  - Improves Customer Responsiveness
  - Streamlines Planning & Execution
  - Fully Integrates Evaluation Product

# New T&E Continuum

- Integrated Strategies Replace Test Phases
  - Focused Expertise
  - Single Organization Responsibilities
- Increased Use of Contractor Data
- Earlier & Increased Use of Modeling & Simulation

## T&E Reengineering Options

### 1. FUNCTIONAL REALIGNMENT

- Lead Agency Responsibility
- Single Process, Single Evaluation Plan, Single Test & Simulation Strategy

### 2. FUNCTIONAL REALIGNMENT AND COMBINED TEST FUNCTIONS

- Single Army Tester
- Integrate Into TECOM Organizational Structure

### 3. SINGLE TEST AGENCY & COMBINED FORCE LEVEL EVALUATION

- Synergise Force Level Analysis (COEA, AWE, ATD, EUTE, IOTE...etc.)
- OE in TRADOC; DE in AMC

### 4. SINGLE TEST AGENCY & SEPARATE SINGLE EVALUATION ACTIVITY

- Test Agency in AMC
- Options for Evaluation Activity (FOA, AMC, TRADOC)

### 5. SINGLE CONSOLIDATED TEST & EVALUATION ORGANIZATION

- Place in MACOM, or as FOA or...
- Establish as Separate MACOM

Feasible  
for POM 98-03  
Potential TDA  
Savings = 150-700

Beyond  
POM 98-03 Options

**FUNCTIONAL REALIGNMENT FACILITATES  
MOVEMENT TO OTHER ALTERNATIVES**

# Functional Realignment

Today: Two to Five Organizations Involved in the Process Steps of Each Functional Area

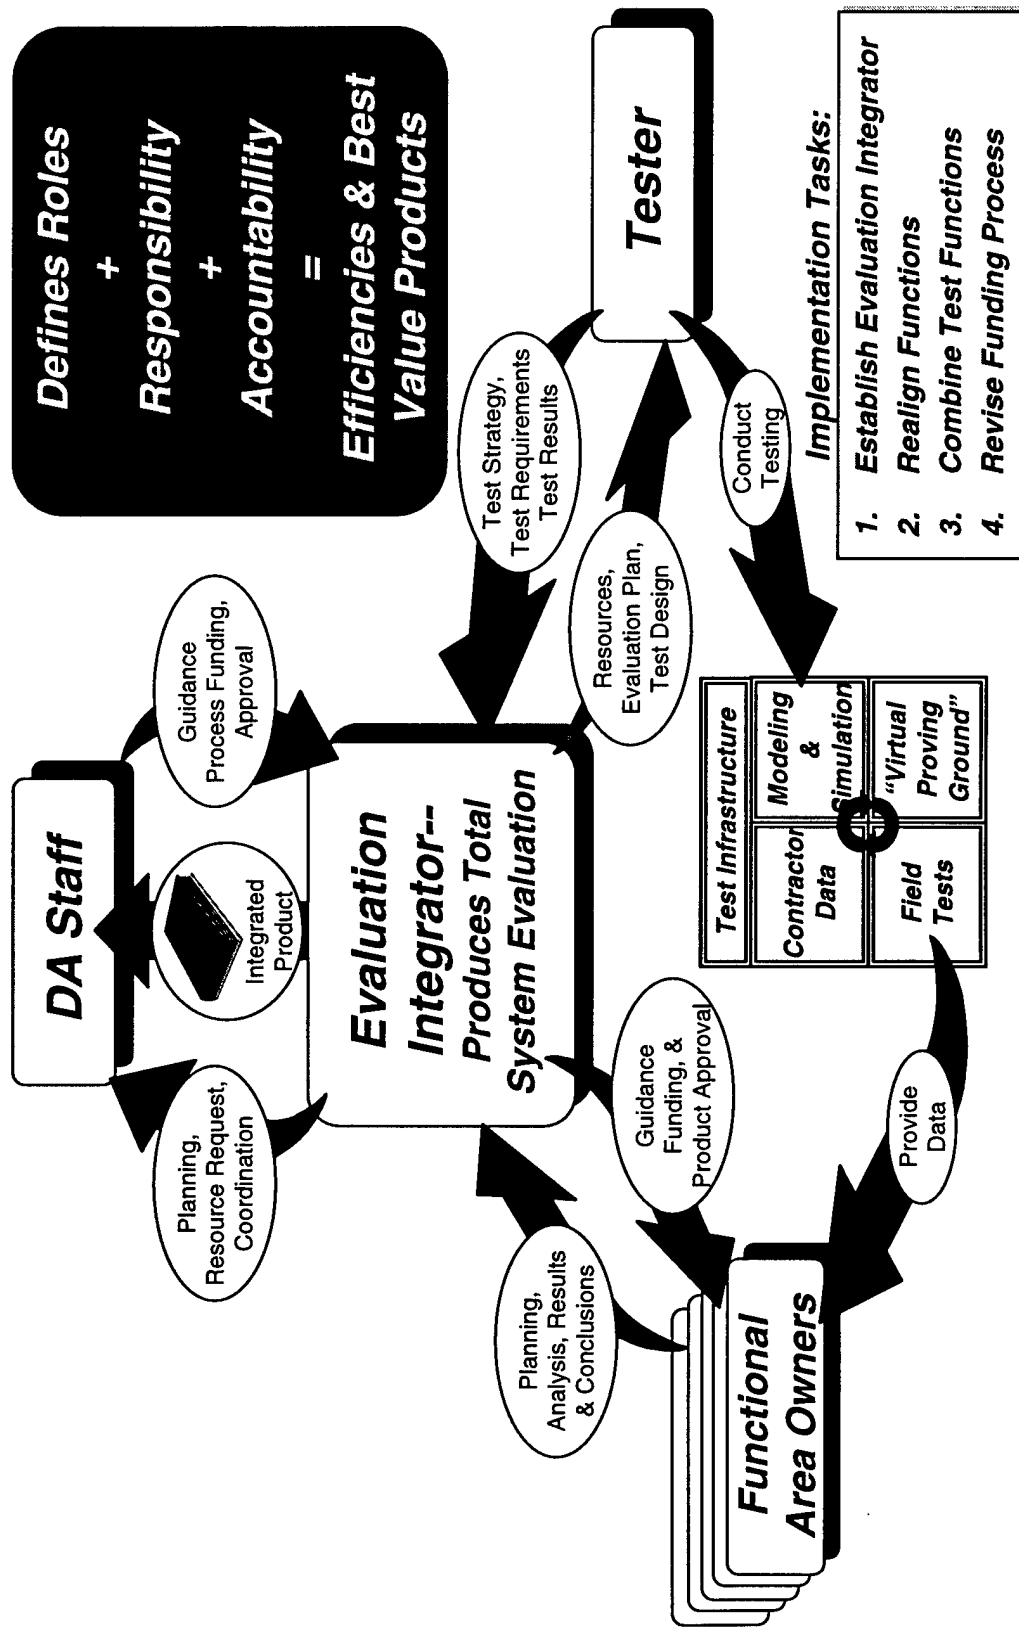

Efforts Initiated as Result of 12/95 DUSA(OR) Briefing to VCSA

Functional Realignment Assigns Single Agency Lead Responsibility and Integrates the T & E Process

Functional Areas	Process Steps			
	Planning, Test Design, Analysis & Evaluation		Detailed Test Planning, Preparation, & Test Execution	
	Current	Proposed	Current	Proposed
Primary System Operations (Maneuver, Communicate, etc)	OEC AMSAA TECOM SSDC	<b>OEC -- Evaluation Integrator</b>	TECOM STRICOM RDEC TEXCOM SSDC	<b>TECOM</b>

# A Strategy to Functionally Realign

# POM 98-03 T&E Reengineering Roadmap

XXI

**How Far Do We Want to Go?**

## Remaining T&E Issues...Consolidated Test

XXI

### "Kwajalein Missile Range Ownership"

#### SSDC CDR Views

- SSDC Retains Ownership of Kwajalein Missile Range
- "Safari" Operations Are Not Feasible--Feb 95 SSDC Study
- Army Should Fix the POM (\$130 Shortfall Over FY 97-01)

#### FAA Perspective

- Consolidate Army Test Facilities--"Safari" Issue Aside
- KMR POM "Fix" Creates \$\$ Shortfalls Elsewhere
- TECOM Proposal Operates KMR at POM \$\$
  - Assumes "Safari" from White Sands Missile Range
  - Synergy with Other Test Operations

### "TEXCOM Ownership"

#### OPTEC CDR Views

- OPTEC Should be Evaluation Integrator--(Retain TEXCOM)
- TEXCOM Assumes Test Integrator Role--(Coordination with TEXCOM)

#### FAA Perspective

- OEC is the Evaluation Integrator (OPTEC is HQ Element in Current Structure)
- All Test Functional Ownership Under TEXCOM (KMR & TEXCOM)

# T&E POM 98-03 Summary

## Conclusions

- Single Process, Single Plans, & Single Product are a Gateway to T&E Efficiencies
- Consolidated Testing Streamlines Planning and Execution
- Functional Realignment Provides Implementation Framework to Proceed

## Issues & Concerns

- Consolidation of Funding and Control with Process Integrators
- Full Consensus Not Yet Achieved on Consolidation of Testing

## Decisions Required

- Functionally Realign Evaluation Functions
- Consolidate Test Functions Under TECOM
- Place T&E Funding Under Process Integrator Control

Potential Savings  
500-700 TDA  
\$25-35 Mil/Yr

## E/S/M FAA Discussion Topics

# Army Secondary item Business

XXI

FY 96 Sales (\$4B)

What a Sales Dollar Buys

Wholesale Inventory

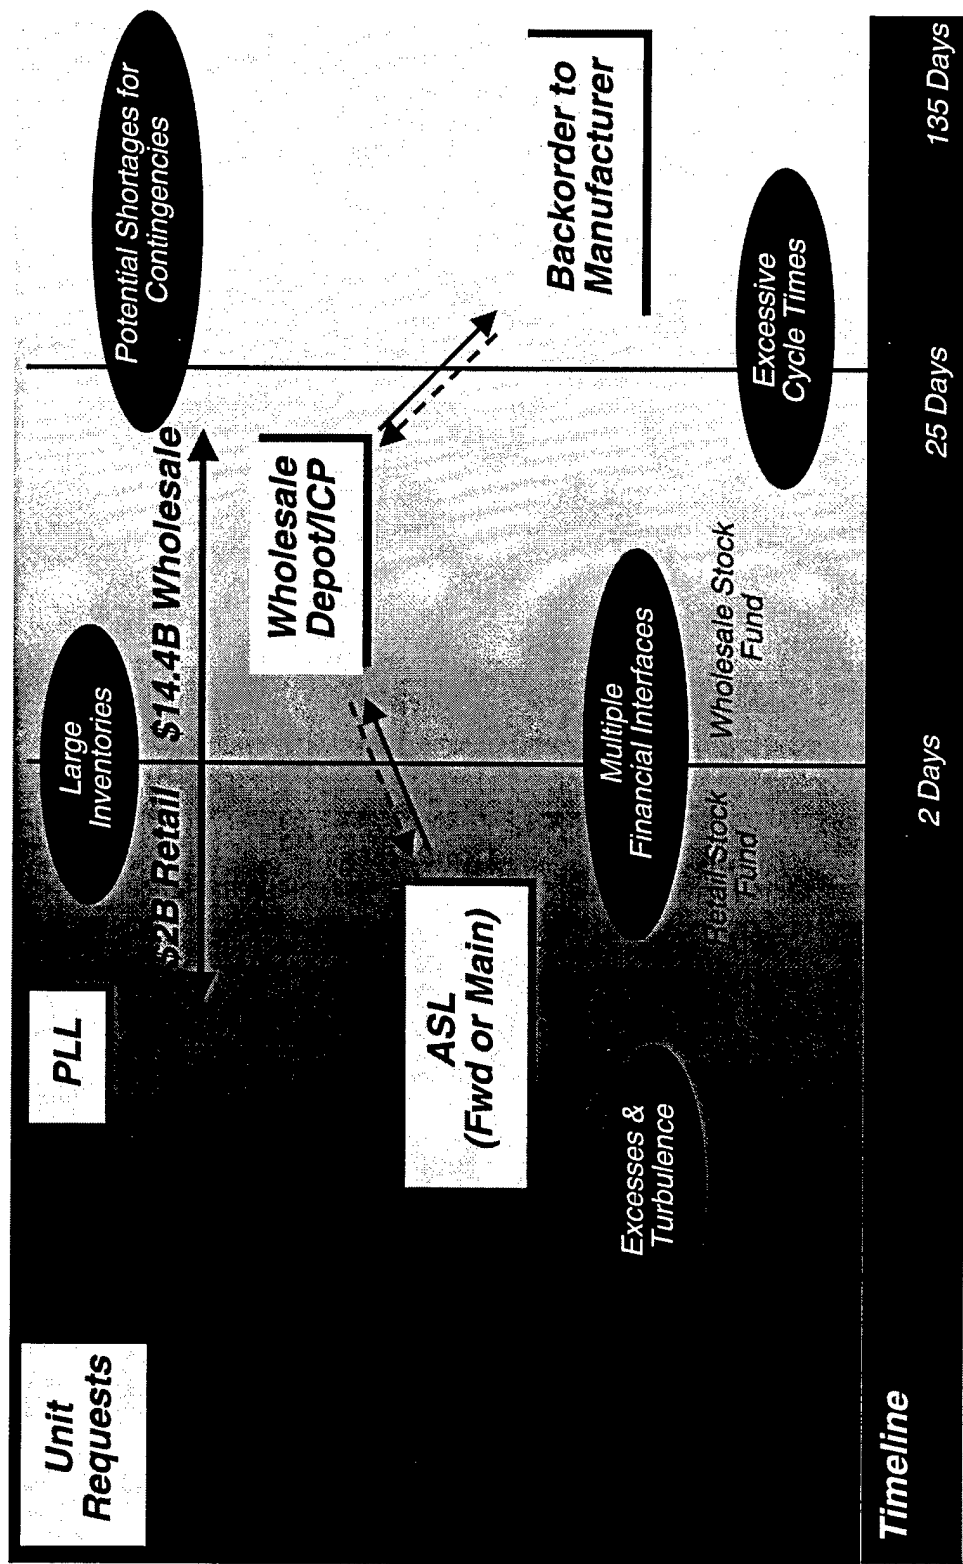

What the Surcharge Buys

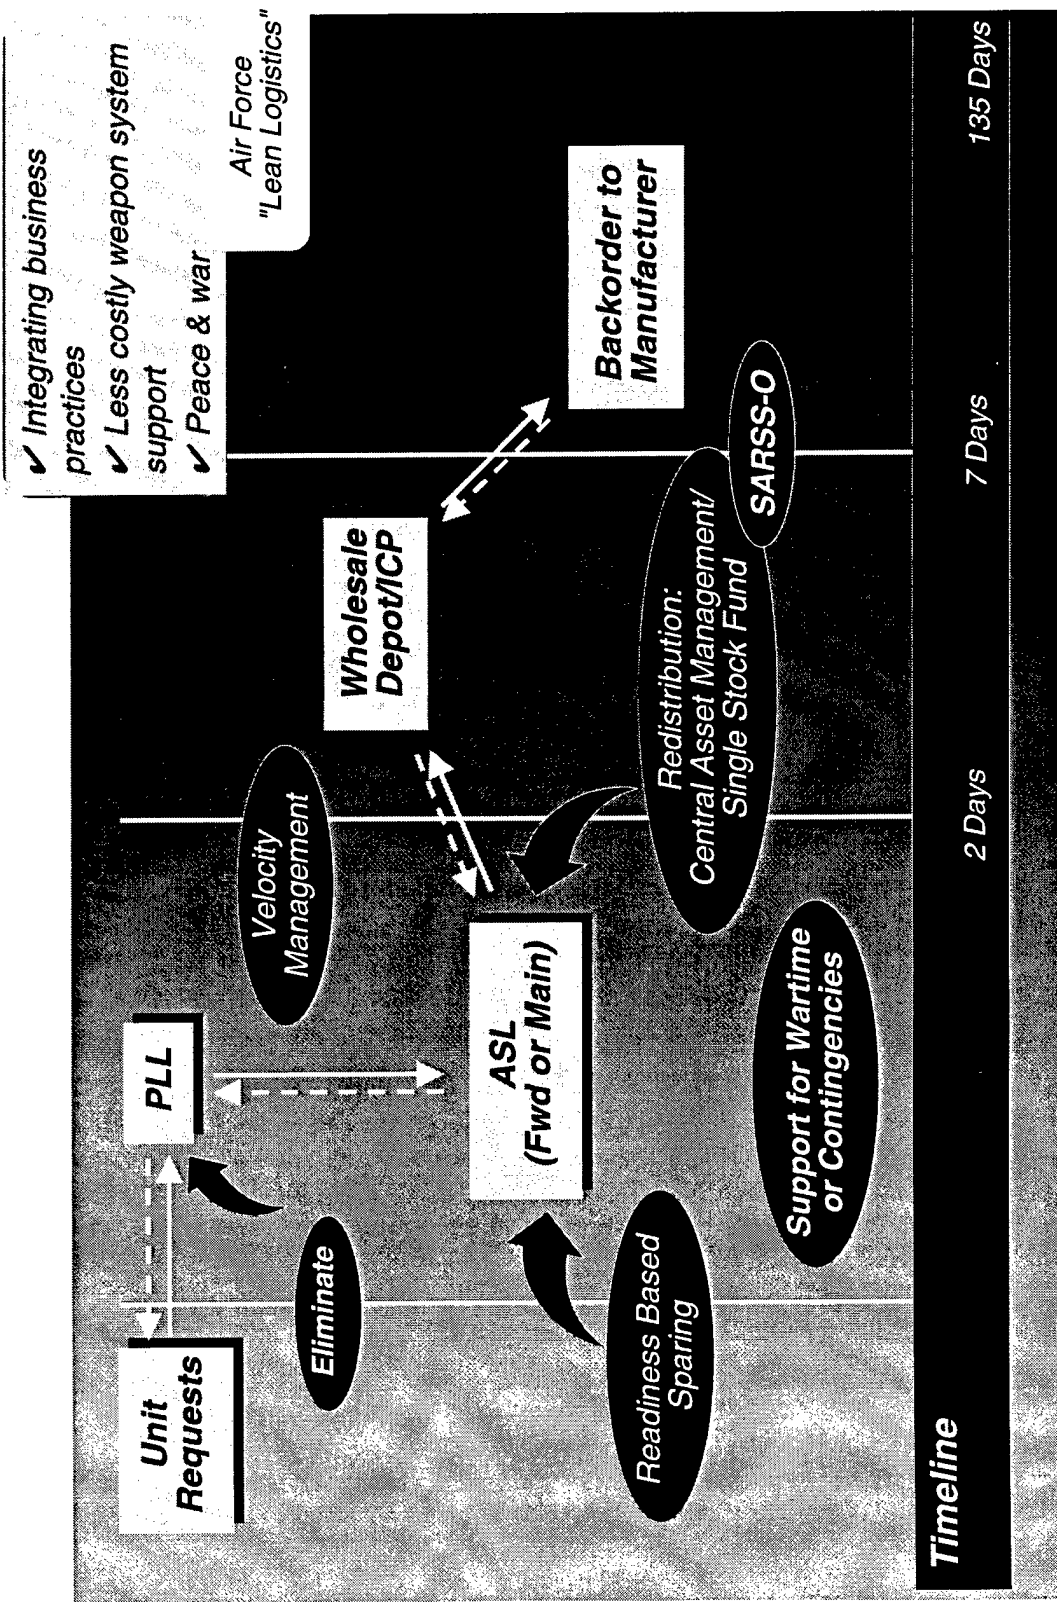

# Current Class IX Supply Process

# Reengineered Supply System

# Foundation for Reengineering Supply Processes

## Velocity Management

Substitute velocity for inventory

- Process reengineering for OST and repair cycle times

Current OST: 20-28 days (CONUS)

Requisition Submission	ICP Processing	Depot Processing	Intransit	Receipt
5-6 Days	1-2 days	3-7 days	4-5 days	7-8 days

Goal (HI Pri CONUS): 7 days (FY96)  
3 days (FY97>)

- Improve batching & sequencing of computer cycles
- Reduce reviews of requisitions
- Improve linkage with automated systems (Standard Army Retail Supply System - Objective SARSS-O)

## Total Asset Visibility (TAV)

In-Storage  
In-Transit  
In-Process  
In-Theater

AIT  
Enabling Technology

Additional investment required for:  
➤ automation  
➤ communications  
➤ distribution (TBD)

Basis for Reengineering of Stock Levels and Distribution Processes

# Cost Savings from Reengineering Initiatives

- ✓ Overlaps addressed
- ✓ Further validation may be required
- ✓ Implementation required before savings are taken

**POM 98-03 Savings**

## Prescribed Load List (PLL) Elimination

### FORSCOM IG REPORT

#### Why Eliminate?

- PLLs contributed little to unit readiness - 85% were not demand supported
- PLLs were major source of excess - lack of visibility created demands for parts already in retrograde pipeline
- Elimination could save each division \$2-3M/yr

#### Analysis (Armored Division 12 months)

- PLL investment was \$3.9M
- 4,578 of 12,122 PLL lines were demanded
- PLLs increased the fill rate for essential requisitions by 1%
- Impact on unit readiness resulting from a 1 day wait for parts from ASL would be minimal

#### Preliminary Test - 3 Month

- XVIII Abn Corps Company level test
- All readiness objectives maintained

Indications are that ASLs  
Support Readiness - not PLLs

#### Follow-on Tests

- Negotiating Bde and Bn level tests at 24ID, 4ID, and FA Bn (XVIII Abn Corps)

Jan 1996 to Nov 1996

Conduct Follow-on Test and Validation as Planned

# Reengineering ASL Inventory Levels

## Current AR 710-2

### Stockage Criteria

- ✓ 9 to add
- ✓ 3 to retain

Greater depth  
high \$ parts

Smaller range

- ✓ Too expensive
- ✓ Not needed

Does not support  
readiness needs

Policy not  
followed

## Readiness Based Sparing (RBS)

### Stockage Criteria

- ✓ Weapon System Readiness
- ✓ Cost

Smaller depth  
high \$ parts

Greater range

- ✓ Less costly
- ✓ Meets readiness
- ✓ Decrease weight & cube

Needed for  
readiness

$$\text{Readiness} = \frac{\text{\# of systems available}}{\text{Total \# of systems}}$$

## RBS Supports Readiness at Lower Cost

# Readiness Based Sparing

High Risk

Unaffordable

## Implementation Examples

Inventory (\$M) 3QFY95

Units draw down inventory

Augment inventory to have right parts available

RBS Performance Validated

# RBS Performance Validated

**NTC → Readiness from 66% to 82%**

**Improved Readiness**

**Lower Investment**

**Army Wide Cost Savings**

Demo Site	Investment	
	Pre RBS	RBS
NTC (Apr 92 - Mar 93)	\$127M	\$55M
SID (May 92 - Dec 92)	\$ 59M	\$33M
256TH (Oct 94 - Aug 95)	\$ 7M	\$ 3M

# RBS Efficiencies

XXI

## Reduced Investment in Inventory

One Time  
OMA  
Savings

### RBS ONLY

FORSCOM, Europe,  
and Korea Division  
and Non-Div Units

Savings need to be  
validated at  
implementation

### RBS with Velocity Mgmt

\$472M : Draw down thru usage  
\$151M : Investment (Inventory only)

Net Savings  
RBS Only

\$321M

\$504M : Draw down thru usage  
\$120M : Investment (Inventory only)

Net Savings  
VM and RBS

\$384M

Enabler investment  
not included  
Off set to savings

Greatest benefit when RBS and VM implemented at same time

# RBS Implementation Options

XI

## Short Term (interim)

**POM 98-03**

Eliminate 710-2 policy.  
AMC/DA/CASCOM supports  
MACOMs, Corps, & Divisions in  
computing and stabilizing new  
stock levels. Changes negotiated  
on an exception basis.

➤ Reduces turbulence

➤ Disciplines the supply process

**FORSCOM**  
validate/verify  
through test

## Long Term Objective

**Beyond  
POM 98-03**

Eliminate 710-2 policy.  
Incorporate RBS computations  
in SARSS-O.

➤ Longer term; requires SARSS-O  
software changes

➤ Requires additional  
investment (TBD)

**Can Begin Implementation/Verification Now**

# Redistribution

XXI

Within MACOMs

SARSS-O

- CMMC has visibility of all stocks
- CMMC directs and controls disposition of supplies

Longer Term...

Across MACOMs

Reduce Layering of Financial Systems

Issue: Ownership of Stocks

DA DCSLOG Task Force Considering Alternatives - 29 Feb Report Out

Significant Potential for Savings

# Cost Savings through Redistribution of Excess

XXI

## One-Time Inventory Cost Savings

### Redistribution of Excess Inventory: O&M-Owned

### Excess Distribution

MACOM	Div	Non-div
FORSCOM	70%	23%
Europe	21%	16%
Korea	9%	20%

	Divisional	Non-divisional	National Guard	Total
	\$150M	\$279M	\$ 41M	\$470M

One-Time Inventory Savings:

**\$383M**

Decrement for Unuseable Inventory

**TDA Savings**  
(Based on Central Asset Management Economic Analysis)

Eliminate duplicative materiel management and financial management functions

AMC: 78  
FORSCOM: 74  
TRADOC: 54  
Others: 25

**231 TDA Reduction (\$11.6M/yr)**

Validation Required

## Transition to Wartime

XXI

*Emphasis on  
peacetime efficiencies*

- ✓ Peacetime optempo
- ✓ SFDLR
- ✓ SRAs-More repair; fewer high dollar replacements

*Had large inventories in ODS*  
- 13M requisitions, Aug-Nov 90  
- distribution a problem

*Potential Shortfalls in Retail and  
Wholesale Stocks for Wartime or  
Contingencies*

*Distribution  
Capacity  
?*

*Need Planning for Augmentation of Peacetime Stocks*

# Transition to Wartime Requirements

Improvements to wholesale/war reserve process

- ✓ Reflect wartime maintenance concept
- ✓ Improved estimates of replacement rates

✓ \$3.8M additional plus-up w/RBS

✓ \$38M additional investment in war reserves for 10 Division force

**Operational Issues**

- Configuration
- Delivery
- Movement

**Test and Validate Concept**

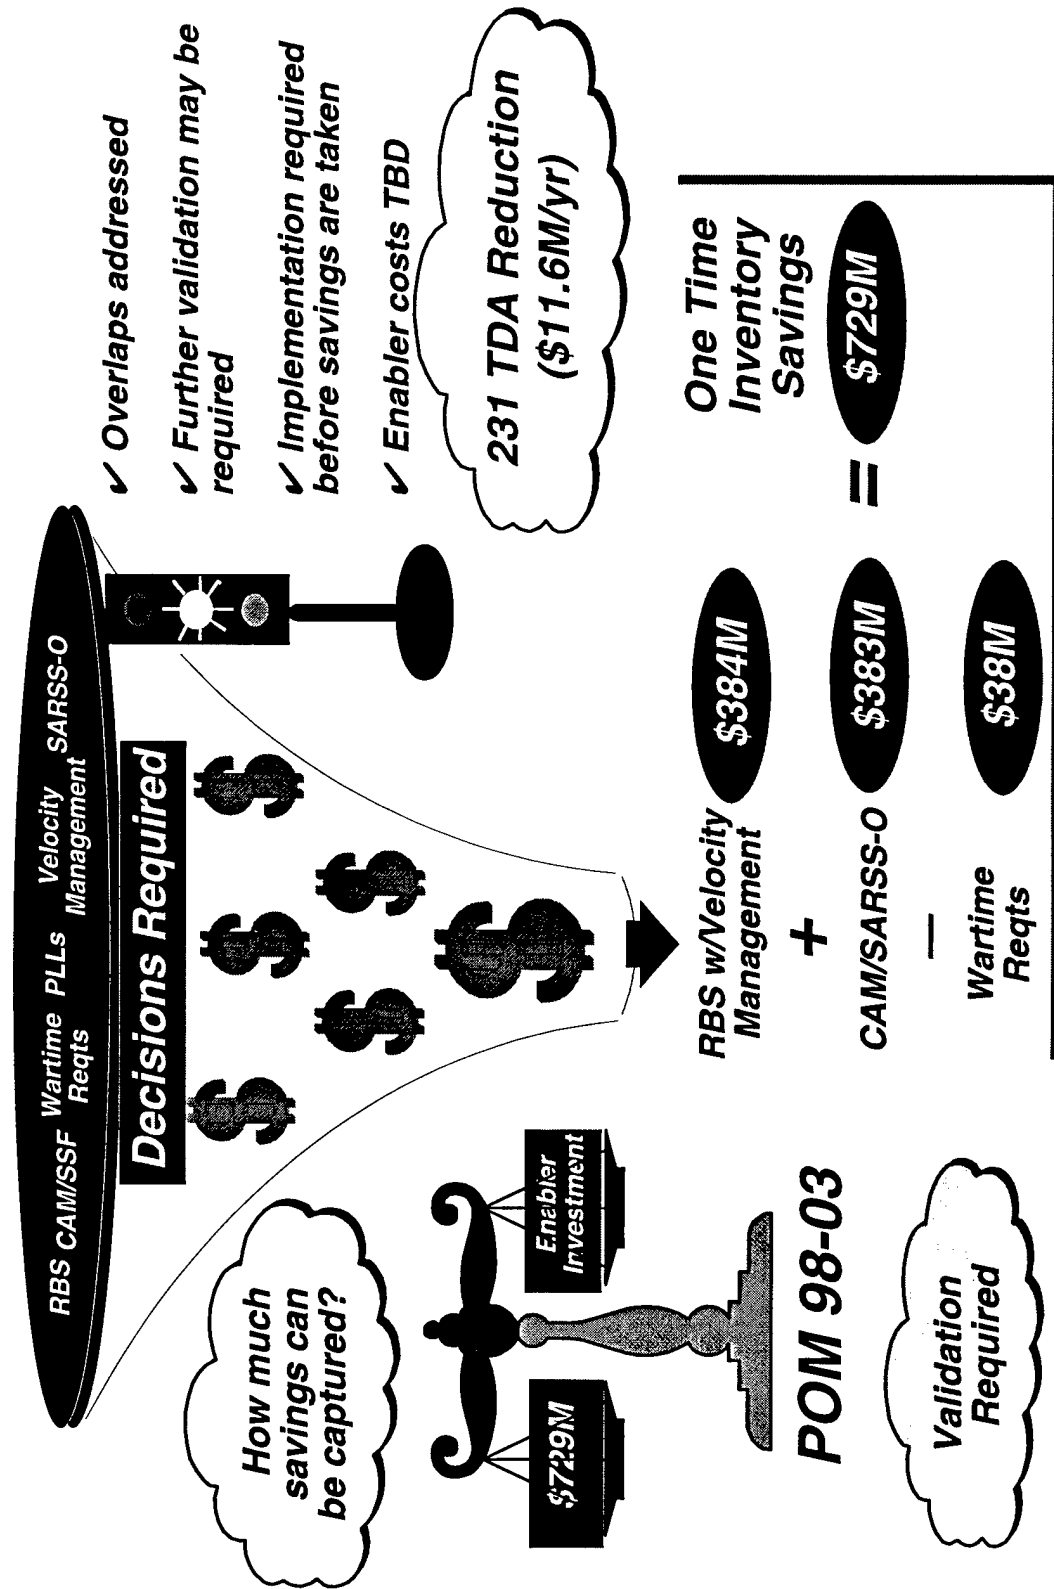

**Current ASL**

# Cost Savings from Reengineering Initiatives

## Supply POM 98-03 Summary

### Conclusions

- Significant potential for cost savings and improved responsiveness with reengineered inventory levels and redistribution
- Potential shortfalls in retail inventory for wartime or contingencies - transition stocks required

### Issues

- User confidence in Readiness Based Sparing
- Ownership of stocks and credit policy under CAM/SSF
- Level of investment for RBS/VM enablers

### Decisions Required

- Test/Validate/Implement ➤ Test/Validate
  - Readiness Based Sparing/  
Velocity Management
  - PLL Elimination
  - SARSS-O/Central Asset  
Management
  - Deployment stock concepts
- Invest in additional stocks for  
wartime/contingencies

231 TDA Reduction  
(\$11.6M/yr)  
\$729M non-TDA Savings  
(one time)

## E/S/M FAA Discussion Topics

XXI

### POM 98-03

#### Contracting:

- Consolidation of Local Contracting Offices
- Credit Card Efficiencies
- Workload Based Manpower Determination

#### Science and Technology:

- On-going Re-Engineering Initiatives

#### Test and Evaluation:

- Functional Realignment

#### Supply:

- Prescribed Load List (PLL) Elimination
- Readiness Based Sparing
- Centralized Asset Mgmt/Single Stock Fund
- Wartime Support Requirements

#### Maintain:

- Integrated Sustainment Maintenance
- IFTE BSTF Allocation

#### Supply/Maintain Organizational Efficiencies

- Privatization of Supply/Maintain Functions
- AMC Workloading Efficiencies
- Res Comp On-Post/Off-Post Support

### Beyond POM 98-03

- National Provider

POM 98-03 Potential Savings

**\$162M Non-TDA**

# Current Maintenance Processes

Depots			Contractors		
NG	GSU	DOLs	Contractors		
	DSU	DOLs	Contractors		
NG & AR	ORG				

**Facilities:**  
FORSCOM (12)  
TRADOC (16)  
ARNG AVCRAD (4)  
USAR AVIMs (5)  
ARNG CSMS (66)  
ARNG OMS (635)  
ARNG MATES (24)  
ARNG UTES (39)  
ARNG AASF (27)  
USAR ECS (32)  
USAR AMSA (131)

## ARNG Structure

45%

96% dual status and deploy with unit

## USAR Structure

98% dual status and deploy with unit

- Significant infrastructure
- Duplication of capability
- Inadequate integration of reserve component
- Rate structure for DOLs and Depots does not promote cost-effective maintenance decisions

# Maintenance Regionalization

## Integrated Sustainment Maintenance (ISM)

- ✓ Integrated sustainment maintenance across MACOMs, ARNG, USAR, and contractors
- ✓ Centralized management and decentralized execution
- ✓ Regional repair

### Elements of ISM

### Why ISM?

- ✓ Difficulties in integrating sustainment maintenance (GS & above) in ODS
- ✓ Duplication of repair programs

### Benefits of ISM

- ✓ Reduce duplication of repair programs
- ✓ Reduce wholesale procurements
- ✓ Reduce repair costs

Wholesale

Single  
Sustainment  
Manager  
(AMC)

Retail

### Original Concept

**Modified Concepts Successfully Demonstrated**

## ISM Initiatives

XXI

### Proof of Principle (POP)

#### at III Corps

- ✓ Lowered repair cost
- ✓ Reduced wholesale demands
- ✓ Initial Cost Savings  
Estimate: \$142 non-TDA savings

- ✓ Validated feasibility of regional repair
- ✓ Centers of Excellence for 65 NSNs

Savings could  
be greater at full  
implementation

### ISM - Expanded Demonstration

III Corps plus  
Bliss, Sill, TXNG & KSNG

- ✓ 214 lines
- ✓ No major problems in  
crossing MACOM lines

### Expansion to XVIII Corps

- ✓ Initiated in Oct 95

- ✓ 149 lines

**12 Star Decision on Future Courses of Action**

ARMY FUNCTIONAL AREA ASSESSMENTS

## Functional Realignments under ISM

OPTION	CHARACTERISTICS	ADVANTAGES	DISADVANTAGES
Baseline	NSMM - AMC RSM - AMC LSMM - AMC	<ul style="list-style-type: none"><li>• All sustainment maintenance under a single structure</li><li>• Optimizes cost avoidance</li><li>• Aligns with ASLP</li></ul>	<ul style="list-style-type: none"><li>• Alters force structure and alignments</li><li>• Commanders perception of loss of control</li><li>• Challenges effective C2 of dollars</li></ul>
Option 1	NSMM - AMC RSM - AMC LSMM - MACOMs	<ul style="list-style-type: none"><li>• Full up NSMM structure</li><li>• Commanders control local assets</li><li>• Less impact on force structure</li><li>• National perspective</li></ul>	<ul style="list-style-type: none"><li>• Fails to fully integrate C2 of ISM</li><li>• Sub optimizes cost avoidance</li><li>• No single proponentcy for maintenance</li></ul>
Option 2	NSMM - AMC RSM - CORPS LSMM - MACOMs	<ul style="list-style-type: none"><li>• Full up NSMM structure</li><li>• Commanders control local assets</li><li>• Less impact on force structure</li><li>• Regional perspective</li></ul>	<ul style="list-style-type: none"><li>• Fails to fully integrate C2 of ISM</li><li>• Sub optimizes cost avoidance</li><li>• No single proponentcy for maintenance</li></ul>

Baseline Option Not Ready for Implementation  
- Automation, Funding, Ownership Issues

Options 1 or 2 Can Be Implemented in FY 97

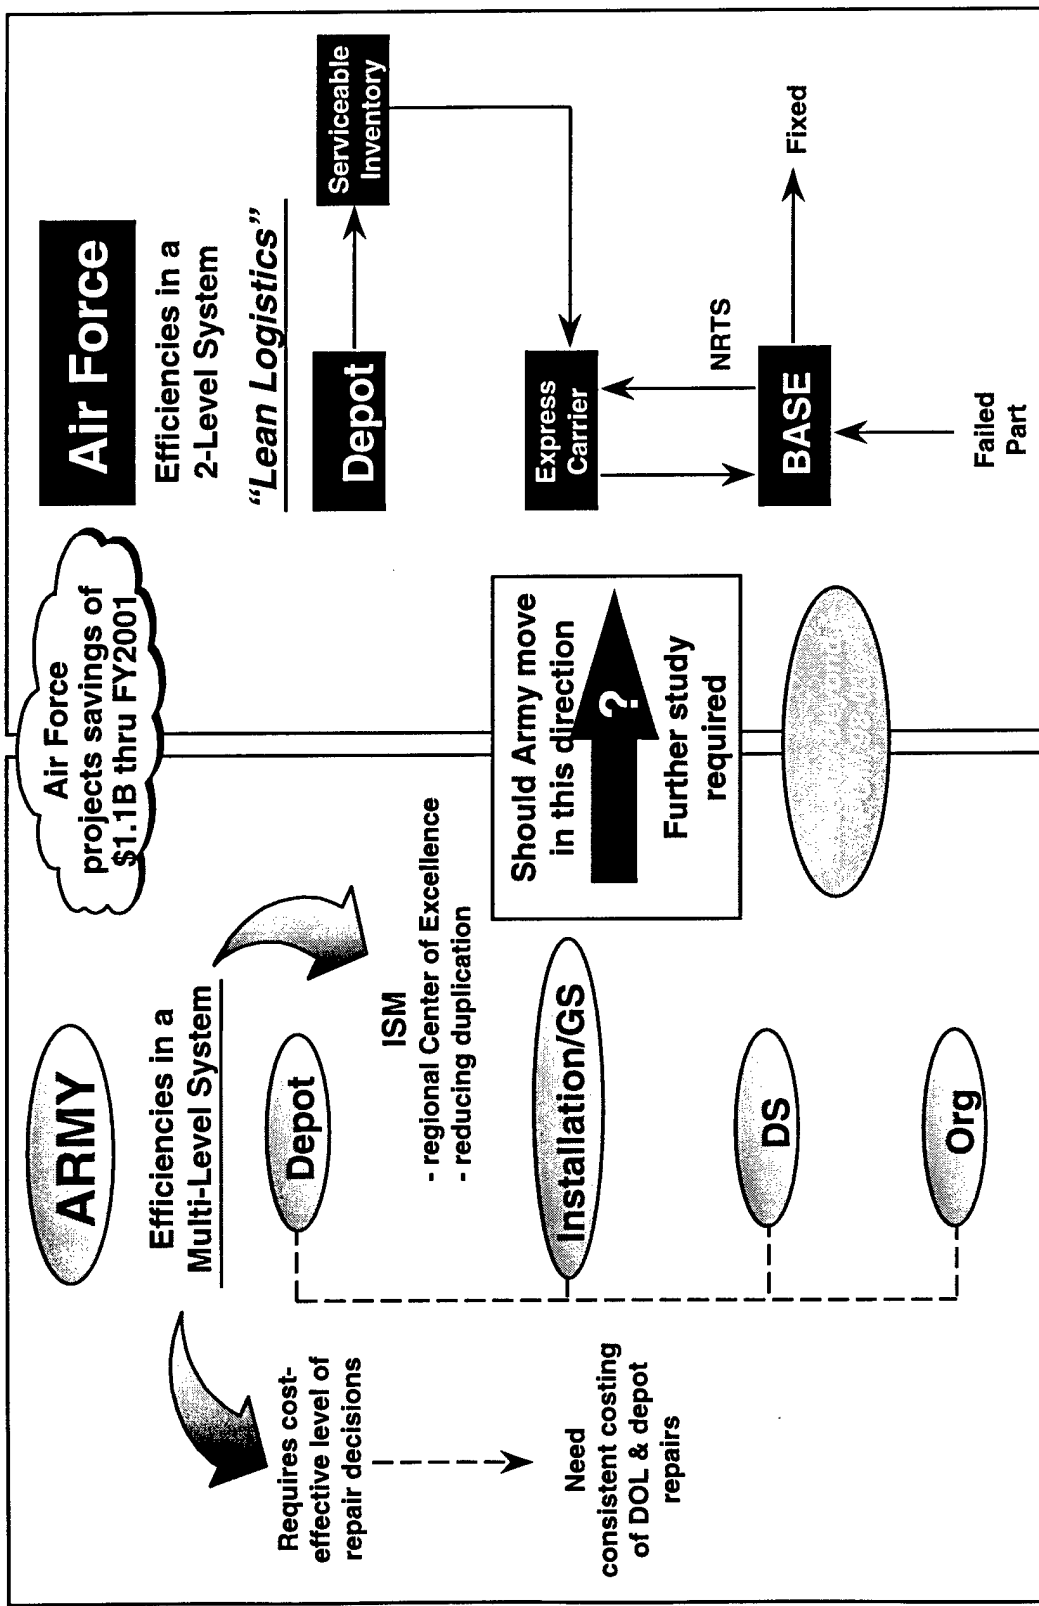

4 Star Review in FEB 96

CSA Decision not later than MAR 96

# Maintenance Efficiencies

XXI

# Best Value Repair Decisions in a Multi-Level System

XXI

## Issues:

- DOL rates not fully burdened - only include labor + flat rate for indirect expenses
- Workload migrates to installations
  - 2400 SRA (some limited repairs)
  - Duplicated capacity

Avg depot  
rate FY 95

\$107

(\$85 FY 96)

Installation DOL

< \$50

## Comparison of Rates on a Level Playing Field

(Direct & Indirect Costs, GAE & BASOPS)

### AAA Findings

LEAD (FY 95) \$98  
Installation\* \$95

\*Based on one TRADOC Installation

### Additional AMSAA Analysis

ANAD (FY 94) \$86 (\$84 for FY 96)  
Installation (FY 94) \$79-88

• Hood, Carson, Riley, Sill, & Bliss

Issue for beyond  
POM 98-03

More Study Required for Best Value Decisions

# Efficiencies in Base Shop Test Facility (BSTF) Allocation

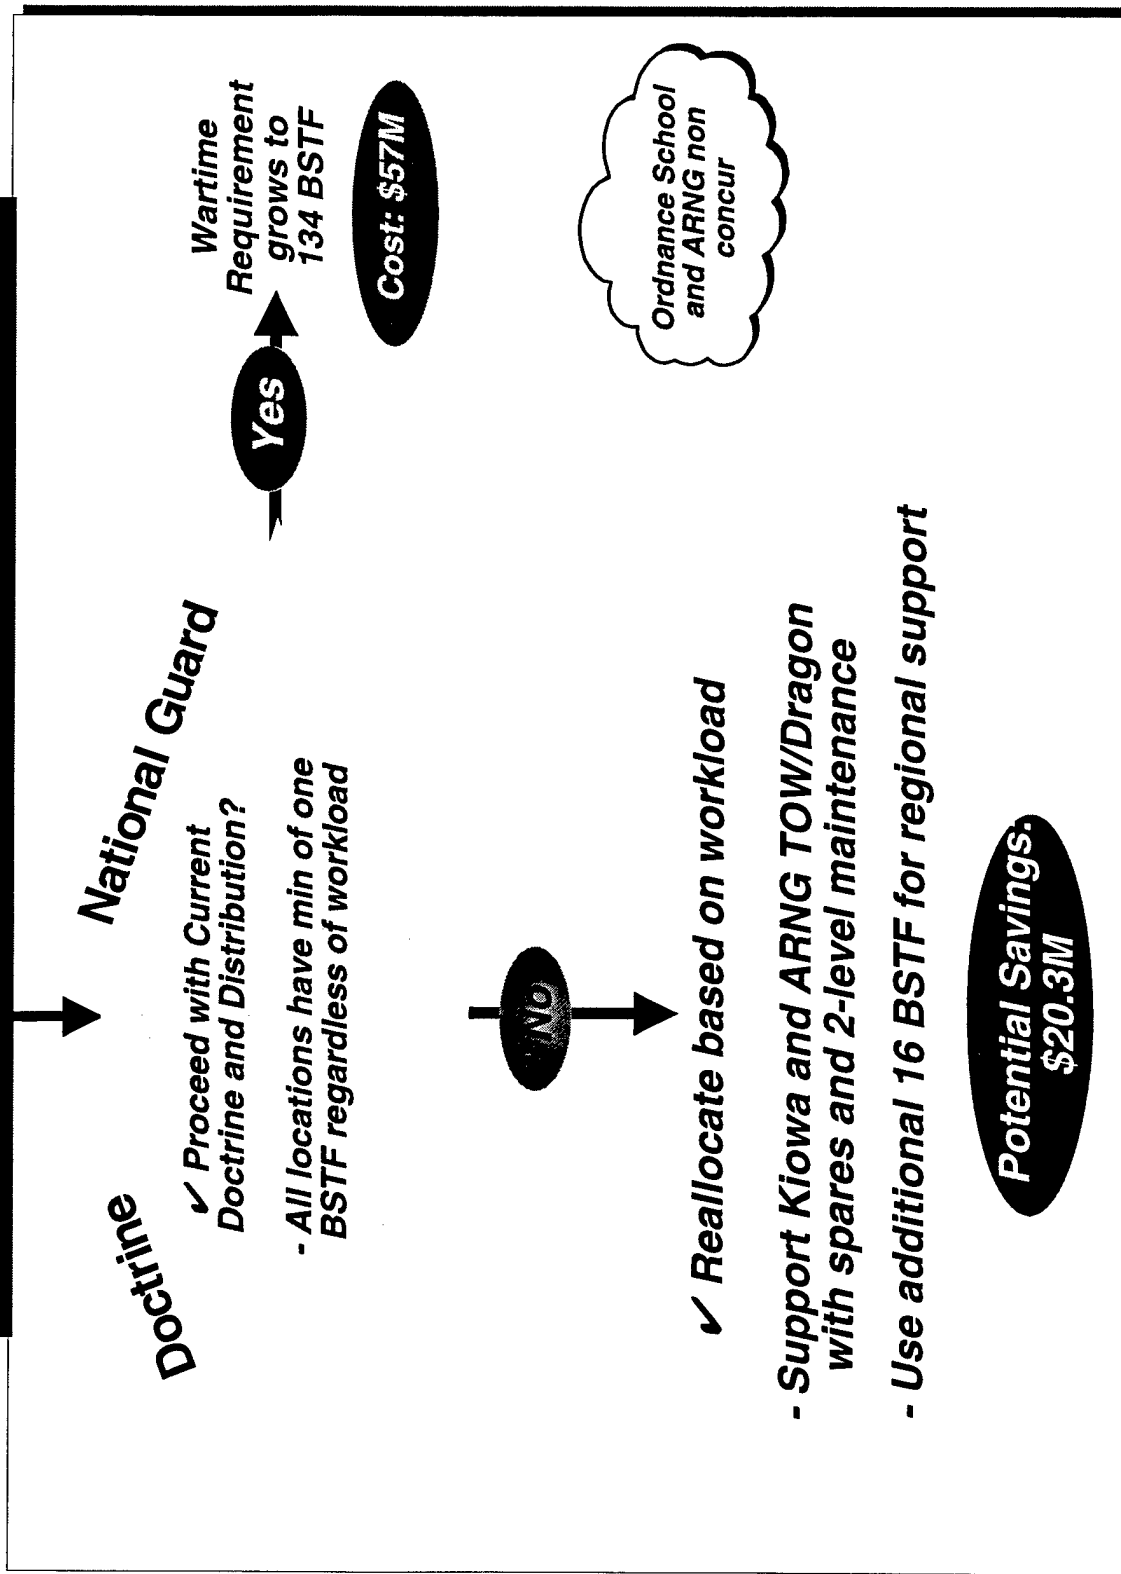

Potential Savings: \$20.3M

**Decisions Required on Doctrine and Distribution of BSTF**

## Decisions Required - BSTF Allocation

## Maintain POM 98-03 Summary

### Conclusions

- ISM has demonstrated potential for cost savings and enhanced integration of sustainment maintenance
- Current IFTE BSTF allocation can be modified to improve wartime support and reduce costs

### Issues

- Doctrine and allocation of BSTF
- Management of regional repair under ISM
- Consistent costing for DOLs and Depots

### Decisions Required

- Implement ISM based on 4 Star Review - \$142M non-TDA Savings
- Continue to evaluate ISM options for full integration under national management
- Do not procure additional BSTF; Modify allocation to improve wartime support - \$20.3M Savings

\$162M  
non-TDA  
Savings

11,416 TDA Conversion (\$57M/YR)**

# Depot Privatization

XXI

CORM: "....Privatize Essentially All Existing Depot-level Maintenance:

SECDEF Develops Plan in Response:

- Rely Substantially on the Private Sector
- Limited Core Capabilities Remain Organic to Meet Wartime Surges, Promote Competition, Sustain Institutional Expertise

## Issues:

- Warfighting & Contingency Requirements - How much Core?
- Ensuring Availability of Adequate Support at Affordable Cost
- Different Approaches/Transition Options
- Validating Costs & Benefits
- Statutory Limitations

- ✓ 60/40
- ✓ \$3M Rule
- ✓ OMB Circular A-76
- ✓ Core Logistics

## Timeline:

- DoD Components Develop Plans (Nov 95-Aug 96)
- DoD Submits Proposed Legislation (Jan 96)
- Identify Impediments to Competition (Mar 96)
- Report on Demonstration Projects (Oct 96)

Funding - FY96 \$ (Proj)			FY96 TDA (Auth)		
End Items	Sdy Items	Total	ANAD	2,150

functions

Currently Contracted  
Out

FORSCOM { Irwin  
Riley

TRADOC

{ McClellan  
Sill (Chaffee)  
Huachuca  
Eustis (Story)  
Gordon

## Issues:

### • Cost Effectiveness

- ✓ 1986-1994: Ft Leonard Wood under contract
- ✓ 1994: Rebid In-house: \$46M Contractor: \$48M
- ✓ Awarded to government

Potential Cost Savings  
Assume 10% Savings (A-76):  
\$34M/yr

If DOLs are privatized:

...approximately 13% of TDA will remain for oversight

...TDA could be reduced by approximately 11,194 at DOLs

# Materiel Management Privatization

XXI

## Actions to date:

- Identified inherently governmental functions
- Performed initial risk analysis
- Currently:

**\$600M contracted/\$520M in-house**

## OSD Recommendations:

- Perform opportunity studies & risk analysis of ICP functions (Mar 96)
- Develop business case analysis of high opportunity functions (Sep 96)
- Initiate transition plans & implement privatization of selected functions (Mar 97)

## Focus Areas for Privatization Opportunities

- New weapon systems
- Older weapon systems
- Low/Medium risk functions

## Privatization of Materiel Management Functions

### Risk Assessment Factors

- Impact of non-performance
- Availability of contracting sources
- Requirement for surge capability
- Synergistic effects with other functions

Risk Category	Example	Full-time Equivalents in AMC MSCs	Potential Cost Impact: Assume at least 10% savings (A-76); \$2.3M Savings/yr in Labor Costs
High	Requirements computation Industrial base management budgeting	2,112	459
Medium-High	Asset control Requisition processing	591	
Medium	Receipt processing Returns management Maintaining log data	248	
Low	Cataloging Deficiency/discrepancy management Log transfers		

Continue to Move Toward CORM Recommendation

# AMC Workloading Efficiencies

## Methodology

- Identify Workload Drivers
- Compare MSC Efficiencies: Workload/Personnel
- Size MSCs to Average Efficiency

## Issues:

- Lack of consistency across MSCs in counting personnel in different functions
- Differences in complexity across MSCs
- Identifying appropriate workload drivers

## Potential TDA Reduction for all Functions across all MSCs

Commodity Management	467
Maintenance	347
Post Deployment Software Support	51
Production Engineering	448
System Life Cycle	862
Logistics Management	524
Project Management	291
Systems Fielding	224

Total  
Population:  
31,045

3214 TDA  
Reduction  
(\$160.7M/yr)

3214

Total

- ✓ Refinement & validation w/ MEA manpower data needed
- ✓ Incorporate methodology in AMC NICP benchmarking

Will apply against  
AMC PBG guidance

Savings already taken -  
don't take again

## Work in Progress - Critical to Get to AMC End State

# Reserve Component On-Post/Off-Post Support

## USAR

- USAR assumes Base Operations Support both on and off post with USAR MTOE and TDA structure

### Proposed IM Structure

### Eliminate Management Layering

## ARNG

- ARNG assumes Base Operations Support both on and off post using fee for service

Leverage Mature Infrastructure in each State

## Two Options

Former Army Secretary John Marsh, Jr. Quality of Life panel report to Defense Secretary Perry -

"Make greater and more efficient use of the National Guard, Army Reserve and private contractors even for such tasks as managing major military bases."

## Objectives

- ✓ Achieve overall net decrease in Total Army's TDA structure
- ✓ Maximize use of all Reserve Component capabilities
- ✓ Single focus of combatant commanders on training, power projection and reconstitution
- ✓ Purifies mission funds

TDA Impact TBD

Issue Provided to BASOPS FAA

# Supply/Maintain Organizational Efficiencies

## POM 98-03 Summary

XXI

### Conclusions

- Privatization of DOLs & Materiel Management offers significant TDA reduction opportunity - 10,957 DOL spaces; \$55M Savings/yr
- Low risk Materiel Management functions - 459 spaces (\$2.3M/yr)
- AMC workloading efficiencies - 3,214 spaces (\$160.7M/yr)
- Depot privatization restricted by statute; legislative enablers needed

### Issues

- Cost-effectiveness of privatization

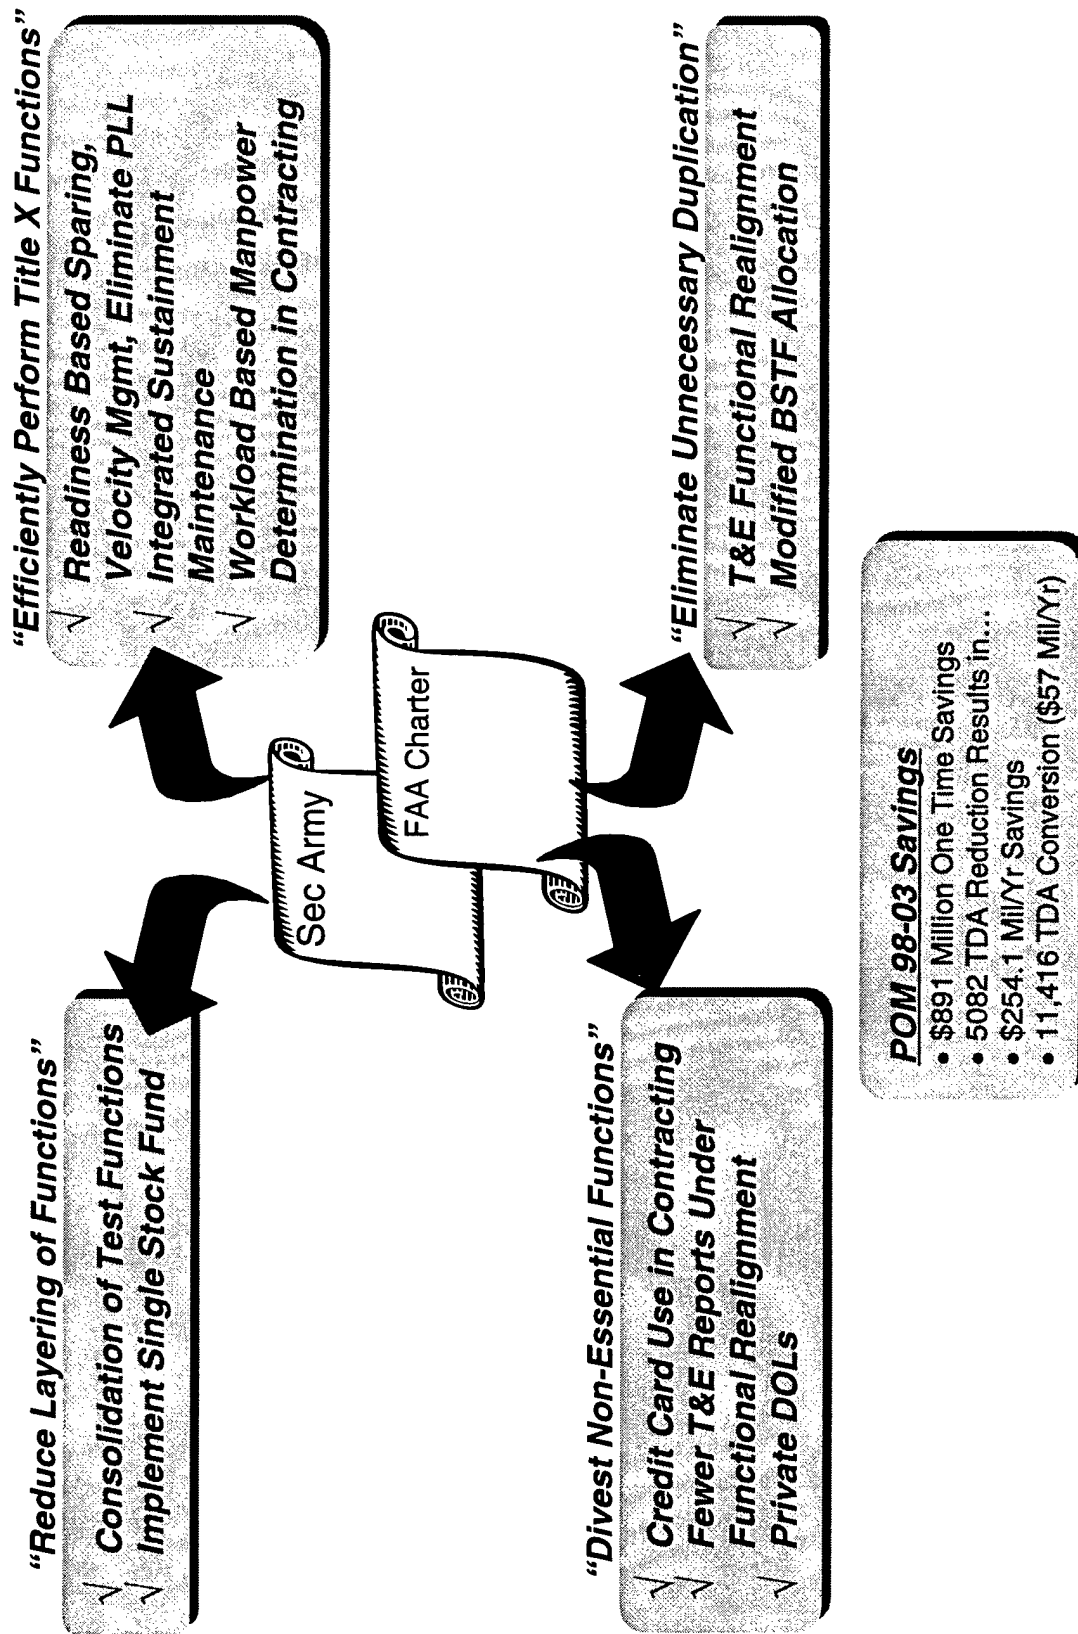

### Decisions Required

- Begin A-76 study process for DOL privatization
- Make DOL privatization a priority item for BASOPS FAA
- Refer Army Reserve and Army National Guard concept for total support to BASOPS FAA

3214 TDA Reduction  
(\$160.7M/yr)  
11,416 TDA  
Conversion  
(\$57M/yr)

## Breaking the Depot Maintenance Paradigm

XXI

### GOCO-

- ✓Least Risk of Non-Responsive Support
- ✓Reduces Infrastructure

### Emphasis on Technology Insertion-

- ✓Co-location of private and public elements yields cost avoidances

### LEAD Examples

- ✓Paladin teaming with UD
- ✓Missile workload to private contractor

### Minimum Core-

- ✓Currently being developed

### The Future System:

- ✓Sustains Institutional Expertise
- ✓Promotes Competition
- ✓Meets Wartime Surge Demands

with

- ✓Reduced Infrastructure
- ✓Single Industrial Base

# Consolidation of Design Centers

## WHERE WE ARE TODAY

FY96-02  
OMA/OPA  
\$725M

## Goal

## WHERE WE SHOULD BE

## Single Seamless Logistics System

➤ Currently development, testing, and fielding of automated logistics systems performed at various design centers

➤ MICOM and IOC (formerly SIMA) - Wholesale

➤ Software Development Center Lee (SDCL) - Retail  
(recommended by SOMA for transfer to CECOM)

**Need Single Organization to Facilitate**

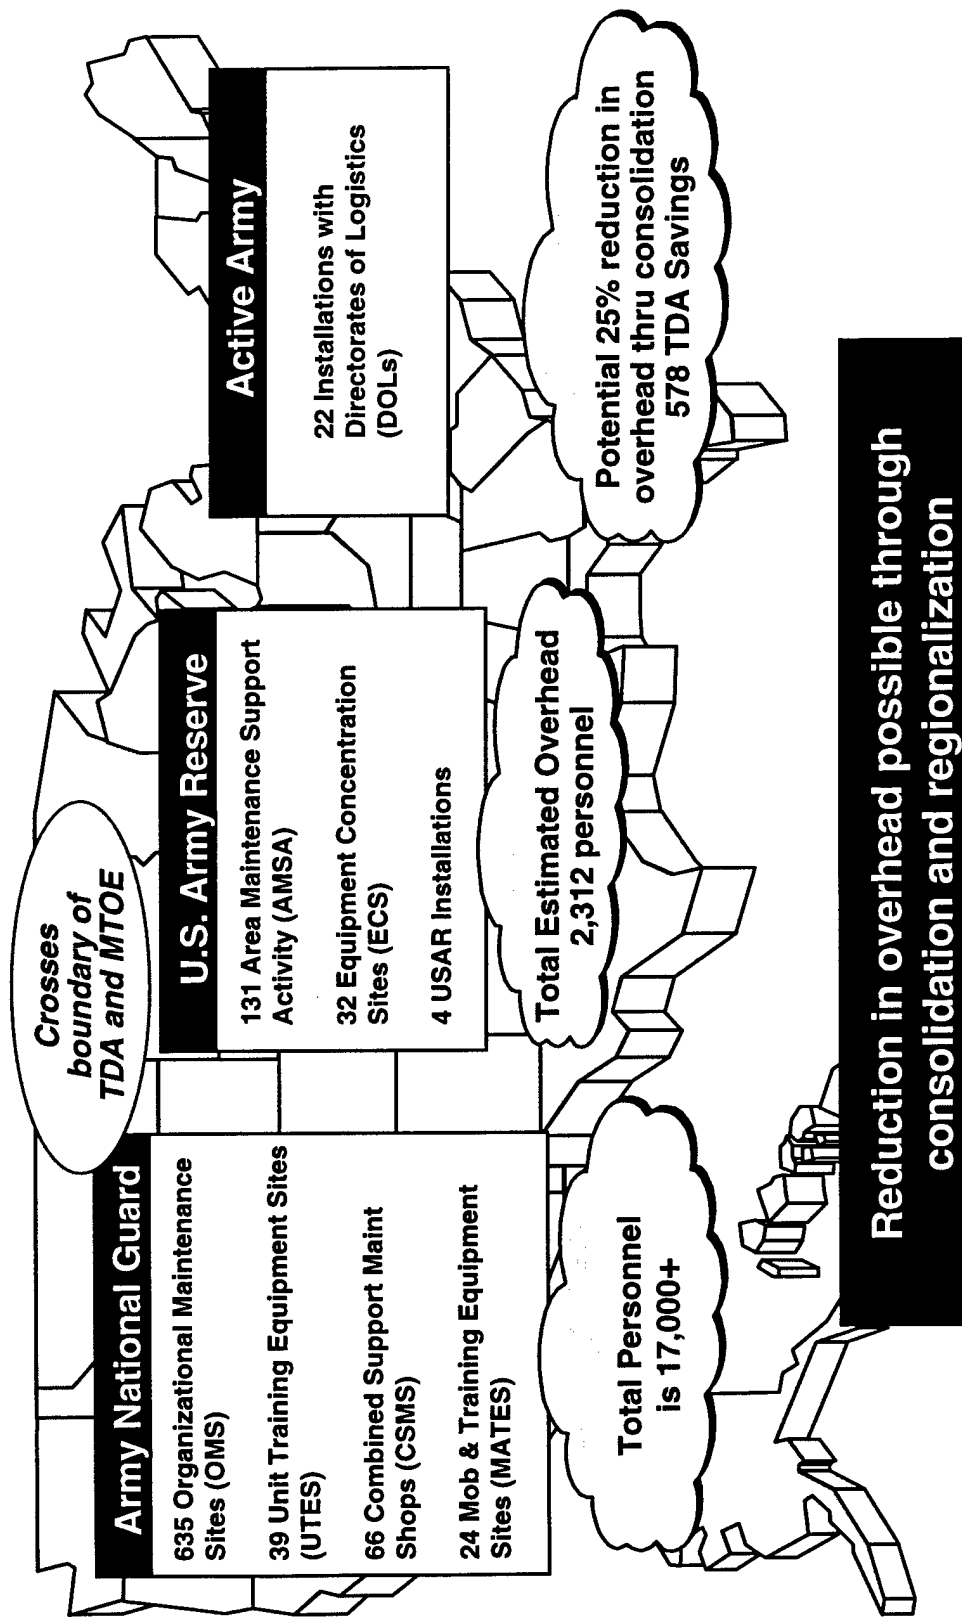

➤ Consolidate activities to facilitate development of a single automated system while reducing TDA by 34 personnel\*

\* Logistics Functional Analysis study completed by Information Technology Solutions, Inc., Jul93

ARMY FUNCTIONAL AREA ASSESSMENTS

# Consolidation and Regionalization Opportunities

# Example--Consolidation Opportunities in WA

Consolidation Challenges: Funding & Mission Restrictions

# National Provider Concept

XXI

## Battlespace Logistics Concept for Force XXI

- Single logistics system
- Army National Provider
- Assured support
- Full asset visibility
- Real-time situational awareness

Info technology enables National Provider concept  
National Provider also implied by DA PAM 100-XX

### Battlespace Logistician

- Subordinate command of the National Provider under opcon to CINC
- operates all theater-level logistics functions

### CONUS-based Army National Provider

- owns and operates supply pipeline directly to the warfighter
- all stocks above DS
- push pre-negotiated stock levels
- manage maintenance above DS

### Issue

### Issue

## Logistics Pipeline

XXX

Battle  
Command

XXXX

XX

X

## Input from Senior Logisticians - Dec 95

- New logistics vision statement - accent joint nature of logistics
- New mission statement - accent joint command
- Look at tactical level up, vice strategic level down
- Answer the question of who is in charge at each level

## Under Review and Revision

## Beyond POM 98-03 Summary - Supply & Maintain

### Conclusions

- With legislative enablers depots provide opportunity for large TDA reduction - 10,035 spaces
- Maintenance infrastructure in Active and Reserve Components could be consolidated - 578 spaces

### Issues

- Depot legislative enablers
- Differences in funding and missions which inhibit maintenance consolidation across the Total Army

### Decisions Required

- Decision and action required on legislative enablers for privatization

578 TDA Reduction  
(\$28.9M/yr)  
10,035 TDA Conversion  
(\$50.2M/yr)

# ESM Wrap-Up

XXI

## "Reduce Layering of Functions"

- ✓ Consolidation of Test Functions
- ✓ Implement Single Stock Fund

### POM 98-03 Savings

- \$891 Million One Time Savings
- 5082 TDA Reduction Results in...
- \$254.1 Mil/Yr Savings
- 11,416 TDA Conversion (\$57 Mil/Yr)

## "Divest Non-Essential Functions"

- ✓ Credit Card Use in Contracting
- ✓ Fewer T&E Reports Under Functional Realignment
- ✓ Private DOLs

## "Enablers"

- Language on Contracting Out (PL 10 2461)
- Crane/McAlester Prohibition (PL 99-661, S317)
- Core Logistics (10 2464)
- Depot Maintenance 60/40 (10 2466)
- Security Guards/Firefighters (10 2465)
- \$3 Million Rule

### Beyond POM 98-03

- 3028 TDA Reduction Results in...
- \$151.4 Mil/Yr Savings
- 10,035 TDA Conversion (\$57 Mil/Yr)

## "Eliminate Unnecessary Duplication"

- ✓ T&E Functional Realignment
- ✓ Modified BSTF Allocation
- ✓ Force XXI Contracting Organization
- ✓ Consolidate Maintenance Infrastructure Under USAR & ARNG

## "Efficiently Perform Title X Functions"

- ✓ Readiness Based Sparing, Velocity Mgmt, Single Stock Fund, Eliminate PLL
- ✓ Integrated Sustainment Maintenance
- ✓ Workload Based Manpower Determination in Contracting

Phase II FAAs: Being Planned

Institutional Army

Core Competency, Capabilities, and Processes

DA PAM 100-XX first draft  
staffed June 95; revision in  
January 1996

Reengineering briefs set  
the stage for beginning the FAAs

FAAs look at the  
processes ... 21st Century view  
DA PAM 100-XX (draft)

# FAA Results Require Major Army Realignment

---

- AMC becomes the National Provider with ownership of stocks and maintenance management above DS.
- Extensive AMC and installation supply and maintenance activity privatization.
- Reorganized research organizations assigned to TRADOC
- Consolidated test and consolidated evaluation organization moved under TRADOC.
- Contracting activities right-sized and credit card usage for \$25K and below actions mandated (97.4% of purchases).
- Consolidate/regionalize/integrate NG USAR and active maintenance infrastructure under a National Maintenance concept.

# Themes

---

- Widen the lane: define the Army core process and give it, along with the resources, to a single process owner.
- Treat business activities like business: apply information technology, establish performance measures, use best practices and benchmarks, eliminate intermediate layers of staff and management.
- Integrate the reserve component supply and maintenance capabilities/facilities into a total system: eliminate duplication.

# **Equip, Supply, Maintain FAA**

## **Acquire, Maintain & Sustain Equipment**

### **Equip**

# Acquire, Maintain & Sustain Equipment

*Sub process with multiple products, customers and effectiveness measures*

# Problems with the Process

- Multiple hand-offs between MACOMs/staff activities.
- Focus on the “eaches” because Congress, OSD and ARSTAF manage by “eaches”  but the Army lives, deploys, fights and is sustained by organizations.
- A confederation of independent activities pushes decision making to the highest level - from the trivial to the profound.
- Hand-offs, independent activities, and independent focus lengthen the process and impose costs.
- Bureaucratic process promotes niches, competitions, delayed decisions, re-looks, re-starts and redundant/overlapping efforts.

NOT a process with a single process owner, but a series of independent activities linked by bureaucratic paper

# Equip- an Alternative

Acquire, maintain and sustain equipment now defined for the Institutional Axis as a single core process, aligned with the core competency of sustain the Force:

- Equipment acquisition more closely aligned with requirements determination and the core competency of Develop the Force -- process responds to the Army's vision of the future.
- Maintain and sustain equipment directly supports the training, operation and employment of military forces -- process focuses on current operations and fielded equipment.
- TRADOC responsible for preparing the Army for war tomorrow -- developing future operationally focused requirements for modernized equipment.

The Developmental Command should be the process owner for acquiring equipment, from research and development, through experimentation, test and evaluation, with a single hand-off to the PEO/PM structure to procure

# Army Imperatives, Core Processes & Core Capabilities

## ARMY IMPERATIVES

Solid Doctrine  
Quality People  
Competent Leaders  
Continuous Modernization  
Appropriate Force Mix  
Realistic Training  
Quality Power Projection  
Installations  
Responsive Sustainment  
Quality of Life  
Resource Stewardship

## CORE PROCESSES

*Develop Doctrine*  
*Develop Requirements*  
*Acquire & Sustain People*  
*Identify & Develop Leaders*  
*Acquire Equipment*  
*Tailor, Mobilize & Project Land Power*  
*Support Organizational Training*  
*Acquire & Sustain Facilities*  
*Maintain & Sustain Land Operations*  
*Manage Installations*  
*Maintain & Sustain Equipment*  
*Plan, Provide Direction; Obtain & Allocate Resources*  
*Manage Information*

## CORE

## CAPABILITIES

Develop

Force

Generate &  
Project  
the Force

Sustain  
the  
Force

Direct,  
Acquire &  
Resource the Force

M A N A G E I N F O R M A T I O N

## Potential Solutions

✓ Make the Development Command (TRADOC) the process owner

- Army labs (ARL, ARO) aligned under TRADOC, along with all 6.1 - 6.3 funding
- Split the RDECs and align the R&D portion with TRADOC
- Consolidate test agencies (TECOM, TEXCOM, and Kwajalein) -- align with TRADOC
- Consolidate evaluation activities (OEC, AMSAA, SLAD, maybe TRAC) -- align with TRADOC

Refocus the requirements process to organizations and let DA transform organizations into the entities required by Congress/OSD

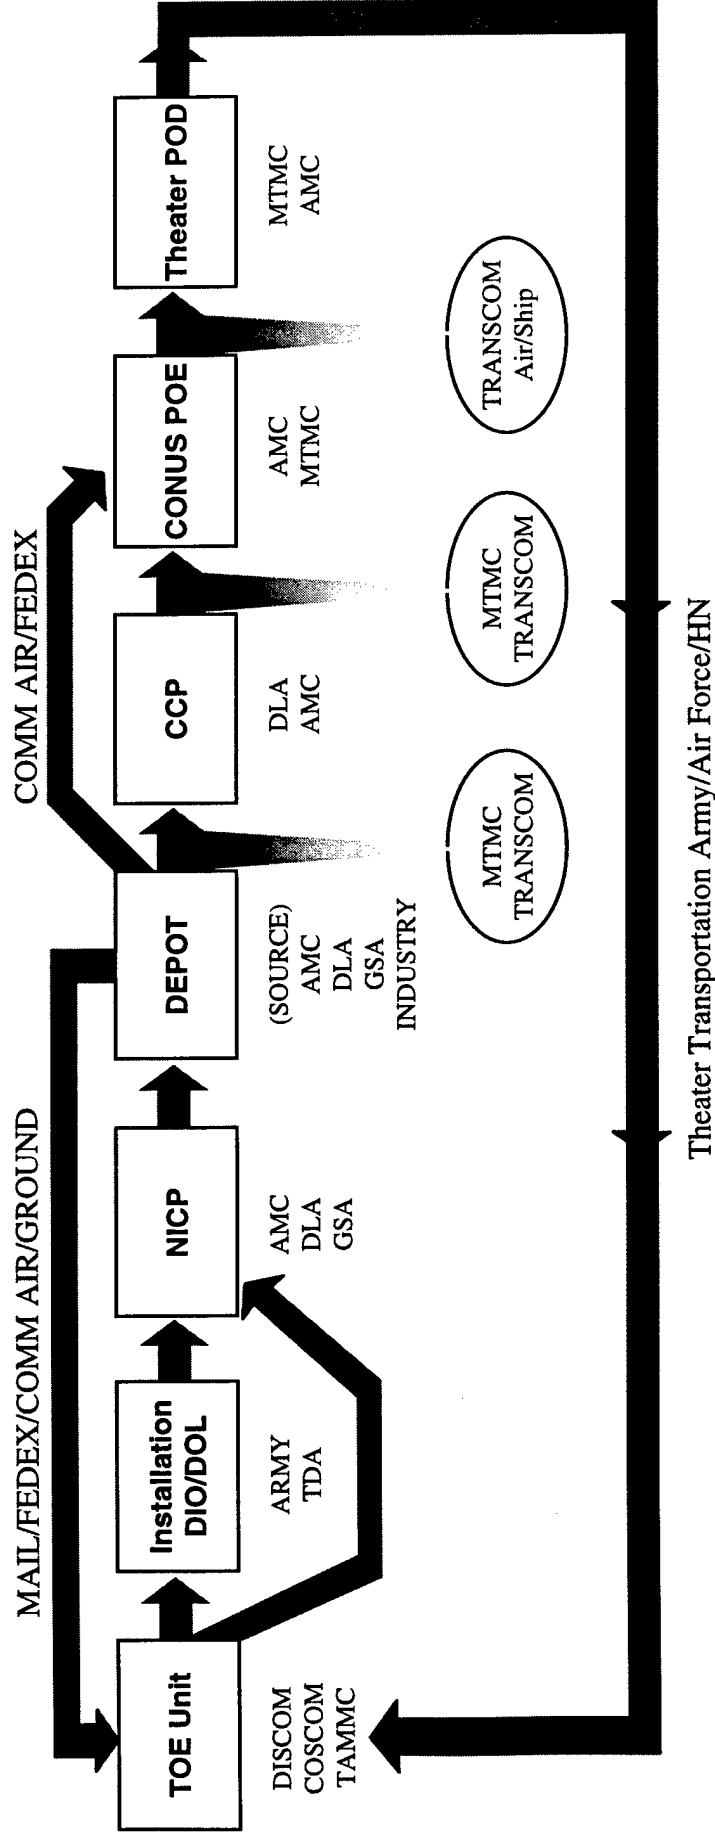

# Equip Themes

---

- Widen the lane by making the Force Development Command responsible for future concepts and selection of future technologies.
- Eliminate layers and corresponding multiple decision points by consolidating combat developments, Battle Labs, TRADOC system managers, Army Labs, into a single organization that leverages commercial technology.
- Use information technology to manage, not physical locations.

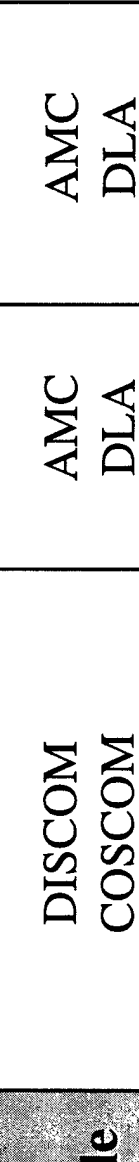

# **Equip, Supply, Maintain FAA Maintain & Sustain Land Operations Supply (Class IX)**

# Maintain and Sustain Land Operations

**Complex, segmented structure:** A patchwork quilt of supply agencies, joint organizations, services, transportation organizations.

# Class IX Distribution Process

Node	Unit			
Responsible Organization	DISCOM	AMC	AMC	MTMC AMC
	COSCOM	DLA	DLA	
Performance Measure	TAMMC	GSA	GSA	Time
	USPFO			
Info System	Readiness	Time	Fill	DAMMS DASP-E
	ULLS DS4/SARSS SAMS TUFMIS	DAAS CCSS	SDS/DSS SAACONS (Vendor)	

- Multiple performance measures
- Variety of automated systems
- Numerous Agencies

Many commercial companies can guarantee overnight delivery in US, two days overseas; Army standard is 5 days for high priority items in CONUS, twice as long for overseas.

# Problems with the Process

---

- Low standards.
- Too many organizations; info systems, performance measures -- with no one clearly in charge of the process.
- Unpredictability, unreliability lowers confidence in the process and generates stockpile/excess.

## Potential Solutions

---

✓ Make the Sustainment Command (AMC) the process owner

- Information technology permits world-wide asset visibility and timely/cost effective stock selections.
- Transportation means available to move stock quickly and efficiently.
- Place all supply activities above the DS level under the Sustainment Command National Management using a single automated logistics system and a single stock fund.
  - Regional implementation possible, using corps, as a first step

# Supply Themes

---

- Widen the lane by making the Sustainment Command responsible for all class IX supply above the DS level.
- Eliminate intermediate layers, and the intermediate stock pile, reviews and systems.
- HQDA provides unambiguous performance measures -- deliver parts in CONUS within 24 hours, OCONUS within 48 hours, at a cost equal to or less than today's price.
- Integrate the R/C: NG USP&FOs are part of the solution.

# **Equip, Supply, Maintain FAA Maintain & Sustain Land Operations Maintenance**

# Duplication of Maintenance Capabilities

## Active/National Guard/USAR

## Problems with the Process

---

- Extensive duplication of capabilities - from DOL DS/GS, NG CSMS, USAR regional support commands, to AMC depots.
- Maintenance integration/coordination difficult.
- Depot pricing policy versus installation costs.

Perceived high cost of depot repair drives  
duplication of depot capability at the  
installation/retail level

## Potential Solutions

✓ Designate the Sustainment Command (AMC) as the National Provider of maintenance support above the DS level.

- National level management of maintenance, integrating depots, USAR and NG capabilities along with DOLs -- regional implementation possible.
- Sustainment Command tailors a multi-functional sustainment maintenance capability for support in specific operational areas using Active, Reserve component, civilians and contractor personnel.
- HQDA establishes the performance measures: pacing item readiness at 95% with costs equal to or less than today's cost. Performance goal: by the year 2000, reduce maintenance costs by 30%.

# Supply Themes

---

- Widen the lane by making the Sustainment Command responsible for all sustainment maintenance.
- Know the real costs of doing business, at depots, DOLs, reserve sites and close inefficient operations.
- Integrate the Reserve components into a total maintenance system: eliminate duplications.

# Summary

---

- Equip, supply and maintain initiatives compatible with DA Pam 100-XX three integrating MACOMs.
- Approving national provider concept totally not necessary - incremental stages possible - but largest savings and best process results from the full concept implementation.
- AMC “out of the box” with supply and maintain portions; T&E and contracting show improvements but did not address science and technology/PM support.

# FY96 ARL Directorate Funding (\$M)

Directorate	Focus	Mission \$	Reimbursable FY96 Projected	Total	Total External	%
Advanced Simulation/high performance computing	External	7.0	3.5	10.5	1.0	9.5%

PHASE II

FAA

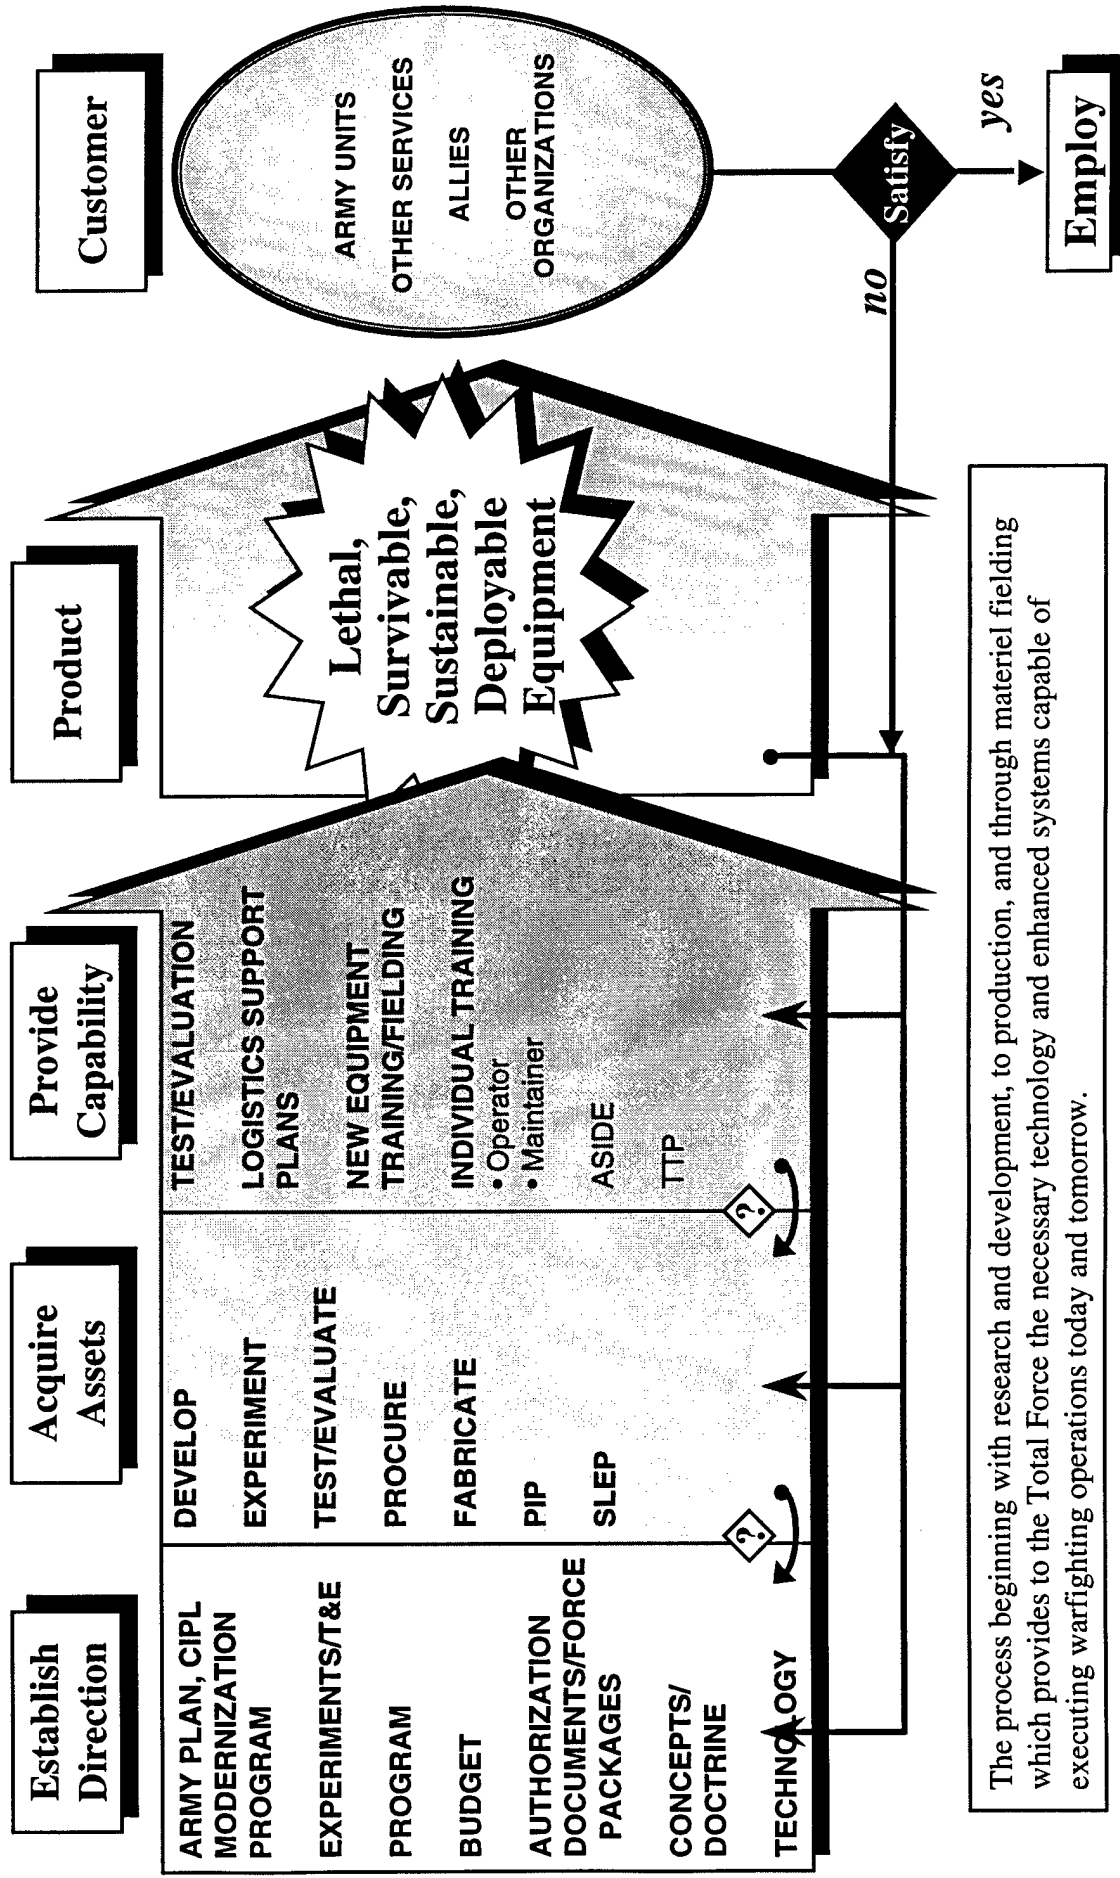

Schedule

# Back-up

# Acquire, Maintain and Sustain Equipment:

## The Process

# Acquire, Maintain and Sustain Equipment:

## *The Organizations*

# Acquire, Maintain and Sustain Equipment

---

## MOE

- Modernized equipment with appropriate training, maintenance and support infrastructure/materiel and a robust development program

## MOP

- Threat overmatch
- Deployable
- Sustainable
- Exploit technological opportunities
- Research and development programs matched to concepts

# Equip- an Alternative

Acquire, maintain and sustain equipment defined as a single Institutional Army core process, aligned with the core capability of sustain the Force:

- Equipment Acquisition (Research Development, Design, Test, and Procurement) more closely aligned with requirements determination and the Develop the Force core capability.
  - Involves LAM, Battle Labs as well as Research Labs
  - Interfaces and impacts with doctrine, training, organization and personnel requirements.
  - Respond to the Army's vision of the future.
- Maintain and sustain equipment directly supports the training, operation, and employment of military forces.
  - Focuses on current operations and fielded equipment

Acquire Equipment Should Be a Separate Institutional Army  
Core Process

# Equip - an Alternative

*(continued)*

Acquire Equipment Core Process definition: "The process beginning with research and development, to production, and through materiel fielding which provides to the Total Force the necessary technology and enhanced systems capable of executing warfighting operations today and tomorrow."

- A collaborative effort involving the identification and investigation of technologies relevant to the Army, and when warranted, the transition of selected technologies into systems to address warfighting needs.
- Closely aligned, synchronized and dependent on the requirements development process-- LAM, Battle Labs, ATDs/AWEs/ACTDs, combat developments, Test and Evaluation, PM/PEO structure, research labs each a separate process and many separately funded.
- Numerous processes creates seams and boundaries which are potential breakdown points. Coordination and communications problems arise when people are working on different sides of the fence

Acquiring Equipment Is a Multi-disciplined Core Process Involving Numerous  
Commands, Agencies Without a Process Owner

# Equip - an Alternative

*(continued)*

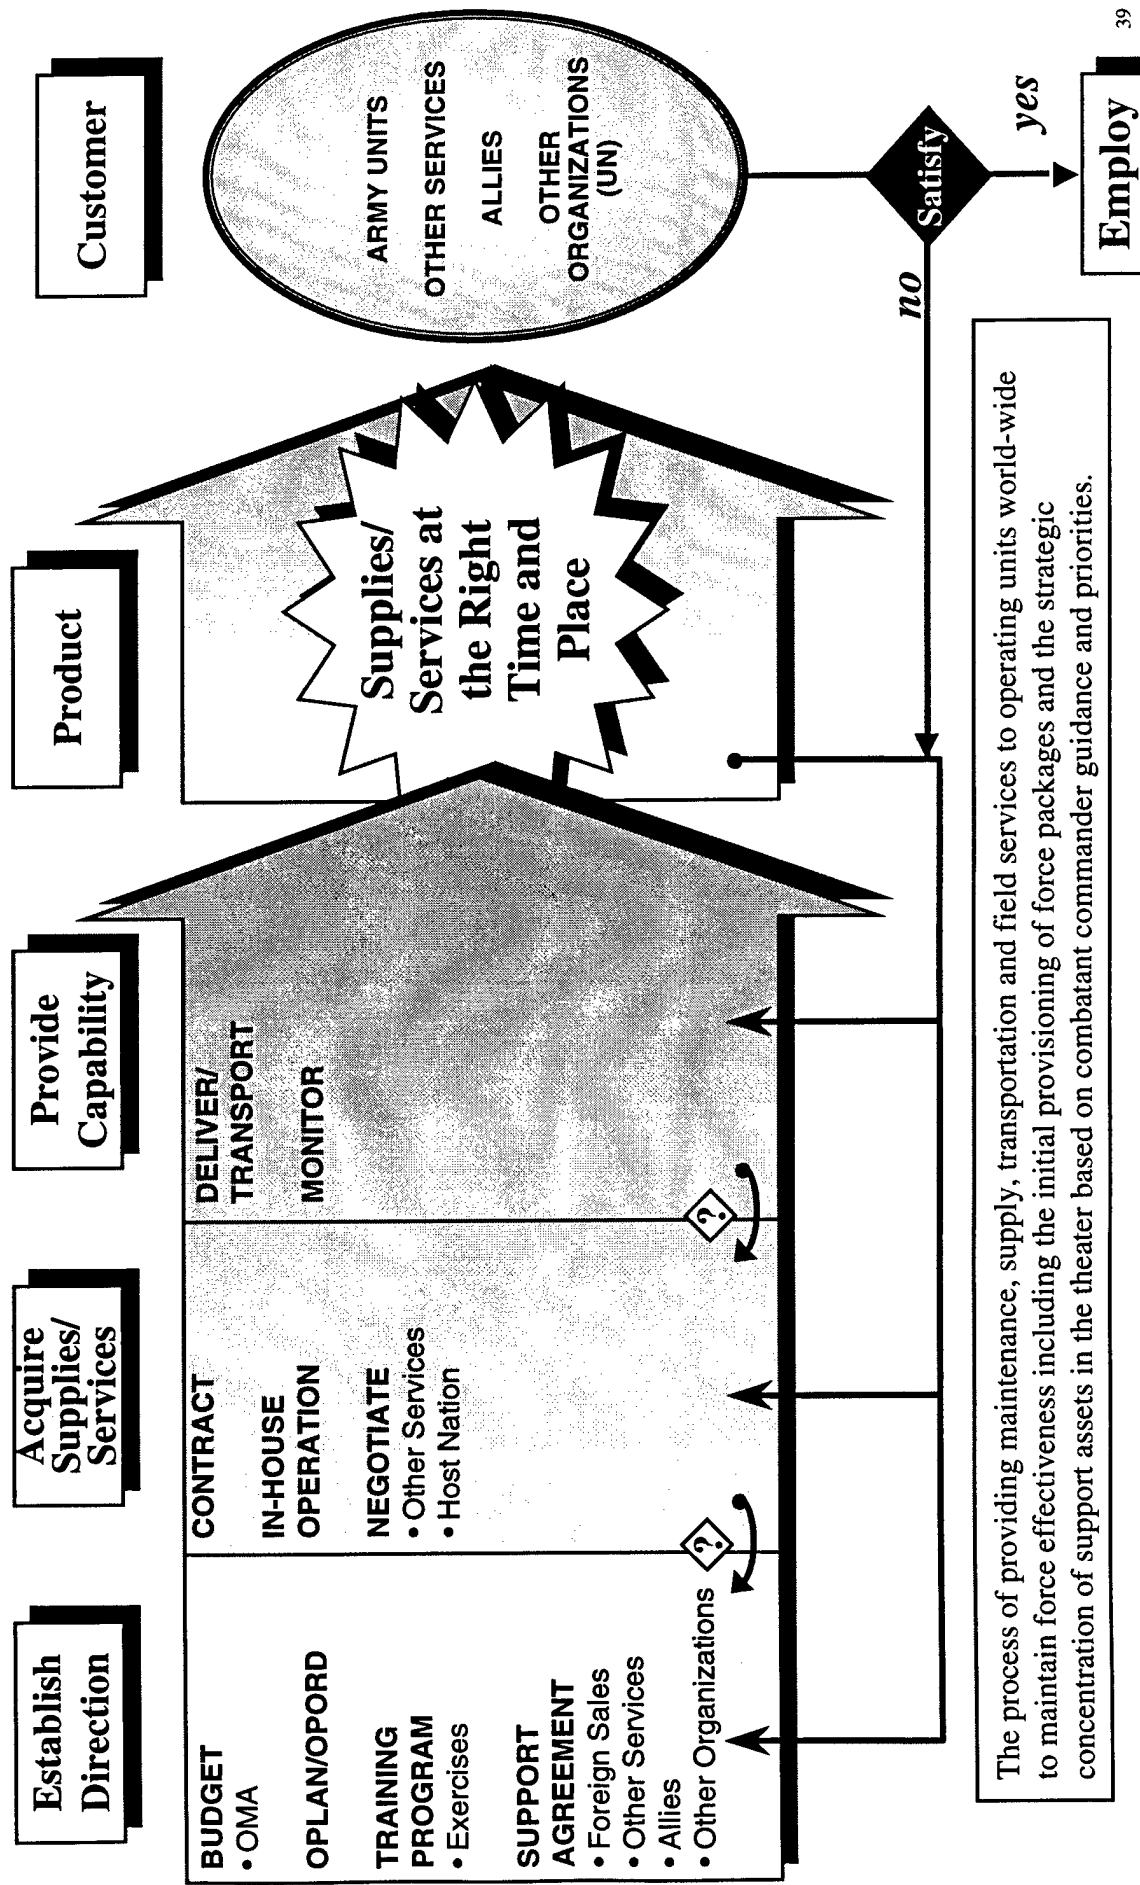

TRADOC responsible for preparing the Army for war tomorrow  
by:

- Developing future concepts for doctrine and training
- Designing future organizations for the operating force
- ☆ • Developing future operationally focused requirements for modernized equipment
- Equipping the 21st Century Army must start with an integrated multi-disciplined requirements development team comprised of the war-fighter, technologist, and acquirer to leverage commercial technology and that developed in-house, for system design.

TRADOC SHOULD BE THE PROCESS OWNER FOR ACQUIRING EQUIPMENT  
from research and development, through experimentation, test and evaluation, to  
requirements development, with a single hand-off to the PEO/PM structure to procure.

# Maintain and Sustain Land Forces:

## *The Process*

# Maintain and Sustain Land Forces:

## *The Organizations*

# Equip

## Establish Direction

### *“to be”*

<i>PROCESS</i>	<i>ORGANIZATIONS</i>
Total Package Requirement	TRADOC
• Test/eval	
• experiments	
• R&D	
• M&S	
• Force design	HQDA
• Organ design/documents	
• TTP	
PPBES	
JROC	
AMP	

- TRADOC is the process owner for requirements determination, with assigned labs, linking research with potential applications and employment considerations. 6.1, 6.2, 6.3 funding through to S&T.
- Requirements expressed as part of an organization total package, linking a new system with its support equipment, training, doctrine, organizational design and other changes necessary for a new capability.
- HQDA transforms the total package into the “eaches” for PPBES, JROC, AAE guidance, provides resources and priority.

# Equip

## Acquire Assets

PROCESS	ORGANIZATIONS
Total Package Procurement	AAE
Total Package Fielding	Sustainment Command (AMC)

## ***“to be”***

- PEO/PMs acquire systems
  - single test/evaluation plan
  - contracting centers of excellence
  - commercial support for engineering, R&D, design assistance
  - coordinated procurement for support items
- AMC provided all equipment/support items for total package fielding to units based on HQDA priority.

# Equip

## Provide Capability

### ***“to be”***

- FORSCOM receives equipment and associated items from sustainment command, organizational documents, TTP (manuals, training) from Force development command: responsible for building capability through training and exercises.

#### ***ORGANIZATIONS***

Force Generation &  
Projection Command  
(FORSCOM)

#### ***PROCESS***

Total Package  
Training

# Supply (Class IX)

## Establish Direction

### PROCESS ORGANIZATIONS

#### Establish Standards

- Time
- Cost

HQDA

## ***“to be”***

- HQDA establishes delivery time standards and inventory cost parameters.
  - CONUS delivery within 24 hours
  - World-wide delivery 72 hours
  - Parts cost: equal to or less than today's cost
- Sustainment command designated as national provider with stock and delivery responsibility above DS level world-wide.

# Supply (Class IX)

## Acquire Assets

### ***“to be”***

#### ***PROCESS***

National Provider  
(supply)

AMC

- All supply activities above DS level under AMC national management, using a single automated logistics system and a single stock fund.
- Implementation may include
  - velocity management
  - readiness based sparing
  - regional ASLs
  - centralized assets management (single stock fund)

## Supply (Class IX)

### Provide Capability

### *“to be”*

- World-wide asset visibility permits rapid selection for movement to customer from most timely (cost effective stock).
- Transportation means selected to meet any delivery standards and item priority:
  - FEDEX or others
  - Mail, UPS
  - Rail, truck, ocean shipping
  - TRANSCOM

#### PROCESS

Total Asset Visibility

AMC

# Maintenance

## Establish Direction

### *“to be”*

#### *PROCESS*

National level  
integration and  
coordination of  
maintenance

Standards  
established

#### *ORGANIZATIONS*

AMC

- AMC provides national level management of maintenance, integrating USAR and NG capabilities, along with DOLs.
- Maintenance regions, built around existing depot structure, would control and manage all activities for the region.
- HQDA establishes readiness and cost standards:
  - Pacing items: 95%
  - Costs: equal to or less than today's cost
- HQDA establishes future performance goals:
  - Maintenance costs decrease by 30% by 2000

# Maintenance

## Acquire Assets

### PROCESS

Cost effective  
maintenance  
capability/facility  
workloading

### ORGANIZATIONS

Maintenance  
regions (depots)  
working through  
DOLs, USAR and  
NG facilities

## *“to be”*

- Full costs are known at all facilities; inefficient operations closed; work assigned to most cost effective location with appropriate capabilities.
- DOLs privatized where/when appropriate.

# Maintenance

## Provide Capability

### ***“to be”***

- AMC, as the national provider, tailors a multi-functional sustainment maintenance capability for direct support in specific operational areas, using active, reserve component, and civilian organizations/personnel.

#### *PROCESS*

Integrated  
Sustainment  
Maintenance

#### *ORGANIZATIONS*

AMC
